DIVIDENDS are paid :—

On Sterling Stocks transferable in the Bank Books—(*a*) Warrants will be sent by Post—1. To Sole or First Stockholders *without application*, in the absence of any instructions to the contrary. (Sole Stockholder includes Sole Surviving Stockholder, Sole Executor or Administrator, and Sole Surviving Executor or Administrator. First Stockholder includes the First Executor.) 2. To any Stockholder, Executor, or Administrator, other than the Sole, or First, Stockholder, Executor, or Administrator, or to any Person, Firm, or Company, upon the written Request, in the prescribed form, of all the Stockholders, Executors, or Administrators. (*b*) Dividends will be paid to any Stockholder, Executor, or Administrator, *personally attending at the Bank*, on his written Request, in the case of a Sole Account, or on the written Request of all the Stockholders, Executors, or Administrators, in the case of a Joint Account. The Request in either case must be in the prescribed form.

On Indian Railway and Thames Conservancy Debenture Stocks, Chinese 5% and 4½% Stocks, Greek 2½% Stock, Japanese 5% Stock, and Corporation of London 2½% Debenture Stock—by transmission of Warrants through the Post to the Stockholders or their Nominees.

On Indian Rupee Promissory Notes and Registered Stock—(*a*) On personal application at the India Office, Bank of England :—to the owner of the Notes or Stock; or, to his Attorney or Agent. (*b*) By Post :—to the owner of the Notes or Stock; or, to his Attorney or Agent.

Dividends on Promissory Notes and Registered Stock are paid by Bills of Exchange on India, commonly called Interest Bills. (As an Interest Bill is payable in India in Rupees, the Bill is usually sold in London, for Sterling, at the Exchange of the day, through a Banker or Agent.)

HOURS, &c.—The Dividend Office is open from 9 A.M. to 4 P.M. (2 P.M. Saturdays).

The India Office (Bank of England) is open from 9.30 A.M. to 4 P.M. (1 P.M. Saturdays).

INVESTMENT OF DIVIDENDS.—Holders of certain stocks in amounts of less than £1,000 may instruct the Bank to receive and invest their dividends by filling up forms, to be obtained at the Head Office, at any of the Branches, or at any Money Order Office. A commission is charged of 1*d.* per £, or part of a £, with 3*d.* additional for each advice of a purchase, should such advice be required.

TRANSFER DAYS, any day but Saturday; Instructions 9.30 to 1 (to 3, fee 2*s.* 6*d.*); Executions 11 to 3; Acceptances 9.30 to 4 (Saturdays to 1). Transfers made on Saturdays (between 11 and 12.30) are charged a fee of 2*s.* 6*d.*

* When the due date of the Dividends falls on a Sunday or Bank Holiday, the Dividends are payable on the business day next ensuing.

THE list on the following two pages contains the names of all the more important British Life offices, of eight Colonial companies (marked C), and of three American offices (marked A).

DATE OF FORMATION.—This is important, as in young companies the normal rate of mortality is not experienced, whilst expenses are necessarily greater owing to the larger proportion of new business.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system (M), whereby the whole of the surplus or profits are allotted to participating policyholders, or whether the company has proprietors by whom part of the surplus is received (P). Life offices transacting other insurance business are indicated by letters in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. The companies in the first part of the Table all transact "ordinary" Life business; the figures for Industrial business are stated separately.

FUNDS.—The Paid-up Capital of Proprietary offices that transact Life business only is included in the Funds. Paid-up capital of offices transacting other classes of business as well is excluded, being available for other claims than those of the Life Branch. The figures are taken from the latest annual accounts, the date in the majority of cases being December, 1907. The amount of the funds taken alone affords no indication of the financial stability of a company, which cannot be judged unless liabilities are considered as well as assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of such risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 14½%, of which about 5½% is expended on commission and 9% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus, and, speaking generally, the larger the bonus. The rate of interest earned is obtained by dividing 100 times the amount of interest, less Income Tax, by the mean of the funds at beginning and end of year after deducting half a year's interest from the mean fund. In some cases, however, this does not quite accurately represent the yield, owing to the manner in which interest on reversions is dealt with.

VALUATIONS.—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H^m and O^m, and the corresponding Tables $H^{m(5)}$ and $O^{m(5)}$ which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and $O^{m(5)}$ tables in conjunction are more stringent than the O^m table alone, the H^m is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

The O^m Tables, which are founded on the latest and largest Life assurance experience, usually require slightly stronger reserves than the H^m.

ADVICE REGARDING LIFE ASSURANCE AND ANNUITIES.—The selection by an intending proposer for Life assurance of the office best suited to his requirements and likely to produce the best results should be carefully made under reliable expert advice. Whilst we have above indicated some points for consideration, the study of any tables or suggestions is not sufficient to enable any person without technical knowledge to gauge accurately the respective merits and attractions of the various companies transacting Life assurance. There are many good offices, but in the very best and most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers during the continuance of a policy, which may be lifelong, through the precaution having been taken of obtaining reliable advice before a proposal is made.

On receipt of a letter of inquiry containing full particulars in regard to the matter on which advice is desired, accompanied by a remittance of a fee of 5s., addressed to the Publishers of WHITAKER'S ALMANACK, 12, Paternoster Row, E.C., and marked "Insurance," the Insurance Editor will be prepared—

(1) To advise any intending assurant as to the system and descriptions of policies best adapted to suit the special circumstances as described, and to assist inquirer in the choice of the Life office which seems from its financial strength and earning capabilities best qualified to do justice to his requirements, and most likely to yield the most satisfactory and profitable results.

(2) To give similar advice to any person contemplating the purchase of an annuity.

(3) To advise any policyholder in a Life office or other inquirer generally on any question, not of a legal character, relating to Life assurance.

* Alliance. Funds exclude Imperial and Provident funds.
* Caledonian. Fire business commenced 1805.
* Century. Accident business commenced 1885.
* Clerical, Medical & General. Expenses include cost of pensions. Large additional valuation reserves (about £300,000) beyond liability on Old $Cm(5)$ 2½ per cent. basis.
* Commercial Union. Funds exclude Hand-in-Hand and West of England funds.
* Equitable. With additional reserve of more than one-half of clear surplus amounting to nearly £500,000.
* Guardian. Funds exclude those of Westminster and General Life.
* Law Union and Crown amalgamated 1891.
* Marine and General. Also insures Mariners', &c., effects.
* National Mutual. Amalgamated 1896.
* Phœnix. Fire business commenced 1782.
* Scot. Acc. Accident Business commenced 1877.
* Scot. Amicable. Net Premiums valued at 3½ per cent., so strengthening Reserves.
* Wesleyan and General. These figures include ordinary life business.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses are declared from time to time, which may usually be applied either to increase sum assured or to reduce premium, if not discounted for cash. It is generally advantageous to select a policy participating in profits, but to overcome the objection of the higher premium an alternative plan may be adopted in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price" system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if however the anticipated bonuses exceed those declared, the balance has to be discharged by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong. We give below the average annual premiums charged for the three classes of policies.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The next table shows the annual premiums payable throughout life for assurance of £100 at death with participation in profits. Premium rates alone are not sufficient for judging the relative attractions of life offices. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually high to commence with, but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, especially in cases of endowment assurance.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the assured, however, die during the endowment period, the sum assured is paid at death. The annual premiums payable throughout the endowment period, or till death if previous, for the assurance of £100 at various ages of entry and maturity, participating in profits, are given in this table.

LIFE ASSURANCE PROGRESS.

The business of foreign and colonial companies doing business in the United Kingdom is not included in the following table:—

	Ordinary Life Companies. Blue Book issued in		Industrial Life Companies. Blue Book issued in	
	1882.	1908.	1882.	1908.
Premiums (less re-assurances)	£11,658,319	£26,014,232	£1,941,994	£12,440,868
Consideration for Annuities	590,911	2,059,584	...	6,746
Interest and Dividends (less Income Tax)	5,369,007	11,349,052	45,716	1,126,549
Increase in value of Investments	238,573	104,423	...	60
Fines, Fees, &c.	6,157	14,806	14‡	1,504
Miscellaneous	44,571	86,945	1,832	1,009,452
Total Income	17,907,538	39,629,042	1,989,683	14,585,179
Claims (including Reversionary Bonuses)	9,850,250	18,437,550	697,778	4,737,281
Cash Bonuses and Reduction of Premium	854,297	1,285,074	...	787
Surrenders	734,051	1,893,565	2,533	128,872
Annuities	512,214	2,219,232	15	5,398
Commission and Expenses	1,572,816	3,633,101	935,180	5,401,288
Dividends and Bonuses to Shareholders and transfers to other accounts	706,658	728,970	2,661	847,448
Loss or Depreciation	101,844	280,756	422	8,190
Miscellaneous	7,631	61,331	345	...
Increase in Funds	3,567,777	11,089,463	350,749	3,455,915
Total	17,907,538	39,629,042	1,989,683	14,585,179
Life and Annuity Funds	128,659,580	306,443,947	1,529,965	34,351,312

	Ordinary Life Assurances.		Industrial Life Assurances.	
	No. of Policies.	Net Sums Assured.	No. of Policies.	Net Sums Assured.
Assurances in Force as shown by the latest Returns issued by the Board of Trade	2,489,139	£ 726,875,009	26,858,618	£ 267,469,613

THE following Table shows the amount of Annuity granted by the undermentioned Companies for every £100 paid. The age last birthday is that upon which the payment is based, but many offices quote intermediate rates for every half or quarter year of age. By a few Companies a proportionate amount of Annuity is payable to *day of death*.

The Annuity is calculated as payable half-yearly; the annual payment is in nearly all cases higher if paid annually and less when paid quarterly. Some offices grant special terms in case of impaired lives.

Fire Insurance Rates.

Most leading fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity. 1*s.* 6*d.*

Household goods therein, according to class, 1*s.* 6*d.* or 2*s.*

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2*s.*

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from 2*s.*

Private Dwelling Houses, brick and timber built and tiled or slated, in no hazardous proximity, from 2*s.* 6*d.*

Household furniture in such dwelling houses, in one sum, from 2*s.* 6*d.*

Shops and Warehouses similarly built and circumstanced, in which no hazardous trade is carried on nor hazardous goods deposited, also *Stock and Utensils* in trade, *Fixtures* and *Furniture* therein, from 3*s.*

China, Glass, Looking Glasses, Pictures, Prints, and Drawings, when separately insured, from 4*s.* 6*d.*

Thatched Dwellings and contents, from 5*s.*

Agricultural and Farming Stock for a year or shorter period, stacks in fields and agricultural produce, farming stock (live stock excepted), implements and utensils in buildings or in open, allowing use of portable steam threshing machine, in England and Wales, from 7*s.* 6*d.*

Wool in Farm Buildings in England and Wales, from 3*s.*

Stacks in Fields, &c., as above, in Scotland, from 10*s.*

Wool in Farm Buildings in Scotland, from 5*s.*

Live Stock in buildings or open in England, Scotland, and Wales, from 3*s.*

Shipping.—Ships and vessels of all kinds whilst building or repairing, or in harbour, dock, or river, and also cargo on board same;—

In harbour, from 2*s.* 6*d.*

Whilst building, finishing, or repairing, from 3*s.*

Steam vessels plying, from 7*s.* 6*d.*

Special rates for London, Liverpool, and Belfast.

Merchandise at Docks, Wharves, and Warehouses in London and other principal places, also rates for *Factories, Mills, Workshops, Distilleries, Refineries, Theatres, Buildings* in which steam or other power is used, and other *Special* risks require special quotations according to current rates.

Loss of Rent during reinstatement of a building destroyed or rendered untenantable in consequence of fire, and architects' and surveyors' fees necessarily incurred in the reinstatement of a building damaged by fire, can be insured against at same rates as the building itself.

A separate amount is required in every case upon each distinct building, and similarly upon contents unless insurance be subject to average.

Long Period Insurances.—Septennial and other policies for terms of years are sometimes issued for certain ordinary fire risks at graduated discounts.

INLAND POSTAL RATES.

To any part of the United Kingdom, including the Orkney and Shetland Islands, the Channel Islands, Isle of Man, and the Scilly Islands.

Letters.

Not exceeding 4 oz. ..... 1*d.*
For every additional 2 oz. ..... ½*d.*

Halfpenny Post.

Not exceeding 2 oz. ..... ½*d.*

Parcels.

Not exceeding.	*s.*	*d.*	Not exceeding.	*s.*	*d.*
1 lb.	0	3	8 lb.	0	8
2 ,, ...	0	4	9 ,, ...	0	9
3 ,, ...	0	5	10 ,, ...	0	10
5 ,, ...	0	6	11 ,, ...	0	11
7 ,, ...	0	7			

Newspapers.

The charge is ½*d.* for the inland transmission of any daily or weekly *registered* newspaper, the weight being disregarded. If more than one paper be included in a packet, the charge is as by an insufficiently paid letter, or transferred to the Parcel Post whichever charge is the lower, with a fine of 1*d.* in addition to any deficient postage.

GENERAL REGULATIONS.

Letters.

NATURE AND WEIGHT.—There is no limit except as to size, and anything may be sent by letter post (except explosive, offensive or obscene matter). The weight is unlimited. Maximum length 2 *ft.*; width 1 ft.; depth 1 ft. (These limits do not apply to official letters.)

BLIND, LITERATURE FOR THE. — Papers, periodicals, and books impressed in special type for the use of the blind may be sent by post at a specially low rate. 2 oz., ½*d.*; 2 lb., 1*d.*; 5 lb., 1½*d.*; 6 lb., 2½*d.*

CONVEYANCE OF SINGLE LETTERS BY RAIL.—On payment of 2*d.* to a servant of the railway, in addition to postage at the ordinary rate, *Inland* letters not exceeding 4 oz. may be forwarded by the next available train or steamship by those companies in agreement with the Post Office, to be called for at the station to which the letter is addressed, or to be transferred thence to the nearest letter-box for postal delivery. The letter must be taken to a passenger station of the railway company. Railway letters may be handed in at any express delivery post office for immediate conveyance to the railway station by special messenger on payment of the express fee of 3*d.* per mile.

EXPRESS DELIVERY SERVICE.—There are three systems by which *any article* (except those of a dangerous or offensive nature) may be specially delivered:—(1) By special messenger all the way, *on week-days only* (charge, *which must be prepaid*, 3*d.* per mile, or part of a mile, *inclusive* of all charges, but with a special weight charge of 3*d.* on each packet over 1 lb. in weight). (2) By special messenger after transmission by post (charge 3*d.* as before, *exclusive* of postage, with special charges as before). (3) In advance of the ordinary deliveries at the request of addressee (3*d.* per mile for one packet, and 1*d.* for every ten or less additional packets). For (1), packets must be handed over the counter with "Express Delivery" clearly marked in left-hand top corner. For (2), may be handed in or, if not to be registered, may be posted, and must be clearly marked as before. No Express Delivery on Sundays (except certain letters specially marked and paid for), Good Friday (except in Scotland), and Christmas Day.

NOTICE OF REMOVAL and for the re-direction of letters must be given on printed forms, to be obtained from the local postmaster or from postmen. Separate forms must be filled in for parcels and telegrams. The notice holds good for twelve months, and may be extended by payment of 1*s.* for second and third and 5*s.* for subsequent years.

RE-DIRECTION.—Letters may be re-posted not later than the day after delivery (Sundays and public holidays not being counted), and must not previous to re-direction and posting be opened or tampered with. If re-posted later a charge will be made at the prepaid rate; if opened or tampered with, at the unpaid rate.

REGISTRATION.—Registered letters and parcels *must be handed to an agent of the Post Office, and a receipt taken.* By prepayment of a fee of 2*d.* in addition to the postage and registration fee, the sender of a registered letter may obtain an acknowledgment of its due delivery. The latest time for registering for the night mails is usually half an hour before the box closes for letters; in the case of parcels, half an hour before the latest time for posting ordinary parcels. If an inland packet marked "Registered" be put in a letter-box it will be liable on delivery to a charge of 4*d.*, less any amount prepaid for registration. The fees for registration and the limits of compensation are as follows:—Fee 2*d.*, compensation £5; 3*d.*, £20; 4*d.*, £40; 5*d.*, £60; 6*d.*, £80; 7*d.*, £100; 8*d.*, £120; 9*d.*, £140; 10*d.*, £160; 11*d.*, £180; 1*s.*, £200; 1*s.* 1*d.*, £220; 1*s.* 2*d.*, £240, and so on, to 1*s.* 10*d.* £400. These fees include the ordinary registration fee of 2*d.* The highest amount of compensation obtainable for any one packet is £400. Compensation in respect of *money* of any kind (*coin, notes, orders, cheques, stamps, &c.*) will only be given in those cases in which the money is enclosed in one of the Registered Letter envelopes sold by the Post Office and the packet is tendered for transmission by Registered *Letter* Post. The compensation given in respect of *coin* will in no case exceed £5. Compensation for *damage* to a packet sent by Registered *Letter* Post will only be given in those cases in which the packet is conspicuously marked with the words "*Fragile, with Care.*"

DISPOSAL OF UNDELIVERED letters, packets, post cards, and parcels.—Inland letters undelivered, bearing full name and address of sender, are returned unopened; others are opened and returned if possible to senders, a registration fee of 2*d.* being charged should anything of value be inside. If without an address, and containing nothing of value, they are at once destroyed. Undelivered foreign letters are returned, unopened, after a short detention, to the countries whence received. If senders of ½*d.* packets place a request for their return, in the upper left-hand corner of the outside cover, in case of non-delivery, a second postage is charged the sender on their return, otherwise they are disposed of at the Head Office. If an undelivered *parcel* bears on the cover the name and address of the sender, it is returned to him at once. If the name and

address of the sender are not shown on the cover, the parcel is sent to the Returned Letter Office of the District, where it is opened and examined. If it is found to contain the name and address of the sender, it is returned to him. No charge is made for the return of an undelivered parcel to the sender. If the name and address of the sender cannot be ascertained from the examination of the parcel, the name of the addressee of the parcel and the Post Office at which it was posted are entered on a list, which is exhibited at the Returned Letter Office, where personal application can be made. In default of proper application and payment of charges, undelivered parcels are liable to be disposed of three months after the date of arrival at the Returned Letter Office. Perishable parcels will be dealt with as may be requisite.

Inquiries for missing letters, &c., should be made at the Secretary's office, G.P.O. (North), St. Martin's-le-Grand, between **10** a.m. and **5** p.m.; Saturdays between **10** a.m. and **1.30** p.m. The Returned Letter Office is at Mount Pleasant, E.C.

POSTE RESTANTE (solely for the accommodation of strangers and travellers).—Letters and parcels may be addressed to the Poste Restante at every Head Post Office in the United Kingdom and to all Branch Post Offices in London. Letters or parcels to be called for should have the words "Poste Restante" included in the address. No initials, or fictitious names, or Christian name only, will be taken in, but are at once sent to the Returned Letter Office for disposal; and all persons applying for "Poste Restante" letters must be able to say from what place or district such letters are expected, and must prove their identity. Foreigners must produce their passports. Poste Restante letters from abroad are not kept more than two months; at Provincial Post Offices only one month; letters posted in London, for one fortnight. After these intervals they are sent up to the Returned Letter Office. When, however, letters addressed "To be called for" bear a request for their return within a specified time, if not delivered, they are dealt with in accordance with such request.

SEAMEN'S AND SOLDIERS' LETTERS.—Letters to or from H.M. ships abroad are 1*d.* per oz.; to or from non-commissioned officers, private soldiers and seamen serving abroad, and enrolled pensioners in, Canada, not exceeding ½ oz., are forwarded for 1*d.* If posted for a place abroad unpaid, or insufficiently paid, or the description of the soldier, &c., be not given, it will be detained and returned to sender for payment of the postage.

UNPAID AND UNDERPAID LETTERS.—If the postage of letters, books, or newspapers be not paid in advance, *double postage* will be demanded on delivery; and if the postage be insufficient, *double the deficiency* will be charged.

Halfpenny Packets.

Packets not exceeding **2** oz. in weight may be sent for ½*d.*; if exceeding **2** oz. they pass unconditionally at the letter rate. The limits of length, width, and depth are the same as those of letters.

Any matter wholly printed on paper (paper sent as stationery not admissible), books and periodicals, manuscript, invoices, deeds and agreements, circulars produced in identical terms by any mechanical process (if type-written they must be handed in *as such* over the counter, and at least **20** copies must be sent at the same time), prints or photographs (when not on glass, or in cases containing glass, or any like substance), together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, or in an unfastened envelope, or cover easily removed, and must contain no communication in the nature of a letter.

RE-DIRECTION AND UNDER-PAYMENT.—*See* "Letters."

Newspapers.

WEIGHT.—Newspapers registered at the G.P.O., not over **5** lb. in weight, **2** ft. in length, or **1** ft. in width or depth. No writing in the nature of a letter is permitted, but the wrapper may bear the name and address of the sender and a reference to any page of its contents to which it is desired to draw attention. Newspapers not registered as such at G.P.O. are treated as printed matter. Duly registered newspapers, magazines, and trade journals may be sent to the *Dominion of Canada* at the rate of 1*d.* per lb.

RE-DIRECTION AND UNDER-PAYMENT.—*See* "Letters."

Parcels.

REGULATIONS.—The limit of weight is **11** lb. The parcel must not be more than **3** ft. **6** in. in length, or greatest length and girth combined, **6** ft.; marked in the left-hand top corner "Parcel Post" and handed across the counter of the receiving houses or given to a rural postman. It must not be posted in a letter-box, and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. The name and address of sender should be on the outside of every parcel. A greater weight than **11** lb. must not be accepted from one person by a rural postman on foot, or **21** lb. by a mounted postman, unless he shall have received notice on the day previous that a greater weight would be sent; and either of them may refuse parcels if already loaded.

Particulars as to collection of parcels from sender and for prepayment of postage in money will be furnished on application to post office.

Parcels left "to be called for" are charged 1*d.* a day after they have lain in the office one clear day, the maximum charge being 1*s.* 5*d.*

Parcels addressed to, or sent from, the Channel Islands are liable to customs duty, and the sender must make a declaration of contents at the office of posting. Parcels for the Isle of Man are treated as those for the British Isles generally.

No parcels are *received* on Sundays, Christmas Day, or (except in Scotland) Good Friday. For Bank Holidays, see page **387**.

COMPENSATION.—Compensation to the amount of £2 can be claimed on unregistered parcels for loss or damage. To secure compensation where no insurance fee is paid, a certificate of posting should be filled up and handed in for the signature of the post-office official. The insurance fee in stamps can be paid only at a post office.

No compensation will be granted for loss or damage of parcels containing money, watches, or jewellery, unless registered, or for damage done to a fragile or perishable article.

REGISTRATION.—*See* "Letters."

RE-DIRECTION.—Parcels may be re-directed free of charge if the original address and the corrected address are both in a delivery from the same office, otherwise they are charged again at the ordinary prepaid rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties up to 2*s.* 6*d.*—*for list of latter see p.* 456) are sold of the respective values of ½*d.*, 1*d.*, 1½*d.*, 2*d.*, 2½*d.*, 3*d.*, 4*d.*, 5*d.*, 6*d.*, 9*d.*, 10*d.*, 1*s.*, 2*s.* 6*d.*, 5*s.*, 10*s.* and 20*s.* Books of 18 1*d.* stamps and 11 ½*d.* are issued, price 2*s.* These may be purchased at most offices between 8 a.m. and 8 p.m., and at any office during the hours that attendance is given for telegraph business. Rural postmen are authorised to sell ½*d.* and 1*d.* stamps and registered letter envelopes.

Embossed or impressed postage stamps cut out of envelopes, postcards, letter-cards, newspaper wrappers, or telegram forms may be used as adhesive stamps in payment of postage provided they are not imperfect, mutilated, or defaced in any way. Embossed or impressed Inland Revenue stamps cannot be used in payment of postage, and stamps indicating the payment of a registration fee may only be used for registered correspondence.

Spoiled Stamps.

Payment of postage cannot be made by means of imperfect or defaced postage stamps. Stamps are considered defaced when marked on the face with any written, printed, or stamped characters. Stamps may, however, be perforated with initials or other identifying mark.

Applications for the recovery of the value of spoiled or unused stamps, whether postage or revenue, can be made to the Postmaster at most large Post Offices in the provinces.

Envelopes.

EMBOSSED ENVELOPES.—Embossed Halfpenny Envelopes are in two sizes—Commercial, in packets of 16 for 9*d.*, and Foolscap, 10 for 6*d.*; they are also sold singly. Penny Envelopes of the following sizes are kept in stock:—**A**, 4¾ × 3⅝, in packets of 20 for 1*s.* 10*d.*; "Commercial," 5⅛ × 3⅛, 16 for 1*s.* 5*d.*, and 240 for 21*s.* 3*d.*; and Foolscap, 9 × 4, 16 for 1*s.* 6*d.* and 20 for 1*s.* 10½*d.*

REGISTERED LETTER ENVELOPES, for foreign and inland letters, bearing a threepenny stamp embossed on the flap for the payment of the registration 2*d.* and postage 1*d.*, are of five sizes, and are sold: **F**, 5¼ in. × 3¼ in., 3¼*d.* each, or 12 for 3*s.* 3*d.*; **G**, 6 in. × 3¾ in., 3½*d.* each, or 12 for 3*s.* 4*d.*; **H**, 8 in. × 5 in., **H²**, 9 in. × 4 in., 3¾*d.* each; **K**, 11½ in. × 6 in., 4*d.* each.

Letter Cards.

LETTER CARDS are sold thus:—1 for 1¼*d.*, and 8 for 9*d.*, also in packets of 96 for 9*s.*

Post Cards.

POST CARDS impressed with a halfpenny stamp are sold at the rate of 10 for 5½*d.*, or 10*s.* per parcel of 220; a thicker quality being 11 for 6*d.*, or 5*s.* per parcel of 110. Impressed with 1*d.* stamp, 1*d.* each. Reply Post Cards are about double the rates for single cards.

PRIVATE CARDS bearing an adhesive ½*d.* stamp, and corresponding as nearly as possible to the size and weight of official cards, may be used. They are also admissible for foreign and colonial post provided they have "Post Card" (printed (or written) on them and are in conformity with the official cards in size and weight.

Wrappers.

WRAPPERS bearing a halfpenny stamp may be had at ¾*d.* each or 7 for 4*d.*; 5*s.* 8½*d.* per packet of 120. With a penny stamp the price is, singly 1¼*d.*, or 4 for 4¼*d.*; 3*s.* 6½*d.* per parcel of 40.

LONDON POSTAL ARRANGEMENTS.

FOR the purpose of facilitating the collection and delivery of letters, the Metropolis is divided into eight districts, marked:—

East Central (E.C.)	North Western (N.W.)
West Central (W.C.)	South Eastern (S.E.)
Eastern (E.)	South Western (S.W.)
Northern (N.)	Western (W.)

FOR THE COUNTRY AND ABROAD.—Letters and cards to go the same evening should be posted at chief district offices, branch offices, receiving houses, and pillar boxes before 6; in suburban places, half an hour to an hour and a half earlier.

LATE FEE LETTERS.—*Inland* letters and post cards bearing an extra ½*d.* stamp are forwarded by the night mails if posted at the town branch offices and receiving houses before 7 p.m., and at Mount Pleasant before 7.45, or at St. Martin's-le-Grand before 7.30. At certain district offices the hour for posting with the late fee is 7.30 and 8, when the letters are to go from the railways in their immediate neighbourhoods. Letters having an extra ½*d.* stamp may also be posted at the sorting carriage or platform barrier at the various railway termini up to the time of the departure of the train bearing the mails, varying from 5.15 a.m. to 10 p.m.

Foreign letters with an extra 1*d.* stamp may be posted in the E.C. District and at Metropolitan District Offices at times varying with the despatch of the mails; with an extra 2*d.* prepaid the time is extended.

POSTAGE, &c., ABROAD.

Letters.

The charge for letters *throughout the British Empire* and to *Egypt* and the *United States of America* is 1*d.* the ounce, except to a few small islands, to which the charge is 2½*d.* for the first ounce and 1½*d.* per ounce afterwards.

The charge to *all other places* is 2½*d.* for the first ounce and 1½*d.* per ounce afterwards.

Post Cards.

The rate to all places to which Post Cards are available is 1*d.* single, 2*d.* return. (*See* col. 1.)

Reply Coupons.

Coupons exchangeable for stamps of the value of 25 centimes (2½*d.*) each in any country participating in the arrangement can be purchased at any Money Order Office in this country at the price of 3*d.* each for the purpose of prepaying replies to letters. The coupons can be exchanged by the addressees of such letters at the Post Office of the place of destination for local postage stamps.

Books, Newspapers, Samples, &c.

NEWSPAPERS, BOOKS, PRINTED PAPERS, &c., ½*d.* per 2 oz.

PATTERNS AND SAMPLES, ½*d.* per 2 oz. ; but with a minimum charge of 1*d.*

COMMERCIAL PAPERS, MSS., &c., ½*d.* per 2 oz. ; but with a minimum charge of 2½*d.*

The limits of size to the British Empire or non-Union countries* are—length 2 ft., width or depth 1 ft., and must not exceed 5 lb. in weight. To countries in the Postal Union the length is limited to 18 in. ; weight not to exceed 4 lb. If in the form of a roll, the limits of size in either case are 30 in. in length and 4 in. in diameter.

The above-named rates should in all cases be prepaid ; no packet can be sent forward wholly unpaid, but, if by inadvertence the postage is insufficiently prepaid, double the deficit will be chargeable on delivery.

CANADIAN MAGAZINE POST. Duly registered newspapers, magazines, and trade journals may be sent to Canada at the rate of 1*d.* per lb.

Parcels sent abroad.

The rules and regulations to be observed are similar to those relating to inland parcels, with the addition that every parcel must have a Customs declaration respecting the contents. This must be on a form obtainable at any Post Office. The sender may arrange to prepay all charges to certain parts of the Empire and foreign countries by paying a fee of 6*d.*, making a deposit of 1*s.* for each 10*s.* value of the parcel, and signing an undertaking to pay all Customs and other charges on demand ; otherwise they are collected on delivery. Certain articles are prohibited ; among them letters nearly everywhere ; gold, silver, jewellery, and firearms to many places ; opium to Hong Kong, Siam, and India ; and pork and bacon to some places.

Imperial British Rates.

The "triple system" of 3 lb. 1*s.*, 7 lb. 2*s.*, and 11 lb. 3*s.*, is charged to India and Aden (or *vid* Italy, 3 lb. 2*s.*, 7 lb. 3*s.*, 11 lb. 4*s.*), Ascension, Bahamas, Barbados, Bermuda, Brit. East Africa, Brit. Guiana, Brit. Honduras, Brit. North Borneo and Sarawak, British Somaliland, Ceylon, Cyprus, Dominica, Egyptian Sudan, Falkland Islands, Gambia, Gibraltar, Gold Coast, Grenada, Hong Kong (or *vid* Italy, 2*s.*, 3*s.*, and 4*s.*), Jamaica, Labuan, Lagos, Leeward Islands, Malay States, Malta (or *vid* France, 2*s.*, 3*s.*, 4*s.*), Mauritius (or *vid* France, 2*s.*, 3*s.*, 4*s.*), Montserrat, Newfoundland, New Zealand, Nigeria, St. Helena, St. Lucia, St. Vincent, Sarawak, Sierra Leone, Straits Settlements (or *vid* France, 2*s.*, 3*s.* and 4*s.*), Tobago, Trinidad, Uganda, Zanzibar. The charges for other parts of the Empire and for Foreign Countries are as follow :—

To India and the British Empire generally and to Constantinople, Beyrout, Smyrna, and Egypt the maximum length is 3 feet 6 inches, or length and girth combined 6 feet; Canada, length, breadth or depth, 2 feet 6 inches, length and girth combined, 6 feet; to Italy, Spain, Greece, and parts of Turkey, length 2 feet, length and girth combined 4 feet; other places in Europe, 2 feet in any direction.

CASH ON DELIVERY.—A service of "cash on delivery" of parcels has been established between the U.K. and certain British Dominions and Egypt.

INSURANCE.—Insurance may be effected for parcels to almost all countries up to £400, according to destination, at the following rates:—4*d.* for £12; 6*d.* for £24; 8*d.* for £36; 10*d.* for £48; 1*s.* for £60; 1*s.* 2*d.* for £72; 1*s.* 4*d.* for £84; 1*s.* 6*d.* for £96; 1*s.* 8*d.* for £108; 1*s.* 10*d.* for £120; 2*s.* for £132; and so on to 5*s.* 10*d.* for £400. Parcels sent to the U.S. by the *semi-official* service are insurable up to £120 at about double the above rates.

MONEY AND POSTAL ORDERS.

The sender of a money order (Inland or Abroad) may apply *for an advice of payment to consignee* at the office of issue at the time of issue or subsequently—fee, 2*d.*; if the Order is payable in the United Kingdom, and 2½*d.* if it is payable abroad.

Inland Ordinary Money Orders.

The highest amount granted in one order is limited to £40. The commission charged is for sums not exceeding £1, 2*d.*; £3, 3*d.*; £10, 4*d.*; £20, 6*d.*; £30, 8*d.*; £40, 10*d.* No order may contain a fractional part of 1*d.*

The rules and regulations are on the forms issued.

The Chief Money Order Office is at 144A Queen Victoria Street, E.C.

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office in the United Kingdom which is also a despatching office for telegrams, and may be made payable at any Money Order office which is also an office for the delivery of telegrams.

Commission at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 2*d.*, and cost of official Telegram of Advice. If the order is to be delivered at payee's address any charge for porterage must be prepaid.

Postal Orders.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on week days. They are also issued and paid in almost all parts of the Empire (except Australia and Canada), and at the British Agencies in Beyrout, Constantinople, Morocco, Panama, Salonica, and Smyrna, and in Egypt. They are issued, with a counterfoil to be retained by the sender, for every 6*d.* up to 20*s.* and for 21*s.*; those of 6*d.*, 1*s.*, 1*s.* 6*d.*, 2*s.* and 2*s.* 6*d.*, at a charge of ½*d.*; of 3*s.*, 3*s.* 6*d.* &c., up to 15*s.*, 1*d.*; those of 15*s.* 6*d.* &c., up to 21*s.*, 1½*d.* They must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. British Postage Stamps (*not* perforated and not exceeding 3 in number) to the amount of 5*d.*, but not fractions of 1*d.*, may be affixed to the *face* of an order.

Ordinary Money Orders Abroad.

For sums not exceeding £1, 3*d.*; £2, 6*d.*; £4, 9*d.*; £6, 1*s.*; £8, 1*s.* 3*d.*; £10, 1*s.* 6*d.*, and for countries on which orders may be issued for more than £10, 3*d.* for every additional £2 or portion of £2.

Telegraph Orders Abroad.

Commission at same rate as for Ordinary Money Orders abroad, plus supplementary fee of 6*d.*, and cost of official Telegram of Advice.

TELEGRAMS.

Inland.

Inland telegrams may be sent to all parts of the British Isles at the rate of 6*d.* for the first twelve words, and one halfpenny for every additional word; stamps in payment to be affixed to the form by the sender. Receipt for charges 1*d.* The address of the receiver is charged for, but not that of the sender when written on the back of the telegram form. Five figures are counted as one word. The charge includes delivery within the town postal limits, or within three miles of a head office—beyond that limit the charge is 3*d.* per mile from the office door. Porterage to be paid by sender. Telegram forms are of two kinds—one issued gratis; the other (A1), embossed with a 6*d.* stamp, may be purchased singly, or in books of 20, interleaved, and with a sheet of carbonic paper, price 10*s.* 2*d.* The usual hours are 8 a.m. to 8 p m.

SUNDAY TELEGRAMS.—In most provincial towns the Telegraph Offices are open from 8 to 10 a.m. in England and Ireland; in Scotland from 9 to 10 a.m. In London the following offices are *always open*:—G.P.O., Central; G.N.R., King's Cross; G.C.R. Marylebone (except 11.30 a.m. to 3.30 p.m.; G.E.R., Liverpool Street and Stratford; London Bridge (S.E. & C.R.), St.

* The parcel post with the United States is carried on by means of two distinct services, namely, an official service with the United States Post Office and a semi-official service maintained through the Agency of the American Express Company. The sender of a parcel forwarded by the semi-official service may, without extra charge, direct that a parcel be sent through the New York Custom House in Bond for Customs examination at any one of the "United States Ports of Entry," or Inland Custom Houses. The addressees of such parcels must, however, make arrangements for the delivery of parcels so treated after they have been cleared at the Custom House of the Inland Port of Entry.

Parcels intended to be forwarded in bond must be plainly marked by the sender, "In bond to ," naming the Inland Port of Entry chosen; and the same words must also be written by the sender in the same handwriting on the Customs declaration.

Pancras (M.R.), Waterloo and Willesden Stations, and West Strand Post Office. The offices at Birmingham, Bradford (except between midnight Saturday and 8 a.m. Sunday), Brighton (except between midnight Saturday and 7 a.m. Sunday), Bristol, Cardiff Docks (ship telegrams not delivered after dark), Derby, Devonport, Dover, Exeter, Falmouth, Holyhead, Hull, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Norwich, Nottingham, Penzance, Plymouth, Portsmouth, Sheffield, and Southampton are always open; as also are those at Aberdeen, Dundee, Edinburgh, and Glasgow, in Scotland; and Belfast, Cork, Dublin, Londonderry, and Queenstown, in Ireland.

Note.—It is usually possible to get a telegram through from an office which is open to one which may, perhaps, be closed for telegraphic business by payment of the following extra fees: 1*s.* for the telegraphist, 1*s.* for the messenger, and 6*d.* an hour for the telegraphist if he has to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1*s.* for the postmaster, 1*s.* for the telegraphist, and 1*s.* for a messenger if it be necessary to call the telegraphist.

Rates for Telegraphing Abroad.

Rates per word are as follows:—Abyssinia, 2*s.* 5*d.*; Aden, 2*s.*; Alaska, 2*s.* 9*d.*; Algeria, 2½*d.*; Angola, 5*s.* 5*d.* and 5*s.* 6*d.*; Annam, 4*s.* 2*d.* and 4*s.* 5*d.*; Antigua, 4*s.* 4*d.*; Argentine Republic, 3*s.* 10*d.* and 4*s.* 2*d.*; Ascension, 2*s.* 6*d.*; Australia, 2*s.* 9*d.* and 3*s.*; Austria, 3*d.*; Azores, 9*d.*; Bahamas, 2*s.* 5*d.*; Barbados, 4*s.* 9*d.*; Basutoland, 2*s.* 6*d.*; Bathurst (W. Wireless Telegraphy.

Telegrams are accepted at any Telegraph Office for transmission to certain of the principal Ocean Liners by Wireless Telegraphy from the stations at Crookhaven, the Lizard, Malin Head, Niton, the North Foreland, and Rosslare, at a charge of 6½*d.* a word, with a minimum of 6*s.* 6*d.* per telegram, and telegrams from ships are received at these stations and are thence transmitted by wire. Telegrams are also accepted at any Telegraph Office for transmission to His Majesty's ships from the same stations at a charge of 3½*d.* a word, with a minimum of 3*s.* 6*d.* per telegram. Such telegrams are only accepted at sender's risk. The name of the wireless station will in each case pass as one word in the address.

POST OFFICE TELEPHONES.

London Exchange.—The office of the General Manager of the Post Office London Telephone

System is at the G.P.O., South, Carter Lane, E.C. The annual subscription, including one telephone at the subscriber's premises, £5. Within a distance of 2 miles from the subscriber's premises, for each call on any exchange in the county of London, 1*d.*; and on any exchange outside the county of London, 2*d.* For connection with any exchange outside the county of London within 2 miles, annual subscription, £4; 1*d.* for each call on same exchange; 2*d.* on any other exchange. The Call Office Fee, whether for subscribers or others, is 2*d.* The annual subscription for connection with an Exchange within 2 miles of premises with *unlimited* number of calls is £17.

Provincial Telephone System.—Applications for terms, &c., should be made to the Sec., G.P.O.

Telephone Trunk Lines.—Where the P.O. Telephone Exchanges in different towns are connected by Trunk lines, such lines may be used by local subscribers and the general public at the following rates: 3*d.* for 25 miles, 6*d.* for 50 miles, 9*d.* for 75 miles, 1*s.* for 100 miles, and an additional 6*d.* for every 40 miles over a hundred. Extra charges are levied if the conversation is between a subscriber to the NATIONAL TELEPHONE COMPANY'S System and a subscriber to a P.O. Telephone Exchange as follow: When the Trunk Wire charge does not exceed (for a conversation of 3 minutes) 1*s.* 6*d.*, the fee is 3*d.* more; if 3*s.*, 4*d.* more; and if over 3*s.*, then 6*d.* more for every 3 minutes the wire is occupied. Such fees are not chargeable on calls to or from the Tunbridge Wells or Hull Exchanges. The ordinary time allowed for a conversation on a trunk line is 3 minutes; but by paying a double fee the line may be engaged for the *maximum* of 6 minutes continuously.

Anglo-French and Anglo-Belgian Telephone.—Telephonic communication may be obtained through Post Office Exchanges or Call Offices from London and certain provincial towns in England to Paris, Brussels, and certain provincial towns in France and Belgium. Fee—8*s.* per conversation of three minutes (10*s.* for Bordeaux, Lyons, Marseilles and St. Etienne). Two *consecutive* conversations are permitted. NOTE.—Paris time is 10 minutes in advance of London time (*i.e.*, 12 noon London = 12·10 p.m. Paris), but Greenwich time prevails in Belgium.

SUNDAY AND HOLIDAY ARRANGEMENTS.

At all offices in the PROVINCES which are open on Sunday, postage stamps are sold, and letters may be registered during the time such offices are open. The same regulation applies to CHRISTMAS DAY and GOOD FRIDAY. In LONDON, letters cannot be registered on Sunday, except at certain railway stations, but on Good Friday and Christmas Day postage stamps are sold and letters may be registered at all offices which are open. The hours at which telegraph business is attended to are, as a rule, from 8 to 10 a.m.; but no Money Order, Savings Bank, Insurance, or Annuity Business is transacted on these days, nor in Scotland on Sacramental Fast Days.

BANK HOLIDAYS AND FAST DAYS.—Where Bank Holidays are observed as public holidays, the counters of the head office and branch offices are closed at 12 noon (in some small places they are not even opened) *except* for telegraph business, the reception of parcels, the sale of postage stamps, and the registration of letters. At no provincial town in England or Ireland is there more than one delivery of letters on Sunday, Christmas Day, or Good Friday; nor in Scotland on Sunday or the Sacramental Fast Days; and any person is at liberty to prevent even this delivery so far as relates to himself.

In London the holiday arrangements are of an exceptional character, and due notice of them is given by means of bills at the various offices.

POST OFFICE SAVINGS BANKS.

These are established at all Money Order Offices, and are opened for the receipt of deposits during the hours appointed for the sale of stamps, commencing at 8 a.m. Every such office is also open for the payment of withdrawals on week-days during certain hours, which are specified in a notice exhibited at the office. On presentation of book a depositor may withdraw on demand a sum not exceeding £1.

Deposits can be made from 1*s.* to £50 in one year (ending 31st Dec.). When with interest the total exceeds £200, interest is allowed on £200 only. Interest is at 2½ per cent.

ANNUITIES AND LIFE ASSURANCE.—Immediate or deferred annuities from £1 to £100 may be purchased through the Post Office on the life of anyone over 5 years old. These are payable by equal half-yearly instalments. (Jan. 5 and July 5, or April 5 and Oct. 10.)

Life insurances, from £5 to £100, are granted to persons between 14 and 65 years of age. Children between 8 and 14 can be insured for £5.

If the amount of the annuity or insurance purchased is less than £100, further amounts may be bought, until the total sum amounts to £100.

The Central Post Office Savings Bank is at Blythe Road, West Kensington, W.

Customs Drawbacks.

BEER, Imported or brought into Great Britain or Ireland and subsequently exported as merchandise, or shipped for use as ships' stores, or removed to the Isle of Man, of an original gravity of 1,055° for every 36 gallons 0 7 9

(And so in proportion for any difference of gravity.)

COFFEE, Roasted Coffee exported, which is not mixed with Chicory or any other substance ..... 100 lb. 0 14 0

MOLASSES, Produced by a Refiner in Great Britain or Ireland and delivered by him to a Licensed Distiller for use in the manufacture of Spirits* .. cwt. 0 0 5

Produced by a Refiner in Great Britain or Ireland from Sugar on which Duty has been paid on Importation, if the Molasses is to be used solely for purposes of food for stock .... cwt. 0 0 5

SUGAR which has passed a refinery in Great Britain or Ireland, and on which the proper Import duties have been paid — upon being exported, or deposited in any bonded warehouse for use as ships' stores or removed to the Isle of Man, a drawback equal to the duty on Sugar of the like polarization.

Goods (other than beer) exported or deposited in any bonded warehouse for use as ships' stores, or removed to the Isle of Man, in the manufacture or preparation of which in Great Britain or Ireland any duty-paid Sugar, Glucose, Saccharin, or Molasses, has been used, a drawback equal to the duty in respect of the quantity of that article which appears to the satisfaction of the Treasury to have been used in the manufacture or preparation of the goods, or, in the case of residual products, to be contained therein.

TOBACCO:—

Tobacco upon which the Duties and Regulations on importation have been paid—

(1) Tobacco manufactured in Great Britain or Ireland on being, by any licensed manufacturer, exported as merchandise, or shipped as stores, or deposited in any bonded warehouse to be used as ships' stores, or exported by parcel post:—

Cigars ..... lb.	0 3 5
Cigarettes ..... lb.	0 3 4
Cut, Roll, Cake, or other manufactured Tobacco ..... lb.	0 3 3
Snuff (not being offal Snuff) ..... lb.	0 3 2

(2) Shorts, stalks, or other refuse of Tobacco, including offal Snuff, on being, by any licensed manufacturer, exported as merchandise, or deposited:—

In an approved bonded warehouse for exportation as merchandise;

In a bonded warehouse approved for the manufacture of sheepwash, &c.; or

For abandonment in an approved King's Warehouse ..... lb. 0 3 1

The above rates of drawback are allowed on Tobacco, &c., containing 14 per cent. of moisture, a proportionate increase or deduction being made if the moisture is less or more than 14 per cent.

A deduction is made from the drawback for every lb. of inorganic matter in excess of 22 per cent. (calculated on the Tobacco, &c., exclusive of water), with certain allowances.

* Such Drawback is not payable in respect of Molasses produced from non-Duty-paid Sugar in Refineries placed in Bond under the Sugar Convention Act, 1903.

EXCISE, STAMPS, AND TAXES.

* Levying transferred to County Councils as from 1st Jan., 1909.

† Estates exceeding £1,000,000 pay 10 per cent. on *first million*, whilst the *remainder*, if not exceeding half a million, is charged 11 per cent., if not exceeding a million 12 per cent., and so on to a maximum of 15 per cent.

	£ s. d.
In calculating duty the net value of an estate where the death occurred between and August, 1894, and 30th June, 1896, is raised to the next complete £10; on deaths after that date until the 8th April, 1900, any fraction of £100 is ignored, such adjusted value determining both the rate and amount of duty. On deaths on and after 9th of April, 1900, the rate and amount of duty is calculated on the exact net value.	
Gifts made by the deceased within a twelvemonth of death are subject to aggregation with the rest of the estate.	
In addition to the above, where property liable to Estate Duty is settled by the will of the deceased, or having been settled by some other disposition which took effect since 1 Aug., 1894, passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty (*Settlement Estate Duty*) is payable at the rate of £1 per cent. on the Settled property (except when the only life interest is taken by the husband or wife of the deceased), but from that payment the *ad valorem* stamp duty charged on the settlement may be deducted.	
But where the net value of the property, real and personal, does not exceed £1,000, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from Legacy or Succession Duties.	
Small estates up to £300 and £500 gross are charged, at the option of the accounting parties, either by the preceding scale or with fixed duties of 30*s.* and 50*s.*, and are exempt from all other death duties.	
Where the net value exceeds £100, but does not exceed £200, the *ad valorem* duty amounts to £1 only, provided that the death occurred on or after 1st July, 1896, and before 9th April, 1900.	
Interest at 3 per cent. per annum is also payable on the Estate Duty on personalty from the date of the death up to that of delivery of the affidavit or account.	
The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and that on certain annuities may at option be paid in four yearly instalments, and 3 per cent. interest is charged on all unpaid portions of duty in these cases from twelve months after death.	
FACULTY OR DISPENSATION. In England, in all cases	30 0 0
In Scotland or Ireland, in some cases £20, in others	25 0 0
FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

Lease of any kind not specially charged	0	10	0
Agreement for lease not exceeding 35 years, same as actual lease.			

Legacy and Succession Duties:—*Also see* "*Estate Duty*."

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. c. 12, s. 42.—Except in the cases of small estates, *see* note to Estate Duty.

No succession duty is payable where the principal value of all the successions on the same death does not amount to £100 (16 & 17 Vict. c. 51, s. 18).

Rates of duties payable on legacies, annuities, and residues (£1 *per cent. Legacy Duty practically abolished since* 1881), and of Succession Duties where deceased died before 1st July,

1888, or where Estate Duty, Finance Act, 1894, is payable *(in which latter case* 1 *per cent. is also practically abolished).*

To Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased *(see* above) ..... £1 per cent.

To Brothers and Sisters of the Deceased, or their Descendants ..... £3 per cent.

To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants ..... £5 per cent.

To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants ..... £6 per cent.

To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased ..... £10 per cent.

Where deceased died on or after 1 July, 1888, and Probate or Estate Duty is not payable, Succession Duties for the relationships above are at rates of 1½, 4½, 6½, 7½, and 11½ respectively.

The Husband or Wife is chargeable with Estate Duty, but not Legacy or Succession Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same; persons not giving notice of a succession, or not delivering an account, are subject to certain Penalties.

LETTERS OF ALLOTMENT AND OF RENUNCIATION. Less than £5, *id.*; £5 and upwards, *6d.*

Spoiled Stamps.

ALL applications for allowance must be made within two years from the time of spoilage of unexecuted instruments, or within two years of the date or of the first execution of others.

The hours of attendance for the allowance of spoiled stamps at Somerset House are from 11 to 3; Saturday, 10 to 1. At Telegraph Street, E.C. (sea policy and general spoiled stamps), from 11 to 3 on Monday, Wednesday, and Friday.

Deeds Stamped after Execution.

REGULATIONS under which the Commissioners as a general rule allow deeds and other instruments to be stamped after execution :—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY :
- Agreements under hand only, liable to the duty of 6*d.* — Agreements for letting furnished houses for less than a year, if in the form of letters and correspondence only.—Appraisements.—Attested copies,—within 14 days of *first* execution.
- Foreign sea policies, within 10 days of arrival in U.K.
- Deeds and instruments not otherwise excepted, within 30 days of *first* execution.
- NOTE.—Where the deed or instrument has been wholly executed *abroad*, the period within which it may be stamped begins to reckon from the date of its arrival here.

WITH PENALTY IN ADDITION TO DUTY :—
- Articles of clerkship.
- Bills of exchange upon stamps of sufficient amount but of improper denomination.
- Charter-parties. Receipts, within certain limits of time.—*Vide* Table of Penalties.
- Contract notes.
- Letters of Allotment and Renunciation. Scrip certificates.
- Share warrants. Warrants for goods.
- Policies of insurance, other than Marine policies.

INSTRUMENTS WHICH CANNOT LEGALLY BE STAMPED AFTER EXECUTION :—
- Bills of exchange (except as before mentioned). —Bills of lading.
- Marine policies executed in the United Kingdom. Proxies and Voting Papers (except those first executed abroad, which may now be stamped within 30 days after first receipt in U.K.).

PENALTIES ENFORCEABLE ON STAMPING :—

	£	s.	d.
Agreements under hand only. Attested copies or extracts : after 14 days from their first execution	10	0	0
Charter-parties, within 7 days from their first execution	0	4	6
Charter-parties after the expiration of 7 days, but within one month	10	0	0
Receipts, within 14 days after they have been given	5	0	0
Receipts, after 14 days, but within one month	10	0	0
Other Instruments presented after the proper time (subject to special provisions in some cases)	10	0	0

BIRTHS.

When a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons :—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened ; 3. A person present at the birth ; or, 4. The person having charge of the child. The duty of attending to the registration thereof rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided, but the registration of a birth will be free when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born, when the Registrar on so attending may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the superintendent Registrar, and on payment of fees to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts where the Notification of Births Act, 1907, has been adopted by the local authority, notice of every birth must (subject to a penalty in case of default) be given by the father, or person in attendance on the mother, to the district medical officer of health. The notice must be sent by post within 36 hours of the birth, and is to be in addition to, and not in substitution for the notices above mentioned.

DEATHS.

When a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons :—1. The nearest relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased in the same (Registrar's) sub-district. In default of any relatives, 3. A person present at the death ; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register ; or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased. The written notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. The penalty for not delivering this certificate is forty shillings. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees.

Coroners' Inquests are held in all cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Sudden deaths are supposed by the law to demand inquiry. Still, it often occurs that a medical man quite familiar with the case will give his certificate that the death arose naturally, from heart disease, apoplexy, &c., and in such case a coroner's inquest is dispensed with. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a *witness* is bound to attend, or renders himself liable to be fined in any sum not exceeding forty shillings, the fine for defaulting *jurymen* being £5. In the case of sudden or suspicious death in Scotland, the Lord Advocate may order a

public inquiry to be held in the manner prescribed by the Fatal Accidents Inquiry (Scotland) Act, 1895, as altered by an amending Act passed in 1906.

VACCINATION.

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth, the Public Vaccinator is required to give 24 hours' notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth of the child he satisfies two justices or a stipendiary or metropolitan police magistrate, or makes a statutory declaration, that he conscientiously believes that vaccination would be prejudicial to the health of the child and within seven days thereafter delivers to the Vaccination Officer for the district a certificate of such justices or magistrate, or the statutory declaration of such conscientious objection. A conscientious objector can thus escape all penalties, but a person who does not obtain a certificate, or make the declaration, will still be liable to penalties for not having a child vaccinated, and by the Vaccination Order, 1898, issued under the Vaccination Act, 1898, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registration, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions.

MARRIAGE BY BANNS OR LICENCE.

BANNS OF MARRIAGE.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. Formerly banns might be proclaimed on Church holidays, but the Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony. If there is morning service the right time for banns is after the Nicene Creed; and if there be afternoon or evening, and no morning service, then the right time is after the 2nd lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force. Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the Established church of the parish. In like manner in Scotland the publication takes place in the parish church, even where the parties are married in the Anglican or Episcopal church. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage. The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage will be null and void (*Midgeley* v. *Wood*, 4 Sw. & Tr. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may licence a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on a registrar's certificate without banns.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 428). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two witnesses present, and that these witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may under Section 56 of this Act refuse to marry a divorced person, whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service. A person whose marriage has been dissolved for the adultery of the other party is entitled to be married in church by the incumbent, or his curate or substitute.

Although the presumption of law is in favour of the validity of a marriage, great care should be taken to comply with the directions of the several statutes in every particular. Where it is impossible to comply literally, the parties must do all they can to comply with the law.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2*s*. 6*d*., and a stamp duty of 1*d*. Searches on the register-books may be made on payment of small fees, viz., 1*s*. for a single year, and 6*d*. additional for every other year. There are small fees, regulated by custom, on the certifi-

ate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in position to afford it, it is usual to pay a guinea to the clergyman, and 5*s.* to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

MARRIAGE LICENCES.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 3 Knightrider Street, Doctors' Commons, E.C., or at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays 10 to 2), are available for London and all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, 10*s.* 0*d.* *No previous notice is required and the licence is available as soon as it is issued.* The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15*s.* to £2 12*s.* 6*d.* By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and *collusion* in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of *such parties hath had* his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archbishop of Canterbury through the Faculty Office, Doctors' Commons, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must be such as to meet with his Grace's approval. Fees for licence stamp, &c., average £29 5*s.* 6*d.*

PROCEEDINGS AS TO A MARRIAGE BEFORE A REGISTRAR.

NOTICE AND DECLARATION.—In case of an intended marriage *by Certificate* at a register office (*i.e.*, the superintendent registrar's office), or a certified building (*i.e.*, usually a Roman Catholic or Nonconformist church or chapel), it is necessary for one of the parties to give notice under his or her hand (in the form prescribed by the 19 & 20 Vict. c. 119, schedule A) to the superintendent registrar of the district within which the parties shall have dwelt for the space of seven days then next immediately preceding; or if the parties dwell in different superintendent registrars' districts, a like notice must be given to the superintendent registrar of each district; every form of notice contains solemn declarations that there is no lawful hindrance to such marriage, as to the necessary residence, the ages of the parties, and consent of parent in case of a minor; such notice and declarations must be signed before a registration officer of the district, namely, a superintendent registrar, or registrar of births and deaths or marriages or the deputy of some such registrar. If the marriage is intended to be had *by licence*, it is necessary for only one of the parties to give notice to the superintendent registrar, in manner before mentioned, in whose district he or she has resided for the space of fifteen days immediately preceding, and if the other party reside in a different superintendent registrar's district, it is not requisite that notice should be given to such last-mentioned superintendent registrar; but one of the parties must, for the space of fifteen days immediately preceding the giving of the notice, have had his or her usual place of residence within the district of the superintendent registrar to whom such notice is to be given. In case a minister did not happen to attend and the parties wished, they might be married before the registrar without any religious ceremony.

CERTIFICATE.—After the expiration of twenty-one days next after the day of the entry of notice of marriage which is to be had without licence, the superintendent registrar is required, provided there be no lawful impediment, to issue, upon the request of the party giving the notice, a certificate in the form prescribed by the 19 & 20 Vict. c. 119, schedule B. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the certificate.

LICENCE.—In the case of marriage by licence the superintendent registrar is required, after the expiration of one day next after the day of the entry of the notice of marriage, provided there be no lawful impediment, to issue his certificate and also a licence to marry. At any time within three months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the licence.

MARRIAGE CEREMONY.—After the expiration of twenty-one days after the entry of the notice if the marriage is to be had without licence, or of one whole day if by licence, the marriage may be contracted at the register office and in the presence of the superintendent registrar and some registrar of the district, and in the presence of two witnesses, between the hours of eight a.m. and three in the afternoon, with open doors. Each of the parties must declare as follows:—"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C.D.*:" and each of the parties shall say to the other, "I call upon these persons here present to witness that I, *A. B.*, do take thee, *C. D.*, to be my lawful wedded wife (*or* husband)." A wedding-ring is usually required. The fact that the surname of one of the parties, and her condition, was untruly stated, was held not to render such a marriage invalid (*Donaldson* v. *Rutter*, 1907, 24 T.L.R. 12). In case a minister is not present, and the parties wish it, they may be married in any chapel or building certified for marriages, the registrar only being present with the two

witnesses. "Gretna Green weddings" are obsolete, a period of residence being now required by law. Provision is made in the Marriages and Registration Act, 1837, sect. 23, for the declaration and form of words to be used in Welsh in Wales and in places where the Welsh tongue is used. If both parties are Jews, they must give notice to the registration officer in manner before mentioned, and may marry according to their usages in a synagogue or private dwelling-house, and at any hour; the marriage must be registered by the secretary of the husband's synagogue. If both parties are members of the Society of Friends, or, if not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to the registration officer, and may be married in a Friends' meeting-house, and the marriage must be registered as soon as conveniently may be after its solemnization by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a registrar of marriages is not requisite at such marriages of Jews or members of the Society of Friends. The provisions as to Notices and Licences given above do not apply to Ireland. [*Marriages before a Registrar* in that country are regulated by 7 & 8 Vict. c. 81, and 26 & 27 Vict. c. 27; the Act regulating marriages in that country in *places of Worship* is 33 & 34 Vict. c. 110.]

Under the Marriage Act, 1898 (which does not apply to Scotland or Ireland or to marriages according to the usages of the Society of Friends or of Jews), marriages may be solemnized in Nonconformist places of worship, provided they are duly registered for the solemnization of marriages without the presence of a Registrar, provided "the authorised person" (which means a person certified as having been duly authorised for the purpose by the trustees or other governing body of the building) is present and no notice has been given to the Superintendent Registrar that the parties to the marriage require the presence of a Registrar.

Where a marriage is solemnized under this Act each of the contracting parties shall in some part of the ceremony make the following Declarations:—

"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D.*"

And each of the parties shall say to the other:—

"I call upon these persons here present to witness that I, *A. B.*, do take thee, *C. D.*, to be my lawful wedded wife [*or* husband];"

or, in lieu thereof:—

"I, *A. B.*, do take thee, *C. D.*, to be my wedded wife [*or* husband]."

The Act provides for the registration after marriage by "the authorised person." The Act provides for the payment to the Superintendent-Registrar of the district in which the registered building selected for the marriage is situated, of an additional fee of 5*s.* 6*d.* if the marriage is by licence, and otherwise a fee of 4*s.*, but this provision for additional fees is only to remain in force for 10 years from the passing of the Act.

CERTIFICATE OF BIRTH, DEATH, OR MARRIAGE.—On giving the name and date this can be obtained at Somerset House on payment of 3*s.* 7*d.* made up as follows: 2*s.* 6*d.* for certificate, 1*s.* for search, and 1*d.* for stamp. Enquiries by post from residents in the Metropolis will not be considered; attendance in person or by agent is necessary. Certificates are also obtainable at the above rate from the superintendent registrar of the district in which the birth, death, or marriage occurred.

FEES FOR MARRIAGE AT REGISTRY OFFICE.

	s.	*d.*
For entering notice of a marriage without licence into the marriage notice-book...	1	0
For entering notice of a marriage by licence into the marriage notice-book, 1*s.*; stamp duty, 2*s.* 6*d.*	3	6

MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed 27th June, 1892; came into force 1st Jan., 1893. Order in Council passed 28th Oct., 1892, laying down Regulations for Marriages under the Act.

British subjects desirous of being married at an embassy, legation, or consulate, must give seven days' notice of the intended marriage, but one of the parties at least must have resided for that time in the district immediately preceding the giving of such notice. After the suspension of such notice for fourteen days the marriage may take place, provided one or both parties have resided for three weeks immediately preceding within the consular district. In cases where one of the parties only has dwelt within the district of the officer by whom the marriage is to be solemnized, the non-resident party, if resident abroad, must give notice to the Consular officer for the district in which he or she resides; or, if resident in a place in the United Kingdom, the same notice must be given as if that party were about to be married at that place, and in England or Ireland shall be given to the superintendent registrar, or registrar, and in Scotland shall be given by proclamation of banns. In either case it is necessary that the non-resident party shall have had his or her abode in the marriage district (whether in the United Kingdom or abroad) for three consecutive weeks immediately preceding the date of the declaration required before the marriage can take place, and notice of the intended marriage must be given during those weeks. A Consular Officer holding a warrant for a district can only solemnize a marriage at his own official house. He cannot solemnize a marriage at the office of any subordinate consular officer, or elsewhere. No marriages performed at any other place are valid under the Foreign Marriage Act. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present; and an oath, declaration or affirmation must be made by both parties with reference to their age, and parents' consent, if minors.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of 18th August, 1892, and are payable to His Majesty's Govt:—

	£ s. d.
For receiving notice of an intended marriage	0 10 0
For receiving notice of a caveat	1 0 0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	0 10 0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place	0 5 0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same	1 0 0

Marriages may be solemnized 8 a.m. to 3 p.m.

The ceremony, if a marriage under the Foreign Marriage Act, may be performed by, or in the presence of, any Ambassador, Minister, Chargé d'Affaires, or any of the Secretaries authorised for that purpose, or by any Consul-general, Consul, Vice-consul, Consular agent (or any person duly authorised to discharge their duties), or Pro-consul, provided that such consular officer is furnished with a warrant signed by the Secretary of State for Foreign Affairs. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church. If the service be not that of the Church of England, the contracting parties must make a declaration before the Marriage Officer to the effect that they know not of any lawful impediment why they may not be joined in matrimony, and that they call upon the persons present to witness that they take each other respectively to be lawful wedded husband and wife. In the absence of any religious ceremony, such declaration is sufficient.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

Marriages may also be solemnized under the "Foreign Marriage Act, 1892," before any governor, high commissioner, or resident, who may be duly authorised to that effect, and also before the commanding officers of any of His Majesty's ships on a foreign station.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

Any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, by virtue of the Marriage with Foreigners Act, 1906, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

MARRIAGES IN SCOTLAND.

The marriage laws of Scotland are peculiar among those of all nations for the latitude allowed the contracting parties, and, beyond requiring proof of present consent, the utter absence of direction as to celebration. No religious ceremony is obligatory, although the intervention of the Church is recognised and is becoming more usual in practice. That the parties give their free and serious consent is the only requisite. Males over fourteen and females over twelve may contract marriage without consent of their parents or guardians.

Marriages are of two kinds: (1) Those solemnized by a minister after (*a*) banns, or (*b*) publication of notice by the Registrar, called Regular Marriages; and (2) those celebrated without the assistance of a clergyman, called Irregular Marriages.

On Banns.—The proclamation of banns in Scotland has been customary authentically since 1242, and is probably of greater antiquity. It is regulated chiefly by the Acts of Assembly of the Church of Scotland. One of the parties (if not already domiciled in Scotland) must have resided in that country for six weeks previous to the proclamation, and in the parish where the banns are to be proclaimed for the space of fifteen clear days immediately preceding. The banns are proclaimed in the parish church (*i.e.*, the church in the parish of the Established Church of Scotland) on two separate Sundays during service, but it is customary to complete the publication by proclamation at two services on the same Sunday. Where the parties reside in different parishes, the proclamation is made in both. There is no provision for cases where one of the parties resides in England, but it is usual to accept an English certificate. Episcopalians, unlike other Dissenters in Scotland, have privilege of proclamation also in their chapel. Application for proclamation of banns is made to the session clerk of the parish church. A certificate of residence signed by two householders is usually required to accompany the application. The fee for banns is 2*s.* 6*d.*

The certificate of publication of banns is authority to a clergyman of any denomination to celebrate the marriage. After the lapse of three months the banns are useless. The marriage must take place in presence of at least two witnesses capable of giving evidence. It need not be celebrated in a church, but may be in a dwelling-house or elsewhere, and at any hour; the time and place is a matter of absolute indifference to the law. After the marriage a schedule, signed by the parties, the clergyman, and two witnesses, must be transmitted to the registrar within three days, under penalties. Clergymen do not charge fees.

After Notice by Registrar.—This procedure is regulated by the Marriage Notice (Scotland) Act, 1878. Both parties must have resided in Scotland for at least fifteen days prior to publication of the notice. Application is made to the registrar, who publicly exhibits the notice of the intended marriage for seven days. At the expiry of this period, unless written objections have been filed, the registrar issues a certificate of publication, which is equivalent in effect to banns. The fee is 1*s.* 6*d.* Roman Catholics avail themselves of this method exclusively.

Irregular Marriages.—By declaration or acknowledgment. One of the parties must have resided in Scotland for twenty-one days immediately preceding. The parties, being capable of marriage and without legal impediment, may express either verbally or in writing, in presence of two witnesses (to whom the parties are known) capable of giving evidence, their mutual consent to take each other then and there for husband and wife. This act constitutes marriage. Registration is not essential to the validity of the marriage. If, however, it is desired to register the marriage, application is made to the sheriff of the county where it has been contracted. It is advisable to employ a solicitor to conduct the matter. After examination on oath of the parties and witnesses, and on being satisfied on the facts, the sheriff issues an order to the registrar to register the marriage and grant a certificate of registration. The fees are £1 5*s.*

BRITISH NATIONALITY AND NATURALIZATION.

NATIONALITY.—The following are, by the law of England, deemed to be British subjects:—

1. All persons born in His Majesty's dominions, whether of British or of Foreign parents.
2. Children of natural-born British subjects, wherever born.
3. Grandchildren of natural-born British subjects, wherever born.
4. Persons naturalized (*a*) By Special Act of Parliament, (*b*) Under the provisions of the "Naturalization Act, 1870."

The above does not apply to married women, who are deemed to be subjects of the state of which their husbands for the time being are subjects.

Natural-born British subjects can only deprive themselves of British nationality, (1) If they happen to be born in the British dominions of foreign parents, in which case they may, if of full age and if under no disability, make a declaration of alienage; (2) If they voluntarily become naturalized in a foreign state.

British subjects born in foreign countries sometimes become, by the law of the country of their birth, subjects or citizens of that country. In such case they may, by the law of England, when of full age, and if under no disability, make a declaration of alienage, and they then cease to be British subjects. Should they retain their British nationality, and continue to reside in the country of their birth, their British nationality will not avail them if claimed as subjects or citizens of the country in question.

NATURALIZATION.—The ordinary way of becoming a British subject is by fulfilling the requirements of the "Naturalization Act, 1870. The applicant must either have resided in the United Kingdom for a term of not less than five years, or have been in the service of the Crown for a similar period. He must also furnish evidence of his intention, when naturalized, either of residing in the United Kingdom, or of serving under the Crown. All applications for certificates of naturalization should be addressed to the Secretary of State for the Home Department.

Privileges of naturalized British subjects:

"An alien to whom a certificate of naturalization is granted shall in the United Kingdom be entitled to all political and other rights, powers, and privileges, and be subject to all obligations, to which a natural-born British subject is entitled or subject in the United Kingdom, with this qualification, that he shall not, when within the limits of the foreign state of which he was a subject previously to obtaining his certificate of naturalization, be deemed to be a British subject unless he has ceased to be a subject of that state in pursuance of the laws thereof, or in pursuance of a treaty to that effect."

With reference to the last paragraph of the foregoing extract, it may be mentioned that the only country with which Great Britain has yet concluded a treaty on the subject of naturalization is the United States of America.

A natural-born British subject, who has become naturalized in a foreign country, may obtain a certificate of re-admission to British nationality in fulfilling the conditions required in the case of aliens applying for a certificate of naturalization.

The children of naturalized British subjects, if born in the British dominions, are by the law of England deemed to be British subjects. If born abroad, they are only deemed to be naturalized British subjects provided that their father was naturalized under the Naturalization Act, 1870, and that during infancy they became resident with their father, or mother being a widow, in any part of the United Kingdom.

A British colony may legislate on the subject of naturalization within its own limits.

The following fees are leviable under the Naturalization Act, 1870:—

	£	*s.*	*d.*
On grant of certificate of naturalization	5	0	0
For registration of declaration, with or without oath of allegiance	0	10	0
For certified copy of any declaration or certificate with or without oath	0	10	0

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate linguæ*, but are triable in the same manner as if they were natural-born subjects.

UNDESIRABLE ALIENS.—An undesirable alien —*e.g.*, one who is without means, or who is a lunatic, or an idiot, or who has been guilty in another country of an extraditable offence—may be prevented landing in the United Kingdom. An alien may also be expelled from this country if he prove to be "undesirable" within the meaning of the Aliens Act, 1905.

NOTIFICATION OF INFECTIOUS DISEASES.

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act of 1889 were extended to the whole of England and Wales on the 1st January, 1899. Every case of infectious disease, as defined by the Act, is to be notified to the

Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certificate to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40*s.* fine. No payment is made for the notices required to be given by persons in the house, but the medical man gets 2*s.* 6*d.* for every case in his private practice and 1*s.* for every case in a public institution of which he is officer.

The diseases to which the Act applies are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and the following fevers: typhus, typhoid, enteric, relapsing, continued, or puerperal. Plague must also be notified, in consequence of an Order issued in 1900. The local authority may order that the Act shall apply to any infectious disease other than those just mentioned, but such an order must be approved by the Local Government Board. In some districts the following have been declared infectious: measles, rötheln or German measles, whooping cough, chickenpox, mumps, and yellow fever. In the case of London the provisions of the Public Health (London) Act, 1891, are similar to those now extended to the rest of the country.

INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED.—By the Public Health Act, 1875 (as amended by the Public Health Act, 1907), it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer, or causes or permits such sufferer to be so exposed; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty of £5. A person suffering from such disorder who enters a public conveyance is liable to a fine of 40*s.*; and if he so enters without notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection; but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house, &c., in which any person has been suffering from any dangerous infectious disorder without having the same disinfected to the satisfaction of a medical practitioner, as testified by a certificate signed by him—penalty not exceeding £20, or imprisonment with or without hard labour, not exceeding one month. By the Public Health Act, 1907, the Local Government Board has power to declare that this Act shall be in force in any specified district. Under this Act, a person suffering from an infectious disease must not engage in any trade unless he can do so without spreading the disease; nor may he take any book from a public or circulating library, or allow any such book to be returned after it has been exposed to infection. Clothes exposed to infection must not be sent to a public laundry unless they have been disinfected. A child who has been suffering from an infectious disease must not attend school without a medical certificate. Dairymen must notify infectious diseases existing among their servants, and the owner or driver of a public vehicle which has conveyed an infectious person must notify the same to the district medical officer. No wake may be held over the body of a person who died of an infectious disease. Where the Infectious Disease (Prevention) Act, 1890, is in force, where any suitable hospital is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, or cannot be effectually isolated, may, on a certificate signed by a medical practitioner, and with the consent of the hospital, be removed by order of any justice to such hospital. Similar provisions apply to the Metropolis. The occupier of a house in which there has been infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. Where it appears to any District Council that any house is in such a condition that the health of any person is affected or endangered thereby, or that whitewashing, &c., would tend to prevent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, &c., the same.

WILLS, TESTATORS AND EXECUTORS.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. Thus a widow may find that the estate, a life policy perhaps, is not all hers, but has to be shared with a distant cousin of her husband's. Negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—*e.g.*, the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot ex-

plain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (*i.e.*, the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration *of any kind whatever* must be made after the will is executed If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others :—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows :—"And I revoke all former wills and codicils. Dated this tenth day of December, 1890."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient :—

Signed by the testator [or testatrix, as the case may be], in the presence of us, both present at the same time who in his [or her] presence and in the presence of each other have hereunto set our names as witnesses. THOMAS SMITH [Signature of Testator.]

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be :—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin :—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows :—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and

trustees." The Public Trustee may be appointed executor or trustee of a will. *See* PUBLIC TRUSTEE, *post*.

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life [or during her widowhood], and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

WHO CANNOT MAKE A WILL.—A minor cannot make a will. A woman married before the 1st of January, 1883, can make a will with her husband's consent; but without such consent she can only (under the Married Women's Property Act) bequeath property accruing to her after that date except in certain circumstances, respecting which it is advisable to consult a solicitor. But a woman married after that date can dispose by will of all property belonging to her at the time of her marriage, and of all property acquired thereafter, in all respects as if she were an unmarried woman.

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will: so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1886, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor may be stated briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1894, duties are charged on *all* property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy on succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL.

To find a will proved before 1st January, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a *copy* obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Registries established by the Act of 1857 are the following:—

Registry.	*Registrar.*	*District.*
Bangor.....	G. H. Reid (£350)	Carnarvon and Anglesey.
Birmingham	W. G. Middleton (£800)	Warwickshire.
Blandford	H. F. C. de Crespigny (£250)	Dorsetshire.
Bodmin ...	W. H. L. Shadwell (£500)	Cornwall.
Bristol.....	John Henry Clark (600)	Bristol & Bath, present County Court Districts.
Bury St. Edmunds	Ronald Southey (£200)	Suffolk, West.
Canterbury	H. Mapleton Chapman (£350)	Kent, East, and Canterbury.
Carlisle ...	W. C. Butler (£700)	Cumberland and Westmoreland.
Carmarth'n	W. Morgan Griffiths (£400)	Carmarthen, Cardigan, Pembroke, with the Deaneries of East and West Gower (including the town of Swansea) in the county of Glamorgan.
Chester ...	H. A. Jenner (£800)	Chester.
Chichester	W. B. B. Freeland (£200)	Sussex, West.
Derby	C. T. E. Wilde (£600)	Derbyshire.
Durham ...	W. J. Maynard (£500)	Durham.
Exeter.....	W. H. Bailey (£1,000)	Devonshire.
Gloucester	R. Fuller (£600) ...	Gloucestershire (except Bristol County Ct. Dist.).
Hereford...	T. C. Paris (£400)...	Herefordshire, Radnor, and Brecknock.
Ipswich ...	G. Pritchard, B.A. (£450)	Suffolk, East, & Essex, North.
Lancaster	Baldwin Dacres Adams (£700)	Co. of Lancs., except the Hundreds of Salford and West Derby, and the City of Manchester.
Leicester...	H. Pickering Clarke (£500)	Leicester and Rutland.
Lewes	J. W. Heisch (£350)	Sussex, East.
Lichfield...	H. G. Fausset-Osborne (£800)	Staffordshire.
Lincoln ...	G. L. Simpson (£500)	Lincolnshire.
Liverpool	J. C. Bromfield (£750)	W. Derby H'nd'd.
Llandaff ...	Charles H. Wilkinson (£350)	Glamorgan (except Deaneries of E. and W. Gower), Monmouth.
Manchest'r	R. S. O. Mais (£800)	Manchester and Salford H'ndr'd.
Newcastle-on-Tyne	H. E. Edwards (£500)	Northumberland.
N'th'mpton	C. C. Becke (£250)	Northants, S'th, and Beds.
Norwich ...	L. D. Powles (£700)	Norfolk.
Nottingh'm	Dr. F. Oswald (£400)	N'tinghamshire.
Oxford	T. M. Davenport (£500)	Oxon, Berks, and Bucks.
Peterboro'	C. S. Magee (£400)	Northants, N'th, Hunts, & Cambs.
St. Asaph	J. P. Lewis (£350)	Flint, Denbigh, & Merioneth.
Salisbury...	H. Elliott Fox (£350)	Wiltshire.
Shrewsb'ry	R. K. A. Green (£500)	Salop and Montgomery.
Taunton ...	E. T. Alms (£350)	Somerset, West.
Wakefield	G. Bridgeman (£1,200)	Yorks, West Riding.
Wells	J. R. Holligan (£350)	Somerset, East, except Bath C. C. District.
Winchester	C. Wooldridge (£500)	Hampshire.
Worcester	G. F. Adams (£500)	Worcestershire.
York.....	H. A. Hudson (£1,000)	Yorks, N. & E. Riding (including York).

SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. Since 1857 this depository has been provided by the State under sect. 91 of the Act 20 & 21 Vic. c. 77; but the provision has been almost a dead-letter. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10*s.* for the deposit, of 2*s.* 6*d.* for entering a minute thereof, and 2*s.* for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar. (*See also* PUBLIC TRUSTEE, *post.*)

TRUST FUNDS AND INVESTMENTS.

BY RULE OF THE SUPREME COURT, DATED NOVEMBER, 1888, trustees may invest trust funds in the following securities:—

2¾ per Cent. Consols; to be reduced, 5th April, 1903, to 2½ per cent. Consols and Reduced 3 per Cent. Annuities. 2¾ per Cent. and 2½ per Cent. Annuities. Exchequer Bills. Bank Stock. India 3½ per Cent. and 3 per Cent. Stocks. Indian Guaranteed Railway Securities. Colonial Government Stocks guaranteed by Imperial Government. Mortgage of freehold or copyhold estates in England or Wales. 3 and 3½ per Cent. Metropolitan Consolidated Stock.

Debenture, preference, guaranteed, or rentcharge stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on ordinary stock or shares.

Nominal stocks or nominal debenture stocks issued under the Local Loans Act, 1875, provided in each case that such stocks shall not be liable to be redeemed within a period of fifteen years from the date of investment.

Local Loans Stock under the National Debt and Local Loans Act, 1887.

THE RULE OF COURT OF NOVEMBER, 1888, will be little referred to now that all the foregoing items in more extensive, and in some cases slightly different, language, are authorized by the Trustee Act, 1893, the more important clauses of which, especially where the Rule of Court is varied, may be summarized as follows:—This Act, which consolidates the enactments relating to trustees, authorizes mortgages on freeholds, or property equivalent to freehold, not only in England and Wales, but also (where not prohibited) in Ireland and Scotland. A very few leaseholds, viz., terms of 200 years, at a nominal rent, are also authorized by the Trustee Act, 1893.

THIS ACT ALSO AUTHORIZES investments by trustees upon any securities guaranteed by Parliament, and these include the following:—Certain Colonial Government stocks, the Turkish Loan of 1855, the Egyptian 3 per cent. Guaranteed Loan, and one or two others. In addition to Metropolitan Stock, any stocks of the London County Council are now authorized; also any Corporation or Municipal stocks of the cities or boroughs (about 60 in number) having at the last census a population exceeding 50,000. Also stocks, &c., under certain conditions, of waterworks companies and of water commissioners. Another very important addition to the list of trust securities is this: Preference, debenture, guaranteed, or rentcharge stocks of British railway companies which have paid 3 per cent. on their ordinary stocks for ten years. This includes all the great lines in England, Ireland, and Scotland, except a few, *e.g.*, the Great Eastern, and Chatham and Dover, which have not, for the whole period of ten years, paid regular dividends to their ordinary shareholders.

THE ACT FURTHER AUTHORIZES trust investments in certain Indian Railways guaranteed by the Indian Government, which can be found on reference to the Stock Exchange official lists. But with regard to the entire list, a trustee cannot invest in anything which is (directly or by implication) prohibited by the terms of his trust.

THE PUBLIC TRUSTEE.

In the article upon this subject in our last issue the success of the Public Trustee, as a somewhat novel enterprise on the part of the State, was necessarily a matter of conjecture. After 21 years of legislative effort, the Act of 1906 was passed and came into force on January 1, 1908, creating a Public Trustee, a Government official, by means of whom the State acts as executor and trustee to anyone desiring to make use of his services. No Parliamentary return of the business in the Department has yet been issued, but it is understood that the scheme is a great success—persons, both rich and poor, making use of the Public Trustee in all parts of the country, while the value of the estates now being administered by him, or as to which the Public Trustee has agreed that he will act as executor and trustee, is said to exceed some £21,000,000; rich men appearing to seek the security of the State guarantee, while the poor desire both this security and the skilled supervision. A person making a new will may appoint the Public Trustee executor and trustee thereof in the simplest way possible: *e.g.*, "*I appoint the Public Trustee executor and trustee of this my will,*" is enough; or, if the will is already made, then the appointment may be effected by a codicil thereto, care being taken to make it clear whether the appointment of the Public Trustee is in addition to the executors and trustees already appointed, or in place of them. A codicil requires to be witnessed in the same way as a will. A testator in his lifetime need not ask the Public Trustee if he will act under the will before appointing him, for the Public Trustee, having been specially created to act in these offices, is not likely to refuse to do so when the time comes for the will to take effect, except, possibly, in cases of a most unusual character. However, it would seem to be the common practice, and one to be commended, for testators to communicate with the Public Trustee when appointing him, and unless this has been done a written application asking him to take office has to be made by someone interested when the will takes effect. Wills, when made, may also be deposited in the Department for safe custody free of charge. To appoint the Public Trustee under a proposed settlement is also a simple matter, it being the policy of the Department to keep its procedure flexible, and free from all fixed forms. All that is required is to submit the heads of the proposed settlement to the Public Trustee, either verbally or by letter, or by means of a draft of the intended settlement. A formal written application asking him to accept the office should also be put in. If, in reply, the Public Trustee intimates that he will accept the trusteeship proposed, the deed may be drawn up and executed, the transfer of the trust estate following in due course by the appropriate means of conveyance, according to the nature of the property. In the case of an existing trust, whether arising under a will or settlement, where there is a vacancy in the trusteeship, much the same procedure is followed as in the case of new trusts just referred to. The Public Trustee, in being invited to take over the trust, should be fully informed as to its terms, and formal written application to him to accept office should be made. He then says whether he will take up the office or not. If he assents, a draft of a proposed deed effecting

his appointment is submitted to him, and a transfer of the trust estate follows. The Public Trustee acts as co-executor or sole executor, or as co-trustee or as sole trustee. His appointment to existing trusts generally enables all the other trustees to retire if they wish to do so. He may also be appointed custodian trustee—a form of office where he takes care only of the capital and income of the trust, but does not interfere in the active management of the estate. This form of trusteeship is perhaps suited to cases of large landed estates, but in the ordinary cases of personal property it seems to introduce, possibly, a needless elaboration and expense in the trust; and, in so far as it attempts to keep alive the system of the private trustee, its success is doubtful. The Public Trustee may act in a trust involving the management or carrying on of a business, but if as an ordinary full trustee, then, except with the consent of the Treasury, for a period only not exceeding eighteen months, and with a view to sale or winding-up. He may, however, act as custodian trustee where a business is involved without these restrictions, but he does not in such case act in the active management of the business.

The Public Trustee has also been empowered under the Statute to act as administrator, either where there is no executor under a will or no will at all. This letting in of a stranger to administer the estate of a deceased person is a novel departure in our law, and doubtless in many cases will prove a great benefit to those interested in an estate. Further, power is also given to transfer an executorship even after probate has been obtained, but the sanction of the Court has in such case to be secured. Frequently, where a transfer of probate is desired, and this sanction of the Court appears to be a difficulty, a solution suggested will be to complete the executorship as quickly as possible, and then transfer the trusteeship, should there be a continuing trust, in the simple manner already described. Where the gross capital value of any estate of a deceased person is under £1,000, and the persons interested are persons of small means, then the Public Trustee, under sec. 3 of the Act, has valuable and peculiar powers for taking over the administration of the estate, and the fees in such cases are somewhat below the usual fees. Furthermore, in such cases the Public Trustee is given direct access to the Court, and has all the powers of a Master of the Supreme Court acting in the administration of an estate. Another original power given by the Statute is that by which (sec. 13) the Public Trustee can order an audit and investigation into the condition and accounts of any trust. This provision should prove to be a valuable protection to any anxious trustee or beneficiary. The expense of the audit is in the discretion of the Public Trustee, and may fall on the estate, or on the applicant, or on the trustees if meriting such an award, or doubtless divided as circumstances may suggest as equitable. As to investments, the Public Trustee has all the powers and duties of a private trustee. He, like any other trustee, is bound by the provisions as to investment in the will or trust instrument; and in the absence of such provisions he is, again like a private trustee, bound to seek trustee investments only. But it is understood that the Public Trustee consults and endeavours to carry out the wishes of those interested in the trust, so far as the terms of investment clauses and the security of the trust fund permit him, preferring, therefore, to be armed with moderately wide and varied powers, so that the experience of a trust estate need not be confined to one political or commercial system. The fees are very low, and are so specially conceived as to permit of the expense of legal or local assistance, such as agents in cases in the provinces, being incurred without increasing unduly the expense of administration. It is also understood that the Public Trustee does not disturb any existing practice in the trust as to the employment of bankers, brokers, or solicitors. The Department is not allowed to work for a profit, but merely to pay expenses. The principal fees are of two kinds—a fee on capital and a fee on income. The fee on capital is taken in two instalments, half at the beginning and half at the end of the trust, such half ranging as follows :—

On the first £1,000	15*s.*	per cent.
,, excess of £1,000 to £20,000	5*s.*	,,
,, ,, £20,000 to £50,000	2*s.* 6*d.*	,,
,, ,, £50,000	1*s.* 3*d.*	,,

The fee on income is 1 per cent. if, as is usual, the income be paid direct to the person entitled, otherwise 2 per cent. Fee on investment, if and when incurred, ¼ per cent., which includes the cost of brokerage. There is power to vary these fees to meet the peculiar circumstances of special cases, but, owing to the low range of the fees, the power of reduction is probably but seldom exercised.

A prospectus giving full information can be obtained on application to the above address, or at any post office.

Public Trustee, Charles John Stewart.
Principal Clerks, E. K. Allen; L. J. Fulton.
Accountant, H. J. J. Freeman.
Chief Clerk, A. H. Cobbett.
Securities Dept., E. W. Thomas.
General Office, S. A. Poynder; W. C. McMillan.
Office: 3 and 4, Clement's Inn, Strand, W.C.
Telephone Nos.: 27 Central and 2218 Central.
Office Hours: 10 to 4; Saturday, 10 to 1.

ILLEGITIMACY.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5*s.* a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A menial servant found to be *enceinte* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action.

PERSONAL PROPERTY, INCLUDING LEASEHOLDS.

TABLE *of Succession applicable to England and Scotland, and showing persons entitled to administer.*

The persons entitled to administer are shown in brackets.

IN EACH INSTANCE IT IS SUPPOSED THERE ARE NO NEARER RELATIONS THAN THOSE NAMED.

[* *Where this is prefixed the Regulation applies to Scotland only.*]

By the Intestates' Estates Act, 1890, a very important change was made in the law as regards provision for widows of men dying intestate and without issue. Under this Act the widow in such a case is entitled to the whole estate both real and personal if under £500 in value; if over that amount she takes £500 out of the real and personal estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

If the Intestate die, leaving	*His representatives take in the proportions following:—*
Widow only	Half to widow. Half to the Crown. [Widow.]
Widow and child or children	One-third to widow, two-thirds to children in equal shares. In case of deceased children who have left issue, such issue take amongst them their deceased parent's share. [Widow.] *One-third to widow. One-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate during life must collate the advances). One-third amongst living children *per capita* and issue of deceased children *per stirpes*. See NOTE A, next page.
Widow and father	Half to widow. Half to father. [Widow.]
Widow and mother, no father	Half to widow. Half to mother. [Widow.] *Half to widow, one-sixth to mother. Two-sixths to Crown.
Widow, brothers or sisters	Half to widow. Half equally amongst brothers and sisters, whether of the whole or half blood; if a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share. [Widow.]
Widow, mother, nephews or nieces	Half to widow. One-fourth to mother. One fourth to nephews and nieces *per stirpes*. [Widow.] *Half to widow. One-sixth to mother, two-sixths to nephews and nieces *per stirpes*.
Husband, with or without children	All to husband. [Husband.] *Half to husband. Half to wife's next-of-kin. [Husband.]
Father, brothers, and sisters	All to father. [Father.] *One-half to father. One-half equally amongst brothers and sisters.
Mother, brothers, and sisters	All equally. [Mother.] *Mother one-third. Brothers and sisters two-thirds equally.
Mother, but no other kin	All to mother. [Mother.] *One-third to mother. Two-thirds to the Crown.
Child, children, or grandchildren by deceased child	Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share. [Any number of children not exceeding three.]
Brother or sister, and nephews or nieces	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share. [Brother or sister.]
Brother or sister, and grandfather	All to brother or sister. [Brother or sister.]
Brother or sister, and uncles or aunts	All to brother or sister. [Brother or sister.]
Grandfather, no nearer relation	All to grandfather. [Grandfather.]
Father's father, and mother's mother	Equally to both. [Either or both.]
Grandmother, uncles, and aunts	All to grandmother. [Grandmother.] *All to uncles and aunts if paternal.
Great-grandfather, uncles, and aunts	Equally *per capita*. [To either or any number not exceeding three.]
Uncles and aunts	All equally. [To either or any number not exceeding three.]

Uncle, and deceased uncle's child	All to uncle. [Uncle.]
Uncle by mother's side, and deceased uncle or aunt's child	All to uncle. [Uncle.] *Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle.
Aunts, nephew, and niece	All equally. [Either not exceeding three.] *Nephew and niece.
Cousins	Equally *per capita*. [Any number not exceeding three.]
Nephew by brother, and nephew by half-sister	Equally *per capita*. [Any number not exceeding three.] *All to nephew by brother.

NOTE A.—Taking *per capita* is taking by head individually. Taking *per stirpes* is taking by descent or representation. Thus, if A. die leaving three brothers or sisters, and no nearer kin, they each take an equal part of his personal estate in his or her own right, *i.e.*, *per capita*. If there are also children of a deceased brother or sister they share in the estate by taking amongst them the share which their deceased parent would have taken had he or she survived, *i.e.*, *per stirpes*.

NOTE B.—By English Law, brothers and sisters of the half blood share equally with the whole blood. By the Scottish Law, brothers and sisters german (that is, by the same father and mother) and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father only) and their issue. And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother only) and their issue.

NOTE C.—Posthumous children take equally with those born in the lifetime of their father.

Intestates' Estates—Real Property.

(N.B.—Leaseholds are Personal Property.)

TABLE of Descent of Real Property in England on death of an intestate. No illegitimate child is capable of inheriting real estate. Custom of Gavelkind (descent to all sons alike) still exists in Kent, and custom of Borough English (descent to youngest son) in divers ancient boroughs. The Dower (viz., widow's thirds) of widows married since 1833 is in the majority of cases barred.

In each instance it is supposed that there are no nearer relations than those named.

If Intestate die, leaving	*Real Property would descend to—*
Wife only, no blood relations	One-third to wife for life, rest to Crown; copyholds to lord of manor.
Wife and child or children, and children of a deceased child	One-third to wife for life in any case. Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female. If no son, rest to daughters equally. If daughters and grandchildren (sons and daughters of deceased daughter), rest to daughters and eldest son of deceased daughter.
Wife and father	One-third to wife for life; rest to father, if deceased purchased same, or had it left him by will.
Wife and mother	One-third to wife for life; rest to mother, there being no heirs on father's side.
Wife, brother, or sister, and children of a deceased brother or sister	One-third to wife for life in any case, rest to eldest brother or his issue. (*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.) Sister and children of deceased sister, rest equally between sister and nephew (eldest). Sisters and nieces, only, children of deceased sister, rest equally between sisters and nieces, nieces taking *per stirpes*.
Wife, mother, nephews, and nieces	One-third to wife for life; rest to nephew (eldest), or nieces, if brother left no son.
Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters)	One-third to wife for life in any case; rest to eldest brother. Rest to nieces, equally, if children of elder brother deceased.
No wife or child or issue of a deceased child	Lineal ancestor paternal, males of whole blood first.
Children by one or more wives, and the issue of deceased children	All to eldest son, or his issue. (*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.) Daughters equally.
Husband and child or children	Husband for life; afterwards to only child or to eldest son or issue of a deceased eldest son. If all daughters, to them equally.
Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father	All to mother in default of lineal ancestors on the father's side, or issue of such ancestors.
Mother, and brothers and sisters	All to eldest brother.

Mother and sisters	All to sisters.
Father, and brothers and sisters	All to father.
Child and grandchild by deceased child	*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.
Brother and grandfather	All to brother.
Brother's grandson, and brother or sister's daughter	All to great-nephew, if eldest brother's grandson. All to brother's daughter, if child of eldest brother.
Brother and two aunts	Brother, all.
Brother and wife	One-third to wife for life; rest to brother.
Grandfather (no nearer)	All to grandfather.
Father's father & mother's mother	All to father's father.
Grandmother & uncle, or aunt on father's side (no nearer)	All to uncle or aunt.
Uncle, and deceased uncle's child	Uncle, unless deceased uncle was elder brother, when his child takes all.
Uncle by mother's side, and deceased uncle or aunt's child	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
Two aunts, nephew, and niece, children of deceased brother	Nephew.
Uncle or aunt's children, and brother's grandchildren through a son	Eldest brother's grandson, or if granddaughters between them equally.
Nephew by brother, and nephew by half-sister	Nephew by brother.
Nephew by deceased brother, and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother.

NOTE A.—By the Land Transfer Act, 1897, the real estate of a deceased person devolves to the personal representative of the deceased, and probate and letters of administration may be granted in respect of real estate only, although there is no personal estate. The ultimate ownership of real estate is not affected by these provisions, which are for the convenience of administration. As to the persons entitled to administration of real estate, they are substantially the same as in the case of personal estate; but the Court shall, in granting letters of administration, have regard to the rights and interests of persons interested in the real estate, and the heir-at-law, if not one of the next-of-kin, shall be equally entitled to the grant with the next-of-kin.

INSTRUCTIONS FOR OBTAINING PROBATE OR ADMINISTRATION WITHOUT EMPLOYING A SOLICITOR.

THE entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 37. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as at present in force will be found in detail on page 370.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the District Probate Registries (see Appendix), application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

COMPANIES ACT, 1862.

FEES TO BE PAID BY STAMPS.

On registration, with a capital of £2,000, £2; £3,000, £3; £4,000, £4; £5,000, £5.

Five shillings extra per £1,000 above £5,000 up to £100,000; 1*s.* extra per £1,000 above £100,000; but no fee higher than £50.

Deed stamp 10*s.* to be put both upon Memorandum and Articles of Association.

Fees on Registration of Mortgage 10*s.* up to £200, £1 above £200.

For ad valorem stamp on capital see p. 457.

Hours at Somerset House.

Inland Revenue Office, 10 to 5. No money received after 4 (Saturdays, 1).

BANK HOLIDAYS.

ENGLAND AND IRELAND.—Banks of England and Ireland, and the Exchequer: Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day and December 26 or 27 (as the case may be). The Stock Exchange, in addition to the Bank holidays, is also closed on Jan. 1, May 1 and November 1. And *special* Bank Holiday *for Ireland*, March 17.

SCOTLAND.—New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

SCOTLAND has also special Quarter Term Days (see p. 34), and there are special holidays in Edinburgh (see pp. 30, 50), and Glasgow (see p. 42).

Voters' Qualifications.

I. PARLIAMENTARY ELECTIONS.

1. PROPERTY.

A. *England.*

i. Freehold Estate of clear yearly value of forty shillings, if owned in fee simple or fee tail, or in occupation, or acquired by marriage, marriage settlement, devise or promotion to a benefice or office.

ii. Lands of any tenure, of £5 clear yearly value, held for life.

iii. Leasehold

a. of £5 clear yearly value, original term being not less than sixty years.

b. of £50 clear yearly value, original term being not less than twenty years.

B. *Scotland.*

i. Lands and heritages in proprietorship of £5 yearly value as appearing in the valuation roll.

ii. Leasehold.

a. of £10 clear yearly value, original term, being not less than fifty-seven years or for life.

b. of £50 clear yearly value, original term being not less than nineteen years.

C. *Ireland.*

i. Freehold of £5 net annual value.

ii. Rent charges or leases for life or lives of £10 clear yearly value.

iii. Leasehold.

a. of £10 clear yearly value, original term being not less than sixty years.

b. of £20 clear yearly value, original term being not less than fourteen years.

N.B.—*The Property Qualification is confined to Counties and to Boroughs which are Counties Corporate.*

MISCELLANEOUS.

Mortgagee. A mortgagor in possession is entitled to vote, but the mortgagee becomes entitled on taking possession.

Trusts. The beneficiary, not the trustee, has the vote.

Joint Owners. Only one may now vote, unless they were all entitled to vote in 1884, or their interests were derived by succession, or they are partners in business on the land owned by them.

Freeholds. Two or more freeholds may be joined to make up the requisite value.

Property in Boroughs. Property situate in a borough, such as would give a vote for the borough, will not give one for the county unless the freeholder be disqualified for the borough vote by non-occupation.

Leaseholds. A lessee who has sublet does not lose his right to vote; but a lessee who has assigned loses the right. To be entitled to a vote, a sublessee or assignee of a sublease must be in actual occupation.

2. OCCUPATION

for twelve months, before registration of lands or tenements within a county or borough, entitled the occupier to a vote. This qualification is uniform throughout the United Kingdom.

"Occupier" means one who uses the premises either as a dwelling house or place of business. Continuous occupation is unnecessary, provided the occupier has the exclusive right to occupy. He or some other person must have been during twelve months rated to the poor in respect of the premises, and all poor rates made and allowed during the twelve months preceding January 5th paid on or before July 20th.

Residence required. In English and Scotch counties, and in Ireland, none, but in English boroughs there must be residence during six months of the qualifying year (four months being allowed for absence on duty or employment); in Scotch Boroughs during the whole year in or within seven miles of the borough.

£50 *Rental Franchise.* This qualification, resting on the occupation of land in counties at a yearly rent of not less than £50, is now virtually obsolete, but persons registered in 1884 with this qualification are entitled to be re-registered from time to time, so long as they retain it.

Service Franchise. Lodgers, licencees and servants do not enjoy the occupation Franchise, as they are neither owners nor tenants, but a servant if allowed to occupy land (only in counties) as a reward for service may be a tenant and therefore entitled.

N.B.—*Occupation Qualification extends to any part of a house separately occupied.*

3. RESIDENCE.

This Household Qualification is given to the "inhabitant occupier" throughout the United Kingdom (whether he occupies as owner, as tenant, or in virtue of any office, &c.) of a dwelling house (including flats and residential chambers), or any part of a house occupied as a separate dwelling, which has been rated, and for which rates have been paid by a certain date. There need not be actual inhabitancy, but there must be an intention of returning after a temporary absence, and a power of doing so without a breach of a legal obligation. So an undergraduate occupying college rooms from which he is excluded during vacation is not entitled to vote, nor a soldier occupying rooms from which he is required to be absent from time to time on duty.

In calculating the twelve months, a period not exceeding four months may be counted during which the house has been occupied and furnished by some one else, or during which the inhabitant occupier has been absent on duty in connection with any office, employment, etc.

Occupation in immediate succession of different premises in the same parliamentary county or borough is equivalent to continued occupation of the same premises during the qualifying period.

N.B.—*This rule applies both to occupation and Residence.*

4. LODGERS.

This qualification belongs to anyone in the United Kingdom who has resided in the same lodgings for twelve months next preceding July 15th, such lodgings being of the clear yearly value, unfurnished, of £10. The Lodger is not disqualified because he has occupied different lodgings of the requisite value in the same house, nor because he occupies them jointly with another lodger, if the aggregate value is sufficient.

5 Freemen.

Reform Act, 1832, left the franchise to freemen of towns in which, prior to 1832, such qualification gave a right to vote, but only to those who have acquired freedom by birth or servitude, and who, during the year preceding claim, have resided in or within seven miles of the town.

In the City of London a freeman, to obtain a vote, must also be a Liveryman of one of the City Companies. He may also acquire freedom by purchase. He must reside within 25 miles of the place of poll.

6. The Universities.

Graduates on electoral roll of Oxford, Cambridge, Dublin, and London, the Chancellor, the Professors, the members of the University Court and General Council of Edinburgh, Glasgow, St. Andrews and Aberdeen, are qualified to vote for their respective Universities.

Registration.

i. Property Voter must claim in order to get on to the Register, but once there he need not make a fresh claim. He must have been in possession, or receipt of rents, in case of freeholds for six, leaseholds for twelve calendar months prior to July 15th in the year in which they claim to be registered. This is not necessary where the qualifying property is freehold, and has been acquired by marriage, marriage settlement, etc.

ii. Occupiers need not claim at all, unless omitted by the Overseers, whose duty it is to register their names.

iii. The Lodger Voter has to claim afresh every year.

Claims for the Old Lodgers' List must be sent in by July 25th, all other new claims by August 20th. The Register, when made up, comes into force on the ensuing January 1st, unless accelerated by special legislation.

Disqualifications.

Aliens, idiots, lunatics (except during lucid interval), infants, peers (except Irish actually elected and serving in the House of Commons), convicted felons (until freed by pardon or otherwise), persons convicted of corrupt practices, either at Parliamentary or Municipal Elections seven years from date of conviction), and School Board Elections (six years from date of election), persons convicted of illegal practices at Parliamentary and Municipal Elections (five years from date of conviction), persons employed at elections, or within six months before, for pay or reward, bankrupts, persons in receipt of parochial or other relief, persons with fictitious or collusive qualifications (*e.g.*, faggot voters), corporations, returning officers (unless the votes are equal), corporations, and women.

I MUNICIPAL AND COUNTY COUNCIL ELECTIONS (ENGLAND AND WALES).

A. City of London.

1. Election of Lord Mayor, Sheriffs, and Chamberlain.

The Electors are Liverymen.

2. Election of Aldermen, Common Councilmen, and Ward Officers.

The Electors are (*a*) Freemen occupying premises in the city, and rated in that respect at not less than £10 per annum. (*b*) Male persons who have occupied for twelve months premises in the city, and are similarly rated. (*c*) Persons registered as Parliamentary Electors for the city by virtue of the borough occupation Franchise. (*d*) Persons otherwise entitled to be registered as Parliamentary Electors for the city, but disqualified by non-residence.

B. Other Boroughs and Counties

1. Election of Mayor or Chairman.

The Electors are the Councillors or County Councillors.

2. Election of Aldermen or County Aldermen.

The Electors are the Councillors or County Councillors.

3. Election of Elective Auditors.

The Electors are the Burgesses. This, however, does not apply to County Councils, whose accounts are audited by district auditors appointed by the Local Government Board.

4. Election of Councillors or County Councillors.

The County Electors, together with the burgesses of every borough within the county, form the Electorate for the County Council. A qualification which in a Municipal Borough would entitle a person to be a Burgess will, if held in a county, entitle him to be a County Elector.

The Municipal Franchise differs from the Parliamentary Borough Franchise in two important particulars—

a. The Franchise is, except in case of land, irrespective of the value of premises occupied.

b. Women may vote.

The qualifications are—

i. Occupation in the borough of a building of any value, or of land of the clear yearly value of £10.

ii. Residence in or within seven miles of the borough.

iii. Being rated and paying rates.

There are two additional qualifications for the County Franchise—

i. Being a peer owning property in the county.

ii. Being registered as an ownership voter for Parliament in a county.

Disqualifications.—These are the same as in the case of Parliamentary Electors, except that peers, women, bankrupts, and persons with fictitious qualifications are not disentitled. Women may not vote in the City of London.

III. PARISH COUNCILS ELECTIONS (ENGLAND AND WALES).

The Electors are the "Parochial Electors," *i.e.*, those persons registered in such portion, either of the Local Government Register (*see* II.), or the Parliamentary Register (*see* I.) of Electors, as relates to the parish.

N.B.—A woman is not disqualified by marriage from being on any Local Government Register of Electors, but husband and wife cannot both be qualified in respect of the same property.

IV. DISTRICT COUNTY ELECTIONS. URBAN AND RURAL (ENGLAND AND WALES).

The Electors are the "Parochial Electors" of the parishes in the district.

V. LONDON BOROUGH COUNCILS.

The Mayor is elected by the Council, the Aldermen by the Councillors, and the Councillors by the "Parochial Electors."

CANDIDATES' QUALIFICATIONS.

I. Parliamentary Elections.

The following are not eligible: Aliens, women, minors, lunatics, English and Scotch peers, Irish representative peers, judges, the holders of various offices, clergy of the Established Church, and of the Roman Catholic Church, and ministers of the Church of Scotland, Government contractors, persons holding pensions of the Crown (other than diplomatic and civil service), convicted felons, and bankrupts.

II. Municipal and County Council Elections.

1. Mayor or Chairman must be chosen from the Aldermen or Councillors, or persons qualified to be such.

2. Aldermen must be Councillors or persons qualified to be such.

3. Elective Auditors must be qualified to be Councillors, but not members of the Council, town clerk, or treasurer.

3. Councillors must be, and entitled to be, burgesses, resident within seven miles of the borough, or within fifteen miles, if they possess a property qualification of £1,000, or the persons qualified to elect to the office of Councillor.

Disqualifications.—Officers on the active list, bankrupts, persons convicted of crime or corrupt or illegal practices, and women are disqualified for all corporate office. A person is disqualified for election as Councillor if and while he is an elective auditor, or revising assessor, or holds any office of profit other than that of Mayor or Sheriff under the Council, or is directly or indirectly interested in any contract or employment with or on behalf of the Council.

N.B.—Clerks in holy orders, and other ministers of religion, are qualified for election as County but not Borough (except London Borough) Councillors or Aldermen.

III. Parish Council Elections.

Persons eligible are: "Parochial electors," or persons who have resided during the whole twelve months preceding the election in or within three miles of the parish. Persons may be disqualified by receipt of parochial relief, bankruptcy, crime, tenure of a paid office under the Council, or pecuniary interest. Women, married and unmarried, are eligible.

IV. District Council Elections. (Urban and Rural.)

1. *Urban.*—In urban districts, which are boroughs, the Municipal Council is the District Council. Elsewhere, the Urban District Councillors must be either "parochial electors" of some parish within the district, or persons who have, during the whole twelve months preceding the election, resided in the district.

2. *Rural.*—The District Councillors must be either "parochial electors" of some parish with a union, comprising the district, or persons who have, during the whole twelve months preceding the election, resided in the union, or, if the parish be wholly or partly situate within the area of a county borough or other borough, is qualified to be elected as a Councillor for that borough.

Disqualifications are the same as in III.

V. London Borough Council Elections.

A person is not qualified to be elected a Borough Councillor unless he—

1. is a Borough Elector of the borough;
2. has, during the whole twelve calendar months preceding the elections, resided in the borough.

The qualifications for Mayor and Borough Alderman are the same as those given in II., 1 and 2.

Women are ineligible for office. Otherwise the disqualifications are the same as in III.

Regulations respecting Passports.

1. APPLICATIONS for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and inclosed in a cover addressed to "The Passport Department, Foreign Office, London, S.W." They must reach the Foreign Office before 5 p.m. on the day prior to that on which the Passport is to be issued.

2. The charge for a Passport, whatever number of persons may be named in it, is 2*s*. Passports are issued at the Foreign Office, between the hours of 11 and 4 *on the day following that on which the application for the Passport has been received*, except on Sundays and Public Holidays, when the Passport Office is closed. If the applicant does not reside in London, the Passport may be sent by post, and a Postal Order for 2*s*. should in that case accompany the application. *Postage stamps will not be received in payment.*

3. Foreign Office Passports are granted (1) to natural-born British subjects, *viz.*, persons born within His Majesty's dominions, and to persons born abroad who derive British nationality from a father or paternal grandfather born within His Majesty's dominions, and who, under the provisions of the Acts 4 George II., cap. 21, and 13 George III., cap. 21, are to be adjudged and taken to be natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

4. Passports are granted to such persons as are known to the Secretary of State, or recommended to him by some person who is known to him, or (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of these Regulations, verified by a Declaration made by any *Banking Firm* established in the United Kingdom, or by any *Mayor, Magistrate, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, or Notary*, resident in the United Kingdom; the applicant's Certificate of Birth may also be required in certain cases; (2) in the case of children under the age of 14 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Foreign Office; (3) in the case of persons naturalised in any of the British Colonies, upon production of a letter of recommendation from the Colonial Office; and in the case of natives of British India, and persons naturalised therein, upon production of a letter of recommendation from the India Office.

5. If the applicant for a Passport be a Naturalised British Subject, his certificate of naturalisation must be forwarded to the Foreign Office with the Declaration or letter of recommendation. Naturalised British subjects, if resident in London or in the suburbs, must apply *personally* for their Passports at the Foreign Office; if resident in the country, the Passport will be sent, and the Certificate of Naturalisation returned, to the person who may have verified the declaration, for delivery to the applicant. Naturalised British subjects will be described as such in their Passports, which will be issued subject to the necessary qualifications.

6. Foreign Office Passports are not available beyond five years from the date of issue. Fresh Passports must then be obtained.

7. A Passport cannot be issued by the Foreign Office, or by an Agent at an outport, on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate.

8. Travellers who intend to visit the Russian Empire, the Turkish Dominions, the Kingdom of Roumania, Persia, Colombia, Venezuela, Hayti, or Eritrea, in the course of their travels, must not leave the United Kingdom without having had their Passports *visés* either at the Russian Consulate-General, 17 Great Winchester Street, E.C.; the Consulate-General of the Sublime Porte, 140 Leadenhall Street, E.C.; the Roumanian Consulate-General, 49 Parliament Street, S.W.; the Persian Consulate-General, 122 Victoria Street, S.W.; the Colombian Consulate-General, 6 Holborn Viaduct, E.C.; the Venezuelan Consulate, Finsbury Pavement House, Finsbury Pavement, E.C.; the Haytian Consulate, 32 Fenchurch Street, E.C.; or the Italian Consulate-General (for Eritrea), 44 Finsbury Square, E.C., respectively, or at one of the other Consulates of those States in the United Kingdom. Travellers about to proceed to any other country need not obtain the *visa* of the Diplomatic or Consular Agents of such country.

N.B.—A statement of the requirements of Foreign Countries with regard to Passports may be obtained upon application to "The Passport Department, Foreign Office, London, S.W."

HORSE VEHICLES.

FARES BY DISTANCE (Cabs either with or without a Distance Recorder, but without a Taximeter): If hired and discharged *within* the Four-Mile Radius, for any distance not exceeding two miles ..... s. d. 1 0

The driver may notify, by means approved by the Commissioner of Police, that he is willing to accept a fare of 6*d.* for any journey not exceeding a mile. s. d.

For every additional mile or part of a mile 0 6

If hired *outside* the Four-Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile 1 0

If hired *within*, but discharged *outside* the Four-Mile Circle, whole distance not exceeding one mile, 1s.; exceeding one mile, then for each mile *ended* within the circle, 6*d.*; and for each mile or part of a mile *ended* outside 1 0

FARES BY TIME: *Inside* the Four-Mile Circle. Four-wheeled Cabs, for one hour or less, 2s.; two-wheeled Cabs.. ..... 2 6

If above one hour, for every quarter hour or part of a quarter of the whole time, four-wheeled Cab, 6*d.*; if a two-wheeled Cab ... 0 8

If hired *outside* the Circle, wherever discharged, for one hour or less 2 6

If above one hour, then for every quarter hour or part of quarter of the whole time.. 0 8

If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should particularly notice these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by DISTANCE OR BY TIME.

LUGGAGE. — For each package carried outside the carriage..... s. d. 0 2

EXTRA PERSONS: For each above two (two children under 10 years of age count as one person)..... 0 6

WAITING:—By distance: for every 15 minutes completed—if hired within the Four-Mile Circle, 4 wheels, 6*d.*; 2 wheels ... 0 8

If hired without Circle, 2 or 4 wheels ... 0 8

MOTOR CABS.

The fare payable for the hiring of a *Motor Cab fitted with a Taximeter* shall be according to the following scale:—

(*a*) Not exceeding one mile, or for a period of time, or a journey not exceeding ten minutes ..... s. d. 0 8

(*b*) Exceeding one mile or ten minutes:

(1) For each quarter of a mile, or for a period of time, or a journey, not exceeding two and a half minutes ... 0 2

(2) For any less period or distance..... 0 2

In addition to the above the driver may be entitled to charge the following extra payments:—

(1) Luggage:—Whether hired by distance or by time—for each package carried outside ..... s. d. 0 2

NOTE.—Luggage carried on the footboard so that the doors do not close over it is deemed to be outside within the meaning of this clause.

(2) Extra persons:—When licensed to carry more than two persons—for each additional person beyond two, the whole journey..... s. d. 0 6

Provided that two children under the age of ten years shall count as one person.

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40s.

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40s., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40s.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office, New Scotland Yard. Office hours, 10 to 4.

HACKNEY CARRIAGE STATISTICS.

During 1907 there were licensed public carriages:—Hansoms, 5,952; clarences—animal power 3,866, mechanical power 723; omnibuses—animal power 2,557, mechanical power 1,205; tramway cars—mechanical power 1,768, animal power 404; total, 16,475. Drivers and conductors:—Hackney drivers—animal power 11,592, mechanical power 818; stage drivers—animal power 4,333, mechanical power 4,716; conductors, 10,284; total, 31,743.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1907, of 2,144 men examined, 803 were successful. The annual average number of applicants who passed the examination during the past five years was 520. The proportion of drivers to hackney carriages is 11·77 drivers to 10 carriages; 263 of the drivers are over 70 years of age.

Of lost property, 57,637 articles were deposited, of which 25,879 were claimed by the owners, and £3,504 14*s.* 10½*d.* awarded to the drivers and conductors.

Tithe Commutation.

THE tithe of produce, the ancient provision for the maintenance of the clergy, was, after various attempts at modification and composition, commuted in 1836 by Act of Parliament to a payment in money. The land was valued, and a modus fixed, based upon the average value of corn for the preceding seven years, and payments, collected half-yearly by the clergy or lay-owners, have since been made on a septennial average. The value fixed amounted in some cases to as much as ten shillings per acre. The better the land for corn-growing, the larger was the sum to be paid, as it was a direct charge upon the corn grown, the prices upon which the Act was based being per quarter—wheat at 56*s.* 8*d.*; barley, 31*s.* 8*d.*; and oats, 22*s.* Consequently much land, not being worth the tithe, is now out of cultivation, or let at a price which just covers the charge. An Act passed in 1891 makes it compulsory for the owners of the land, instead of the occupiers, to pay the tithe, which amounts in the aggregate to about four millions annually, of which sum £766,334 is paid to 2,056 lay-owners or impropriators. Extraordinary tithes were an additional charge made, when the Commutation Act was passed, upon hop, fruit, and market-garden grounds. These special industries were so affected by the tax, which in some cases amounted to thirty shillings an acre, that serious resistance against the payment ensued, and an Act was passed in 1886 providing that it should not be levied on land brought under such cultivation after the passing of the Act, but land under these crops at the time was permanently burdened with the impost. The tithe map and apportionment for each parish is deposited with the incumbent and churchwarden. Any one interested therein may have access to the same and obtain extracts by paying 2*s.* 6*d.* for inspection, and 3*d.* for every 72 words contained in the extract. Tithe may, upon the joint application of the land-owner and tithe-owner to the Board of Agriculture, be redeemed for a sum *not less* than 25 times its amount. This is dependent upon the consent of the Board, and sometimes on that of the Bishop and patron. Town property and building land is often redeemed, agricultural land rarely, the cost being too great.

The average Tithe Rent Charge for the first fifty years from 1836 was £102 9*s.* 9½*d.*, and for the past 72 years (1837–1908) £93 9*s.* 4½*d.*

Architects' Fees.

THE custom is to charge 5 per cent. on the cost of new work, if exceeding £1,000. Below that sum, an increased scale is usual. An increased charge is also made for alterations to existing buildings, and for designs for decorations, fittings, and furniture. If PLANS, &c., are prepared for works which are never carried out, the charge is one-half the above, with a further half per cent. if tenders have been invited and received. These charges do not include negotiations for purchase of site, &c., nor settlement of difficulties with adjacent owners and public authorities, nor taking out quantities. For repetitions a modified charge is usually arranged. The minimum charge per day is three guineas. In all cases, travelling and other out-of-pocket expenses are paid by the employer in addition to the fees. For furnishing or checking a Schedule of Dilapidations and Estimate the usual charge is 5 per cent. on the estimate, but in no case less than two guineas. For valuing and negotiating the settlement of claims under the Lands Clauses and similar Acts the charge is on Ryde's Scale.

Surveyors' Fees.

SURVEY with plain plan—100 acres and under—by arrangement, according to work required. Over 100 acres, 2s. per acre and expenses; if with finished map, according to amount of embellishment.

VALUATION to fix rent—5 per cent. on first £300, and 2½ on remainder of one year's rental value, and expenses.

TIMBER valuation—5 per cent. on first £100, and 2½ on the excess, and out-of-pocket expenses.

CROPPING—5 per cent. up to £100, and 2½ on the excess, and out-of-pocket expenses.

VALUATION for probate—2 per cent. on first £500, and 1¼ on the excess, and out-of-pocket expenses. But it is now usual to make a bargain for a fixed and moderate sum.

VALUATION of land—6d. per acre, and out-of-pocket expenses. No fee less than 5 guineas.

Auctioneers' and Estate Agents' Fees.

FOR THE SALE OF FREEHOLD AND COPYHOLD ESTATES AND HOUSES AND GROUND LEASES, BY AUCTION OR BY PRIVATE TREATY.—£5 per cent. on the first £100; £2½ per cent. up to £5,000; and on the residue above that sum £1½ per cent.; and the usual commission of £5 per cent. in addition on the amount paid for fixtures, furniture, and effects, and in addition for any disbursements.

FOR LETTING UNFURNISHED HOUSES, OR DISPOSING OF LEASES OTHER THAN GROUND LEASES BY ASSIGNMENT OR OTHERWISE.—Where the term is for three years or less, £5 per cent. on one year's rent; where for more than three years, £7½ per cent. on one year's rent, and (in either case) upon the premium or consideration, £5 per cent. up to £1,000, and 2½ per cent. on the residue, and the commission of £5 per cent. on any sum obtained for fixtures, furniture, or effects of any kind.

FOR LETTING FURNISHED HOUSES, IN TOWN OR COUNTRY.—When let for a year or less period, £5 per cent. on the rental. When let for more than a year, £5 per cent. on first year's rent, and £2½ per cent. on rent for remainder of term. Where a property is let, and the tenant afterward's purchases, the commission for selling will then become chargeable, less the amount previously paid for letting furnished or unfurnished.

FOR VALUATIONS OR SALE OF FURNITURE, FIXTURES, AND OTHER EFFECTS.—For *Sale*, £5 per cent.; for *Valuation*, £5 per cent. up to £500, and £2½ per cent. on the residue.

FOR VALUATION OF FURNITURE AND EFFECTS FOR PROBATE OR ADMINISTRATION.—£2½ per cent. on the first £100, and £1½ per cent. on the residue.

FOR VALUATION OF PROPERTIES FOR SALE, PURCHASE OR MORTGAGE.—£1 per cent. up to £1,000, 5s. per cent. above, on full amount of valuation. In valuations for Mortgage, if an advance is not made, one-third of the above scale, the minimum fee to be £3 3s.

FOR VALUATIONS FOR PROBATE OR ADMINISTRATION (UNDER THE FINANCE ACT, 1894) OF FURNITURE AND EFFECTS.—£2½ per cent. on the first £100, and £1½ per cent. on the residue. OF FREEHOLD, COPYHOLD, OR LEASEHOLD PROPERTIES—5s. per cent. on amount of valuation. Minimum fee, £3 3s.

FOR NEGOTIATING THE PURCHASE OF ESTATES, HOUSES, AND GROUND LEASES.—£2½ per cent. up to £500, and £1 per cent. beyond that amount.

FOR NEGOTIATING THE TAKING OF FURNISHED OR UNFURNISHED HOUSES.—Half the scale for letting.

FOR LETTING BUILDING LAND.—Amount of one year's ground rent, or by agreement.

FOR MAKING AND EXAMINING INVENTORIES, and making catalogue for auction sale—From one guinea, according to length, exclusive of expenses.

MAKING schedule of fixtures to attach to lease—From 1 to 4 guineas, or about 3 guineas per day.

FOR MAKING schedule of dilapidations, and serving notice to repair—From 2 to 5 gs. per day.

FOR SETTLING amount of dilapidations—5 per cent. on amount, and out-of-pocket expenses.

RAILWAY, School Board, Corporation, Board of Works, and other compensations—SCALE:—

If the award be for £1,000 the fee chargeable is 18 gs., and for £1,200 19 gs., and so on, each £200 additional earning a further guinea, but no fee less than 7 guineas; and a fee of 3 guineas per day for London valuers, and 5 guineas per day for valuers outside the London area, for attendance in London before jury or arbitrator.

MANAGEMENT of estates, including collection of rents—Tithe-rent charges, ground rents, &c., from 3 to 5 per cent.; cottage property, from 5 to 10 per cent., according to special agreement.

Allowances under Bankruptcy Acts, 1883 and 1890.

The following charges are to be subject to reduction by agreement with the Official Receiver or the trustee, or to increase with the sanction of the Committee of Inspection and the Receiver:—

Brokers.—For inventory not exceeding 5 folios, 10s. 6d.; additional per folio to 20 folios, 1s. 6d.; each folio after 20, 1s. For inventory and valuation:—On the first £100, £2 10s.; for the next £400, £1 5s.; above £400 up to £10,000, £1; above £10,000, 10s. Travelling expenses in addition.

Auctioneers.—For sales by private contract half the above charges for inventory and valuation; for sales by auction (in addition to certain out-of-pocket expenses) of chattel property, 5 per cent. on first £500, 4 per cent. on next £500, above £1,000 2½ per cent.; and of estates in land, including prior valuations for determining amount of reserve bids, on first £300 5 per cent., on next £1,600 2½, above up to £5,000 1¼, and above £5,000 1 per cent. Cost of surveys, dilapidations and specifications, £2 to £5.

Accountants.—For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, including necessary affidavit, £1 1*s.* to £5 5*s.* Chief-clerk's time, 10*s.* 6*d.* to £1 11*s.* 6*d.* Other clerk's time, per day of seven hours, 7*s.* 6*d.* to 15*s.* These charges to include stationery, except forms used.

MEDICAL FEES.

Unlike those in most other businesses or professions, the charges made by medical men are assessed upon a sliding scale. All engaged in the profession are supposed to be equal in point of skill, and therefore entitled to charge alike, the tariff depending chiefly upon the residence of the doctor or patient. A medical man living in the western suburbs of London will perhaps charge at half a crown or three-and-sixpence if waited upon by a patient; but, when he removes to the neighbourhood of Cavendish Square, the fee charged for the first visit will be two guineas, and one guinea for the second and every subsequent visit.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

General Practitioners.	Rentals.			
	£10 to £25.	£25 to £50.	£50 to £100	
Ordinary Visit	3*s.* 6*d.* to 5*s.*	3*s.* 6*d.* to 7*s.*	5*s.* to 10*s.* 6*d.*	
Night Visit.....	Double an ordinary visit.			
Mileage beyond two miles from Home	1*s.* 6*d.*	2*s.*	2*s.* 6*d.*	
Attention per ½ hour	2*s.* 6*d.* to 5*s.*	3*s.* 6*d.* to 7*s.*	5*s.* to 10*s.* 6*d.*	
Letters of Advice ..	Same charge as for an ordinary visit.			
Attendce. on servants	2*s.* 6*d.*	3*s.* 6*d.*	3*s.* 6*d.* to 5*s.*	
Midwifery	21*s.*	21*s.* to 63*s.*	63*s.* to 105*s.*	
Administring Chlfm.	10*s.* 6*d.*	21*s.*	42*s.*	
Consultants.				
Advice or Visit alone	21*s.*	21*s.*	21*s.*	
Advice or Visit with another Practitioner	21*s.*	21*s.* to 42*s.*	21*s.* to 42*s.*	
Mileage beyond two miles from Home	10*s.* 6*d.*	10*s.* 6*d.*	10*s.* 6*d.*	

Special visits—*i.e.*, of which due notice has been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When himself is called in, in consultation, he is entitled to the minimum fee of 21*s.*

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if *he* send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year, and contain but one amount—"Attendance and medicine," from date to date, so much. The patient has no means of checking the correctness of the charge, although medical men, like all others, are liable to err; they, however, are always willing to show their ledgers when requested.

SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor *negotiates* the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to.

STREETS AND FOOTPATHS.

Streets and Footpaths.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

RECEIPTS.

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

Places of Interest and Amusement in London.

EXHIBITIONS, CHURCHES, PUBLIC BUILDINGS, THEATRES, AND OTHER PLACES AND OBJECTS OF INTEREST IN LONDON AND THE SUBURBS.

The Derby, 1854–1908.

The following table gives the winners of the Derby for the last 55 years. Including 1851, Sir J. Hawley scored four successes with Teddington, Beadsman, Musjid, and Blue Gown, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. The Duke of Portland, Lord Rosebery, and Mr. Bowes have won twice consecutively, and H.M. the King, Lord Falmouth, Mr. W. I'Anson, Mr. Merry, Sir F. Johnstone, and Sir J. Miller have been twice victorious at intervals of four or more years.

DISTANCE—1 MILE 4 FURLONGS 29 YARDS.

Professional Records.—Greatest distance run in 1 hour, 11 m. 1,286 yds., by H. Watkins, Sept. 16, 1899, at Rochdale; while J. Bailey (1881) ran 35¼ m. in 4 hours, and C. Rowell 89 m. 1,540 yds. in 12 hrs., and 150 m. 395 yds. in 23 hours, Feb., 1882.

Amateur Records.—A. Shrubb ran 11 m. 1136 yds. in 1 hour, Nov. 5, 1904; G. Crossland, September 22, 1894, ran 20 miles and a half in 2 hours, both at Stamford Bridge.

BILLIARDS.

Best "spot-in" break (exhibition match) 3,304, by W. J. Peall, 1890; match for money 2,031, by W. J. Peall, 1888. Best spot-barred breaks, 1,392 by J. Roberts, 1894, and 1,467; by T. Taylor, 1894. Greatest number of spot-hazards in succession 633, by W. J. Peall, 1888. Successive nursery cannon record of 180 is held by W. Cook, on Jan. 11, 1906. Longest run of successive losing red hazards 98, by J. Roberts, 1894. Largest number of successive screw-back red hazards 186, by J. G. Sala, 1883. Fastest 1,000 up game, all-in, W. J. Peall, 1884, 44 min. Fastest 1,033 spot-barred, J. Roberts, 1894, 59½ min. Under Billiard Association Rules, J. G. Breed is the amateur champion. The record breaks are 802 by H. W. Stevenson, Feb. 16, 1905, recognised by the B.A., and 821 by John Roberts, Jan. 24, 1905, in Scotland. On Oct. 12, 1906, in London, M. Inman scored 3,000 points off the red ball. By means of the now abolished cradle cannon W. Cook, in June, 1907, scored 42,746; and by the aid of the same stroke T. Reece, during June and July, totalled 499,135, but the latter was not passed by the Billiard Association, as it was not made entirely in public play.

† Balls jammed in mouth of pocket.

Running High Jump	M. Sweeney *a*	6	5⅔	1895
Standing High Jump	Ray C. Ewry *a*.....	5	5¼	1901

A 120 yds. 11 4-5th secs., by W. Phillips *e* (1882); C. A. Bradley *b e* (1893); C. A. Bradley *e* (1894); A. R. Downer *e* (1895); B. J. Wefers *a* *(1896); A. F. Duffy *a* (1901), A. F. Duffy *c* (1902); J. W. Morgan *e* (1904).

° Wefers has run 120 yds. in 11 2-5th secs., but it is not passed by the A.A.A.

a Made in America.

b On grass.

c In New Zealand.

† T. P. Conneff ran 1,320 yds. in 3 mins. 2 4-5th secs., and 1 mile in 4 mins. 15 3-5th secs., at Travers Island, 1895, both in trial races with pacemakers.

(PROFESSIONALS.) F

Name.	Distance. ft.	in.	Year.
T. F. Keane	22	6	1900
J. Darby	12	1½	1890
E. A. Johnson.....	6	0½	1881
J. Darby *g*.....	6	0	1892

* These are the only records generally accepted, though it is certain that several professionals have travelled the distance a yard or two yards quicker. Geo. Seward's apocryphal 9½ secs. is no longer accepted. M. W. Long, in 1900, ran a straight quarter in 47 secs. in America.

d Made in Australia.

e British amateur records.

f Not Music Hall exhibitions, but all doubtful.

g With ankles tied.

Walk, London to Brighton, 52½ miles, J. Butler, 8 hrs. 23 m. 27 secs., 1906. Throwing the Cricket Ball, 122 yds. 1 ft. 3 in., by W. H. Game, at Oxford, 1873. Record in a six days' professional contest, 623 m. 1,320 yds., by G. Littlewood, New York, 8th December, 1888.

BRITISH AMATEUR RECORDS.

100 yds., 9 4-5th secs., by A. F. Duffy (U.S.A.), on grass, and W. A. Schick (Harvard), 1904. 120 yds. (hurdles), 15 2-5th secs. by A. C. Kraenzlein, 1900. 220 yds., 21 4-5th secs., by C. G. Wood, 1887. 250 yds., 24 4-5th secs., by E. H. Pelling, 1888. 300 yds., 31 2-5th secs., by A. R. Downer, 1895, and C. G. Wood, 1887. 300 yds. (hurdles), 36 3-5th secs., by O. Groenings, 1907. 440 yds., 48¼ secs., by H. C. L. Tindall, 1889, and E. C. Bredin, 1895. 500 yds., 58 1-5th secs., by E. C. Bredin, 1895. 600 yds., 1 m. 11 secs., by E. H. Montague, 1906. 880 yds., 1 m. 54 3-5th secs., by F. J. K. Cross, 1888. 1,000 yds., 2 m. 14 4-5th secs., by W. E. Lutyens, 1898. 1,320 yds., 3 m. 8⅘ secs., by W. G. George, 1882. 1 mile, 4 m. 10 4-5th secs., by J. Binks, 1902. Other British Amateur records from ¼ mile to 100 will be found in table of "Bests on Record."

High Jump, 6 ft. 4⅜ in., by P. J. Leahy, 1898. Throwing the Hammer, 204 ft. 5 3-8th in., by S. J. Gillis, 1908. Putting the Weight (16 lb., 7 ft. sq.), 48 ft. 2 in., by D. Horgan, 1897. Pole Jump, R. D. Dickinson, 11 ft. 9 in., 1891.

Putting the Weight (16 lb., 7 ft. sq.), 49 ft. 7½ in., by Ralph Rose *a*, 1907. Throwing the Hammer, 16 lb., J. Flanagan, 172 ft. 11 in., 1904, in America, from 7 ft. circle, A.A.U. rules, wire handle with loops. M. Sheridan holds the World's Discus Throwing record, viz., 134 ft. 11 in., at the Stadium, 1908.

The pole-jumping record is held by an American amateur, W. R. Dray, New Haven, Connecticut, 12 ft. 5¼ in., May 18, 1907. Best performance in England, 12 ft., by E. B. Archibald (Canada), at the Stadium, July, 1908.

* All these records were made with motor pacing and wind Shields. † Flying starts.

On Sept. 17-18, 1883, M. Cordang, at The Hague, Holland, rode 640 miles 196 yards in 24 hours, but owing to his suspension at the time by the U.V.F. the record is not recognised. At Madison Square Gardens, New York, December, 1898, Charles Miller rode 2,007 miles 4 laps in 142 hours.

Auzani, at Paris, Sept. 16, 1905, rode a motor cycle 58 miles 489 yards in 60 minutes.

Cricket.—Highest score, A. E. Stoddart, 485, Hampstead *v.* Stoics, 1886; A. E. J. Collins (*age* 13), 628 in house match at Clifton College, 1899. English largest gross score, Orleans Club *v.* Rickling Green, 920, Aug. 3rd, 1882. In a first-class match, Yorkshire, 887, *v.* Warwickshire, May 8, 1896. Also in first-class cricket, highest individual score, A. C. Maclaren, 424, for Lancashire *v.* Somerset, at Taunton, July, 1895. Lowest score in an innings, 12, by Oxford University (one man absent) *v.* M.C.C. and Ground, at Oxford, May, 1877. Most runs made in a year in England, 3,518 by T. Hayward in 1906 in 61 innings (8 times not out) av. 66·37; previous best, 3,309 by Abel, 1901, in 68 innings (8 not outs), aver. 55·15. Also T. Hayward in 1906 equalled C. B. Fry's record of 13 centuries in one season. England *v.* Australia matches, 47 in Australia, 34 in England. England has won 34, Australia 32, drawn 15. Total 81.

Trotting.—Fastest mile, in America, 1 m. 58¼ s., by Lou Dillon, Oct. 24, 1903. Fastest pacing mile, 1 m. 56½ s., Dan Patch, Oct. 22, 1903.

THE NATIONAL AMATEUR WRESTLING ASSOCIATION CHAMPIONS FOR 1908.

CUMBERLAND AND WESTMORELAND STYLE.
Feather Weight, F. C. Newman, London A.W.S.
Light Weight, A. E. Hawkins, London A.W.S.
Middle Weight, J. Baddeley, London A.W.S.
Heavy Weight, J. Sewell, 1st Life Guards A.C.

LANCASHIRE OR CATCH-AS-CATCH CAN STYLE.
Bantam Weight, F. W. Knight, Hammersmith A.W.C.
Feather Weight, J. A. Webster, London A.W.S.
Light Weight, G. de Relwyskow, Hammersmith A.W.C. and German G.S.
Middle Weight, G. de Relwyskow, Hammersmith A.W.C. and German G.S.
Heavy Weight, E. Barrett, City of London Police A.C.

Cycling—Road Records.

24 *Hours.*—Safety (F. R. Goodwin, 1898) 428 miles paced; safety (E. Buckley, 1908) 347½ miles unpaced; ordinary bicycle (J. F. Walsh, 1891), 312 miles; tandem safety (M. A. Holbein and J. A. Bennett), 397½ miles, 1895.

50 *Miles.*—2h. 33m. 28s. (G. H. Brinault, 1908).

100 *Miles.*—Safety 4h. 16m. 35s. (A. A. Chase, 1897, paced); ordinary bicycle 6h. 22m. 15s. (J. F. Walsh, 1891); tandem safety 4h. 36m. 29s. (R. J. and A. F. Tisley), 1902.

The Land's End to John o' Groats record: safety (H. Green), 2d. 19h. 50m., 1908. London to Brighton and back: safety (R. Shirley), 5h. 15m. 29s., 1906; tandem safety (P. Wheelock and G. Fulford), 4h. 54m. 54s., 1899. London to York (F. R. Goodwin), 10h. 16m. Edinburgh to London unpaced (R. Shirley), 23h. 43m., Oct. 14, 1905. 1,000 miles (T. A. Fisher), 3d. 19h. 11m., 1908. Bath to London and back (F. W. Barns), 11h. 48m. 42s., 1897. London to Portsmouth and back (R. Shirley), 7h. 29m. 48s., 1906. 12 hours' safety road record, 226½ miles, 1900, by H. Green, unpaced; also paced, F. R. Goodwin, 245 miles.

English 1 Hour Records (Path).

Safety, W. T. Hall, C. T., April, 1905 (45m. 210yds.); ordinary, B. W. Attlee, 1891 (21m. 180yds.); tandem safety (S. MacGregor and G. A. Nelson, 1897, 31m. 1,660yds. The amateur tandem safety record is 29m. 1,110yds. (C. Heydon and H. Thackthwaite), 1898, and the amateur safety record 29m. 480yds. (H. Chinn), 1900.

The Imperial Coinage.

THE authorized Coinage of the United Kingdom consists of the following pieces, some of which are issued only on special occasions :—

Denomination.	Standard Weight.	Least Current Weight.	Remedy of Weight.
GOLD :	Grains.	Grains.	Grains.
Five Pound	616·37239	612·500	1·00000
Two Pound	246·54895	245·000	0·40000
Sovereign	123·27447	122·500	0·20000
Half-Sovereign	61·63723	61·125	0·15000
SILVER :			
Crown	436·36363	—	2·000
Double Florin ...	349·09090	—	1·678
Half-Crown	218·18181	—	1·264
Florin.....	174·54545	—	0·997
Shilling	87·27272	—	0·578
Sixpence	43·63636	—	0·346
Groat or 4*d*.	29·09090	—	0·262
Threepence	21·81818	—	0·212
Twopence.....	14·54545	—	0·144
Penny.....	7·27272	—	0·087
BRONZE :			
Penny.....	145·83333	—	2·91666
Halfpenny	87·50000	—	1·75000
Farthing	43·75000	—	0·87500

STANDARD GOLD contains eleven-twelfths of fine metal and one-twelfth of alloy ; fineness, 916·66, or 22 carats. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign ; one troy ounce is, therefore, intrinsically worth £3 17*s*. 10½*d*., and one ounce of pure gold, on the same basis, £4 4*s*. 11½*d*.

STANDARD SILVER consists of thirty-seven-fortieths of fine metal and three-fortieths of alloy ; fineness, 925. One troy pound of standard silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (958·33), is practically obsolete. It is occasionally used, however, for high-class plate.]

*BRONZE is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part.

THE "REMEDY" is the amount of variation permitted in fineness and in weight of coins when first issued from the Mint.

TOKENS.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

LIGHT GOLD.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight ; but under the provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

BANK OF ENGLAND NOTES are issued for sums of £5, £10, £20, £50 ; also for £100, £200, £500, and £1,000.

BANK POST BILLS are drawn for any sum from £10 to £1,000, and made payable to order at seven days' date, or at sixty days'. No charge is made for bills so drawn : they may be obtained at the Chief Office in London, or at any of the branches.

LEGAL TENDER OF MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, is a legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

OLD MONEYS.—Guinea, 21*s*. ; Carolus, 23*s*. ; Moidore, 27*s*. 6*d*. ; Angel, 10*s*. ; Noble, 6*s*. 8*d*. ; Tester, 6*d*. ; Groat, 4*d*.

SCOTS MONEY.—Merk=13*s*.1⅓*d*. ; Pound=1*s*.8*d*. ; Shilling=1*d*. ; Plack=2 Bodles=4*d*. Scots.

* It is interesting to note that the legal weight of a penny is one-third of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois. Further, the halfpenny is one *inch* in diameter.

Foreign Moneys.

TABLE FOR CALCULATING THE VALUE OF ANY GIVEN WEIGHT OF STANDARD SILVER IN TROY OUNCES.

Market Price of Standard Silver in Pence per Troy Ounce.

Oz.	21½	22½	23½	24½	25½	26½	27	27½	28½	29½
1	21·5	22·5	23·5	24·5	25·5	26·5	27·0	27·5	28·5	29·5
2	43·0	45·0	47·0	49·0	51·0	53·0	54·0	55·0	57·0	59·0
3	64·5	67·5	70·5	73·0	76·0	79·5	81·0	82·5	85·5	88·5
4	86·0	90·0	94·0	98·0	102·0	106·0	108·0	110·0	114·0	118·0
5	107·5	112·5	117·5	122·5	127·5	133·5	135·0	137·5	142·5	147·5
6	129·0	135·0	141·0	147·0	153·0	159·0	162·0	165·0	171·0	177·0
7	150·5	157·5	164·5	171·0	178·5	185·5	189·0	192·5	199·5	206·5
8	172·0	180·0	188·0	196·0	204·0	212·0	216·0	220·0	228·0	236·0
9	193·5	202·5	211·5	220·5	229·5	238·5	243·0	247·5	256·5	265·5

By means of the above table, taken in conjunction with the column of the opposite page headed "Equivalent Weight of Standard Silver in Troy Ounces," the intrinsic value of any coin can be easily calculated with silver at several prices other than those given. It will only be necessary to take the numbers representing tenths, hundredths, and thousandths of ounces in that column, find the numbers opposite to them in the column of the above table giving the price of silver, and add these together, taking care to move the decimal point successively one, two, and three places to the left ; the result will be the coin's intrinsic value in pence.

Price of Silver, 1898–1907.

The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows :—

1898.	1899.	1900.	1901.	1902.	1903.	1904.	1905.	1906.	1907.
d.	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*
26 1/16	27 1/16	28¼	27 1/16	24⅛	24¾	26 3/16	27 1/16	30⅞	30 3/16

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by 2·192 ; to express a United States price on the English system multiply the cents by 0·4562.

Foreign Moneys and their English Equivalents.

EXPLANATORY NOTES.—France, Belgium, Italy, Greece, and Switzerland constitute what is known as the "Latin" Union, and their coins are alike in weight and fineness, occasionally differing, however, in name. The same system has been in part adopted by Spain, Servia, Bulgaria, Russia, and Roumania, but they have not joined the Union. France and continues of France, Belgium, and Switzerland are respectively designated lire and centesimi in Italy; drachmai and lepta in Greece; dinars and paras in Servia; pesetas and centimos in Spain; leys and bani in Roumania; leva and stotinkis in Bulgaria. Similarly the Scandinavian countries, Norway, Sweden, and Denmark, employ coins of the same weight and fineness, their names being also alike. Special coins are struck for Austria and Hungary, identical in value but of different designs. Most of the South American States possess a standard coin, equal in weight and fineness to the silver 5-fr. piece, generally termed a "peso." In Hayti the corresponding coin is a "gourde." In Equador and Paraguay the standard is silver, in all other South American States gold, but usually without a gold currency, paper taking its place.

The exchange value of the moneys of those countries indicated by a * is determined by the rate of exchange for the day, and may be taken as approximately that given in the last column. The rate given in the daily papers generally represents the number of the standard coins that are equivalent to one sovereign. The Spanish rate is given in terms of pence per dollar—2 escudos, the Russian in pence per rouble, Portuguese in pence per milreis, and the United States rate in pence per dollar. The approximate value of other silver coins must be sought in one of the columns headed "Intrinsic Value with Silver at per Troy Oz." In "bimetallic" countries pure gold is generally taken as being worth 15½ times its weight of pure silver. This proportion corresponds to giving standard silver a constant value of 60¾*d.*, as in the last column of the table.

Colonial Moneys and their English Equivalents.

IMPERIAL sterling coins are the sole legal metallic currency in the following British Colonies:—

AUSTRALASIA.
CAPE OF GOOD HOPE AND SOUTH AFRICA GENERALLY.
FALKLAND ISLANDS.
FIJI.
GIBRALTAR.
ST. HELENA.

In the following Colonies special coins are current in addition to the Imperial series:—

BRITISH GUIANA AND CERTAIN W. INDIAN ISLANDS.—A special groat or fourpence.
GUERNSEY.—Eight doubles (= 1 penny), 4, 2, and 1 double.
JAMAICA.—Nickel-bronze pence, halfpence, and farthings. [farthings.
JERSEY.—Special pence, halfpence, and
MALTA.—One-third of a farthing.
NIGERIA, NORTH AND SOUTH.—One penny (nickel-bronze) and one-tenth penny (aluminium and nickel-bronze), both perforated.

COLONIES POSSESSING SPECIAL METALLIC CURRENCIES.

COLONY.	STANDARD COIN.	SUBSIDIARY COINS.
BRITISH HONDURAS ...	U.S. Gold Dollar, and all U.S. gold coins. British Sovereign = $4·867. ½ " " = $2·433.	*Silver*—50, 25, 10, and 5 cents. *Nickel-bronze*—5 cents. *Bronze*—cents.
BRITISH NORTH BORNEO	Mexican Dollar.	*Nickel-Bronze*—5, 2½ and 1 cents. *Bronze*—1 and ½ cent.
CANADA	Same as British Honduras, but dollar of U.S. is described as $4·86⅔ = £1.	*Silver*—50, 25, 10, and 5 cents. *Bronze*—cents.
CEYLON	Indian Rupee at fixed rating, 15 rupees = £1.	*Silver*—50, 25, and 10 cents; ½ and ¼ Indian rupees.
CYPRUS	British Sovereign = 180 piastres.	*Copper*—5, 1, ½, and ¼ cents. *Silver*—18, 9, 4, and 3 piastres.
EAST AFRICA AND UGANDA	Indian Rupee at fixed rating, 15 rupees = £1.	*Bronze*—1, ½, and ¼ piastre. *Silver*—50 and 25 cents. *Nickel-bronze* (perforated)—10 and 5 cents. *Aluminium and nickel-bronze* (perforated)—1 and ½ cent.
HONG KONG AND LABUAN	Mexican Dollar, British Dollar, or Hong Kong Dollar.	*Silver*—50, 20, 10, and 5 cents.
INDIA	Indian Rupee at fixed rating, 15 rupees = £1. (1 rupee = 16 annas = 64 pice.)	*Bronze*—1 and ½ cent. *Silver*—½, ¼, and ⅛ rupee. *Copper*—2, 1, ½ piece, and ⅓ pice or pie. *Nickel*—1 anna (serrated).
LABUAN	(*See* Hong Kong).	
MAURITIUS AND SEYCHELLES	Indian Rupee at fixed rating, 15 rupees = £1.	*Silver*—20 and 10 cents. *Bronze*—5, 2, and 1 cents.
NEWFOUNDLAND	Two-dollar Gold Piece = 100 pence.	*Silver*—50, 20, 10, and 5 cents. *Bronze*—cents.
STRAITS SETTLEMENTS	S.S. Dollar, or British Sovereign—7 sovs. = 60 S.S. dollars. Also S.S. ½ dollar.	*Silver*—50, 20, 10, and 5 cents. *Bronze*—1, ½, and ¼ cent.
UGANDA	(*See* East Africa).

THE WORLD'S PRODUCTION OF GOLD AND SILVER, 1898–1907.

Year.	British Empire.		Other Countries.		Total.	
	Gold.	Silver.	Gold.	Silver.	Gold.	Silver.
1898	£33.938,000	£6.498,000	£25.485,000	£50,177.000	£59.423.000	£56,675,000
1899	38.706.000	5.539,000	26,360,000	46,407,000	65,066,000	51,946,000
1900	25.302,000	5.554,000	27,319,000	48,687.000	52,621,000	54,241,000
1901	24,981,000	4.785,000	29,447,000	47.198.000	54,428,000	51,983,000
1902	31.654.000	4,244,000	29,606,000	44.506.000	61,260,000	48,750,000
1903	37,803.000	4,139,000	28,092,000	46,533.000	65,895,000	50,672,000
1904	40,386,000	5,540,000	29,432,000	48,646.000	69,818,000	54,186.000
1905	45,097,000	6,994,000	30,830,000	50,343.000	75,927,000	56,437,000
1906	49.694,000	6,615,000	35,648,000	48,396,000	85,342,000	55,011,000
1907	50.909,000	7,864,000	33,916,000	41,368.000	84,825,000	49,232.000
Totals ...	£378,470,000	£56,872,000	£296,135,000	£472,261,000	£674,605,000	£529,133,000

The figures given in the above table are based mainly on Returns prepared by the Director of the United States Mint and published in his annual Reports, and on those contained in "The Mineral Industry," published by the *Engineering and Mining Journal*.

Gold has been valued in the table at the legal rate of £3 17*s.* 10½*d.* per troy ounce standard, and silver at its *coining* value in this country, namely 5*s.* 6*d.* per troy ounce standard.

IMPERIAL COINAGE, 1898–1907.

Year.	Gold.			Silver.	Bronze.	Total.
	London Mint.	Australian Mints.	Total.			
1898	£5.780,600	£8,107,100	£13,887,700	£1,312,306	£84.555	£15,284,561
1899	9,010,900	9,642.800	18,653,700	1,616,246	139,065	20,409,011

1901	2,604,000	9.889,000	12,493,000	914,201	120,280	13.527,481
1902	7,119,000	11,411,300	18,530,300	937,202	148.399	19,615,901
1903	9,928,000	11,118,100	21,046,100	557,247	113,894	21,717,251
1904	11,042,000	11,266,700	22,308,700	605,801	77,895	22,992,396
1905	7,300,000	11,288,000	18,588,000	510,490	100,325	19,198,875
1906	12,565,000	11,475,000	24,040,000	1,705,070	184,520	25,929,590
1907	20,551,000	10,844,000	31,395,000	2,109,828	227,550	33,732,378*

Note.—Since 1871, inclusive, the designs adopted for gold coins have been identically the same in the four Mints of London, Sydney, Melbourne, and Perth. They are distinguishable, however, in that the Australian coins bear minute "Mint Marks" immediately above the date on the reverse side, the letter S being borne by Sydney coins, M by those issued from Melbourne, and P by those issued from Perth. The letter C will be borne on Imperial gold coins struck at the branch Mint at Ottawa, Canada, but no such pieces have yet been struck.

CONSUMPTION OF TEA, COFFEE, COCOA, &c., IN U.K.

EXAMPLE 1. What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? ANSWER:—19·14 years' purchase, or £1,914.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER: Looking at the Table of Expectation of Life p. 423, it will be seen that the expectation for age 54 is about 17 years; and from the above table an annuity certain for 17 years, interest at 5 per cent., is worth 11·27 years' purchase. The present payment required would therefore be £1,127 *approximately*.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

Expectation of Life.

THE following are Dr. W. Ogle's tables founded on the death-rates of 1871–80: in the 1897 Almanack a table appeared (p. 357) giving, alongside of the following, statistics compiled by Dr. Farr, of the General Register Office, on the basis of the death-rates of 1838–54. These columns are now omitted, and only the more recent figures appear. The first columns show the survivors of each sex at each year of life out of a million born; the other columns show the expectation of life at each year.

AGE.	Of 1,000,000 Born, the Number Surviving at the End of each Year of Life.		Mean After-lifetime (Expectation of Life).		AGE.	Of 1,000,000 Born, the Number Surviving at the End of each Year of Life.		Mean After-lifetime (Expectation of Life).

* When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £36·012, and deduct £1—£35·012.

REPAYMENT OF PUBLIC LOANS.

LARGE sums of money are every year advanced to County or District Councils and other public bodies, for improvements, building of workhouses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1888, and examined by the actuary of the National Debt Office. It gives the sums needed as the annual amount of principal combined with interest required for the liquidation of a debt of £100, at the stated percentage, in 10, 20, 30, 40, and 50 years:—

Years	3 per Ct.	3½ per Ct.	4 per Ct.	4½ per Ct.	5 per Ct.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.

A quire of paper contains 24 perfect sheets; an outside quire 20, some of which may be torn.

Sizes of Type.

ALL Founders cast their type nearly to one uniform height, though the letters may vary considerably in their breadth.

The type chiefly used in this Almanack is named *Nonpareil*. The column contains 75 lines, and is, technically, 12 Pica ems wide; on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains so many (1,800) ems; he then, doubling that number, charges as so many (3,600) ens.

A very minute type, used only occasionally, is:—

Brilliant. A column the size of this in the Almanack if set in Brilliant would contain 124 lines, and about 7,500 letters.

Printing is the art of producing impressions, from characters or figures

Diamond is the next size; the column would contain 107 lines, and about 6,000 letters.

From the above table it will be seen that a sheet of 24 lb. Demy is about the same substance as a sheet of Royal of 30 lb.

SLANG TERMS FOR MONEY.

In addition to the ordinary terms there are others which, although puzzling to a foreigner, are tolerably well understood in this country. In Scotland, a man who flies "kites" may not be worth a "bodle," and in England not worth a "mag"—coins which no one ever saw. Such a man will toss you for a "bob." He, of course, would be shunned by the lady who lost a "pony" on last year's Oaks, and by her husband who lost a "monkey" on the Derby a day or two previously. A gentleman who is worth a "plum" (£100,000) need never be short of "tin"; while the outcast who begs a few "coppers" in order to procure a bed generally has no "blunt." The following words are commonly in use:—

A Joey = 4*d*.
A Tanner = 6*d*.
A Bob = 1*s*.
Half a Bull = 2*s*. 6*d*.
A Thick 'Un = £1.
A Jimmy = £1.
A Quid = £1.
A Pony = £25.
A Monkey = £500.
A Kite = An accommodation Bill.
Browns = Copper or bronze.
Tin = Money generally.
Blunt = Silver, or money in general.

Dibs, Dust, Rhino, The Ready, Oof, Mopuses, Brass, or Spondulics = Money generally.
Filthy Lucre = Scottish well-worn £1 notes.

TO ESTIMATE WEIGHT.

Cattle.

Formula—

$$\frac{L \text{ (in feet)} \times 10 \times G^2 \text{ (in feet)}}{3} = \text{weight in lb.}$$

[L = length from hollow on crop (forepart of shoulder blade) to root of tail. G = girth close behind the shoulder.]

Hay and Straw.

Hay Formula—

$$\frac{\text{Height} \times \text{breadth} \times \text{length}}{11} = \text{tons of hay.}$$

Straw Formula—

$$\frac{\text{Height} \times \text{breadth} \times \text{length}}{16} = \text{tons of straw.}$$

[Height = distance from ground to eaves + ½ distance from eaves to ridge.]

Circular Stacks—

$$\frac{3\frac{1}{7} \times \text{radius}^2 \times \text{height}}{11} = \text{tons of hay.}$$

$$\frac{3\frac{1}{7} \times \text{radius}^2 \times \text{height}}{16} = \text{tons of straw.}$$

[Height = distance from ground to eaves + ½ distance from eaves to apex.]

ESTIMATED NUMBERS OF RELIGIOUS DENOMINATIONS AMONGST ENGLISH-SPEAKING COMMUNITIES THROUGHOUT THE WORLD.

Episcopalians	32,000,000
Methodists of all denominations	19,000,000
Roman Catholics	15,000,000
Presbyterians of all descriptions	13,000,000
Baptists of all descriptions	10,000,000
Congregationalists	6,250,000
Unitarians, under several names	3,000,000
Minor religious sects	6,000,000
Lutheran, German, or Dutch, &c.	3,000,000
Of no particular religion	20,000,000
English-speaking population	127,250,000

English bids fair to become the universal language. In Australasia and North America it is the one speech; and in the East fully 20,000,000 read and speak English. In point of numbers it is exceeded by Chinese alone.

ANNUITIES TO THE ROYAL FAMILY.

Their Majesties' Privy Purse	£110,000	£
Salaries of Household	125,800	
Expenses of Household	193,000	
Royal Bounty and Works	33,200	
Unappropriated	8,000	470,000
Prince of Wales		20,000
Princess of Wales		10,000
Princess Christian of Schleswig-Holstein		6,000
Princess Louise (Duchess of Argyll)		6,000
Duke of Connaught		25,000
Duchess of Edinburgh		6,000
Duchess of Albany		6,000
Princess Beatrice (Henry of Battenberg)		6,000
Duchess of Mecklenburg-Strelitz		3,000
Trustees for His Majesty's Daughters		18,000

Metric Weights and Measures.

THE Metric System is based upon the (assumed) length of the direct distance from the Equator to the North Pole. The ten-millionth part of this distance, as calculated in 1795, was adopted by the French Government as the unit of length, and called a *mètre*. All other measurements are derived from this unit; the cube of the tenth part of the mètre is the unit of capacity, called a *litre*, and the weight of a litre of water, at a certain temperature is the unit of weight, called a *kilogramme*. The unit of land measurement is 10,000 sq. mètres, called a *hectare*. The above terms are now used in this country under the English names of meter, liter, kilogram, and hectare. In the designs at the left of the page, the figures refer to inches and centimeters, the former being divided into 16ths, 8ths, 4ths, and the latter into millimeters.

Rough Comparisons.

10 centimeters	=	4 inches	8 kilometers	=	5 miles.
1 liter	=	1¾ pints	1 cubic meter	=	220 gallons.
1 kilogram	=	2¼ lbs.	1,000 kilograms	=	1 ton.
1 sq. meter	=	10 sq. feet.	1 hectare	=	2½ acres.

Accurate Comparisons.

1 pint	=	0·568 liter.
1 GALLON (8 pints or 160 fluid ounces)	=	4·545963 liters.

Time and Watch on Board Ship.

WATCH.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the Starboard (right side, looking forward) and the Port (left). The day commences at noon, and is thus divided:—

Afternoon *Watch*	...	...	noon to 4 p.m.
First Dog	,,	...	4 p.m. to 6 p.m.
Second Dog	,,	...	6 p.m. to 8 p.m.
First	,,	...	8 p.m. to midnight.
Middle	,,	...	12 a.m. to 4 a.m.
Morning	,,	...	4 a.m. to 8 a.m.
Forenoon	,,	...	8 a.m. to noon.

This makes seven WATCHES, which enables the crew to keep them alternately, as the *Watch* which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two *Watches*.

TIME.—Time is kept by means of "Bells," although there is but one bell on the ship, and to strike the clapper properly against the bell requires some skill.

First, two strokes of the clapper at the interval of a second, then an interval of two seconds; then two more strokes with a second's interval apart, then a rest of two seconds, thus:—

BELL, ONE SECOND; B., TWO SECS.; B. S.; B. SS. B. S.; B. SS.; B.

1 Bell is struck at 12.30, and again at 4.30, 6.30, 8.30 p.m.; 12.30, 4.30, and 8.30 a.m.
2 Bells at 1 (struck with an interval of a second between each—B. S. B.), the same again at 5, 7, and 9 p.m.; 1, 5, and 9 a.m.
3 Bells at 1.30 (B. S. B. SS. B.), 5.30, 7.30, and 9.30 p.m.; 1.30, 5.30, and 9.30 a.m.
4 Bells at 2 (B. S. B. SS. B. S. B.), 6 and 10 p.m.; 2, 6, and 10 a.m.
5 Bells at 2.30 (B. S. B. SS. B. S. B. SS. B.) and 10.30 p.m.; 2.30, 6.30, and 10.30 a.m.
6 Bells at 3 (B. S. B. SS. B. S. B. SS. B. S. B.) and 11 p.m.; 3, 7, and 11 a.m.
7 Bells at 3.30 (B. S. B. SS. B. S. B. SS. B. S. B. SS. B.) and 11.30 p.m.; 3.30, 7.30, and 11.30 a.m.
8 Bells (B. S. B. SS. B. S. B. SS. B. S. B. SS. B. S. B.) every 4 hours, at noon, at 4 p.m., 8 p.m., midnight, 4 a.m., and 8 a.m.

METRIC CONVERSION—*continued.*

AVOIRDUPOIS WEIGHT.

1 grain	=	0·0648 gramme.
1 dram	=	1·772 grammes.
1 ounce (16 drams)	=	28·350 ,,
1 POUND (16 ozs. or 7,000 grains)	=	0·45359243 KILOGRAM.
1 stone (14 lb.)	=	6·350 kilograms.
1 quarter (28 lb.)	=	12·70 ,,
1 hundredweight (cwt.) (112 lb.)	=	50·20 ,, / 0·5080 quintal.
1 ton (20 cwt.)	=	1·0160 tonnes or / 1016 kilograms.

TROY WEIGHT.

1 grain	=	0·0648 gramme.
1 pennyweight (24 grains)	=	1·5552 grammes.
1 troy ounce (20 pennyweights)	=	31·1035 ,,

APOTHECARIES WEIGHT.

1 grain	=	0·0648 gramme.
1 scruple (20 grains)	=	1·296 grammes.
1 drachm (3 scruples)	=	3·888 ,,
1 oz. (8 drachms)	=	31·1035 ,,

NOTE.—Approximately one liter equals 1,000 cubic centimeters, and one milliliter equals 1·00016 cubic centimeters.

Freezing point = 32° F. = 0° C. = 0° R.; Boiling point = 212° F. = 100° C. = 80° R. To convert degrees CENTIGRADE or RÉAUMUR into degrees FAHRENHEIT, or *vice versa*, use one of the following formulæ:

Let F = Number of degrees Fahrenheit, C = Number of degrees Centigrade, and R = Number of Degrees Réaumur, then

$$F = \frac{9}{5}C + 32 \qquad F = \frac{9}{4}R + 32 \qquad R = \frac{4(F-32)}{9}$$

$$C = \frac{5(F-32)}{9} \qquad F = C + R + 32$$

THERMOMETER. 429

Comparison between Scales of Fahrenheit, Réaumur, and the Centigrade.

CENT.	FAH'T.	RMR.	CENT.	FAH'T	RMR.

UNIFORMITY.—In 1824 an Act was passed rendering uniformity compulsory from the 1st of January, 1826, since which time the Imperial Statute System of Weights and Measures has been in general use, although some remains of the older forms still linger.

Avoirdupois Weight.

Drachm .....*dr.* = 27·34375 grains.
Ounce .....*oz.* = 16 drachms, 437·5 grains.
Pound .....*lb.* = 16 oz., 256 dr., 7,000 grains.
Customary Stone...*st.*, Butcher's Meat = 8 lb.
Legal Stone...*st.* = Horseman's weight = 14 lb.
Quarter .....*qr.* = 28 lb.
Cental or Quintal, *cent.* = 100 lb.
Hundredweight, *cwt.* = 4 qr., 112 lb.
Ton .....*T.* = 20 cwt., 2,240 lb.

Avoirdupois weight is used in all commercial transactions and common dealings, but in addition to the above there are special local weights for various articles, the chief of which are:—

A Quartern Loaf	=	4 lb.
A Peck of Flour, 2 Gallons (assumed)	=	14 ,,
A Firkin of Butter.....	=	56 ,,
A Barrel of Butter—4 firkins	=	224 ,,
A Firkin of Soft Soap (assumed) ...	=	64 ,,
A Box of Fish (assumed)	=	90 ,,
A Barrel of Gunpowder	=	100 ,,
A Barrel of Raisins	=	112 ,,
A Seam of Glass, 24 stones of 5 lb.	=	120 ,,
A Barrel (or pack) of Soft Soap.....	=	256 ,,
A Faggot of Steel	=	120 ,,
A Pig of Ballast	=	56 ,,
A Fodder of Lead, London and Hull	=	19½ cwt.
A do. Derby=22½ cwt.; Newcastle	=	21½ ,,
A Cask of Blacklead	=	11½ ,,
A Sack—Flour, 280 lb.; Coals, 224 lb; a ton of Coals, 10 sacks.		

The Metrical System of Weights is used in Belgium, France, Germany, Italy, Portugal, Spain, Sweden and Norway, and some other countries, the unit of which is the *Gramme*=15·432 grains; the chief multiple of the Gramme is the *Kilogramme*=2·2046 lb.: in practical use this is found inconvenient for small purchases, and nearly all commodities are sold by the demi or half kilo. The *Centner* of 50 kilos=110¼ lb., very nearly represents the English cwt.; but heavy goods are sold by the *Tonneau* of 2204·621 lb., about 19 cwt. 77 lb., the *Myriagramme* being ignored.

In the United States and in Canada the cwt. is generally reckoned as 100 lb., and the ton of 20 cwt.=2,000 lbs.

In Russia the *Pood* of 36 lb. is the commercial weight: 62⅔ Poods=1 English ton.

Indian Weights (*Bengal*).

Tola, unit of postage=180 grains.
Chittak=5 Tolas; Seer (16 Chittaks)=2$\frac{1}{3}$$\frac{5}{7}$ lb.
Imperial or Indian Maund=82$\frac{2}{7}$ lb.=40 seer.

Madras.

Viss=3·09 lbs., Maund=25 lb., Candy=500 lb.

Troy and Apothecaries Weight.

Carat ..... = 3·17 grains.
Pennyweight ...*dwt.* = 24 grains.
Ounce.....*oz.* = 20 dwt., 480 gr.
Pound.....*lb.* = 12 oz., 240 dwt., 5,760 gr.
Hundredweight..*cwt.* = 100 lb.

TROY is the weight used by goldsmiths and jewellers. The grains Troy, Apothecaries' and Avoirdupois are equal, and the same in England, France, the United States, Holland, and in most other countries; but the carat varies: in France it is 3·18 grains, in Holland 3·0 gr., and in the U.S. 3·2 gr. In the U.K. the jewellery ounce is divided into 151½ carats or 600 pearl grains.

The oz. Troy and Apothecaries' = 1·09714 oz. Avoirdupois; but the lb. Troy and lb. Apothecaries' =only 0·82286 lb. avoirdupois; while 175 lb. Troy and Apothecaries' = 144 lb. avoirdupois.

Apothecaries' Weight.

Scruple ℈	= 20 Grains.....	=	20 gr.
Drachm ʒ	= 3 Scruples.....	=	60 ,,
Ounce ℥	= 8 Drachms	=	480 ,,
Pound lb	= 12 Ounces	=	5760 ,,

The avoirdupois oz. of 437½ grains, and the lb. of 7,000 grains, are the weights named in the British Pharmacopœia; drugs are purchased by avoirdupois, but compounded by Apothecaries' weight. The Apothecaries' oz. and lb. may now be considered obsolete.

Hay and Straw.

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.
Truss of New Hay (to September 1st), 60 lb.
Load, 36 Trusses—Straw, 11 cwt. 2 qr. 8 lb.; Old Hay, 18 cwt.; New Hay, 19 cwt. 1 qr. 4 lb.

Wool.

Clove, *cl.* = 7 lb.
Stone, *st.* = 2 Cloves = 14 lb.
Tod, *td.* = 2 Stones = 1 qr.
Wey, *wy.* = 6½ Tod = 1 cwt. 2 qr. 14 lb.
Pack, *pk.* = 240 lb.
Sack, *sk.* = 2 Weys = 13 qr.
Last, *la.* = 12 Sacks = 1 cwt. 19 lb.

Since the advent of SHODDY, some of the above weights have become nearly obsolete, although the terms are still in use with different values: thus 16 lb. = 1 st.; 28 lb. = 1 Tod; 20 lb. = 1 Score; 12 Score or 240 lb. = 1 Pack.

Worsted Yarn.

Wrap, 80 yards; Hank=560 yards=7 Wraps; Counts or Numbers are the number of hanks in a lb.

Cotton Wool.

Bale variable in United Kingdom; U.S.A. average 477 lb.; Egyptian, 719 lb.; East Indian, 396 lb.; Brazilian, 220 lb.

Cotton Yarn.

Thread = 1½ yards.
Lea, or Skein, *skn.* = 120 Yards.
Hank, *hk.* = 7 Skeins or Leas = 840 yds.
Spindle, *spdl.* = 18 Hanks.
} Also same for Silk.
Counts=the number of Hanks in 1 lb.
Bundle Hanks, either of 5 lb. or 10 lb.
Reels of Cotton vary from 30 to 1,760 yards; by the new Act must be marked correctly.
Bundles of Cotton are chiefly made up for export.

Liquid Measure.

The Gill contains 8·6648125 cubic inches.
The Pint contains 4 gills or 34·65925 inches.
Quart = 2 pints = 8 gills or 69·3185 cubic in.
Gallon = 4 quarts = 32 gills or 277·274 cubic in.
Pin = 4½ Gallons or ⅛ Barrel.

	Gals.	Qts.	Pts.
Firkin or Quarter Barrel	9	36	72
Anker (10 gallons)	10	40	80
Kilderkin, Rundlet, or ½ Barrel	18	72	144
Barrel	36	144	288
Tierce (42 gallons)	42	168	336
Hogshead of Ale (1½ barrels).....	54	216	432
Puncheon	72	288	576
Butt of Ale	108	432	864

Practically, the only measures in use are gallons, quarts, pints, and gills, the others are merely nominal; *e.g.*, the hogshead of 54 gallons, *old measure*, contains but 52 gallons, 1 quart, 1 pint, and 3·55 gills imperial measure; and of wine six nominal quart bottles go to the gallon. Of wines imported in casks the following are the usual measurements:—

Pipe of Port or Masdeu ..... = 115 gallons.
,, Teneriffe ..... = 100 ,,
,, Marsala ..... = 93 ,,
,, Madeira and Cape ..... = 92 ,,
,, Sherry and Tent ..... = 108 ,,
Butt of Lisbon and Bucellas..... = 117 ,,
Aum of Hock and Rhenish ..... = 30 ,,
Hogshead of Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons.

The United States use the "Winchester" gallon of 231 cubic inches; the names of measures are the same, and 6 American gallons (1386 c.i.) are practically = 5 English gallons (1386·37 c.i.)

Apothecaries' Fluid Measure.

		Marked
60 Minims ♏ (drops)	= 1 Fluid Drachm	f ʒ
8 Drachms	= 1 Ounce	f ℥
20 Ounces	= 1 Pint	O
8 Pints	= 1 Gallon	C., or Cong.

1 Drachm, =1 Tea-spoonful. 2 Drachms=1 Dessert-spnful. 4 Drachms=1 Table-spoonful. 2 Ounces =1 Wineglassful. 3 Ounces =1 Teacupful.

Prescribing medicine by the spoon, glass or cupful is unsafe, as all those vessels vary in size. Graduated glass measures may be purchased for a few pence.

Dry or Corn Measure.

Quart	= 2 Pints.	Strike	= 2 Bushels.
Pottle	= 2 Quarts.	Coomb	= 4 Bushels.
Gallon	= 4 Quarts.	Quarter	= 8 Bushels.
Peck	= 2 Gallons.	Load	= 5 Quarters.
Bushel	= 4 Pecks;	Last	=10 Quarters.

Boll of Meal = 140 lb.; 2 Bolls = 1 Sack.

Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned:—

Wheat, English, 63 lb. Foreign, 62 lb.
Barley, English, 52 and 56 lb. French, 52½ lb. Mediterranean, 50 lb.
Oats, English, 40 & 42 lb. Foreign, 38 & 40 lb.
Rye and Maize, 60 lb. Buckwheat, 52 lb.

Grain of all kinds is sold by stone of 14 lb.

Coals were formerly sold by measure: 3 heaped bushels = 1 sack, 12 sacks = 1 chaldron. Coke, apples, potatoes, and some other goods are still sold by heaped measures and the sack of three bushels; of coke, four bushels are usual.

Fruit.—The Covent Garden bushel basket is 17½ inches in diameter at top, 10 inches at the bottom, and is 10 inches deep. The smaller market baskets are said to vary in size according to the season and the supply.

Cubic or Solid Measure.

Cubic Foot ..... = 1,728 Cubic Inches.
Cubic Yard ..... = 27 Cubic Feet, 21·033 bushels.
Stack of Wood... =108 Cubic Feet.
Shipping Ton .. = 40 Cubic Feet merchandise.
Shipping Ton .. = 42 Cubic Feet of Timber.
Ton of displacement of a Ship = 35 Cubic Feet.

Measures of Length.

Mile Geographical, Admiralty Knot, or Nautical Mile, 6,080 Feet = 1013⅓ fathoms = 1·15 Mile Statute.
33 Knots = 38 Statute Miles.
League = 3 Miles.
Degree = 60 Geographical = 69·121 Statute Miles.

Inch, *in.* ..... = 72 Points, or 12 Lines,
Nail, ¼ ..... = 2¼ Inches.
Palm ..... = 3 Inches.
Hand ..... = 4 Inches.
Link ..... = 7·92 Inches.
Quarter (or a Span) = 9 Inches.
Foot ..... = 12 Inches.
Cubit ..... = 18 Inches.
Yard ..... = 36 Inches.
Pace, Military ..... = 2 Feet 6 Inches.
Pace, Geometrical.. = 5 Feet.
Fathom ..... = 6 Feet.
Rod, Pole, or Perch = 5½ yards.
Chain (100 Links) ... = 22 Yards (4 Poles).
Cable's Length ..... = 100 Fathoms, 600 Feet.
Furlong ..... = 40 Rods, 220 Yards.
Mile ..... = 8 Furlongs, 80 Chains, 320 Rods, 880 Fathoms, 1,760 Yards, 5,280 Feet, 63,360 Inches.

Although no longer sold by that measure, Calicos, &c., are sometimes said to be "Ell wide"—the English Ell being 1¼ yard, the Flemish Ell ¾ yard, and the French Ell 1½ yard.

The old *Scottish Mile* was 5,920 feet; ten Scots Miles being about equal to 11 Statute Miles. *Irish Mile* is 6,720 feet; eleven Irish Miles being equal to 14 Statute Miles.

Square, Surface, or Land Measure.

Square Foot = 144 Square Inches.
Yard = 9 feet = 1,296 inches.
Rod, Pole, or Perch = 30¼ yards = 272¼ feet.
Chain = 16 rods = 484 yards = 4,356 feet.
Rood = 40 rods = 1,210 yards = 10,890 feet.
Acre = 4 roods = 160 rods = 4,840 yards.
Yard of Land = 30 acres = 120 roods.
Hide = 100 acres = 400 roods.
Mile = 640 acres = 2,560 roods = 6,400 chains = 102,400 rods, poles, or perches, or 3,097,600 square yards.

An Acre of four equal sides = 69·57 yards each or 208·71 feet. The sides of a square half-acre of equal sides = 147·581 feet, and of a square quarter-acre, 104·355 feet.

The above Imperial Measure is employed in the United Kingdom, in Canada, Australia, and the Colonies generally also in the United States; but occasionally some older measurements are referred to. Of these—

The Lancashire and Irish Acre, each of 160 perches, contain 7,840 sq. yards, equal to 1·619835 Statute. 1 Statute = 0·617347 Lancashire or Irish.

The Cheshire Acre of 160 perches, each = 64 sq. yards = 10,240 sq. yards = 2·1157 acres.

The Cunninghame Acre, equal to 1·291322 Statute; or 1 Statute Acre is equal to 0·7744 Cunninghame.

The Scottish Acre = 1·26183 Statute (nearly 6,104 square yards).

Measures of Time.

60 Seconds ..... = 1 Minute.
60 Minutes ..... = 1 Hour.
24 Hours ..... = 1 Day.
(23*h.* 56*m.* 4*s.* = 1 Sidereal Day.)
7 Days ..... = 1 Week.
28 Days ..... = 1 Lunar Month.
28, 29, 30, or 31 Days ..... = 1 Calendar Month.
12 Calendar Months ..... = 1 Year.
365¼ Days ..... = 1 Common Year.
366 Days ..... = 1 Leap Year.
365*d.* 5*h.* 48*m.* 46*s.* ..... = 1 Tropical Year.

The Astronomical Day commences at noon, and is computed from 1 to 24 hours.

In 400 years 97 are Leap-years and 303 common, Leap-year being omitted every 100th year, but not omitted every 400th. (1900 was not a Leap year.)

Angular Measure.

60 Seconds ″..... = 1 Minute.
60 Minutes ′..... = 1 Degree.
30 Degrees° ..... = 1 Sign.
90 Degrees° ..... = 1 Quadrant.
4 Quadrants, or 360° ... = 1 Circumference.

The Earth rotates at a velocity of 15 degrees an hour of time at the Equator (about 17·366 miles a minute); 1° is therefore equal to 4 minutes.

Circular Measure.

Diameter of Circle × 3·1416 = Circumference.
Diameter Squared × ·7854 = Area of Circle.
Diameter Squared × 3·1416 gives Surface of Sphere.
Diameter Cubed × ·5236 = Solidity of Sphere.
One Degree of Circumference × 57·3 gives Radius.
Diameter of Cylinder × 3·1416; product by length or height, gives the Surface.
Diameter Squared × ·7854; product by length or height, gives Solid Content.

A Circular Acre is 235·504 feet, a Circular Rood 117·752 feet in diameter. The Circumference of the Globe is about 24,855 miles, and the Diameter about 7,900 miles.

Electrical Measures.

It is customary among electricians to express all measurements in terms of the centimeter, gramme, second (C.G.S.) system, either as force or work according to their nature, and, due allowance being made for the effect of gravitation, these units are called "absolute"; but it is fair to mention that the accuracy aimed at has not, and probably never will be, attained.

For practical and commercial purposes the chief units are the—

	For the measure of
VOLT.....	Electromotive force = about 92·6% of that given by one Daniell's battery cell.
OHM	Resistance = the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.
AMPÈRE	Current = the current 1 volt will drive through 1 ohm.
COULOMB.....	Quantity = 1 ampère flowing for 1 second of time.
MICROFARAD	Capacity = ·000,001 coulomb at 1 volt pressure.
WATT	Power = 44 ft. lb. per minute.

Board of Trade Unit = 1,000 watts 1 hour.
746 watts = 1 horse-power.

In incandescent lamps of 16-candle power (nominal) about four watts are required per candle power to give good economical results for domestic purposes.

One Board of Trade unit will keep a 16-candle incandescent lamp alight for about 16 hours.

Fish Measure.

Herrings are sold by the *Cran*, containing 37½ imperial gallons or *Half Cran* of 18¾ imperial gallons (or *Barrel*, for white herrings, of 26¾ imperial gallons) on the East Coast of Scotland from Shetland to Berwick, also at Castle Bay and Stornoway; but on the West Coast, Isle of Man, and in Ireland, by the *Maze*, which contains 5 long hundreds of 123 each. On the East coast of England they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4. 33 Warps = 1 Long Hundred, 132: 10 Hundred = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200.

Timber and Wood.

40 cubic feet rough, 50 cubic feet squared = 1 load.
50 cubic feet of planks = 1 load.
100 superficial feet = 1 square of flooring
120 Deals = 100.
Width of Battens, 7 inches; Deals, 9 inches; Planks are 2 to 4 inches thick, and 10 or 11 inches wide. A Cord of Wood is 2½ tons, or 125 cubic feet.

Carpenters', Bricklayers', and Builders' Measurements.

Stock or kiln bricks	8¾ inches	× 4¼ × 2¾	
Welsh fire-bricks.....	9	,, × 4½ × 2¾	
Paving bricks	9	,, × 4½ × 4½	
Square tiles	9¾	,, × 9¾ × 1	
,, ...	6	,, × 6 × 1	
Dutch clinker bricks	9¼	,, × 3 × 1½	

A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11¼ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar.

A Square of Flooring is 100 square feet.

A Piece of Wall Paper is 12 yd. long × 21 in. wide (English), and 9 yd. × 18 in. (French).

Ordinary bricks weigh about 7 lb. each; a load of 500 weighs about 1 ton, 11 cwt., 1 qr.

Sizes of Slates.

	in. in.		in. in.
Empress	26×16	Ladies	16×10
,, Small ...	26×14	,, Small ...	16× 8
Princesses	24×14	,, Large ...	14×12
Duchesses	24×12	,, ...	14× 8
Marchionesses	22×12	Plantation ...	13×11
,, Small ...	22×11	Doubles	13×10
Countesses	20×10	,, ...	13× 7

Remarkable Occurrences, &c., 1907–1908.

PRINCIPAL EVENTS, 1 Nov., 1907—31 Oct., 1908.

THE BRITISH ISLES.

THE KING AND COURT.—(1907) *Nov.* 12. The Kaiser shot in Windsor Forest with the King. In the evening a State Banquet was given at the Castle. *Dec.* 1. The birthday of the Queen was celebrated at Sandringham. 16. The King held an Investiture at Buckingham Palace.—The Prince of Wales presided at a meeting of the General Council of King Edward's Hospital Fund. 20. The King paid a private visit to the Royal United Service Institution, and inspected the newly restored Rubens ceiling. (1908) *Jan.* 9. The King, at Buckingham Palace, invested Mr. Frith, R.A., painter of the "Derby Day," with the insignia of a C.V.O. on the occasion of his 90th birthday. 22. The King and Queen, with other members of the Royal Family, attended a memorial service on the anniversary of the death of Queen Victoria. *Feb.* 8. The King and Queen were present at a requiem celebration for the King and Crown Prince of Portugal at St. James's, Spanish Place. 9. The King and Queen attended a memorial service for the late King and Crown Prince of Portugal in St. Paul's Cathedral. 15. A memorial to Queen Victoria, the work of Mr. John Hughes, R.H.A., was unveiled in Leinster Lawn, Dublin, by the Lord Lieutenant. 19. The King held a Levée at St. James's Palace. 20. The first Court of the season was held at Buckingham Palace. 21. The Liverpool Chamber of Commerce presented the King, at Buckingham Palace, with a portrait of His Majesty painted by Mr. Tennyson Cole. 27. The King decorated two miners with the Edward medal at Buckingham Palace. *March* 4. The King called on the Prime Minister at his residence in Downing Street, and spent nearly an hour there, previous to his journey abroad. 5. The King, travelling as the Duke of Lancaster, left London for the Continent. 14. The Queen and the Dowager Empress of Russia visited Earl Spencer at Althorp. *April* 10. The Queen and the Dowager Empress of Russia visited the grounds of the Franco-British Exhibition. 16. The King returned to London from the Continent. 17. The King called at Downing Street to inquire as to the health of the Premier. 30. The Prince of Wales, as Grand Master, attended the annual service for the members of the Order of St. Michael and St. George at St. Paul's Cathedral. *May* 4. The King and Queen arrived in London after a visit to the Continent. 5. The King held a Council at Buckingham Palace. 9. The Prince and Princess of Wales paid a visit of inspection to the Franco-British Exhibition. 11. The King held a Levée at St. James's Palace. 12. The King arrived at Chester, and was welcomed by the Mayor and Corporation. His Majesty afterwards proceeded to Eaton Hall. 15. The King concluded his visit to Eaton Hall, and returned to London, their Majesties holding a Court at Buckingham Palace in the afternoon. 23. The King and Queen visited the Duke of York's School at Chelsea. 26. The King and the President of the French Republic visited the Franco-British Exhibition. In the evening a State Ball was given at Buckingham Palace.

28. The Prince and Princess of Wales opened the new Public Library in Mare Street, Hackney. *June* 12. The Prince of Wales, accompanied by the Princess, formally opened the Rotherhithe Tunnel. 13. The King, with the Queen and Princess Victoria, arrived in London on their return from visiting the Tsar. 20. The King and Queen gave a great garden party at Windsor Castle. 22. The King laid the commemorative stone at Windsor of a new hospital and dispensary for the district.—The King and Queen visited the International Horse Show at Olympia. 24. The Prince and Princess of Wales entertained the members of the League of Mercy at a garden party at Marlborough House. 26. The official celebration of His Majesty's Birthday took place. The King attended the ceremony of Trooping the Colour on the Horse Guards Parade. 27. The Duke of Connaught reviewed about 10,000 of the Church Lads' Brigade in Hyde Park. 29. The King and Queen were present at the Queen's Hall at a display of physical drill by the Children's Happy Evenings Association. *July* 4. The King and Queen opened the new building of the Royal National Pension Fund for Nurses in Buckingham Street, Strand. 6. The King held a Levée at St. James's Palace. 9. The King and Queen spent the day at Bristol, opening the Royal Edward Dock at Avonmouth and visiting Clifton College. 10. The King and Queen gave a State Ball at Buckingham Palace. 21. The King held an Investiture at Buckingham Palace. 27. The King and Queen received an address from the Seventeenth Universal Congress of Peace, at Buckingham Palace. *Aug.* 6. The King and Queen cruised round the Isle of Wight in H.M.S. *Indomitable*. 10. The King held an Investiture at Buckingham Palace, and afterwards left London for Marienbad. 24. The Queen left Balmoral for Copenhagen. 29. The King and Queen of Spain gave a garden party at Osborne Cottage. *Sept.* 2. The King and Queen of Spain left London for the Continent. 5. The King returned to London from Marienbad. 28. The King opened the new Queen Victoria Memorial School for the Children of Scottish Sailors and Soldiers at Dunblane. 30. The Earl of Dartmouth unveiled a statue of the King at Lichfield. *Oct.* 11. The King received the Russian Foreign Minister and the Russian Ambassador at Buckingham Palace, and also gave audience to the Prime Minister and Sir Edward Grey. In the evening His Majesty gave a banquet at the Palace. 12. The King held an Investiture at Buckingham Palace.

INTERNATIONAL COURTESIES.—(1907) *Nov.* 11. The yacht *Hohenzollern*, with the Kaiser and Kaiserin on board, arrived at Portsmouth, and received a most enthusiastic welcome. The Royal party afterwards proceeded to Windsor, where they were received by the King and Queen. 13. The Kaiser was entertained at luncheon in Guildhall by the Lord Mayor and Corporation. 15. A deputation from the University of Oxford waited on the Kaiser at Windsor Castle, and conferred upon him the degree of Doctor of Civil Law. 23. The King and Queen of Norway arrived in London. (1908) *March* 4. The Dowager Empress of Russia arrived at Dover, and proceeded to London. 6. The King exchanged visits with the French President, and afterwards dined at the English Embassy in Paris. *April* 1. The Prince and Princess of Wales visited President Fallières at the Elysée. 7. The King and Queen arrived at Copenhagen, and afterward proceeded to Christiania. *May* 8. The French Minister of Commerce and the French Ambassador were entertained by the chief organisers of the Franco-British Exhibition—the Earl of Derby presiding. 18. A party of German Chief Burgomasters staying in England visited the City and Houses of Parliament. 23. The German Burgomasters were received by the King at Buckingham Palace. 25. The King received the President of the French Republic at Victoria Station and drove with him to St. James's Palace. In the evening a State Banquet was given at Buckingham Palace. 27. The President of the French Republic was entertained at Guildhall by the Lord Mayor and Corporation. In the evening he attended a gala performance at the Royal Opera House.—A party of ministers, representative of various German churches, on a visit to England, arrived in London. 28. The President of the French Republic visited Windsor, and in the evening a banquet was given at the French Embassy. 29. The President of the French Republic left London for Paris. 30. The King received the German pastors at Buckingham Palace. *June* 5. The King and Queen, with Princess Victoria, left London on a visit to the Tsar. 9. The King and the Tsar met at Reval. *July* 28. The Lord Mayor and a number of provincial Mayors visited Boulogne as guests of the Municipality. *Aug.* 11. The King arrived at Cronberg, and was met by the German Emperor. 12. The King met the Austrian Emperor at Ischl. 15. Many thousands of French excursionists visited London, taking advantage of the Fête de l'Assomption. 26. The King dined with the French Premier and the Russian Foreign Minister at Marienbad.

IMPERIAL POLITICS.—(1907) *Nov.* 6. A deputation on the subject of Irish Land Purchase Finance waited on the Premier, the Chancellor of the Exchequer, and the Irish Secretary. 13. The usual Colston Banquets were held at Bristol. The Prime Minister spoke at that of the Anchor Society. 14. The National Union of Conservative Associations held its annual Conference at Birmingham. 21. Uproarious scenes were witnessed at Leeds, when a number of Suffragettes disturbed a meeting of Mr. Gladstone's supporters. 26. Mr. Asquith received a number of deputations at the Treasury on the Licensing question. 28. A deputation on the employment of barmaids waited on the Home Secretary. *Dec.* 5. A number of medical students created a great disturbance at a Woman's Suffrage meeting at the Paddington Baths Hall. (1908) *Jan.* 1. The offices of the Public Trustee were officially opened to the public for the first time. 8. Riotous proceedings occurred during the meetings held by the rival candidates in the Ashburton Division bye-election.—Mr. Haldane was much heckled by Suffragists at a meeting held in Glasgow.—A deputation of coal-owners waited on the Home Secretary with reference to the Eight Hours Bill. 17. A raid by Suffragists was made on 10, Downing Street, during a meeting of the Cabinet. Violent scenes were witnessed during their removal to the police stations. 18. The result of the Mid-Devon election was announced, Capt. Morrison-Bell, Unionist, having converted a Liberal majority of 1,283 into 559 Conservative. Rioting followed, the Conservative Club was seriously damaged, and a number of supporters of Women's Suffrage were roughly

handled. 20. The Annual Conference of the Labour Party was opened at Hull.—Lord Curzon of Kedleston was elected an Irish Representative Peer. 24. Mr. Lloyd George was presented with the freedom of the city of Cardiff. 29. The King, accompanied by the Queen, opened Parliament in State. 30. A number of Suffragists demonstrated outside the houses of several Cabinet Ministers. Various arrests were made. *Feb.* 1. The Hereford bye-election resulted in the return of Captain Clive (*U.*). 7. *The Tribune*, a newly established, high-class Liberal daily newspaper, ceased issue after this date. 11. A number of Woman Suffragists attempted to force their way into the House of Commons to present a petition. Several arrests were made. 13. The polling in the South Leeds bye-election resulted in the return of Mr. Middlebrook (*L.*) with a diminished majority. 21. A great demonstration was held in Queen's Hall, the Lord Mayor presiding, to consider the misrule on the Congo.—At the meeting of the National Liberal Federation at Leicester, a resolution, moved by Mr. Lehmann, M.P., in favour of the reduction of armaments, was carried by a large majority. 28. The Woman's Enfranchisement Bill passed the second reading in the House of Commons by 271 votes to 92. *March* 3. The result of the Hastings bye-election was the return of Mr. A. P. Du Cros (son of the former member) by an increased Conservative majority. 9. A mass meeting to protest against the Licensing Bill of the Government was held at the Queen's Hall. 18. A meeting of Brewery Debenture-holders was held at the Cannon Street Hotel, under the presidency of Lord Rothschild, to consider the new Licensing Bill. 24. The Peckham bye-election resulted in the return of the Unionist candidate (Mr. Gooch) by a majority of nearly 2,500 votes. 26. Uproarious scenes were witnessed at the Queen's Hall, at a meeting convened by the United Kingdom Alliance in support of the Government Licensing Bill. *April* 5. It was officially announced that Sir Henry Campbell-Bannerman had resigned the Premiership. It was also stated that the King had summoned Mr. Asquith to Biarritz. 8. At Biarritz Mr. Asquith was received by the King, and kissed hands on appointment as Prime Minister. 10. Mr. Balfour was entertained by the members of the Parliamentary Press Gallery at the Waldorf Hotel. 17. The Social Democratic Party opened its session at the Coal Exchange, Manchester. 23. The Dewsbury bye-election resulted in the return of Mr. Runciman (*L.*) by a diminished majority. 24. At the bye-election in North-West Manchester Mr. Joynson-Hicks (*U.*) defeated Mr. Winston Churchill (*L.*) by 429 votes. 28. The Archbishop of Canterbury, presiding at the annual meeting of the Church of England Temperance Society at Lambeth Palace, spoke strongly in favour of the Government Licensing Bill. 29. The first meeting of the new Cabinet was held in Downing Street. *May* 5. The bye-election in East Wolverhampton resulted in a narrow victory for Mr. Thorne (*L.*) by 8 votes. 8. The annual demonstration of the Primrose League took place at the Albert Hall. Lord Harris presided in the absence of Mr. Balfour. 9. After a most strenuous contest Mr. Winston Churchill (*L.*) was elected Member for Dundee. 15. The Unionist candidate returned for Mid-Shropshire with an increased majority. 16. The Bishop of London presided at a large demonstration at the Albert Hall in favour of the Licensing Bill.—A demonstration of the Hop and Allied Trades was held in Trafalgar Square, urging that steps should be taken to protect the English hop trade. 22. The bye-election in the Stirling District, the seat of the late Premier, resulted in the return of Mr. Ponsonby (*L.*). *June* 6. The Annual Convention of the United Irish League of Great Britain was held at Leeds, Mr. T. P. O'Connor presiding. 13. Remarkable procession of Woman Suffragists from the Embankment to the Albert Hall, followed by a demonstration. 19. The Prime Minister spoke at Birmingham, at the annual meeting of the National Liberal Federation. 20. The Pudsey bye-election resulted in the return of the Unionist candidate by 113 votes, the first time that a Conservative had ever gained the seat. 21. A great demonstration of supporters of Women's Suffrage took place in Hyde Park. The number of people present was estimated at 250,000. 30. An enormous crowd witnessed an attempt of Suffragists to present a petition to the Prime Minister, and a number of women were arrested. Some of the windows in Mr. Asquith's house were broken by stones. *July* 10. Mr. Asquith was entertained at dinner in the Inner Temple Hall by the Bar of England, the Attorney-General presiding. 13. A deputation of Members of Parliament of all parties waited on the Prime Minister to ask for the introduction of penny postage to France. 25. A great demonstration in support of the Government Licensing Bill was held in Hyde Park. *Aug.* 1. The Haggerston bye-election resulted in the return of Hon. Rupert Guinness (*C.*) by a majority of over 1,000 votes. 4. The International Free Trade Congress was opened at Caxton Hall; Mr. Winston Churchill was among the speakers. In the evening the Prime Minister spoke at the Cobden Club dinner at the Hotel Cecil. *Sept.* 24. The Newcastle bye-election resulted in the return of the Unionist candidate by a majority of over 2,000 votes. 27. A great demonstration of opponents of the Government Licensing Bill was held in Hyde Park, 250,000 being the estimated number present. 29. Lord Tweedmouth's resignation of office was officially announced. *Oct.* 10. Resignation of office by the Marquess of Ripon officially announced. 13. A strenuous demonstration of Suffragists led to riotous scenes outside the House of Commons. One woman managed to effect an entrance into the House itself, but was promptly carried out. A number of the leaders were arrested. 15. In the House of Commons, Mr. Victor Grayson defied the authority of the Speaker, and was removed by the Serjeant-at-Arms. 16. Mr. Victor Grayson, in the House of Commons, was named by the Speaker for disorderly conduct, and suspended for the rest of the Session. 24. Lord Curzon of Kedleston (*C.*) was elected Lord Rector of Glasgow University, and Mr. George Wyndham, M.P. (*C.*), of Edinburgh University, to the exclusion respectively of Mr. Lloyd George (*L.*) and Mr. Winston Churchill (*L.*). 31. The Prime Minister was elected Lord Rector of Aberdeen University, to the exclusion of Sir E. H. Carson (*C.*).

MUNICIPAL AFFAIRS.—(1907) *Nov.* 9. The Lord Mayor's Procession took place, and the customary banquet was held at Guildhall in the evening. *Feb.* 19. The annual meeting of the Central Poor Law Conference was held at the Guildhall, Sir Edward Fry presiding. *March* 31. The report of the Local Government Board

Inspectors on the Mile End Inquiry was issued. It referred in scathing terms to some of the practices pursued. *April* 1. A new scheme came into force whereby the City of London became one parish. 29. The Prince of Wales opened the new Lambeth Town Hall. *May* 20. In connection with the recent Poor Law Scandals in Mile End, seven of the Guardians were arrested. 26. The decision of the Winchester City Council to remove some railings round a Russian gun captured in the Crimean War and placed in a public position, led to such serious riots that the troops were called out. *July* 7. The Prince of Wales, accompanied by the Princess, opened the new Town Hall at Stockport. 14. A deputation, headed by the Lord Mayor, waited on the Home Secretary with regard to the motor traffic in the City. *Aug.* 5. The Duke of Connaught opened the new Marine Drive at Scarborough. *Sept.* 25. Seven members of the Board of the Poplar and Stepney Sick Asylum were arrested on charges of conspiracy to defraud. 29. Alderman Sir George Truscott was elected Lord Mayor of the City of London. *Oct.* 23. Mr. J. S. Harmood-Banner, M.P., presided at the autumn meeting of the Association of Municipal Corporations. 24. A definite announcement made that Mrs. Garrett Anderson, M.D., and Miss Dove were candidates for the Mayoralties of Aldeburgh and High Wycombe.

ACCIDENTS AND DISASTERS (GENERAL).—(1907) *Nov.* 9. Lord Chesham was thrown from his horse while hunting near Daventry and killed instantly. 25. Fatal cage accident at a colliery near Barnsley. 24. Maj.-Gen. Sir H. Colvile fatally injured in a motor-car accident. 26. A fire at Gamage's, Holborn, caused £30,000 damage. *Dec.* 26. Three children suffocated by a fire in Wardour Street. (1908) *Jan.* 1. An explosion of cartridges and subsequent fire in Aldermanbury caused much damage, killed one man and injured many more. 11. Sixteen children were suffocated and many injured at a cinematograph exhibition at Barnsley Public Hall, a crush occurring on the stairs. *Feb.* 21. Fourteen men killed by an explosion in a mine near Newcastle-on-Tyne. 22. A tremendous gale raged all round the coast, doing extensive damage. *March* 4. Fire in the Hamstead Colliery, near Birmingham; 24 lives lost. 9. Scent works in Blackfriars Road entirely destroyed by fire; £50,000 damage. 25. A fire broke out in Drury Lane Theatre; the stage and much of the properties were consumed, but the auditorium was untouched. *April* 6. Some houses collapsed in Castle Street East (Oxford Street); 8 people were killed, and many injured. 9. Explosion at Norton Hill Colliery, Midsomer Norton; 10 lives lost. 18. The Guildhall at Londonderry entirely destroyed by fire. *May* 1. Serious tram accident between Bournemouth and Christchurch; 7 killed and 10 injured. 13. A heavy thunderstorm raged over Lincolnshire; one of the pinnacles of the famous Boston "Stump" displaced by lightning. *July* 3. A tremendous thunderstorm raged at night over a large area, and did an immense amount of damage. 16. Fire broke out on the Bank and Moorgate Street section of the City and South London "Tube," fortunately without serious consequences. *Aug.* 2. Lord Brassey's country house, "Normanhurst," near Battle, was severely damaged by fire. 6. Burley Hall, in Rutlandshire, almost entirely destroyed by fire; Mr. Winston Churchill and several other guests experiencing narrow escapes. 14. An airship which had been intended for ascent on the following day exploded at Shepherd's Bush, killing three persons and severely injuring several others. 18. Explosion at the Maypole Colliery, near Wigan; 76 lives lost. *Oct.* 3. A breakdown at the Chelsea Electric Generating Station led to a complete stoppage during the afternoon on District Railway and three "Tubes." 10. The floor temporarily erected over a bath at Matlock collapsed at a public meeting; the Duke and Duchess of Devonshire and a number of people were badly shaken and bruised.

ACCIDENTS AND DISASTERS AT SEA.—(1907) *Dec.* 7. The ss. *Scheldestroom* was run into by the iron barque *Forfarshire* off Folkestone; 10 men were drowned owing to the wreck of a boat. 14. The American schooner *Thomas W. Lawson* foundered off the Scilly Islands, and 17 lives were lost. (1908) *Sept.* 1. The sailing ship *Amazon* foundered in Swansea Bay, with a loss of 20 lives. 29. The steam yacht *Argonaut*, with a number of tourist passengers on board, was run down and sunk by a cargo steamer off Dungeness in a fog; no lives were lost. *Oct.* 26. The G.E.R. cargo steamer *Yarmouth* left Rotterdam for Harwich with a crew of 20 on board, and from wreckage discovered at sea appears to have capsized and sunk.

AERIAL NAVIGATION.—(1907) *Nov.* 30. The French military airship *Patrie*, which had completed many successful flights, broke away and was wrecked in Ireland (1908). *Jan.* 13. M. Farman won the Deutsch Archdeacon prize of £2000. *May* 30. The International Balloon Race, starting from the Hurlingham Club, with 31 entries, resulted in four places out of the first five being gained by English competitors. *June* 20. The Zeppelin No. 4 made a first voyage with 15 passengers. *Aug.* 5. Wreck of Zeppelin No. 4 after sailing a total distance of 400 miles. *Sept.* 16. Mr. Wilbur Wright flew 30 miles in 40 minutes. *Oct.* 14. A successful trial was made with an Army aeroplane at Farnborough. 29. M. Farman flew 17 miles in 20 minutes.

CONFERENCES, EXHIBITIONS, PAGEANTS, &c.—(1907) *Nov.* 11. The Duke of Connaught opened the Motor Show at Olympia. 30. The Birmingham Agricultural Exhibition Society opened its Annual Show at Bingley Hall. *Dec.* 9. The King was a visitor at the Show of the Smithfield Club at Islington, and His Majesty's exhibits gained several prizes. (1908) *Feb.* 25. The Annual Show of the Shire Horse Society was opened at the Agricultural Hall, Islington. *March* 3. The Hackney Horse Show was opened at the Agricultural Hall. 9. The Second International Conference on the Sleeping Sickness met at the Foreign Office. 27. The Lord Mayor opened the Commercial Motor Vehicle and Motor Boats Exhibition at Olympia. *April* 20. The Annual London Van-Horse Parade was held in Regent's Park. *May* 9. The Lord Mayor opened the Hungarian Exhibition at Earl's Court. 14. The Prince of Wales formally opened the Franco-British Exhibition, in the most deplorable weather. 21. The Royal Naval and Military Tournament at Olympia was formally opened by General Sir John French. *June* 4. The "Orient in London" Exhibition at the Agricultural Hall was opened by Mr. Winston Churchill. 8. The Annual Cart-Horse Parade was held in Regent's Park. 13. A Scottish His-

torical Pageant took place in Edinburgh. 18. The International Horse Show at Olympia was opened. 25. The Winchester and Chelsea Historical Pageants were opened, in splendid weather. 30. The Annual Show of the Royal Agricultural Society was opened on the Town Moor, Newcastle-on-Tyne. *July* 4. The Annual Display of the London Fire Brigade took place at Victoria Park. 6. The Gloucestershire Historical Pageant was opened at Cheltenham. 11. Lord Strathcona opened the Mining Exhibition at Olympia. 27. The Dover Pageant was begun. *Aug.* 19. The Annual Co-operative Festival opened at the Crystal Palace. 22. The Annual Congress of the British Chess Federation was concluded at Tunbridge Wells. 25. The Annual Horse Show of the Royal Dublin Society was opened. *Sept.* 2. The 78th Session of the British Association was opened in Dublin. The inaugural address was delivered by the President, Mr. Francis Darwin —son of the famous scientist. 7. The Trade Unions Congress opened in the Mechanics' Hall, Nottingham. 15. The Third Congress of the History of Religions was opened at Oxford. *Oct.* 9. The Lord Mayor opened the "Ideal Home" Exhibition at Olympia.

CRIMES AND CAUSES CÉLÈBRES.—(1907) *Dec.* 18. An artist named Wood acquitted of the charge of having murdered a woman at Camden Town in September. Mr. Justice Ross sentenced Mr. Ginnell, M.P., to six months' imprisonment for contempt of Court, at Dublin. 27. In connection with the claim to the title and estates of the Duke of Portland, the Chancellor of the Diocese of London issued a faculty for the opening of the grave of Thomas Druce in Highgate Cemetery. 30. The grave of Thomas Druce was opened in Highgate Cemetery before a number of experts and interested witnesses. It was officially announced that the coffin contained the body of an aged and bearded man, who was unmistakably the Thomas Druce whom the Portland claimants alleged not to have been buried there; this discovery dissipated the claims, and was regarded as conclusive evidence of their worthlessness. (1908) *Jan.* 5. A serious mutiny took place among the convicts at Dartmoor Prison. Several warders were injured. 6. The charge of perjury against Mr. Herbert Druce was concluded. Mr. Plowden dismissed the summons, and said that Mr. Druce left the Court with his character for truthfulness absolutely vindicated. 7. In connection with certain family litigation it was announced in the *Times* that negotiations were in progress for its formation into a limited company, with Mr. Walter as chairman. 10. At the Central Criminal Court, W. J. Hollis, the signalman implicated in the West Hampstead railway accident, was found "Not Guilty." —Sensation was caused by the withdrawal of Sir Arthur Vicars, Ulster King-of-Arms, and his legal advisers from the inquiry promoted by the Viceregal Commission into the disappearance of State jewels from Dublin Castle, on the ground that it was not properly public and judicial. 11. In a case that had created much local excitement, Mrs. Rushworth was sentenced at York to nine months' imprisonment for ill-treating two little girls, and her husband was sentenced to pay costs. 31. The report of the Viceregal Commission on the Dublin Crown Jewels was issued. The Commissioners were of opinion that Sir Arthur Vicars could not be acquitted of want of proper care in the custody of the keys of the safe. *Feb.* 3. In the case of Wilford and others *v.* the West Riding of Yorkshire County Council, a matter of Voluntary Schools, Mr. Justice Channel gave judgment in favour of the plaintiffs. 6. The trial of Henry Boulter for blasphemy was concluded, Mr. Justice Phillimore saying that if the prisoner would give a satisfactory undertaking not to continue such public speeches as had led to this prosecution, he would merely bind him over. 12. At the Central Criminal Court, Franz von Veltheim was convicted of sending threatening letters to Mr. S. B. Joel, and was sentenced to 20 years' penal servitude. 19. Four men concerned in the theft of the Queen's miniatures from a printing office, were sentenced to imprisonment. *March* 13. After a trial lasting some days, before Mr. Justice Swinfen Eady, it was decided that Mr. Robins should be removed from his position as a trustee to the Marquess Townshend. *April* 10. Mary Ann Robinson, convicted of perjury in the Druce Case, was sentenced to four years' penal servitude. *May* 2. The case of Isidore Wyler and the Ibo and Nyassa Corporation, Ltd., *v.* Lewis and Marks for alleged conspiracy to defraud was concluded before Mr. Justice Phillimore by a verdict for the plaintiffs, with damages of over £65,000. The fees of counsel for the trial, which lasted 33 days, were said to have exceeded £70,000. 8. After a trial of several days, the action of Mr. John Murray *v.* the *Times* for libel was concluded, the plaintiff being awarded £7,500 damages. 15. The Court of Criminal Appeal sat for the first time. The Lord Chief Justice, Mr. Justice A. T. Lawrence, and Mr. Justice Channell constituted the Bench. 19. A daring robbery took place at the Central Railway Station, Manchester, a package containing goods and securities to the value of £15 000 being removed from a guard's van by a woman, who was subsequently arrested at Liverpool. *June* 27. Mr. Robert Sievier, editor of the *Winning Post*, was arrested on a charge of blackmailing Mr. J. B. Joel. *July* 23. Sir Lewis Dibdin, as Dean of the Arches, delivered an important judgment, in a case where the Communion had been refused to a man who had married his deceased wife's sister. 30. The trial of Mr. Robert Sievier terminated in a verdict of "Not Guilty," after a protracted trial before the Lord Chief Justice. *Aug.* 7. The trial of the Mile End Guardians at the Central Criminal Court was concluded. The accused were all found guilty, and sentenced. 24. Mrs. Luard, wife of Maj.-Gen. Luard, of Ightham Knoll, near Sevenoaks, found dead near an empty summer house, having previously started to walk homeward. Much interest was aroused by the mysterious nature of the affair, but no clue to the murderer came to light. *Sept.* 9. The late directors of the International Securities Corporation and Feltham's Bank were charged at Westminster Police Court with conspiracy to defraud, and were remanded. 18. Considerable sensation was caused by the suicide of Major-General Luard, whose wife had been mysteriously shot about three weeks before, near Sevenoaks. *Oct.* 6. Two convicts escaped from Dartmoor Convict Prison, and were not recaptured for several days. 23. At Bow Street Police Court, the charge against Mr. William Thorne, M.P., of conduct likely to provoke a breach of the peace by advising his hearers in a public speech to "rush the bakers' shops," was concluded. 24. At Bow Street Police Court, the

hearing of the charge against Mrs. Pankhurst, Mrs. Drummond, and Miss Christabel Pankhurst of endangering the peace by issuing a handbill inciting the public to "rush" the House of Commons, was concluded. All the defendants elected to go to gaol.

NOTABLE DEATHS.—(1907) *Nov.* 12. Sir Lewis Morris ("Epic of Hades"), aged 74. 17. Admiral Sir L. McClintock, Arctic explorer and commander of the Franklin search expeditions, aged 88. 22. Mr. Justice Kekewich, aged 75. *Dec.* 11. Bishop Wilkinson, Primus of the Scottish Episcopal Church, aged 75. 17. Lord Kelvin, scientist, aged 83; buried in Westminster Abbey *Dec.* 23. 19. Sir J. Strachey, Anglo-Indian administrator, aged 84. (1908) *Jan.* 18. Sir J. Lawson Walton, Attorney-General, aged 56. 25. Louise de la Ramé ("Ouida"), novelist. *Feb.* 12. Lt.-Gen. Sir R. Strachey, aged 91. 29. Marquess of Linlithgow, first Governor-General of the Commonwealth of Australia, aged 48. *March* 19. Sir Nicholas O'Conor, British Ambassador at Constantinople, aged 65. 24. The Duke of Devonshire, Liberal and Liberal Unionist leader, aged 74. *April* 7. Sir Howard Vincent, M.P., aged 58. 22. Sir H. Campbell-Bannerman, M.P., until recently Prime Minister, after a long illness, aged 71. 27. Funeral service at Westminster Abbey for the late Sir H. Campbell-Bannerman, and subsequent interment in Scotland. *June* 2. Gen. Sir Redvers Buller, V.C., aged 68. *Sept.* 1. Canon Fleming, aged 78. *Oct.* 16. Father Ignatius, aged 70.

ECCLESIASTICAL.—(1908) *Jan.* 9. Dr. Drury was enthroned as Bishop of Sodor and Man in St. George's Church, Douglas. 25. Dr. Ridgeway, late Dean of Carlisle, and Dr. Molony, were consecrated Bishops of Chichester and Mid-China respectively, in Westminster Abbey. *March* 3. The National Council of the Free Churches began the annual meeting at Southport. *April* 7. The remains of Emmanuel Swedenborg were removed from the Lutheran Church, Prince's Square, Whitechapel, for transfer to Sweden. 19. The General Assembly of the Church of Scotland opened with the usual levée at Holyrood Palace and procession to St. Giles's Cathedral. *June* 9. The newly finished portions of the west front of Hereford Cathedral were dedicated. 15. The Pan-Anglican Congress opened with a service of intercession in Westminster Abbey. 22. Mr. Balfour read a paper on "Religion and Science," before the Pan-Anglican Congress at the Albert Hall. 24. Thanksgiving Service, attended by the Bishops sitting in the Pan-Anglican Congress, in St. Paul's Cathedral. The amount of the thank-offerings presented was over £330,000. *July* 4. The fifth Lambeth Conference opened with a service in Canterbury Cathedral. 5. The Bishops attending the Lambeth Conference were present at a special service in Westminster Abbey. 20. The King and Queen received at Buckingham Palace a number of Prelates attending the Lambeth Conference, who presented an address. 23. The final sittings of the Wesleyan Conference were held at York. *Aug.* 6. The Lambeth Conference of 1908 was brought to a conclusion with a service at St. Paul's Cathedral. 8. The new nave of Hexham Abbey was consecrated by the Bishop of Newcastle. *Sept.* 8. Cardinal Vannutelli arrived as Papal Legate to attend the Eucharistic Conference about to be held in London. 13. Outdoor procession of the Roman Catholic clergy and laity attending the Eucharistic Congress through the streets of Westminster. On the previous day the Prime Minister telegraphed to the promoters, stating that in the opinion of the Government the Host should not be carried publicly; this part of the ceremony was therefore eliminated. 29. St. Michael's Church, Coventry, was formally opened as a Collegiate Church, the future seat of a Warwickshire Diocese. *Oct.* 6. The Church Congress was opened in Manchester. 31. Resignation announced of Dr. Maclagan, Archbishop of York.

EDUCATION.—(1907) *Nov.* 2. Lord Curzon of Kedlestone delivered the Romanes Lecture on "Frontiers," at Oxford.—Lord Rosebery opened the new L.C.C. Training College in Southampton Row. *Dec.* 20. The Annual Conference of Head Masters was opened at Magdalen College School, Oxford. (1908) *Jan.* 3. The North of England Education Conference was opened at Sheffield. 9. The annual meeting of the Incorporated Association of Head Masters was begun at the Guildhall. 15. Mr. Haldane addressed the British Science Guild at the Mansion House. 16. Lord Avebury installed Lord Rector of the University of St. Andrews. 23. A deputation of Liberal Churchmen waited on Mr. McKenna and the Prime Minister to urge "simple Bible teaching" as the solution of the education difficulty. 25. Mr. Balfour delivered the Henry Sidgwick Memorial Lecture at Newnham College, Cambridge. *March* 10. A letter from the Archbishop of Canterbury to Mr. McKenna, pointing out that there were insuperable objections to the Government Education Bill published. 26. Lord Rosebery opened the new libraries and south wing of University College, London. *April* 10. Lord Rayleigh was elected Chancellor of the University of Cambridge in succession to the late Duke of Devonshire. 20. The 39th annual conference of the National Union of Teachers opened at St. Leonards. *May* 1. The inauguration of Lord Rayleigh as Chancellor of the University of Cambridge took place. *June* 12. Lord Rosebery was installed Chancellor of Glasgow University. *July* 7. The King opened the new University buildings at Leeds. 9. Viscount Morley of Blackburn was installed as Chancellor of Manchester University. *Sept.* 11. At the Trade Union Congress, a motion in favour of secular education was carried by 1,433,000 votes to 131,000. 16. Lord Rosebery opened the new engineering laboratories at the Heriot Watt College, Edinburgh. 25. Professor Sadler issued his Presidential address at the opening meeting of the Moral Education Congress at London University. *Oct.* 1. The opening of the Winter Session at the Medical Schools in London and the provinces was marked by a brilliant and noteworthy speech by Mr. Rudyard Kipling at the Middlesex Hospital. 9. The Prime Minister delivered his presidential address to the Classical Association at Birmingham. 17. Princess Alexander of Teck opened important extensions of Haileybury College.

LABOUR TROUBLES.—*Jan.* 2. A strike of London motor omnibus men broke out, nearly 1,200 employées being involved. 13. The motor omnibus strike came to an end. 22. At the final session of the Labour Party, a vote in favour of the identification of the Labour Party with Socialism was carried by 514,000 to 469,000 votes. *Feb.* 19. A number of engineers in the North-Eastern district of England, struck work on

account of a proposed reduction in wages; 83,000 men were eventually involved. 27. Through the instrumentality of Mr. Lloyd George the shipbuilding strike was settled. *July* 19. A number of the unemployed were present at the afternoon service in St. Paul's Cathedral, and a collection was made for them. *Sept.* 2. A riotous demonstration of the unemployed took place in Glasgow. An attempt was made to force an entry into the City Council Hall. 5. Prince Arthur of Connaught inspected the Boys' Brigade at Glasgow; a section of the unemployed made a hostile demonstration against the City Corporation. *Sept.* 9. After a seven months' strike, the North-Eastern engineering dispute was settled, the men accepting the proposed reductions. 21. A strike of Lancashire cotton operatives, affecting 120,000 hands, rendered inevitable owing to the action of the card-room spinners after the operatives had failed to authorize cessation. *Oct.* 4. A demonstration of "hunger marchers" in Trafalgar Square led to conflicts with the police and several arrests. 7. Sir Christopher Furness suggests at a scheme for making the employees at the works co-partners in his shipbuilding firm on reasonable terms of purchase. 13. A disturbance took place at the meeting of the London County Council, on the refusal of the chairman to allow a resolution to be moved on the question of unemployment. 20. Great crowds of the unemployed endeavoured to reach the House of Commons, but were kept in order and dispersed. 23. At a meeting of Trade Union delegates held at West Hartlepool, a resolution in favour of the scheme of Sir Christopher Furness was passed. 26. The National Free Labour Congress was opened at the Memorial Hall, Farringdon Street, Mr. J. Penrose was elected president.

LITERATURE, ART, MUSIC AND THE DRAMA.—(1907) *Nov.* 29. A letter headed "Under which King?" appeared in the *Times* from its military correspondent, calling attention to a letter recently sent by the Kaiser to Lord Tweedmouth on the subject of British and German Naval Policy. 16. The freedom of the City of London was presented at the Guildhall to a representative of Miss Florence Nightingale, who

was unable to be present in person. 31. The Volunteers came to a close, the Territorial Force supervening on the following day; farewell parades were held in many places. *April* 3. The t.b.d. *Tiger*, during night exercises about 20 miles off St. Catherine's Point, ran across the bows of H.M.S. *Berwick* and was cut clean in two; the commander and 34 others perished. 10. Lord Grenfell promoted to be Field-Marshal. 25. Steaming in a tremendous blizzard the liner *St. Paul* rammed and sank H.M.S. *Gladiator*, with heavy loss of life. 28. During exercise the t.b.d. *Gala* was cut in two by the scout *Attentive*. *June* 1. The King presented new colours to the 2nd Battalion Grenadier Guards in the grounds of Buckingham Palace. 12. At the *Gladiator* court-martial Capt. Lumsden was found to have hazarded his ship by default and not by negligence. *July* 7. The Duke of Connaught opened the Veterans' Fête at Chelsea. 24. An impressive service was held in Greenwich Parish Church in memory of General Wolfe, whose remains rest in the crypt. Field-Marshal Sir George White represented the King. *Aug.* 17. Cavalry manœuvres and training on a large scale begun on Salisbury Plain. 19. Princess Christian presented at Portsmouth to H.M.S. *Good Hope* a number of gifts, including a silk white ensign, the cost of which was subscribed by the women of Cape Colony. 28. The Cavalry manœuvres on Salisbury Plain were concluded. *Sept.* 10. The new battleship *St. Vincent* was launched by the Countess Beauchamp at Portsmouth. *Oct.* 2. When changing quarters, the 3rd Battalion Grenadier Guards, exercising an ancient privilege, marched with colours flying, drums beating and bayonets fixed through the City of London to the Tower. 21. The anniversary of the Battle of Trafalgar was celebrated in the customary manner. 24. The anniversary banquet in commemoration of the charge of the Light Brigade at the battle of Balaclava took place at the Crystal Palace. 26. A memorial to Manchester men who fell in the Boer War was unveiled in Manchester by General Sir Ian Hamilton.

RAILWAYS AND SHIPPING.—(1907) *Nov.* 8. The *Lusitania* passed Sandy Hook Lighthouse on her outward-bound voyage in record time, beating her previous best by 1 hour 13 minutes. 21. The *Mauretania* completed a record run of 624 knots for the 24 hours. *March* 2. The proposed working agreement between the Great Northern and Great Central Railways was declared by the Railway and Canal Commissioners to be outside the powers of the Act of 1858. Notice of Appeal was given. 12. The *Mauretania* arrived at Queenstown, after accomplishing the homeward passage at the record rate of 24·42 knots per hour. 13. In the Court of Appeal, before the Master of the Rolls and Lords Justices Fletcher Moulton and Buckley, the appeal of the Great Northern and Great Central Railways against the decision of the Railway and Canal Commissioners concerning the validity of the proposed working agreement was dismissed. *April* 10. The new tramway subway from Aldwych to the Victoria Embankment was formally opened. *Aug.* 3. H.M. cruiser *Indomitable*, with the Prince of Wales on board, arrived in Cowes Roads, after a record voyage across the Atlantic at an average speed of 24·8 knots.

SPORT.—(1908) *Feb.* 27. The M.C.C. team played the final test-match in Australia; they lost 4 and won 1 of the series. *April* 4. The University Boat Race was won by Cambridge by 2½ lengths. *June* 3. The Derby at Epsom was won by a filly, Signorinetta, a 100 to 1 chance. 5. The Oaks was won by the Derby victor, Signorinetta. *July* 8. Oxford won the University cricket match by 2 wickets. 13. The King opened the Olympic Games in the Stadium of the Franco-British Exhibition. 24. The Marathon Race of the Olympic Games was run in great heat. An Italian was the first to break the tape, but a protest as to his having been assisted in the Stadium, after collapsing fifty yards from the finish, was upheld and the trophy awarded to an American. The Queen, who was present, afterwards announced her intention of presenting the Italian with a special cup. *Sept.* 9. Mr. J. B. Joel's Your Majesty won the St. Leger at Doncaster. 19. An Australian football team arrived in England and played a series of matches. 22. The motor race meeting in the Isle of Man was begun. *Oct.* 10. A Marathon Race, organised by the *Evening News*, was won by a Frenchman in nearly seventeen minutes less than the time accomplished by the winner at the Olympic Games in July.

NOTABLE WEDDINGS.—(1907) *Nov.* 16. Prince Charles of Bourbon and Princess Louise of Orleans married at Wood Norton. *Dec.* 3. The Lord Chancellor (Lord Loreburn) and Miss Violet Hicks-Beach in the Chapel of St. Stephen, Westminster Hall. This was the first recorded occasion of the marriage of a Lord Chancellor while in office and of a marriage ceremony being performed in this chapel. 12. Prince George of Greece and Princess Marie Bonaparte at Athens. *April* 4. The Queen and the Dowager Empress of Russia were present at the marriage of Viscount Errington and Lady Ruby Elliot at St. Margaret's, Westminster. *June* 23. The King and Queen were present at the marriage of the Hon. J. H. Ward and Miss Jean Reid, daughter of the United States Ambassador. *Sept.* 12. Mr. Winston Churchill and Miss Clementine Hozier, at St. Margaret's, Westminster.

IMPERIAL DOMINIONS.

(1907) *Nov.* 1. The Legislative Council of India passed a Bill for the suppression of public seditious meetings. 5. The *London Gazette* contained an announcement that a branch of the Royal Mint was to be established at Ottawa. 9. The great Cullinan Diamond was presented to the King at Sandringham by Sir Richard Solomon as a present from the people of the Transvaal. 25. The King received the Swazi chieftains at Buckingham Palace. *Dec.* 9. The Zulu chief Dinizulu surrendered to the civil authorities. 10. The Parliament Buildings at Wellington, N.Z., were destroyed by fire. (1908) *Jan.* 1. A mass meeting of Indians in the Transvaal was held at Pretoria to protest against the new Asiatic Law. 2. The Canadian branch of the Royal Mint was formally opened by the wife of the Governor-General, who himself struck the first coin—a 50-cent piece. *Feb.* 7. A large part of the centre of Christchurch, New Zealand, was devastated by fire. 10. It was announced that the Indian Government had decided to dispatch a force to punish the Zakka Khels in consequence of their constant raids on the British frontier. 16. On his arrival at Johannesburg, Mr. Keir Hardie, M.P., was mobbed, but escaped serious injury. *April* 20. Two excursion trains collided at Braybrooke Junction, Victoria, Australia, and over 40 per-

sons were killed. *May* 11. The Prime Minister of Nepal was received by the King. 13. The first Legislative Assembly of the Orange River Colony was opened at Bloemfontein. 15. A meeting in favour of the Wolfe and Montcalm Memorial at Quebec was held at the Mansion House. *July* 15. The Prince of Wales left Portsmouth on board H.M.S. *Indomitable* for Quebec. 21. Lord Roberts was entertained by the Quebec Garrison Club amid scenes of great enthusiasm. 22. The Prince of Wales arrived at Quebec, where he received an enthusiastic welcome.—Mr. Tilak, the Indian Nationalist leader, was convicted at Bombay of publishing seditious articles, and sentenced to six years' transportation and a fine of 1,000 rupees. 24. The Prince of Wales, who was accompanied by Lord Roberts, held a great military review on the Plains of Abraham. 25. The naval review and pageant of the Tercentenary held at Quebec. The Prince of Wales spoke at a great banquet given by Earl Grey at the Citadel. 29. The Prince of Wales left Quebec on his return to England. *Aug.* 5. Lord Roberts was presented with an address, and made a farewell speech at the Government House, Ottawa. 20. The United States Fleet, under the command of Rear-Admiral Sperry, anchored in Sydney Harbour. 24. Lord Northcote reviewed nearly 14,000 naval and military troops of all arms, including men of the United States Fleet, in the Centennial Park, Sydney. 29. The United States Fleet anchored in the Melbourne Roads. *Sept.* 4. A farewell banquet was given to Lord Northcote, the retiring Governor-General in the Parliament House, Sydney. 5. The Earl of Dudley arrived at Sydney to take office as Governor-General of the Commonwealth. 18. The United States Fleet concluded its visit to the principal ports of Australia and New Zealand, and sailed for Japan.

FOREIGN COUNTRIES.

(1907) *Nov.* 2. British, Russian, French, and German representatives signed a treaty at Christiania guaranteeing the integrity of the Kingdom of Norway. 6. The New York elections resulted in a Tammany victory—rout of the Hearst-Republican fusion. 14. The third Duma opened at St. Petersburg. 19. The German naval programme showed great increases in new constructions. 26. Signor Ernesto Nathan, formerly a British subject, elected Syndic of Rome, the first Hebrew to occupy that position. *Dec.* 4. Mrs. Goold sentenced to death, and her husband to penal servitude for life, for murder at Monte Carlo. 5. An explosion of dust at Monogah coal-mine, Virginia, U.S.A., resulted in the loss of nearly 500 lives. 8. King Oscar of Sweden died at Stockholm, in his 79th year. 15. Tehran reported to be in a state of siege, the Cabinet having resigned, personal sovereignty supervening. 19. A fire in the Darr coal-mine, near Pittsburg, U.S.A., caused great loss of life. (1908) *Jan.* 3. The proceedings against Herr Harden for criminal libel against Count von Moltke were concluded in Berlin. 6. The second trial of Harry Thaw begun in New York. 11. Great indignation in France at the proclamation of Mulai Hafid as Sultan of Morocco at Fez. 12. Street disturbances in Berlin, in connection with the Reichstag agitation for reform of the franchise. 13. Following on a cinematograph explosion a panic took place at the Rhoades Opera House, Boyertown, Pennsylvania, and over 160 persons were killed. 14. The ice in the Bois de Boulogne, Paris, gave way, and many people were drowned. *Feb.* 1. The King of Portugal and the Crown Prince were assassinated while driving through Lisbon. The Queen and the Infante Manuel were also slightly wounded. 2. Resignation and flight of the Portuguese premier. 20. At a court-martial at St. Petersburg, in connection with the loss of Port Arthur, Gen. Stössel was sentenced to death (afterwards commuted), Gen. Fock reprimanded, and Gens. Reüss and Smernoff acquitted. 25. Tunnels opened beneath the Hudson River, connecting Manhattan and New Jersey, U.S.A. 26. The Queen of Holland and Prince Henry had a narrow escape whilst driving at The Hague. 28. Three bombs were thrown at the Shah's carriage as he was driving near Tehran, about a dozen persons were killed. 28. A bomb, which did not explode, was thrown at the President of the Argentine Republic. *March* 4. Over 150 teachers and children were killed by an outbreak of fire at the Lake View public school, Collinwood, Cleveland, U.S.A. 20. It was announced that the Japanese Government had invited the U.S. fleet to visit their country on its journey round the world. 25. The German Emperor and the King of Italy met at Venice.—Some surprise was expressed in the U.S. at the Kaiser's unwillingness to receive Dr. Hill as U.S. Ambassador at Berlin in succession to Mr. Charlemagne Tower. 28. A bomb was thrown during an unemployed demonstration in New York, killing and wounding many people. *April* 4. An arbitration treaty between Great Britain and the United States was signed at Washington. 8. The Bill for the Devolution of Church Property was finally carried, with some amendments, by the French Senate. 13. The fire that had devastated Chelsea, a suburb of Boston, was at last got under control; damage to nearly £2,000,000 was said to have been caused.—The famous garrison church at Berlin was destroyed by fire. 20. The mobilization of the Italian Fleet caused the Sultan to abate his unyielding attitude on the question of the establishment of Italian post offices in Turkey. 30. An explosion wrecked the Japanese cruiser *Matsushima* off the Pescadores; over 200 officers and men perished. *May* 1. The usual May Day celebrations passed off more quietly than usual on the continent.—The Kaiser and the principal German Sovereigns assembled at Vienna, and congratulated the Emperor Francis Joseph on the attainment of the 60th year of his reign. Congratulatory messages were sent from the whole of Europe. 21. Over 80,000 school children assembled at the Schönbrunn Palace to give an ovation to the Emperor Francis Joseph.—An express train ran into the rear of a pilgrim train at Contich, near Antwerp; 38 were killed and over 100 injured. 30. The International Congress of Publishers held its final meeting at Madrid. *June* 1. The fifth International Cotton Congress was opened at Paris. 4. In Paris the ashes of Zola were transferred to the Panthéon. Two revolver shots were fired at Major Dreyfus in the building, but only caused a slight wound. 8. The 19th Annual Congress of the International Miners' Federation began its sittings in Paris.—The draft scheme for the Danube-Adriatic railway was signed in Paris. 9. The Tsar and King Edward met at Reval on board the *Standart*. 12. The Jubilee of the Emperor of Austria was celebrated in Vienna by a great procession of peoples and nationalities from all

corners of the Empire. 13. The race for the Grand Prix at Longchamps was won by Mr. W. K. Vanderbilt. 17. Lemoine, a pretended discoverer of the manufacture of diamonds, failed to present himself for the unsealing of an envelope supposed to contain the secret; many persons had been victimised, including leading London financiers. 18. Mr. Taft nominated for the U.S. Presidency by the Chicago Republican Convention. 23. The Parliament buildings at Tehran taken by the Shah's troops, the Nationalists being dispersed, and the town looted.—Birth of a son to the King and Queen of Spain. 24. The U.S. representative in Venezuela was withdrawn. *July* 1. The right of asylum by political refugees at the British Legation at Tehran having been violated by the Shah's troops, an interchange of telegrams led to a severe reproof of the Persian Sovereign by King Edward. 4. Count Ignatieff, the famous Russian statesman and diplomatist, died at Kieff in his seventy-seventh year. 10. Mr. Bryan was nominated for the United States Presidency by Denver Democratic Convention. 22. The fine of over £5,000,000 imposed on the Standard Oil Co. remitted by the United States Court of Appeal at Chicago.—Following on the recent expulsion of the United States Minister from Venezuela, President Castro also sent away the Dutch Minister. 24. An Imperial Irade was published in Constantinople restoring the "suspended" Constitution of 1878. 27. M. Fallières and the Tsar met at Reval on the *Standart*. *Aug.* 3. A general strike, ordered by the French Confederation of Labour, proved a complete fiasco. 11. The King and the Kaiser met at Cronberg. 12. The King and the Austrian Emperor met at Ischl. 14. Ira D. Sankey, the famous evangelistic singer, died at Brooklyn, aged 68. 16. A general statement of the programme of the new Turkish Ministry was issued in the Constantinople press. 17. The fourth International Esperanto Congress opened at Dresden. 20. The Belgian Chamber passed the Congo Treaty of Annexation. 22. News reached Europe that Abdul Aziz had been totally defeated by Mulai Hafid, and had sought French protection. 26. Prince Reshad Effendi, Heir-Presumptive to the Turkish throne, was cordially received by the Sultan at the Yildiz Kiosk, and restored to favour. 29. The first European Baptist Congress was opened at Berlin. *Sept.* 1. An Edict was issued outlining the proposed Constitution for China, and the ultimate summoning of a Parliament. 2. The railway from Damascus to Medina was inaugurated. 8. M. Alberti, Danish Minister of Justice, was arrested on charges of extensive fraud. 10. Count Tolstoy's eightieth birthday was celebrated by messages of appreciation from all over the world. 11. M. Gueshoff, Bulgarian diplomatic agent at Constantinople, received no invitation to the Foreign Ministers' dinner in celebration of the Sultan's birthday; although in accordance with usage, this incident led to the withdrawal of M. Gueshoff. 18. It was officially announced that the British Government adhered fully to the Franco-Spanish proposals regarding the recognition of Mulai Hafid as Sultan of Morocco. 18. The outbreak of cholera continued to extend in St. Petersburg. 19. A tremendous sensation was caused during the Presidential Election in the U.S.A. by Mr. Hearst producing letters from the executive head of the Standard Oil Co. to both Democratic and Republican statesmen and senators. 20. The Paris Central Telephone Exchange was entirely destroyed by fire.—Senor Sarasaté, the famous violinist, died at Biarritz, aged 64. 22. The first anniversary of the Sultan of Turkey's accession, after the promulgation of the Constitution, was marked by a cordial congratulatory telegram from King Edward. 23. The Turkish Chargé d'Affaires delivered a Note to the Bulgarian Foreign Minister, complaining of the non-evacuation of the Oriental Railway Company's line by the Bulgarian troops, who had occupied it provisionally during a strike of the operatives.—Prince Ferdinand of Bulgaria was received by the Emperor Francis Joseph at Prague, with sovereign honours. 27. Deserters from the French Foreign Legion in Morocco placed themselves under the protection of the German Resident at Casablanca, but were forcibly removed by French gendarmes. 28. The Dalai Lama of Tibet arrived at Pekin. *Oct.* 3. The Austrian Ambassador in Paris, at an audience of the President, presented an autograph letter from the Emperor Francis Joseph, announcing the intention of the Austrian Cabinet to annex Bosnia and Herzegovina as integral parts of the Empire. 5. Prince Ferdinand assumed the title of Tsar of Bulgaria, at Tirnovo, the ancient capital, amid great enthusiasm of the people. 7. Sir E. Grey, speaking at Wooler, and Mr. Asquith, at Earlston, Berwickshire, said that in any question of the revision of the Treaty of Berlin the interests and rights of Turkey, as a Power most closely concerned, must be guarded. 9. A number of British warships received orders to proceed from Malta to the Ægean Sea. 10. The Russian Foreign Minister, who had just arrived in London, had a long conference with Sir Edward Grey. 12. Extensive credits for war supplies were voted by the Servian and Montenegrin Skupshtinas. 17. The U.S. Fleet received a most enthusiastic welcome on their arrival in Japan. 20. Adm. Sperry, with his officers and the members of the U.S. Embassy, were received in audience, and afterwards entertained to luncheon by the Emperor of Japan. 23. Sir Frank Lascelles was received in farewell audience by the Kaiser. 28. A "calculated indiscretion" appeared in the London *Daily Telegraph*, purporting to be an account of an interview with the Kaiser; the statements of policy and friendship for England gave rise to much discussion, and caused great indignation in Germany. 31. It was reported that the Imperial Chancellor, Prince von Bülow, had endeavoured to resign, but had not received permission to do so.

WILLIAM CLOWES AND SONS, LIMITED, LONDON.

IMMIGRATION AND EMIGRATION, 1840-1906.

The following tables give the number of persons who left the British Isles between the years 1840-1907, and of those who arrived from 1870-1907. The Nationality of the Immigrants is given, and the destinations of the Emigrants (*British and Irish only*) who left this country.

Year.	Nationality of Immigrants.				Year.	Destination of Emigrants.				
	British and Irish.	Foreigners.	Not distinguished.	Total.		To North American Colonies.	To the United States.	To Australia and New Zealand.	To South Africa.	Total.

The British Empire.

* The total area of the British Empire is nearly 11,400,000 square miles, with a total population of about 410,000,000. The known surface of the globe is estimated at 55,000,000 square miles, and its total population is believed to be about 1,800,000,000; so that the British Empire occupies approximately 21 per cent., or more than one-fifth, of the earth's surface, and its population is in the proportion of 22 per cent., or over one-fifth, of the inhabitants of the globe. The total revenue exceeds £400,000,000, the debt totals over £1,500,000,000, and the trade exceeds £1,600,000,000. Railways to the extent of 90,000 miles have been opened, and 12,160,020 net tons of shipping sail under the British flag, while nearly 265,000,000 tons enter and clear annually at British ports.

THE CONSTITUTION AND GOVERNMENT OF THE BRITISH EMPIRE.

The Constitution.—The Constitution, which is unwritten, recognises certain great principles, including the fair administration of justice; the prohibition of taxation without the consent of the people; and a limited monarchy, the power of the monarch being, in effect, wielded by a ministry supported by a majority of the House of Commons. The component parts of the British Government may be thus briefly described:

1. *The King.*—The King has a right to veto bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong," is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right, however, will generally enable an injured subject to obtain redress.

2. *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King. English bishops, Irish peers, elected for life, and Scottish peers, elected for duration of Parliament, may also sit in the House of Lords. This House may alter or reject a Bill passed by the House of Commons. In practice it generally submits to the will of the people.

3. *The House of Commons.*—This body consists of 670 elected members representing county, borough, and university constituencies. Roughly speaking, about one-sixth of the population are electors.

4. *The Ministry.*—The Ministry includes members of the Cabinet and a number of other persons who have no seat in the Cabinet. Ministers are drawn from the ranks of the party in power.

5. *The Executive.*—This consists of the King in Council. It is the Crown which "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." Ministers hold their office during pleasure; they may be dismissed at any moment.

The Judicial System.—(a) *England and Wales.*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. The High Court comprises the King's Bench, Chancery, and Probate, Divorce and Admiralty Divisions. Two Courts of Appeal hear appeals from these divisions, the ultimate Court of Appeal from all the courts in the United Kingdom being the House of Lords. All civil cases arising in London and Middlesex are tried at the Royal Courts of Justice, but civil cases arising in the country are tried on circuit by judges of the King's Bench. The Chancery Division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, *e.g.*,

* An enlarged edition of Whitaker's Almanack, containing the whole of the Popular Edition, together with a supplement devoted to the Imperial Dominions, Foreign Countries, Sport, Additional Astronomical Tables, Shipping and Railways, Holiday and Health Resorts, County and Municipal Directory, &c., is also published, neatly half-bound, 792 pages, price 2*s.* 6*d.* *net*. (See Table of Contents, p. 503.)

the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court, while in the provinces the County Courts have jurisdiction in bankruptcy.

With regard to criminal law in England it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction are (1) the judges of the High Court sitting at Assizes for the trial of cases in the provinces, and in London at the Central Criminal for the trial of cases arising in and around London; (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions in respect of cases arising within their districts. (3) Courts of Petty Sessions, consisting of two justices of the peace or a stipendiary magistrate. These courts hear and decide minor offences, and have power to commit offenders to take their trial in more serious cases. (4) *Court of Criminal Appeal:* This court, which was established by an Act passed in 1907, has power to hear appeals against convictions and sentences. It will not, however, re-try a case, nor will it upset the verdict of a jury unless it is manifestly unreasonable.

(b) *Scotland.*—Scots civil law, which is entirely different to that of England, is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The sheriff of each county is the proper criminal judge in all crimes occurring within the county which merit only an arbitrary punishment. Borough magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offences under various statutes.

(c) *Ireland.*—The civil courts in Ireland are very similar to the English courts. In the main the criminal procedure is also similar.

Local Government.—Local government is carried out under the central control of the Local Government Board. The subjects which local bodies administer are, *inter alia*, the poor law; the laws relating to public health; the maintenance of the police; the control of the sale of intoxicating liquors; the provision of lunatic asylums. Local authorities also have to administer and carry into effect the laws as to elementary and other schools. Scotland and Ireland each have an elaborate system of local government. The ruling principle has been to entrust special interests to those specially interested.

Defence.—The defence of the Empire is entrusted to the navy and army. The numbers of the navy are maintained by voluntary enlistment, although the right of impressment still exists. The army is maintained by voluntary enlistment.

GOVERNMENT OF THE IMPERIAL DOMINIONS.

Colony Defined.—A Colony means any part of the King's dominions except the United Kingdom, the Channel Islands, the Isle of Man, and British India.

Control of Parliament.—All British dominions are subject (except as regards taxation) to the legislation of the British Parliament; but no Act of Parliament affects a colony unless that colony is specially mentioned. If the legislature of a colony enacts a law which is repugnant to an imperial law affecting the colony, it is to the extent to which it is repugnant absolutely void.

Colonial legislatures may be controlled (1) by the refusal of the governor's assent to any measure passed; (2) by reservation of a measure for the consideration of the Crown, and refusal of Crown's assent; (3) by a suspensory clause and the refusal of the Royal assent.

Subject to what has been stated above, the parliament of a self-governing colony—such as Victoria—exercises throughout the colony all the ordinary powers of a Sovereign assembly.

The Imperial Dominions may be divided into four classes, according to the way in which they are governed:

1. *Colonies wherein both legislative and executive powers are vested in the governor alone.*—In this class are Gibraltar, Labuan, and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. The South African colonies of Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

2. *Colonies where there is government by a governor acting with an executive and a legislative council, the councils being nominated by the Crown or a governor representing the Crown.*—Colonies so governed include British New Guinea, Ceylon, Falkland Islands, Fiji, Gambia, St. Vincent, Sierra Leone, Straits Settlement, Trinidad.

3. *Colonies where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the governor representing the Crown.*—In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, Mauritius, and Malta.

4. *Colonies having responsible government.*—In these colonies the principal government departments are administered by political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature. The colonies thus governed include Canada, Newfoundland, New South Wales, New Zealand, Queensland, Natal, Western Australia, the Cape of Good Hope, South Australia, Tasmania, Victoria, Transvaal, and Orange River Colony.

British India.—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India. Where the advice of a council comes in, it is the Council of India, whose members are appointed by the Secretary of State. In certain matters the actions of the Secretary of State and Council are not valid unless sanctioned by Parliament. The Governor-General of India in Council acts for executive purposes very much on the lines of the governing body of a Crown colony.

Protectorates.—The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the King. The protectorates of the British Empire include British Central Africa, British East Africa, Uganda, and Nigeria.

Spheres of Influence.—A sphere of influence may be described as an area wherein other foreign Powers undertake not to attempt to acquire influence or territory by treaty or annexation.

*** The figures in parentheses refer to the Appendix, where a descriptive account of each country will be found.

THE BRITISH ISLES.

THE British Isles, including the United Kingdom of Great Britain and Ireland, the Isle of Man and the Channel Islands, lie between the 48th and 61st degrees of N. latitude, and the 2nd degree of East and the 11th degree of West longitude. The total area is 77,683,084 acres, or 121,377 sq. miles, with a population in 1908 of 44,538,718. In 1907 there were 1,147,988 births (26 per 1000), 678,988 deaths (15·4 per 1000), and 331,413 marriages (15 per 1000) in the United Kingdom. The average strength of the Regular Army of the United Kingdom was 251,373 officers and men in 1907, and the Police numbered 63,450. The number of Immigrants was 293,633, and of Emigrants 634,949, in 1907. The number of Paupers and Dependents in Jan. 1908 was 1,125,594, and 14,179 Criminals were convicted in 1907. There were in 1907 43,038 registered Joint Stock Companies trading in the United Kingdom, the paid-up capital amounting to £2,061,010,586, and 1,904 incorporated Building Societies, with liabilities of £55,894,058 (exclusive of 60 unincorporated societies, with liabilities of £16,364,370). There were also 2,208 Industrial and Provident Societies, with 2,351,686 members, having a share capital of £30,887,195 and a sales total of £100,312,614. In 1907 there were 29,040 applications for Patents, of which 16,272 were sealed, and 6,255 Trade Marks were registered. With regard to Insolvency, 4,188 persons were adjudicated bankrupts in 1907, with total liabilities £6,346,914 and assets £3,459,572. In 1906 sailing and steam vessels numbering 357 were totally lost, their tonnage being 148,214, and 442 lives were lost, of whom 12 were passengers and 430 crew. Of the total area, 46,997,546 acres were under cultivation in 1907, 8,317,413 acres being under corn crops, 4,114,535 under green crops, 27,411,720 other crops, grass, permanent pasture, etc. The live stock included 2,089,027 horses, 11,630,142 cattle, 30,011,833 sheep, and 3,967,163 pigs; 56,531,198 bushels of wheat, 64,092,321 bushels of barley and bere, and 183,688,750 bushels of oats, were grown in the United Kingdom, while 97,168,000 cwt. (about 194,000,000 bushels) of wheat and 13,297,366 cwt. of meal and flour were imported in 1907.

BIRTHS, MARRIAGES, AND DEATHS, 1840–1907.

The numbers of Births, Marriages, and Deaths for the United Kingdom and the rate per 1,000 of the population are shown below:—

THE UNITED KINGDOM.

Year.	Births.	Rate per 1,000.	Marriages.	Rate per 1,000.	Deaths.	Rate per 1,000.
1895	1,154,898	29·4	279,746	14·3	735,244	18·7
1900	1,159,922	28·2	311,254	15·1	757,732	18·4
1905	1,163,506	26·9	315,063	14·6	669,628	15·5
1906	1,170,537	26·8	325,823	14·9	681,293	15·6
1907	1,147,988	26·0	331,413	15·0	678,988	15·4

THE THREE KINGDOMS.

Year.	England and Wales.			Scotland.			Ireland.

1907	917,636	276,031	524,211	128,789	33,260	77,267	101,563	22,122	77,410

CENSUS POPULATION OF THE UNITED KINGDOM.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

1570.....4,160,221	1670.....5,773,646
1600.....4,811,718	1700.....6,045,008
1630.....5,600,517	1750.....6,517,035

The first general Census was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

	1801.	1831.	1841.	1851.	1861.	1871.	1881.	1891.	1901.

† Exclusive of the Army, Navy, and Merchant Seamen Abroad.
‡ Those rates have been corrected for the varying length of the intercensal periods.
** Incorrectly taken. § Decrease.

From the above figures it appears that the population of the United Kingdom (including Islands in the British Seas) in 1901 showed an increase of upwards of 3,725,000 when compared with the population in 1891, and the number of inhabited houses an increase of 908,000.

URBAN POPULATION, BIRTHS AND DEATHS (U.K.), 1907.

In the following table the Population and Birth and Death Rates for the year **1907** are shown for some large towns in the United Kingdom and in different parts of the globe. The population of each town in the United Kingdom (with the exception of certain Irish towns) is estimated to the middle of **1907**.

Cities, Boroughs, and Urban Districts.	Populatn.	Ratio per 1,000.		Cities, Boroughs, and Urban Districts.	Populatn.	Ratio per 1,000.

EMPLOYMENT IN TEXTILE FACTORIES, U.K., 1870-1904.

The following table shows the number of hands employed in the principal branches of the Textile industry in the United Kingdom for such of the past thirty-eight years as have been covered by various returns under the Factories and Workshop Acts. The total number employed in all Textile Factories is given below :—

ALL MATERIALS.

	Male.	Female.	Total.		Male.	Female.	Total.
1895	411,881	663,870	1,075,751	1898	387,583	648,987	1,036,570
1896	412,841	664,846	1,077,687	1901	379,211	650,142	1,029,353
1897	396,851	654,713	1,051,564	1904	382,835	643,543	1,026,378

PRINCIPAL TEXTILES.

Year.	Cotton.			Woollen, Worsted and Shoddy.			Flax, Jute, &c.		
	Male.	Female.	Total.	Male.	Female.	Total.	Male.	Female.	Total.
1870	178,397	271,690	450,087	108,243	130,360	238,503	43,910	101,582	145,492

1895	205,230	333,653	538,883	120,972	161,429	282,401	51,206	109,813	161 019
1896	203,686	329,234	532,920	121,451	162,990	284,441	51,820	110,643	162,463
1897	199,576	327,647	527,223	111,278	154,466	265,744	50,374	109,057	159 431
1898	197,701	328,406	526,107	106,207	150,218	256,425	49,102	107,603	156,705
1901	193,830	328,793	522,623	106,598	153,311	259,909	45,732	104,587	150,319
1904	196,421	326,609	523,030	108,998	152,803	261,801	44,833	103,513	147,968

The number of "half-timers" employed in 1895 was 55,625, of whom 25,525 were boys and 30,100 girls under 14 years of age; in 1904, 14,568 boys and 17,176 girls (total, 31,744) were similarly employed, a decrease of 24,881. In 1898, 29,627 (11,735 boys and 17,892 girls) between 13 and 14 years of age were employed as "full-timers" after fulfilling certain educational requirements, and a similar or increasing proportion in 1901, and 1904 probably accounts for the above-mentioned decrease.

PAUPERS AND POOR RELIEF, U.K., 1850-1908.

The following table shows the number of persons in receipt of Poor Relief in each of the three Kingdoms and in the United Kingdom for a series of years, with a statement of the amount expended out of the Poor Rates (including Receipts-in-Aid) in Actual Relief of the Poor, except that the expenses of management for Scotland and Ireland (but not for England and Wales) are included in the total :—

Year.	England and Wales.		Scotland.		Ireland.		United Kingdom.

PRODUCTION AND CONSUMPTION OF BEER AND SPIRITS (U.K.).

The following table shows the amount of Beer and Spirits produced and consumed in the United Kingdom for the decennial period 1858–1907. The production of beer is given in standard barrels of 36 gallons, calculated at a standard gravity of 1055°. The figures concerning spirits refer to British and Irish spirits distilled in the United Kingdom, in proof gallons.

Year.	Beer.		Spirits.	
	Produced. (Standard Barrels.)	Consumed. (Barrels.)	Produced. (Proof Gallons.)	Consumed. (Proof Gallons.)
1898	35,590,095	35,624,166	60,652,466	41,707,723

AVERAGE WEEKLY EARNINGS OF RAILWAY SERVANTS.

The following table shows the *average wages per head* of workpeople employed in the coaching, goods, locomotive, and engineers' departments of the 27 principal Railway Companies of the United Kingdom during the first or second week in December in each of the years 1897-1906. The Companies included in the table employ over 90 per cent. of the total number of Railway servants.

THE BUDGET, 1908-1909.

The Prime Minister (Mr. H. H. Asquith) introduced the Budget on 7 May, 1908. The receipts on the basis of existing taxation were estimated at £157,770,000, and the expenditure at £152,869,000, showing an anticipated surplus of £4,901,000. This amount was disposed of by a remission of £3,400,000 in the Sugar Duty and of £20,000 on Marine Insurances (one quarter only), accounting together for £3,420,000; while £1,200,000 was allocated for the Old Age Pension Scheme (January to March quarter, 1909), and £40,000 granted to Local Authorities for collection of licences. The balance sheet for 1908-9 therefore reads as follows:—Estimated Revenue, £154,350,000: Estimated Expenditure, £154,109,000; Estimated Surplus, £241,000.

NOTE.—The increased figures for revenue and expenditure in 1907-8 and 1908-9 are due to the inclusion of revenue collected for the Imperial Taxes but previously intercepted and paid direct to the Local Taxation Accounts. Such collections are now paid to the Exchequer and subsequently paid away to the Local Taxation Accounts.

EXCHEQUER RECEIPTS AND ISSUES, 1907-1908.

Receipts.	£
Balance at Banks of England and Ireland, 1 April, 1907	6,932,423

Total National Income	£155,036,485	£156,537,690

Of the sources of National Income mentioned in the above table of details :—

(I.) CUSTOMS: The contributory articles are **Beer** (£22,765), **Chicory** (£47,509), **Cocoa** (£286,918), **Coffee** (£183,624), **Currants** (£126,139), **Dried Plums** (£35,736), **Figs** (£60,999), **Prunes** (£9,796), **Raisins** (£223,821), **Spirits** (£4,133,023), **Sugar, &c.** (£6,707,808), **Tea** (£5,807,907), **Tobacco and Snuff** (£13,739,379), **Wine** (£1,177,144).

(II.) EXCISE is derived mainly from **Intoxicants**, which account for £30,822,757 (*Spirits* £17,705,703, and *Beer* £13,116,964), **Saccharin** £13,832, **Glucose** £120,679, **Home-grown Tobacco** £6,997, the remainder accruing from *Licences (£4,407,540) and **Railway Duty** (£345,061).

(III.) PROPERTY AND INCOME TAX: To this PROPERTY contributes £8,110,258, which is made up of £7,947,235 from **Lands and Tenements**, and £163,023 from the **Occupation of Land**; the share from INCOME TAX is £23,750,122, being £2,197,045 from **Annuities and Dividends**, £19,418,056 from **Trades and Professions**, and £2,135,011 from **Public Offices, Annuities from Public Revenues, &c.**

(IV.) ESTATE DUTY: The total amount of Estate Duty is £14,359,587 (£4,474,797 being payable to Local Taxation Accounts). Other contributories are £3,908,601 from **Legacy**, £732,437 from **Succession**, and £51,519 from **Corporation Duties**.

(V.) The POST OFFICE and TELEGRAPH contributions are made up of £18,638,452 from the **Sale of Postage Stamps**, £654,351 collected in cash for **Postage of Letters, &c.**, and £619,921 **Poundage on Money and Postal Orders**. £3,609,855 was received for transmission of Telegrams, of which £578,421 was refunded to Cable Companies. The gross **Telephone** receipts were £1,118,233, reduced by refundments, &c., to £1,105,878, and **Royalties** on Licences amounted to £272,462.

(VI.) STAMPS: Under this heading are included **Deeds** £3,141,567, **Bills of Exchange** £866,556, **Companies' Capital Duty** £482,557, **Bonds** to **Bearer** £402,324, **Contract Notes** above 1*d.* £137,243, **Patent Medicines** £334,142, **Marine Insurances** £273,495, **Licences and Certificates** £176,956, **Life Insurances** £91,447, **Composition for Duties on Bills and Notes of Banks** £129,434, **Receipts, Drafts, and other** 1*d.* **stamps** £1,721,543, **Share Warrants** £103,598, **Loan Capital Duty** £22,146, **Foreign Certificates** £15,653, and **Playing Cards** £25,881.

One of the remaining items, the **SUEZ CANAL SHARES** (£1,090,752 interest and dividend on 169,777 ordinary shares, and £37,069 on 6,825 Actions de Jouissance), is worthy of mention. The estimated market value of these shares (for which £4,080,000 was paid) was £31,055,000 on 31 March, 1908.

* The amount produced by the Licence Duties in 1907-1908 was made up as follows:—Publicans' Licences £1,802,158, Dog Licences £653,652, Carriage Licences £580,165, Game Licences £182,170, Licences for Man Servants £171,053, Gun Licences £119,577, Armorial Bearings £72,984, Auctioneers, &c. £93,068, Dealers in Gold and Silver Plate £55,758, Pawnbrokers £39,517, Hawkers and Pedlars £27,936. Of this total £4,119,240 found its way to the Local Taxation Accounts and the remainder to the Exchequer.

THE NATIONAL EXPENDITURE.

	£108,079,000	£109,185,000

Total Expenditure... £149,637,663 £151,812,094

Local Revenue and Expenditure. The amount raised in 1905-6 was £163,975,539, of which £74,214,002 was from Rates, &c., £23,565,572 from Government contributions, and £29,849,675 from the issue of Loans. The Expenditure amounted in 1905-6 to £162,436,029. In 1904-5 £17,093,662 was spent in Poor Relief, £3,658,315 by School Boards, and £107,003,647 for Police and Sanitary and other Public Works. The Outstanding Loans of Local Authorities at the end of the financial year 1905-6 amounted to £564,645,200 (England and Wales £482,983,929, Scotland £63,075,020, Ireland £18,586,251). The Gross Estimated Rental of Property assessed to the Poor Rate in England and Wales in 1906-7 was £254,887,521, the Rateable Value being £207,067,675.

Municipal Trading.—The gross receipts from Municipal Undertakings in England and Wales in 1905-6 were:—Water, £4,429,778; Gas, £7,073,249; Electric Light, £2,853,537; and Tramways, £5,942,127. In Scotland £954,492 was derived from Water Undertakings: £1,757,272 from Gas; £470,872 Electric Light; and £1,087,434 from Tramways.

The naval expenditure of the British Empire on sea-going force in 1906-7 was £31,870,000, of which the U.K. contributed £31,438,600. The aggregate *gross* tonnage of the Mercantile Marine protected thereby was 16,381,650 (U.K.) and 1,229,246 India and Colonies, total 17,611,096 gross tons, which carries the annual value of nearly £1,500,000,000 including bullion and specie. The naval expenditure is therefore 2·13 per cent., if regarded as a premium for insurance. Other nations spend as follows in millions of £:—U.S.A., 25·1 to protect 4,241,590 tons of Mercantile Shipping; Japan, 5·2 for 1,000,000 tons; Russia, 12·4 for 913,133 tons; Germany, 11·4 for 3,810,553 tons; and France, 12·8 for 1,741,195 tons.

* 1840–50, 3 Jan. to 2 Jan.; 1855 onward, 1 April to 31 March.

Tower of London, Admission Fees, £2,000.

THE INCOME TAX.

A Tax on Income was first imposed by Pitt in 1798, in order to meet the expenses of the French War, and at the conclusion of peace in 1801 it was abolished. In 1803 the Income Tax was again imposed as a Property Tax, divided into Schedules A, B, C, D, and E, as at the present time, the rate being 1*s.* in the £ on incomes exceeding £60, except in the case of Schedule B, where the rate was 9*d.* in England and 6*d.* in Scotland. In 1805 the rate was increased by 3*d.*, and in 1807 the figures were 2*s.* in the £ on Schedules A, C, D, and E, 1*s.* 6*d.* on Schedule B for England and 1*s.* for Scotland. At the conclusion of peace the Income Tax ceased for 26 years (1816–1842), to be re-imposed by Sir Robert Peel on June 22, 1842, at the rate of 7*d.* in the £ on all incomes exceeding £150. In 1842 the tax produced about £5,000,000, or about £710,000 per 1*d.* of tax; and in 1906–7 the yield was £31,600,000, or £2,633,000 per 1*d.* of tax.

TEN YEARS OF PROPERTY AND INCOME TAX ASSESSMENTS.

The following table gives the amount assessed to Property and Income Tax in the ten years 1897-8 to 1906-7. "Land and Houses" represent Schedules A (Ownership of Lands and Houses) and B (Occupation of Lands); "Businesses" represent Sch. D (Businesses, Concerns, Professions and Employments); "Investments" are Schedule C (British, Indian, Colonial and Foreign Government Securities) and "Salaries" are those included under Schedule E (Government, Corperation and Public Company Officials).

THE NATIONAL DEBT.

The National Debt amounted on 31 March, 1908, to £759,826,051 *Gross* and £724,352,150 *Net*, being at the rate of £16 8s. 6d. per head of the population of the United Kingdom; the annual cost for 1907-8 being £29,500 000, or 13s. 4½d. per head. This amount is mainly the remnant of the growth of many years, and nearly all was raised for foreign wars. There was a trifling sum of £664,263 until the "Glorious Revolution" of 1688, which added nearly £16,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £38,000,000, part of which was paid off in the time of George I. In the reign of George II. about £87,000,000 were added, but the first twelve years of George III. saw £10,000,000 of this paid off. The American War added £121,000,000, making the total nearly £250,000,000, which was reduced considerably until 1793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £601,500,343 were added to the debt for the purposes of the war, the following amounts being raised:—

Year.	£	Year.	£	Year.	£
1793...	4.877.956	1801...	27,305,271	1809...	12,298,375
1794...	6,998,389	1802...	14 638,254	1810...	7,792,444
1795...	30,464,831	1803...	8.752,761	1811...	19,143,953
1796...	22,244,962	1804...	14.570,763	1812	24,790,697
1797...	30,356,873	1805...	16,649,801	1813...	39,649,282
1798...	16,858,503	1806...	13,035,344	1814...	34,563,603
1799...	21,714,863	1807...	10,432,934	1815...	20,241,807
1800...	23,030,520	1808...	12,095,044	1816...	514,059

The amount of the Debt in January, 1816, capitalised in the manner adopted since 1835, was £900,436,000 (Funded, £816,312,000; Unfunded, £44,727,000; Annuities, £39,397,000), the annual charge being nearly £33,000,000. With peace secured, the following amounts were paid off from 1817–1837:—

Year	£	Year.	£	Year.	£
1817...	1.826.814	1824...	7,456,550	1831...	2,673,858
1818...	1,624,606	1825...	9,900,725	1832...	5,696
1819...	3,163,130	1826...	1,195,531	1833...	1,023,784
1820...	1,918,019	1827...	2,023,028	1834...	1,776,378
1821...	4,104,457	1828...	4,667,965	1835...	1,270,050
1822...	2,962,564	1829...	2,760,003	1836...	1,590 727
1823...	5,251,725	1830...	1,935,465	1837...	1,585,885

At the accession of Queen Victoria the amount stood at nearly £788,000,000, with an annual charge of £29,000,000. Small sums were paid off annually from 1837–1854, when the Russian War added £33,000,000 to the Debt. Repayments were made from 1858 onwards, with slight increases in 1868, 1875, 1878, 1879 and 1886, the following being the actual amounts paid off:

Year.	£	Year.	£	Year.	£
1858...	2,971,727	1872...	3,443,023	1886...	*Nil.*
1859...	58,441	1873...	6,899,370	1887...	5,993,723
1860...	2,888,254	1874...	15,094,807	1888...	30,703,615
1861...	381,651	1875...	*Nil.*	1889...	7,426,812
1862...	1,038,371	1876...	7,094,132	1890...	8,036,931
1863...	568,099	1877...	1,106,831	1891...	4,709,820
1864...	9,236,915	1878...	*Nil.*	1892...	5,412,351
1865...	4,054,429	1879...	*Nil.*	1893...	6 894,203
1866...	8,739,650	1880...	4,034,595	1894...	4,543,540
1867...	1,826,986	1881...	5,350,543	1895...	8,943,417
1868...	*Nil.*	1882...	15,647,754	1896...	7,620,502
1869 ..	1,092,700	1883...	6,669,421	1897...	7,630,258
1870...	4,073 603	1884...	9,952,555	1898...	6,643,365
1871...	5,303,496	1885...	6,093,283	1899...	6,873,119

On 31 March, 1899, the *gross* total was £635,040,665, being a decrease since the accession of Queen Victoria of £153,000,000. The wars in Africa and China increased the *gross* amount by £149 482 000, the balance of cost (£67,684,000) being contributed by Revenue. In 1905-6 £11,855,000 was paid off, in 1906-7 £18,715,000, and in 1907 8 £15,530,000—a total reduction of £46,100,000 in three years.

The total gross Debt on 31 March was as follows in 1907 and 1908:—

	1907.	1908.
I. FUNDED DEBT:—		
(*a*) Permanent	£631.928.334	£625,608,890
(*b*) Annuities ...	40,864,211	39,407,575
II. Unfunded Debt ...	51,713,000	43,959,400
III. Other Capital Liabilities	49,659,159	50,850,186
Total Gross Debt ...	£774.164.704	£759,826,051

From these totals must be deducted the following assets:—

	1907.	1908.
Suez Canal Shares.....	£31,796,000	£31,055,000
Unexpaid Loans.....	422,516	422,516
Colonial contributions to Pacific Cable	1,401,500	1,387,540
Red Sea and India Telegraph Company's Annuity	26,082	8,845
Cunard Debentures ...	739,016	2,600,000
Exchequer Balances...	6,932,423	8,018,562
Total	£43,001,286	£44,392,863

Year end 31 March.	Funded Debt.	Terminable Annuities.	Unfunded Debt.	Other Liabilities	Gross Total.	Increase (+) or Decrease (−)	Assets.

The Debt is of three descriptions :—I. Funded (*a*) *Permanent*, (*β*) *Terminable* ; II. Unfunded ; III. Certain other Liabilities.

I. Funded Debt.—(*a*) *Permanent.*

That is, Debt which the Government is not under obligation to pay off at any fixed time. This consisted of the following stock on 31 March :—

	1907.	1908.
2½ per cent. *Consols*...	£583,245,235	£577,342,017
2¾ per cent. *Consols*...	4,259,906	4,151,077
2½ per cent. (26 Vict.)	30,777,324	30,469,927
Bank of England Debt	11,015,100	11,015,100
Bank of Ireland do. ...	2,630,769	2,630,769
	£631,928,334	£625,608,890

(*β*) *Terminable Annuities.*

These are a description of Sinking Fund by means of which a considerable portion of debt is paid off year by year, and after a certain time the capitalized sum entirely extinguished, the Treasury giving an Annuity for a certain number of years in exchange for permanent stock.

The following is a list of these terminable annuities with their amount, the dates when they expire, and their capitalized value as on March 31, 1908 :—

(1) Annuities for Life and Terms of Years (£1,468,465, created 1830–1888)	£14,265,649
(2) Red Sea and India Telegraph Co.'s Annuity (£36,000, created in 1862 and expiring in 1908)	17,650
(3) Annuities created by the National Debt Act 1883, National Debt Local Loans Act 1887, and the Finance Act 1899 :—	
(*a*) Savings Banks Annuities (£490,533 expiring in 1913–1914)	2,924,704
(*b*) Savings Banks Annuities (£773,637 expiring in 1924–1925)	11,417,074
(*c*) Book Debt Annuities (£745,215 expiring in 1924)	10,012,044
(4) Minor Annuities :—	
(*a*) Trustee Savings Banks Deficiency Annuity (£83,672 created in 1881 and expiring in 1917)	770,414
(*b*) Sinking Fund Annuity (£15,547 created in 1884 and expiring in 1934)	—
Total Capital Value...	£39,407,575

II. Unfunded Debt.

The Unfunded Debt consists of loans, money borrowed for short periods, which the Government is bound to pay off at certain dates, and is represented by certain loans having currency for periods varying from a few months to five or more years. On 31 March, 1908, these consisted of six months' Treasury Bills to the amount of £12,000,000, and also of War Stock and War Bonds (2¾ per cent.) repayable in 1910 to the amount of £23,959,400, and Exchequer Bonds (2¾ per cent.) repayable by annual drawings of £1,000,000 to the amount of £8,000,000.

III. Other Capital Liabilities.

These sums, which are not included in the capital on which interest is arranged for in the permanent charge, stood as follows on 31 March, 1908 :—

Under Barracks Act, 1890	£863,827
,, Telegraph Acts, 1892 to 1907	6,038,453
,, Uganda Railway, 1896 to 1902	4,428,995
,, Public Offices Act, 1895	409,214
,, (Whitehall Site) Act, 1897	459,052
,, Royal Niger Compy. Act, 1899	685,573
,, Naval Works Acts, 1895–1905	20,271,655
,, Military Works, 1897 to 1901	11,893,190
,, Land Registry Buildings, 1900	194,125
,, Pacific Cable Act, 1901	1,901,301
,, Public Offices Site (Dublin) Act, 1903	71,168
,, Public Buildings Expenses Act, 1903	1,034,633
,, Cunard Agreement Act, 1904	2,600,000
Total	£50,850,186

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. On 31 March, 1908, these consisted of the following sums :—

Liability to Suitors (Chancery)	£1,932,135
,, ,, Bankrupts' Estates	1,114,575
,, ,, Suitors (Ireland)	259,191
Fee and other Funds ,,	163,285
Court of Bankruptcy ,,	42,542
Unclaimed Dividends (B. of England)	79,761
,, South Sea Annuities, &c. ,,	39,788
,, Dividends (Bank of Ireland)	1,459
,, Prize Money	6,915
Life Annuities, &c. (Nat. Debt Office)	20,000
Unclaimed Dividends ,,	267,831

Cost of the Debt.

The Cost of the National Debt for the last two years is detailed below :—

I. Annual Interest—	1906–1907	1907–1908
Funded Debt—	£	£
(*a*) Perpetual Annuities :—		
2½ per cent. Consols	14,627,867	14,548,648
2¾ per cent. Consols	118,807	115,784
2½ per Cents.	772,040	769,953
Government Debts :—		
Bank of England ...	275,377	275,377
Bank of Ireland.....	65,769	65,769
(*b*) Terminable Annuities	4,739,306	3,596,992
Unfunded Debt.....	1,745,781	1,584,073
II. Cost of Management.	182,429	180,107
III. New Sinking Fund ...	5,982,621	8,365,294
Total	£28,500,000	£29,500,000

TRADE OF THE UNITED KINGDOM.

Imports and Exports Classified (1903–1907).

The tables on pages 469, 470, and 471 show the value of British Imports and Domestic Exports for the last five years, differentiating Imperial and Foreign customers, and summarising the merchandise into the four main headings of Food, Drink and Tobacco, Raw Materials, Manufactures, and Miscellaneous. The values are as ascertained by the Board of Trade, and represent in the case of Imports the full value (what is known as "C.I.F."), *i.e.*, cost, insurance and freight, or if sent on consignment the sale value at the date of entry; in the case of exports the term "Domestic" includes only British and Irish produce or manufactures, and the values are those known as "F.O.B.," *i.e.*, cost and charges for delivery on board the ship.

It must always be borne in mind that Imports have two values—F.O.B. when they *start* and C.I.F. when they *arrive*, the latter being the value delivered "free on board," or cost *plus* insurance and freight. Similarly, exports scheduled with their F.O.B. values as above are enhanced in value (=C.I.F.) by the time they are landed. This accounts, in some degree, for the excess in the value of imports over that of exports, and also for the difference in the figures recorded by the Board of Trade of the United Kingdom and by the recording offices of other countries.

THE KINGDOM OF ENGLAND

may be roughly said to be divided from Scotland on the north by the Cheviot Hills and the rivers Tweed and Solway, and from Wales by the Severn and Dee. Except in the west and the north, England is for the most part a level country, so cultivated as to be highly productive. The other districts have mineral riches, including iron, tin, lead, zinc, slate, and coal, which make abundant amends for the poverty of their surface.

The southern and eastern parts of England have a population mainly derived from Belgic Gaul, whilst the western districts and Wales have been peopled from the West of France and the North of Spain, while Ireland and Scotland are believed to have been peopled by a race originally Belgic. When the Romans first came to our shores the inhabitants might have been roughly divided into two sections: those who lived inland, and who may with some reason be called Celtic colonists, were a race of hunters and shepherds, dressed in the skins of beasts, and inhabiting huts made of rude wickerwork and covered with rushes; whereas the coast-dwellers were, probably, of Gallic origin, with some approach towards civilisation, and holding intercourse, for purposes of trade, with foreign merchants visiting the island. Neglecting the Romans, who were no more than mere military garrisons, and mingled little with the natives—much like Europeans in the East at the present day—we have the Saxons and Jutes established from Kent to Devonshire, and the Angles (and subsequently the Norsemen) from the Thames to the Tweed. The Norman Conquest brought in a mixed multitude from the Continent; the wars of Stephen introduced a numerous body of Flemings, who were settled by Henry II. in Wales; and the commercial views of Edward III. led to the establishment of a still larger body of the same people as clothworkers in Kent. The west of England was known to the Phœnicians, and was resorted to by them for its tin, four centuries or more B.C.; hence the whole country received the name of the Cassiterides, or Tin Islands. When invaded by Cæsar (B.C. 55) it was called Britain (perhaps derived from Prydain, the name of an early chief of great power), or sometimes Albion, that is, the *White Land*, from the white cliffs on the S.E. coast.

Agriculture and Live Stock.—In 1907 the cultivated area was as follows:—Acres under Wheat, 1,537,208; Barley, 1,411,163; Oats, 1,967,682; Beans, 296,186; Peas, 164,326; Potatoes, 381,891; Turnips and Swedes, 1,058,292; Mangold, 436,193; Cabbage, Kohl Rabi, and Rape, 265,747; Clover and Rotation Grasses, 2,611,722; Small Fruit, 73,372; Hops, 44,938; Other Crops, 380,197; Bare Fallow, 248,678; total arable land, 10,777,595. Permanent grass, 13,807,860. Total acreage under crops and grass, 24,585,455. The produce in 1907 was 6,526,242 quarters of wheat (33·96 bushels per acre); 6,292,461 quarters of barley (35·67); 11,464,406 quarters of oats (46·61); 1,270,946 quarters of beans (34·45); 587,774 quarters of peas (29·49); 2,097,814 tons of potatoes (5·49 tons per acre); 14,665,737 tons of turnips and swedes (13·86); 8,690,789 tons of mangold (19·92); 2,738,779 tons of hay from clover, sainfoin, and rotation grasses (33·31 cwt. per acre); and 5,941,256 tons of hay from permanent grass (27·79 cwt. per acre). The Live Stock included 1,183,147 horses; 2,032,234 cows and heifers; 2,955,447 other cattle; 5,750,187 ewes for breeding; 9,348,741 other sheep and rams; and 2,257,136 pigs.

Education.—Public Elementary Education is free, and is conducted in various institutions known as Ordinary Public Elementary Schools,* with 237,156 boys and 221,508 girls under 5 years, 2,242,406 boys and 2,206,950 girls over 5 and under 12, and 531,171 boys and 528,929 girls of 12 years and over, on the registers in 1907. There were also 61 Higher Elementary Schools, with accommodation for 18,964 scholars, and Special Schools for Blind, Deaf, Defective, and Epileptic Children. Teachers are trained at 668 Pupil-Teacher Centres and at 75 Training Colleges and 22 Hostels. Public Secondary Education is conducted at 768 Recognised Secondary Schools, at 5,933 Evening (Continuation) Schools, and at 203 Day Technical Classes, 44 Art Classes, 33 Technical Institutions, and 225 Schools of Art. A Parliamentary grant of £10,780,242 was made for Public Elementary Education in 1906, the total receipts for that purpose being £11,173,983, exclusive of £9,830,233 received from Local Rates, the total payments being £20,403,935 in 1906. In addition to State action, there are many establishments known as "The Public Schools," where the upper and middle classes are educated at their own cost; and Universities at Oxford (1249 A.D.), Cambridge (1257 A.D.), Durham (1832), London (1836), Manchester (1850), Birmingham (1900), Liverpool (1903), Leeds (1904), and Sheffield (1905), with various University Colleges throughout the Kingdom.

Occupations (1901).—Of the 12,134,259 males of 10 years and upwards in England and Wales in 1901, 1,071,040 were engaged in Agriculture, 1,042,864 in Building and Works, 774,291 in Food, Tobacco, Drink and Lodging, 640,989 Coal and Shale Mine Workers, 626,263 Engineering and Machine Making, 548,190 Dock, Coal and General Labourers, 430,645 Road Conveyance, 351,911 on Railways, 311,618 Professional, 307,889 Commercial or Business Clerks, 233,000 Wood, Furniture, Fittings and Decorations, 229,123 Tools, Dies, Arms and other Metal Trades, 222,796 Merchants, Agents, Accountants, Banking and Insurance, 196,898 Cotton Manufactures, 184,681 Boot and Shoe Trades, 180,496 Messengers, Porters and Watchmen, 179,932 Domestic Outdoor Service, 172,687 General or Local Government, 168,238 Defence, 131,429 Seas, Rivers and Canals, 130,731 Precious Metals, Jewels, Watches, Instruments and Games, 124,263 Domestic Indoor Service, 119,545 Tailors, 115,083 Cycles, Coaches and other Vehicles, 111,081 Drapers, Mercers and Dress, 107,170 Printers and Lithographers, and 101,938 Chemicals, Explosives, Oil, Grease and Soap Makers. Of females, 3,254,242 unmarried and 917,509 married, aged 10 and upwards, were occupied, 1,330,783 being in Domestic Indoor Service, 340,582 Dressmakers, 332,233 Cotton Manufactures, 196,141 Laundry and Washing, 172,873 Teaching, 142,687 Food and General Shopkeepers, 122,068 Woollen and Worsted Manufactures, 117,640 Tailoresses, 111,841 Charwomen, and 95,900 Staymakers, Shirtmakers and Seamstresses.

* These Schools are also divisible as "Provided," where the provision of the fabric and the cost of maintenance is borne by the public, and "Non-Provided," where the buildings are not provided or maintained by the public, but by a religious denomination.

Statistics of English Counties.

THE following tables show the Area and Population of each County* in England and Wales according to the Census of 1901, the Rateable Value as settled by the Assessment Committees in the Valuation Lists in 1907, the amount of Rates received by Boards of Guardians of Poor Law Unions in each county for their own purposes (*i.e.* excluding county contributions) during the year ended Lady Day, 1907, together with the number of Paupers who were actually in receipt of relief on Jan. 1st, 1908.

The total population of England and Wales in 1901 was 32,527,843, as compared with 29,002,525 in 1891. The total number of Paupers receiving relief on Jan. 1st, 1908, was 928,671, being an increase of 7,833 when compared with the previous year. The total cost of Relief to the Poor for the year ended Lady-Day, 1907, excluding the expenditure of the Metropolitan Asylums Board in connection with hospitals for infectious diseases, was £13,968,897.

The total amount of Rates received by Boards of Guardians in England and Wales for their own purposes during the year ended Lady Day, 1907, was £12,118,836, as compared with £12,268,933 in the previous year. This was equivalent in 1907 to a rate of 18. 3*d*. in the £ on Assessable Value or 7*s*. 0¼*d*. per head on estimated population. The receipts in aid of these Rates, inclusive of grants from County and Borough Councils, and grants under the Agricultural Rates Act, 1896, amounted to nearly £3,750,000. The cost of Relief to the Poor for the year ended Lady-Day, 1907, amounted to 8*s*. 1*d*. per head of the estimated population. (*For statistics and other particulars as to Wales, see next page.*)

* *Note.*—The Counties referred to above are Registration Counties, and do not precisely correspond with the areas of ordinary Counties, but with Poor Law areas to which the figures in this table relate. For particulars as to the area and population of Administrative Counties under the Local Government Act, 1888, see page 765.

† Received by Boards of Guardians for their own purposes.

The Principality of Wales.

THE Principality of Wales, with an extreme length of 135 miles and a breadth varying from 35 miles to 95 miles, lies in the S.W. of Great Britain, and has an area of 7,370 square miles, or about 4,716,000 acres. The Principality is rich in minerals; slate, coal, and iron being among the more important; while of its manufactures, flannel, cloth, and hosiery alone are worthy of mention. The native inhabitants are almost wholly of the Cymric stock of the Celtic race; and a large number of them belong to the religious body known as the Calvinistic Methodists.

At what time Christianity was introduced it is impossible to tell, but certainly not later than A.D. 400. When the British Christians were driven from their homes, such of them as did not seek refuge beyond the seas found in the rocky fastnesses of the Welsh mountains a secure retreat from their enemies. There they immediately set about dividing the country into ecclesiastical divisions for administrative purposes, and the present sees of Wales represent those leading centres of religious thought that became famous in the sixth century.

The four bishoprics still remain as of old, and the numbers of beneficed clergy now to be found in them are as follows: St. David's, 360; Llandaff, 246; St. Asaph, 206; and Bangor, 147. The sees of St. David's and Llandaff were united with the Southern province in the year 1107, and those of Bangor and St. Asaph in the years 1092 and 1143 respectively.

When the Saxon pirates began to visit and ravage the eastern shores of Britain, the Celtic inhabitants were gradually pressed westward by the invading hordes, and finally found secure shelter in the wilds of Wales, Devon, and Cornwall. The border-lands, or marches, between England and Wales were long in a state of at least guerilla warfare; and it was not until about 850 A.D. that one Roderick (Rhodi Mawr) contrived to unite the whole country into one Principality, dividing it afterwards among his sons into three smaller ones, named, severally, Gwynedd, Dyved and Ceredigion, and Powis. This was followed by the incursions of the Danes, after which Howel once more (in the 10th century) succeeded in reuniting the country. Later, when England was tending in the same direction of unity, Athelstane received a tribute from the Welsh in recognition of his nominal sovereignty over them. William I. and his son Rufus both tried the plan of granting fiefs to their more adventurous Norman knights, on condition of their conquering the land, while Henry I. introduced into the Principality a colony of Flemish wool-workers. Henry II., too, and John, endeavoured, with doubtful success, to effect a final subjugation of the troublesome province. A combination of fortuitous circumstances led to its lasting conquest. Llewellyn, who succeeded David, had been implicated in the Montfort rebellion, but, on the accession of Edward I., managed to get included in the general amnesty granted to those who had joined the Leicester faction. In 1276, however, Edward, having been repeatedly refused the homage due to him from Llewellyn, raised an army to enforce his commands. Internal dissensions among the Welsh greatly aided the English, and Llewellyn, at length cooped up and almost starved to death among the Snowdon mountains, was forced to submit at discretion, and accept the terms offered by the victor (1277). By the grace of Edward the Welsh prince was allowed to return to the Principality; but trouble arising again, in which both Llewellyn and his brother David were concerned, a war arose, and the independence of Wales was for ever shattered. Llewellyn was slain in battle in 1282, with two thousand of his followers; and in the following year David, being betrayed to the English, was sent in chains to Shrewsbury, and at last put to a painful and ignominious death as a traitor. The Welsh nobility then submitted in a body, and King Edward invested his son Edward (who had been born at Carnarvon) with the Principality, which very soon afterwards was fully annexed to the Crown. In later days the history of Wales has been almost identical with the history of England, the Principality and Country marching side by side in sure and steady progress.

In education the Principality has made great strides of recent years, and possesses a University (Prifysgol Cymru), consisting of the three university colleges of Aberystwyth, Bangor, and Cardiff, in addition to St. David's College at Lampeter.

The following table of statistics contains some interesting information with reference to the various individual counties of Wales. In addition to those named, Monmouth is, not without good reason, claimed as a Welsh county; if admitted, it would add over a quarter of a million to the population of the Principality, thus making it larger than that of Scotland in the early part of the last century. The Welsh is a distinct nationality, with a language and literature of its own.

THE KINGDOM OF SCOTLAND.

THE most northerly part of the island, divided from the south by the River Tweed, the Cheviot Hills, and the Solway Firth, is the ancient Caledonia or modern Scotland, and contains nearly 30,000 square miles, or 19,069,500 acres, of which not quite 4,500,000 are in a state of cultivation, with a population of 4,472,103 in 1901, estimated at 4,826,587 in 1908.

Industries.—In the Highland regions the crofters carry on a primitive system of farming, and the distilling of whiskey is a typical industry. Sheep farming is carried on, but a great part of the land is preserved for deer. The South-Eastern Highlands contain granite in profuse quantities, and supply at Aberdeen a famous breed of cattle for the London market. In the Northern Lowlands grazing, fishing and manufacture of woollens are the chief occupations. The Western, Eastern and Mid Lowlands are immensely fertile, and contain iron and coal-fields. In 1907 the acreage under wheat was 48,307, barley 210,309, oats 951,308, potatoes 138,888, turnips 446,190, clover and rotation grasses 1,559,244, permanent grass 1,447,992, and total 4,866,478; there were 204,724 horses, 1,185,452 cattle, and 7,313,155 sheep. The principal industries are flax and jute (Dundee), cottons (Paisley), shipbuilding and engineering (Glasgow and Greenock), dyeworks (Perth), and printing and brewing (Edinburgh). The product of the sea fisheries amounted in 1907 to £3,241,941, and over 30,000,000 tons of coal were raised in Lanarkshire and the other mining districts in 1902, and about 150,000 hands were employed in textile industries. The annual value of the trade of Scotland is about £72,000,000, of which £39,000,000 represents the value of imports. The principal ports, with the tonnage of entries in 1907, are given on p. 457.

Education.—There were 3,138 Primary Schools in 1907, with 792,677 children on the register, and 147 Higher Grade Schools, with 18,323 children, in addition to 939 Evening Schools (87,599 scholars) and 772 Continuation Classes (107,622 scholars). There are Universities at St. Andrews (1411 A.D.), Glasgow (1450), Aberdeen (1494), and Edinburgh (1582).

POPULATION, AREA, VALUATION AND PAUPERS OF COUNTIES.

*** The valuation of lands and heritages is that furnished by the Inspectors of the Poor to the Local Government Board for Scotland. The number of Paupers is that chargeable on May 15, 1907.

THE TAXES AS CONTRIBUTED.

THE following table shows the amount contributed by each of the three kingdoms (England and Wales, Scotland, and Ireland) under the various schedules of the Property and Income Tax, Inhabited House Duty, and Land Tax in the financial year 1906–7.

Kingdom.	Tax.				Population, 30 June, 1907.
	Income.	Inhabited House.	Land.	Total.	
	£	£	£	£	
England and Wales	30.587.503	1,950.847	726.171	33.273.524	34.945.600
Scotland	3.123.054	125.570	33 774	3.292.398	4.776.063
Ireland	1,266.511	*nil*	*nil*	1.260.511	4.377.056
United Kingdom	34.987.068	2.085.417	759.945	37.832.433	44.098.719

THE KINGDOM OF IRELAND.

IRELAND is an island lying between 51° 26′ and 55° 23′ N. lat. and 5° 20′ and 10° 26′ W. long. It is about 60 miles to the west of England. On three sides it is washed by the Atlantic Ocean, and on the east by the Irish Sea and St. George's Channel. Its greatest length is, from north to south, 306 miles, and from east to west from 120 to 180, with an area of about 31,759 square miles. The total acreage is (1907) 20,710,589, of which 2,995,945 acres are barren mountain, turf bog, marsh, or building land. The greater part of the surface is a plain, interspersed with low hills, the highest mountain being 3,414 feet above the sea-level. The rivers are numerous, the Shannon, 254 miles in length, being the principal; but the chief water feature of the country is the beautiful series of lakes or (as they are called) loughs, the largest, Lough Neagh, covering a surface of 98,255 acres. The harbours are among the finest in the world.

Government.—The government is semi-independent. A Lord-Lieutenant, appointed by each successive Ministry, exercises almost regal sway. The peerage consists of 176 members, who are represented in the Imperial Parliament by 28 of their number; and 103 members represent the country in the House of Commons.

The legal establishment is similar to that of England, and is presided over by a Lord Chancellor.

Population.—The population of Ireland on March 31, 1901, was 4,458,775 (2,200,040 males and 2,258,735 females), a decrease of 245,975, equal to 5·23 per cent., since the preceding Census of 1891. Of the total population the professional class numbered 214,343, domestic 219,419, commercial 97,889, agricultural 876,062, industrial 639,413. In 1907 there were 22,122 marriages, 101,563 births, and 77,410 deaths, and the estimated population on 30 June, 1908, was 4,363,351.

Agriculture and Live Stock.—In 1907 there were 38,143 acres under wheat, 1,075,390 under oats, 170,431 under barley, 8,868 under rye or bere, 1,835 under beans, and 324 under pease—a total acreage of 1,294,991 under cereal crops; 590,998 acres were under potatoes, 275,092 under turnips, 67,100 under mangold, 38,259 under cabbage, 5,191 under vetch and rape, and 25,340 under carrots, parsnips and other green crops—a total of 1,002,980 under green crops; 59,659 acres were under flax, and 2,281,318 under hay; the total extent under crops of all kinds thus being 4,650,397 acres, while there were 10,104,852 acres under permanent grass. The produce in 1907 was 709,823 cwt. of wheat, 2,997,901 cwt. of barley and bere, and 17,165,791 cwt. of oats; while 2,246,488 tons of potatoes, 4,095,710 tons of turnips and swedes, and 1,181,551 tons of mangolds were also grown. The live stock included 596,144 horses, 29,791 mules, 237,540 asses, 4,676,493 cattle, 3,816,609 sheep, 1,317,068 pigs, 247,347 goats, 24,326,995 poultry.

Industries.—In addition to agriculture and pasture, linen and shipbuilding are the principal industries in the north-east, sea fishing throughout the coast districts, distilling and brewing in many of the large towns, and cloth and lace locally. The western districts are being developed by the opening up of communication. An industry which is rapidly gaining ground is bee-keeping; the amount of honey produced in 1906 was 362,563 lb. in movable combs and 108,287 lb. in other hives, a total for the year of 470,850 lb.

The total value of fish landed in 1907 was £341,049, the quantities being 697,901 cwt. (including 252,473 cwt. mackerel and 309,310 cwt. herrings), exclusive of salmon and shell-fish.

Religion.—The prevailing religion is Roman Catholic, 3,308,661, or 74·21 per cent. of the population, professing that form of faith, there being also 581,089 Protestant Episcopalians, 443,276 Presbyterians, and 62,006 Methodists. Until the year 1871 the Established Church was a branch of that of England, with two archbishops and ten bishops, although the members of this communion were but 12 per cent.—9 per cent. of the remaining Protestants being Presbyterians.

Education.—Ireland is well supplied with educational establishments, having two universities (and a third in prospect), a large number of secondary schools, indirectly endowed under the Intermediate Education Board, and an admirable system of primary schools under the National School Commissioners. There is also a Department of Agriculture and Technical Instruction which issues detailed reports, and assists generally in the development of agriculture and industry. In 1907 there were 8,538 Primary Schools in operation, with 675,471 pupils on the rolls and 12,705 principal and assistant teachers; there were also 7 Training Colleges, with 476 men and 657 women students resident. The total expenditure by the Commissioners from grants and rates was £1,470,347 in 1907-8.

THE LORD LIEUTENANT.

His Excellency the Right Honourable John Campbell Gordon, 7th Earl of Aberdeen, LL.D., D.C.L., G.C.M.G., *born* 3rd August, 1847; *married*, 1877, Hon. Ishbel Maria, daughter of 1st Baron Tweedmouth; Lord Lieutenant General and General Governor of Ireland; sworn in 14th December, 1905...£20,000

Do., Telegraph Office, M. O'Toole ...£400 to £500

ROYAL IRISH CONSTABULARY.

Headquarters, Dublin Castle—£1,354,902.

The Royal Irish Constabulary, then styled "the Constabulary of Ireland," was formed in 1836 by the consolidation of the "Barony Constables" and the "Peace Preservation Police." The force is armed with rifle, sword, and pistol. Its duties are varied, and military as well as police work has often to be undertaken. In 1867, by Her late Majesty's command, the title of the force was changed from the Constabulary of Ireland to Royal Irish Constabulary, in special recognition of the splendid services rendered in the past, and in particular during the Fenian outbreaks of that year. Officers and men alike have given repeated proofs of conspicuous courage and daring, and of exceptional moderation under the most trying circumstances. Approximate strength of the force 1908-9:—236 Head Constables, 1,624 Sergeants, 384 Acting Sergeants, and 7,892 Constables; total, 10,136.

Inspector-General, Col. Sir Neville Chamberlain, K.C.B. ..... £1,500 to £1,800

THE ISLE OF MAN AND THE CHANNEL ISLANDS.

ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3′—54° 25′ N. and long. 4° 18′—4° 47′ W., nearly equidistant from England, Scotland, and Ireland. It is about 34 miles long, and from 10 to 12 broad, containing an area of 145,325 acres, with a population of 55,598. Curiously enough the history of the island is intimately linked with that of the Hebrides and the Kingdoms of Scotland and Norway. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition, conquered the Orkneys and the Shetlands, the Western isles, and Man, and added them to the kingdom already beneath his sway. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1736 James, 10th Earl of Derby, died without issue male; the earldom went to his next male heir, but the sovereignty of the island went, with the Barony of Strange, to his heir-general, James, Duke of Athole, on whose death the island descended to his daughter Charlotte, from whom, in 1765, Parliament purchased the sovereignty for £70,000. In 1827 the Crown purchased it for the sum of £417,144. The land is rich in minerals, lead, iron, blende, and slate, and exports large quantities of agricultural produce. About 50 miles of railway have been constructed, and about 23 miles of electric tram roads. The natives of this island belong to a mingled race of Celts and Norwegians, and the language, in which the Celtic element is predominant, is known as the Manx.

Man is governed by an independent Legislature called the Tynwald, consisting of two branches—the Governor and Council, and the House of Keys. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys.

CAPITAL: Douglas, pop. 19,223 (Castletown, pop. 1,963, is the ancient capital); the other towns are Peel, pop. 3,306, and Ramsey, pop. 4,729.

	1906-7.	1907-8.
Public revenue	£87,322	£86,365
Public expenditure	76,157	75,728

Receiver-General, Colonel W. J. Anderson 230
Clerk to Council, A. B. Herbert-Story ... £5
Speaker, House of Keys, A. W. Moore, C.V.O.

THE CHANNEL ISLANDS

comprise the bailiwicks of Jersey (including the Minquiers and Ecréhou Rocks) and Guernsey (the latter of which are comprehended the small islands of Alderney, Sark, and Herm), situated off the north-west coast of France, at distances from ten to thirty miles. They are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest. The area altogether is about 73 square miles: and the population in 1901 was 95,841—Jersey, 52,796, Guernsey with Herm and Jetou, 40,328, Alderney, 2,054, and Sark, 506. The land under cultivation in Jersey amounted in 1904 to 19,290 acres, and in Guernsey (1904) 11,071 acres, the principal produce of the soil of Jersey being potatoes and wheat, and in Guernsey green crops and oats. There were 2,292 horses, 11,560 cattle, 218 sheep, and 6,608 pigs in Jersey in 1904; in Guernsey (1904), 1,439 horses, 6,528 cattle, 209 sheep, and 5,099 pigs. The famous Jersey and Guernsey breed of cows has earned well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents His Majesty. French is the official language of the local legislatures, called the *States*, and of the Royal Court, and the old Norman dialect is still spoken by the people, but English is now permissible in the legislative assembly. The Bailiff appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The climate of these islands is mild, and the soil exceptionally productive. The islands being almost exempt from imperial taxation, they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea-bathing; the principal town of Guernsey is St. Pierre, on the east coast.

Imports from United Kingdom, 1906... £1,353,186
Exports to United Kingdom, 1906 1,554,217

THE CITY OF LONDON

LONDON was a place of importance under the Romans, and was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it is said it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them; and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (*i.e.*, possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality, four times, A.D. 1397, 1398, 1406, 1419); and modern cases occur with Alderman Wood, 1815, 1816; Sir John Key, 1830, 1831; Alderman Cubitt, 1860, 1861; and Alderman Sir R. N. Fowler, 1883, 1885. The title of Lord Mayor is said to have been first bestowed in 1354 on Sir Thomas Legge, by Edward III.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life.

The Common Council was at an early date substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. Sheriffs (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas, on which day the Lord Mayor is elected. He is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the Lord Mayor's Show. The Recorder was first appointed in 1298. The Chamberlain is an ancient officer. There were at one time 2 Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance *circ.* 1319. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as officers in the charter of Edward II., A.D. 1319, but the offices can be traced to a much earlier date than this.

Loss on Realisation	1,153
Interest on Asylum Loan	260
Balance carried to General Balance Account	6,352
Total	£212,140

* The above is abstracted from the 275th "City's Cash Account" of the series extant—A.D. 1633 to 1907. The Accounts earlier than A.D. 1633 were believed to have been destroyed in the Fire of London; but two years' Accounts, *temp.* Queen Elizabeth, have been recently discovered among the Corporation Archives, as exceptions to that belief. The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The extract is from the 124th Annual Printed Account of the Corporation, A.D. 1784 to 1907. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, and the 14th December, 1905, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 76th Standing Order of the Court of Common Council. The Accounts for the year 1907 show the Income and Expenditure applicable to the year on the various Funds.

Offices, Spring Gardens, S.W.—*Education Offices*, Victoria Embankment, S.W.
Hours 9.30 to 5 (Saturday 9.30 to 1).—Meets on Tuesday at 2.30 p.m.

THE London County Council was constituted under the Local Government Act of 1888. London is an *administrative* county, covering an area of 121 square miles, with boundaries conterminous with those of the area over which, prior to 1889, the Metropolitan Board of Works exercised jurisdiction under the Metropolis Management Act of 1855, except that under the London Government Act, 1899, there was some re-arrangement of the county boundaries, the principal being that Penge was taken out of and South Hornsey was added to London.

The City of London is an electoral division of the county, and was not much affected by the Act. The County of the City of London is a county for *non-administrative* purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for *non-administrative* purposes, by name the County of London, in which the justices continue their judicial duties. Such matters as necessitate the consideration of both the *administrative* county and the *non-administrative* county are referred to "The Standing Joint Committee" of the London County Council and the London Quarter Sessions.

The Council comprises a chairman, 19 aldermen, and 118 councillors, together 138, or, if the chairman be also an elected member or alderman (as at present), 137. The term of office for aldermen is 6 years, and 10 or 9 retire every 3 years. The councillors are elected for 3 years, and will all retire in March, 1910, the seventh council having been elected in March, 1907. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office. The first meeting of the London County Council was held on the 21st March, 1889, under the presidency of Lord Rosebery.

In the present Council the Municipal Reform Party have for the first time a large majority, previous Councils having been strongly Progressive.

The powers, duties, and liabilities of the Council include the following: *First*, those formerly belonging to the Metropolitan Board of Works in connection with the raising and loaning of money, and the sanctioning of loans required by the councils of the metropolitan boroughs; main drainage, and the sanctioning of local sewers; fire brigade; parks and open spaces; works for prevention of floods by the Thames; Thames crossings (bridges, tunnels, and ferry); street improvements; controlling the width of new streets, the building line, and the naming and numbering of streets; supervising buildings and district surveyors; dangerous structures; structure of theatres and music-halls; artizans' dwellings; cattle diseases; explosive substances and petroleum storage; infant life protection; gas, gas-meter, and electric-meter testing; tramways, &c. *Secondly*, those transferred from former county justices in connection with the granting of music and dancing licences; provision of asylums for pauper lunatics, and of reformatory and industrial schools; testing weights and measures; county buildings; coroners; and other minor matters. *Thirdly*, powers transferred from various authorities with regard to highways; licensing of houses or places for the performance of stage-plays beyond the limits of the Lord Chamberlain's authority; licensing of slaughter-houses and of cow-houses; and the supervision of common lodging-houses. *Fourthly*, new powers with respect to registration of electors; public health; historic buildings and monuments; inspection of factories and certain other buildings; to secure means of escape from fire; suppression of nuisances; regulation of overhead wires; the administration of the Shop Hours and Shop Seats Acts, the Employment of Children Act, and the Midwives Act; reformatories for inebriates; the registration of motor cars; and the collection of duties on dog and establishment and certain other licences. Under the Education (London) Act, 1903, the Council became the authority for all public education in the county, both elementary and higher. As the central representative body in London, the Council also interests itself in the thousand and one things affecting the welfare of the people of London as a whole, and has delegates on the Metropolitan Water Board and numerous other boards, charities, &c.

The Council meets weekly, and receives reports from its numerous committees. The Finance Committee have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a gross debt, according to the latest returns, of about £82,155,000, a Sinking Fund of £31,217,000, and an annual expenditure, including loans advanced to other bodies, of about fifteen millions, of which five and a half millions are expended on education. The Council has recently revised its standing orders relating to expenditure with a view to increasing its control. The Asylums Committee have special powers under the Lunacy Acts, and manage Hanwell, Colney Hatch, Banstead, Cane-hill, Claybury, Bexley, and Horton Asylums. On the Horton estate an experimental working colony for epileptic patients has been opened, and a new asylum for 2,000 patients was opened in June, 1907. Accommodation is provided for over 19,000 patients. The Housing of the Working Classes Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total accommodation provided by the Council up to 31st March, 1908, comprised 1,608 cottages, 6,272 tenements in block dwellings, and 1,845 cubicles in three lodging houses. The total capital outlay was £2,596,514. It is the aim of the Council to make its working-class dwellings self-supporting, and in this, taking all the dwellings as a whole, it has succeeded, but there is a charge on the rates in respect of estates in course of development.

The Improvements Committee are responsible for the carrying out of street improvements and the construction and maintenance of bridges (outside the City of London) and tunnels across the river Thames. The new street between Holborn and the Strand (authorised by Act of 1899), now known as Kingsway and Aldwych, was opened by H.M. the King on 18th October, 1905. The committee have almost completed an extensive improvement at Westminster, including

a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge (authorised by Act of 1900), and they have also in hand several smaller improvements. During last year the construction of the tunnel connecting the districts of Rotherhithe and Shadwell was completed, and opened by the Prince and Princess of Wales on 12th June, 1908. This tunnel, including the approaches, is 1¼ miles in length, it accommodates both foot and vehicular traffic, and has cost about £2,000,000, of which the contract price of the engineering work was £1,088,484.

The Fire Brigade, directed by the Fire Brigade Committee, has been much increased since the Council came into existence: the authorised staff now numbers over 1,350 men; several new stations are being built, while old stations are being improved and enlarged, and the equipment improved by the addition of motor appliances. Perhaps the most popular work of the Council is that connected with its parks and open spaces. Amongst the latest additions to these open spaces in and around London are Marble Hill, Twickenham (to preserve the view from Richmond Hill), Avery Hill, Eltham, Hainault Forest, Essex, Springfield Park, Clapton, and Ruskin Park, Denmark Hill. The annual expenditure on the maintenance of parks and open spaces (over 5,000 acres) is about £135,000.

The disposal of sewage is the work of the Main Drainage Committee. The metropolitan main drainage system covers about 140 square miles, including certain districts outside the county, and comprises 290 miles of main, storm-relief, intercepting and outfall sewers, ten pumping stations and two sewage precipitation stations. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, the harmless effluent being allowed to flow into the river, while the sludge is taken out to sea. The total quantity of sewage treated at the outfalls in the course of a year amounts to about 90,000 million gallons. A comprehensive scheme for enlarging the main drainage system was adopted by the Council in 1900, and this was supplemented in 1904 by a scheme of extensive flood relief works. These works are already well in hand. The total capital outlay on main drainage up to 31st March, 1908, was £10,746,000.

In previous Almanacks particulars have been given of the purchase by the Council of the most important tramway systems within the county. The Council is now in possession of all the tramways in London with the exception of a few miles of lines, chiefly in the north-west. On 31st March, 1908, the system extended over 119¾ street miles, being 68¾ miles of electric lines (mostly underground conduit) and 51⅜ miles of horse lines. The latter are being rapidly reconstructed for electric traction. The whole of this great system is worked by the Council, with the exception of a short length of ¾ mile leased to a company. The total capital outlay on tramways amounted, on 31st March last, to £8,414,590, and the debt outstanding to £7,330,697. A report recently presented to the Council on the results of the year 1907-8 showed gross receipts of £1,663,000, a surplus on working of £493,000 (surplus on electric lines £550,000, less deficiency on horse lines £57,000), and a net surplus, after payment of interest on capital outlay and providing for repayment of debt, of £45,406, which was carried to the renewals fund. 35,561,000 car-miles were run and 372,515,000 passengers were carried during the year. This department of the Council's work is directed by the Highways Committee.

The Education Committee comprises thirty-eight members of the Council and twelve co-opted members. Names of these members will be found under the Alphabetical List of Councillors. The Council is responsible for the education of about 750,000 children in elementary schools, and is doing much to improve the supply of secondary and technical education in London and the provision of training colleges for teachers. The estimates of expenditure on rate account for education for the year 1908-9 amount to £5,437,508, of which £4,442,007 is for elementary and £995,901 is for higher education, which now includes evening schools and pupil teachers' centres, as well as secondary schools, training colleges, polytechnics, and technical institutes. The charge falling on the rates, after deducting grants and other receipts in aid, is £3,509,622, or 1*s.* 7*d.* in the pound—an increase of 1*d.* in the pound upon the rate for 1907-8.

During the past year the Council decided to discontinue the service of steamboats on the river Thames which the previous Council had established under an Act obtained in 1904. The Council also resolved, on 28th July, 1908, to close the Works Department, which had been in existence since 1892, and was created for the purpose of executing works by direct employment of labour. Both these questions were much to the fore at the last election.

The latest addition to the committees of the Council is the Local Pensions Committee, appointed under the provisions of the Old Age Pensions Act of last Session, and composed of twenty-one members of the Council and twelve persons appointed by the Council.

The expenditure of the Council is met by two chief sources of supply—capital money raised by the issue of Stock, and current income raised in a county rate. Certain contributions, including education grants, are also received from the Imperial Exchequer. The capital disbursements for the year ended 31st March, 1908, amounted in round figures to £3,260,000, including improvements (streets, bridges, and tunnels), £683,000; housing of the working classes, £105,000; main drainage, £395,000; fire brigade, £29,000; lunatic asylums, £101,000; tramways, £1,468,000; new county hall site, £99,000; and education, £328,000. The maintenance of these works and services, the sinking fund to pay off debt, and the interest on the debt, together with all recurring disbursements of every kind, are paid out of rates, or, in the case of tramways and working-class dwellings, out of receipts. Some idea of the nature and amount of the expenditure on rate account will be gathered from the statement on the next page.

During the year 1908 the Council made a further issue of £2,750,000 London County Consolidated Stock, carrying interest at the rate of 3½ per cent., the Stock being issued at par. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure within a period of 60 years. The total Stock now outstanding amounts to about £73,500,000.

The rating for the year 1908-9 amounts to 2*s.* 9½*d.* in the pound over the whole county,

including the City, and a further rate over the county outside the City of 2½*d.* in the pound, together 3*s.* 0*d.* This includes 1*s.* 7*d.* for education. The assessable value of the County of London on 6th April, 1908, was £44,332,025—a 1*d.* rate over the whole county producing £184,716.

The following is a summary of the estimates of the amount to be raised by county rate for the year to 31st March, 1909, prepared at the beginning of the year. These figures do not include the receipts and expenses on account of the revenue-producing undertakings (tramways, working-class dwellings, &c.):—

ESTIMATED RECEIPTS.			ESTIMATED EXPENDITURE.		
1. CASH BALANCE on 1 April, 1908 (out of which the outstanding net liabilities of the previous year have to be met)		£1,136,418	1. DEBT:—Redemption	£1,457,075	
			Dividends on Stock (less tax)	2,121,500	
			Interest on sundry liabilities	140,655	
			Income Tax	50,046	
			Management of stock, &c.	71,075	
					£3,840,351
2. RECEIPTS in aid of expenditure:—			2. GRANTS:—To Guardians for indoor paupers	£327,131	
Exchequer Contribution	£512,396		To Guardians and others out of the Exchequer contribution	306,142	
Government Grants in aid of Education	1,511,621		Registration of Electors	15,665	
Interest on Loans advanced to Local Authorities, &c.	605,060		Main roads	289	
Rents	144,610				649,227
Sundry contributions, fees, fines, &c.	268,801		3. PENSIONS (including Superannuation and Provident Fund)		76,005
		3,042,488	4. ESTABLISHMENT CHARGES (not charged to particular services)		228,835
3. CONTRIBUTIONS from Revenue-producing undertakings for interest and repayment of debt chargeable thereto (Tramways, Working-class Dwellings, &c.)		615,706	5. JUDICIAL EXPENSES		48,535
4. CONTRIBUTION from Works Account for interest and repayment of debt and interest on working capital (charged as part of cost of works executed)		7,019	6. SERVICES:—		
5. TRANSFER from revenue-producing undertakings in relief of rates—			Main Drainage	£285,850	
Working-class Dwellings	£1,076		Fire Brigade	258,090	
Parks Boating	£1,000		Parks and Open Spaces	139,810	
		2,076	Bridges Tunnels and Ferry	49,980	
6. GRANT from Local Taxation Account under the Agricultural Rates Act, 1896		1,633	Embankments	11,505	
7. **COUNTY CONTRIBUTIONS** required to be raised:—			Pauper Lunatics	83,105	
General County—			Inebriates Acts	12,990	
For purposes other than Education (1*s.* 2½*d.*)	£2,678,396		Coroners	30,940	
For Education (1*s.* 7*d.*)	3,509,622		Weights and Measures	15,055	
	6,188,018		Gas-meter & Gas Testing	12,975	
Special County (2½*d.*)	405,002		Building Acts	25,095	
		6,593,020	Diseases of Animals Acts	20,200	
[Total rate, 3*s.* 0*d.*]			Miscellaneous	63,235	
				1,008,830	
			Education— £		
			Elementary 4,442,007		
			Higher 995,901		
				5,437,908	
			Less debt charges included in Head 1	761,561	
				4,676,347	
			Steamboats 36,996		
			Less debt charges (Head 1) 20,506		
				16,490	
					5,701,667
			7. PARLIAMENTARY EXPENSES, Inquiries, Rating Appeals, &c.		13,315
			Total Expenditure		10,557,935
			8. ESTIMATED CASH BALANCE on 31 March, 1909, out of which liabilities then outstanding have to be met		840,425
		£11,398,360			£11,398,360

Elected and March, 1907, for three years.

Chairman ..... R. A. Robinson, J.P., *South Kensington.*
Vice-Chairman..... W. Whitaker Thompson, LL.B., *Alderman.*
Deputy Chairman ..... A. A. Allen, M.P., *Bermondsey.*

*** In the following list the figures after each division represent the number of voters on the Register in 1907; the figures after the names represent the votes polled at the General (or subsequent bye-) Election. The names of members are in *italics*, and members of the last Council have an asterisk * prefixed to their names; † denotes an Alderman of the late Council, and § a change of constituency.

Clerk, H. F. Keene £925
Pathologist, F. W. Mott, M.D., F.R.S. ... £1,000
Engineer, W. C. C. Smith £1,200

LONDON POLICE.

THE CITY POLICE district comprises an area of 673 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (*see* p. 206). Although the area is comparatively small, the rateable value is enormous, and there are 26,923 night residents to be protected.

The Force comprises 1 Superintendent, 1 ditto, Detective Department, 4 Chief Inspectors, 15 District Inspectors, 20 Station Inspectors, 9 Detective Inspectors, 74 Sergeants, 12 Detective Sergeants, and 865 Constables; also 1 Sergeant and 59 Constables on private service duty.

The METROPOLITAN POLICE district embraces an area of 447,626 statute acres, with a population of between seven and eight millions. There are within this area sixteen Police Courts, viz., Bow Street, Clerkenwell, East Ham, Greenwich, Lambeth, Marlborough St., Marylebone, North London (Stoke Newington Rd.), Old Street, South Western (Lavender Hill), Thames (Stepney), Tower Bridge, West Ham, West London (Vernon St.), Westminster, and Woolwich (*see* p. 206).

The force on Oct. 4, 1908, consisted of 32 Superintendents, 575 Inspectors, 2,388 Sergeants, and 15,243 Constables, making a total of 18,238, with 286 horses.

It is scarcely possible to form an accurate estimate of the enormous actual value of the property under police protection, but the mean rateable value of the metropolitan area for Metropolitan Police purposes for the year 1907–8 was £53,750,268.

LONDON FIRE BRIGADE.

PREVIOUS to the formation of the Metropolitan Fire Brigade, under an Act passed in 1774, the churchwardens and overseers of every parish had been compelled to maintain an engine for putting out all fires occurring within their own boundaries; though, independently of this provision, for more than thirty years before 1866 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On 1st January, 1866, the Metropolitan Board of Works took over these responsibilities. On 1st January, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of life from fire.

By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade.

IN 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade."

The total amount expended on the Brigade for the year ending 31st March, 1908, was £301,617 11s. 4d. Of this amount the Treasury and the various insurance companies contributed £45,007 19s. 6d.

On the 30th September, 1908, the complement of the Brigade consisted of:—1 chief officer, 2 divisional officers; 2 assistant divisional officers; and 1,355 officers, firemen, coachmen, and pilots. There were 80 land fire-stations, 3 river stations; and the appliances included 78 horse fire-engines, 77 horsed fire-escapes, 6 motor fire engines, 5 motor fire-escapes, 5 motor hose tenders, 4 turntable long ladders, 29 long ladders, 23 smoke helmets, 90 hose-carts, 2 fire-floats and 4 steam fire-engines on rafts, 2 oil-tank wagons, 4 motor cars. There were 327 horses and 53 miles of hose in use by the Brigade. The fire-alarms distributed over London numbered 1,301. The number of calls to which the Brigade responded during the year ending 31st December, 1908, totalled 5,575, and the fires numbered 4,184, of which 70 were classed as "serious." 93 persons lost their lives at fires.

PRINCIPAL OFFICERS.

Chief Officer, Captain J. de Courcy Hamilton, R.N. (retd.) £1,000
Divisional Officers, Sidney G. Gamble, C.E.; Lieut. Sampson Sladen, R.N.
Assistant Divisional Officers, Arthur R. Dye; Cyril C. B. Morris.
Headquarters: 94 Southwark Bridge Road, London, S.E.

METROPOLITAN WATER BOARD.

Chairman, E. B. Barnard, M.P. ..... *unp.*
Vice-Chairman, G. S. Elliott, J.P. ..... *unp.*
Clerk of the Board, A. B. Pilling £1,750
Assist. do., W. J. G. Norris £600
Supervisor, F. W. Drake £700
Solicitor, W. Moon £900
Chief Engineer, W. B. Bryan £2,500
Depy. do., J. W. Restler £1,827
Accountant and Registrar, A. Newton ... £1,000
Depy. do., D. P. Hutchings £600
Chief Revenue Officer, J. Wilson £618
Director of Water Examinations, Dr. A. C. Houston £1,000

The Metropolitan Water Board was created in 1902, and came into existence in 1903, the duties of the Board being to supply water to the districts previously supplied, or authorised to be supplied by the various authorities superseded. The total amount of water supplied during the year 1907 was 80,170,867,952 gallons. The sources of supply are four in number, namely, (1) the rivers Thames and Lee; (2) gravel beds adjoining the main stream of the Thames and other gravel beds at Hanworth; (3) natural springs; and (4) wells sunk in the chalk or other strata in the Lee Valley on the north of the Thames, in Kent and at certain other points south of the Thames. The Board consists of 66 members, nominated by the constituent authorities of the water area for three years ending 1st June, 1910, and meet on alternate Fridays at Metropolitan Asylum Board Offices, Thames Embankment, E.C. *Offices*, Savoy Court, Strand, W.C.

THE CITY COMPANIES, NUMBER OF LIVERYMEN (1908). CORPORATE AND TRUST INCOMES, MASTERS, CLERKS, AND HALLS.

As will be seen from the following table, many of the London Livery Companies are possessed of great wealth. Of some portion of the property they are merely trustees, but of the "corporate" property they are the sole owners, and may dispose of the income as they please. Fifteen of the Companies have more than ten thousand pounds a year, and most of them are very liberal in their charities, especially in the way of education. In the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, but the Fletchers (arrow makers) and the Loriners (bridle, bit, and spur makers) are not self-explanatory. The following list is compiled from returns made (in many cases but partially) at the Editor's request. Where the return was incomplete the Editor allowed the old figures to remain. The order of precedence is given in parentheses after the name of each Company.

Company.	No. of Liverymen.	Corporate Income.	Trust Income.	Total Income.	Master or Prime Warden, 1908—1909.	Clerk.	Hall.*
		£	£	£			
Mercers (1)	200	53,000	58,000	111,000	Robert H. Bicknell	G. H. Blakesley	4 Ironmonger Lane.

* In case of a Company having no Hall, the address of the Clerk is given in brackets.

The report, in 5 vols., published in 1884, of the City Livery Companies' Commission appointed in 1880 (*Chairman*, the late Earl of Derby), stated the rateable value of the Halls of the London Companies at about £55,000, and that of their Schools and Almshouses about £18,000 a year; the value of their Plate and Furniture at £320,000; and the annual income of the livings in their gift—several of the "great" Companies are patrons of livings—about £12,300. In 1880 the Companies were indebted to the extent of about £270,000.

LONDON WITHIN VARIOUS BOUNDARIES.

	Area in Statute Acres.	Population. 1891.	Population. 1901.
Within the Registrar-General's Tables of Mortality	74,839	4,228,317	4,536,541
Within the Limits of the County of London			
City of London within Municipal and Parliamentary Limits	673	37,702	26,923
Central Criminal Court District	269,148	5,260,680	6,101,664
Metropolitan Police District (not including City)	442,746	5,596,104	6,554,449
Metropolitan and City Police Districts	443,419	5,633,806	6,581,372

Parliamentary Boundaries.—In consequence of changes of boundaries under the London Government Act 1899, the County of London does not now include the whole of certain *Metropolitan* Parliamentary Divisions; on the other hand, it includes portions of certain *Extra-Metropolitan* Parliamentary Divisions.

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusive of the City of London, with a rateable value in 1907-1908 of £53,790,268, and embraces an area of upwards of 699 square miles. The number of new houses built since 1879 up to and including the year 1907 is 529,520, with 3,972 in course of erection; during the same period 7.778 new streets and squares were formed, the new mileage since 1879 being 1,442.

FELONIES IN LONDON.

Felonies Relating to Property Committed, Persons Apprehended, Property Stolen and Recovered, etc., in the Metropolitan Police District in ten years 1898 1907.

Year.	Total No. of Felonies.	Total No. of Persons Apprehended.	First Loss.	Amount Recovered.	Total Loss.	Estimated Population.*	Proportion of Felonies per 1,000 of pop.

PEERAGE, BARONETAGE, KNIGHTAGE, and COMPANIONAGE, 1909.

Handsomely bound in Royal Blue Cloth, Gilt Top and Head Band, Blocked on Front with Special Design in Gold.

A VERY HANDSOME AND USEFUL PRESENT.

LONDON: PRINTED BY WILLIAM CLOWES AND SONS, LIMITED, DUKE STREET, STAMFORD STREET, S.E.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe ithout Russia. Legally, "British India" means all territories governed by the King rough the Governor-General of India, or through any officer subordinate to him; while India" means British India, together with any territories of any native prince or chief der the suzerainty of His Majesty, exercised through the Governor-General of India any officer subordinate to him (Act 52-3 Vict., c. 63, s. 18). There are tracts of tribal rritory on the N.W. and N.E. frontiers under the political influence, though not yet der the administrative rule, of the Indian Government; and within the Indian sphere influence lie the self-governed States of Afghanistan, Nepal, and Bhutan.

Boundaries and Area.—The political boundary of India marches with Persia from the ulf of Oman to near Zulfikar on the Harirud; then with the Russian Empire along the ontier laid down by agreement in 1885 as far as the Oxus at Khamiab; thence along the xus by the Panjah branch up to the Victoria lake, and from the east end of that lake by e line demarcated in 1895 up to Povalo Schveikovski on the Taghdumbash Pamir, where ree empires—the British, Russian, and Chinese—meet. From this point the frontier—in ny parts not yet clearly defined—touches the Chinese Empire, mainly along the crests the Muztagh (Karakoram) and Himalayas, till the limits of French Indo-China are ached on the Upper Mekong. The Indian frontier, leaving the Mekong, marches with am till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond e sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive ands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefships ng the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, aches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Calcutta, the capital, s in 88° E. long. The total area of India proper is about 1,767,000 square miles, of which 0,000 square miles are under native administration. The British Provinces comprise per cent. of the area, and nearly 79 per cent. of the population, which in 1901 numbered 4,361,056. (For details, see pp. 507–8.)

Physical Features and Products.—Excluding Burma, which forms no part of the lian peninsula, we may broadly divide the country into three sections, viz., the malayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their thern offshoots, form the natural northern boundary of India. The Himalayan range ns for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and ains a general height of 20,000 feet above the plain, culminating in the loftiest peaks t measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and aulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, ar its junction with the Hindu Kush Mountains. The line of perpetual snow is at about 000 feet. The Himalayas collect and store up water for the tropical plains below. The pes afford a representation of the tropical zone (especially on the southern slopes to the E.), temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward rney is taken from the plains. In the Himalayas are several sanatoria, including Murree, nla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied cies as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, llet, and many domestic vegetables. The fauna are as varied as the flora, and include bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with gles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the at fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, mprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, d their tributaries. At no great distance from one another, four rivers take their rise the Himalayas. Of these, two are on the north side—the Indus, which flows westward 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 00 miles. The other two, on the southern slope, are the Sutlej, which, after flowing and S.W. for 900 miles and collecting various other streams, joins the Indus; and the ages, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the

The principal Government publications relating to India presented to Parliament in 1908 were:—tistical Abstract, 1897–8 to 1906–7; Moral and Material Progress Report, 1906–7; Tables of Trade of India, 1902–3 to 1906–7; Review of the Trade of India in 1907–8; Sanitary Measures India, 1906–7; Indian Financial Statement for 1908–9; Home Accounts, 1906–7, with linates 1907–8; Explanatory Memorandum regarding the Accounts and Estimates of 1908–9; urn of Net Income and Expenditure, 1896–7 to 1906–7; Administration Report on Railways edia for 1907; Report of Committee on Indian Railway Finance and Administration (Cd. 4111); ort of Royal Commission on Factory Labour; Papers relating to Advisory and Legislative ncils; Report of Decentralisation Commission; N.W. Frontier, Orakzais, &c. (Cd. 4201); ny and Population (H.C. 208).

Bengal plain. The Brahmaputra, after flowing along the northern side as far as the easte extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins t Ganges 75 miles from where their combined streams enter the Bay of Bengal. Thus t Himalayas supply India with the water gathered on both slopes. The Indus and Gang with their tributaries, are the source of an extensive system of irrigation by canals. T richest, most populous, and most historically famous part of India lies in the basins of the great rivers. Formerly the Ganges was the only great highway of Bengal; it is still t fertiliser and the water-carrier. But a close network of railways is increasingly used f transport. So rich is the Indo-Gangetic plain that it supports a population of abo 50 millions, almost wholly agricultural. The density of the population is extremely hig in this region, averaging in the Bengal delta 552 per square mile, and rising in a few distric to 900. The population has increased most in the densest areas, and pressure on the soil severe in parts of Behar and the United Provinces. In Northern India there are tv harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops October to December. To the north we find wheat, pulse, maize, millet, barley, and ter while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, and many dye opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopard hyenas, jackals, squirrels, elephants, deer, parrots, crocodiles, and snakes. Salt, mica, ar coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Centr India Native States. To the N.W. of the peninsula lies the mountainous, barren, and thin populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Suleim Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhy Mountains, running almost due E. from the head of the Gulf of Cambay, north of t Nerbudda River, form a firm southern boundary to the river-plains of Northern Indi Southern India, or the Deccan, is a plateau of triangular shape and very old geologic formation, bounded on two sides by the Malabar and Coromandel coasts, which converge Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all b complete this environing triangle of mountain ranges. In the extreme N.W., south of t Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda ar the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountain which lie midway between them. As the Western Ghauts lie so close to the coast, and affo no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rive flow eastwards, through defiles in the Eastern Ghauts, into the Bay of Bengal. The fo chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), t Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physic geography of Southern India has shaped its history: the S.W. coast, shut in by the mountain is very primitive and moves slowly; the S.E., open and easy of access by sea and towards t interior, has made great progress. The mountain slopes of this region, especially those of t Western Ghauts, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid veg tation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo aboun The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various small game afford sport. Snakes are found everywhere. In the valleys and on the higher plain many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indig tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dam wells, tanks, and canals. The southern table-land has furnished considerable supplies of min rals. At present the minerals principally worked are salt, coal, manganese ore, mica, and gol

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irr waddy and its tributaries and by the Salween. The delta region is flat; further inland are hil and rolling downs; while the north is mountainous. Rice is the chief staple. Millet, cotto sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerab contribution to the exports. Petroleum is produced in rapidly increasing quantities, and jad and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and dee

Climate.—About half of India is within the tropics, but the greatest extremes of heat an cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it dry, and the winters are rather cold. In tropical Southern India the climate is more equable Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea India depends for its fertility upon the monsoon. The S.W. monsoon brings moistur from the ocean south of the Equator, and reaches the west coast early in June and th northern provinces late in June. The mountains arrest these currents and precipitate rain fall, which averages 60 inches in the sub-Himalayan region, 30 inches in the Indo-Gangeti plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefit by the N.E. monsoon in the autumn.

The People of India.

Population.—The third general census of India was taken on the 1st March, 1901. The enumeration embraced the whole of the Indian Empire, except a few outlying tracts and certain disturbed areas on the frontier. The final census returns gave a population of 294,361,056, as compared with 287,314,671 in 1891 (for details *see* p. 476). Deducting for purposes of comparison the population of tracts not enumerated in 1891, the increase in the ten years is only about 1½ per cent., as compared with an increase of over 11 per cent. in the previous decade. These statistics show that long-continued famine in Western India, combined with an abnormal prevalence of cholera, plague, and other diseases, had, during the decade, seriously enhanced mortality. The census total of 1901 is divisible into 231,899,507 (or 79 per cent.) for British India, and 62,461,549 (or 21 per cent.) for Native States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist.

Languages.—India has 147 vernacular languages of extraordinary variety. The languages spoken by 292,563,771 persons in India are grouped in three families; and twenty-three languages belonging to these families are spoken by not less than one million persons each. The principal languages are Hindi (spoken by 60,354,137 persons), Bengali (44,624,048), Bihari (37,076,990), Telugu (20,696,872), Marathi (18,237,899), Panjabi (17,070,961), and Tamil (16,525,500), after which come Rajasthani, Kanarese, Gujarati, Oriya, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

Religions.—The population by religions includes 207,147,026 Hindus (70 per cent. of the total), 62,458,077 Muhammadans (21 per cent.), 9,476,759 Buddhists (3 per cent.), nearly all in Burma, leaving 6 per cent. for all other religions, including 2,923,241 Christians (two-thirds of whom are in Madras and Travancore), 2,195,339 Sikhs, 1,334,148 Jains, 94,190 Parsis, and 8,584,148 described as Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. Christian converts come mainly from the more degraded classes in Bengal and Madras.

Large Towns.—Tables below show the populations of the chief towns and the distribution of the people by occupations. There are 28 towns with a population of over 100,000, and 49 with 50,000 to 100,000. The urban areas of over 5,000 people comprise less than 10 per cent. of the total population.

Occupations.—About two-thirds of the population depend on agriculture. The cotton industry supports over 7,500,000 persons, more than two-thirds of whom depend on handweaving. There are 5,500,000 persons in Government service, civil or military.

Sex.—Marriage is almost universal owing to religious obligations. Infant marriage and enforced widowhood are extending through Brahmanical influence and notions of social distinction. There are nearly 26,000,000 widows in India. The males outnumber the females in the proportion of 1,000 to 963.

OCCUPATIONS OF THE PEOPLE.

* Enumerated incompletely prior to 1901. † The North-West Frontier Province was formed in 1901 out of certain Punjab Districts and areas not previously included in India.
‡ Includes South Lushai and Manipur. § Certain areas were imperfectly enumerated owing to tribal disputes. ‖ Includes Shan States, Chin Hills, and Kachin.
N.B.—Revised figures showing area and population of the provinces of Bengal, the Central Provinces, and Eastern Bengal and Assam as reconstituted in 1905 are now furnished above. The Central Provinces and Berar have been amalgamated for administrative purposes.

A Brief Sketch of Indian History.

ALEXANDER'S invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts of later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C.; they are written in Sanskrit, a language akin to Persian and to the principal European languages. The people who wrote these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types there are still survivals in India. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads*; their epics, the *Mahabhárata* and *Rámáyana*, extol their mythical heroes; while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually then existed. The ascendency of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the *Aryas* (kinsmen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautáma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died at a great age about 487 B.C. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 250 B.C. to 350 A.D., but was never quite general, and existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in China and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified. A branch of Buddhism, however, or a survival of a kindred creed, continues to exist in India in the distinct sect of the Jains. The followers of this creed, which flourished most from about 950–1300 A.D., are still numerous in Gujarat, and are also found in other parts of India.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (326 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village communities of the Punjab, and speaks of the people as brave and truthful, and averse to litigation, and of the women as chaste; and he notes the absence of slavery. Asoka (272–231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to, and a great patron of Buddhism, which became the State religion. Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China, who visited the country between 399 and 695 A.D.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between about 165 B.C. and 320 A.D., over Northern India. Their inroads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606–648), after many years of fighting, which made him master of Northern India, ended his reign in piety and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions; but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in the year 999 that Mahmud of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 500 years; but the advance of their power was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutb-ud-din, whose memory is perpetuated by the Kutb Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1294.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed; frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 *Babar*, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, *Humayun* (1530–56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah, Sur, who reigned from 1540–1545. *Akbar the Great*, his son (1556–1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Berar and Bidar were absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms; he was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mall, his able finance

minister; Abul Fazl, the historian of his reign; and Faiz, the poet. Bairam Khan, Akbar's faithful guardian in his youth, revolted when the young king seized the reins of power, but was pardoned. *Jahangir* (1605–27) received in 1616 Sir Thomas Roe, the ambassador of James I. His empress was the famous Nur Jahan. Under *Shah Jahan* (1627–1658) the Mogul Empire reached the zenith of its glory. Many public works and grand buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658–1707) defeated and killed his brothers and kept his father a prisoner till death (1666). Aurangzeb had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects magnificent, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and *Bahadur Shah* (1707–12) gained the coveted crown. After four short-lived emperors *Muhammad Shah* (1719–48), grandson of Bahadur, came to the throne. His viceroys became rebellious, and so contributed to the success of the Mahrattas, who subdued the Deccan. About 1724 part of the Deccan became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam). In 1738, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, *Ahmad Shah* (1748–1754) and *Alamgir II.* (1754–1759), occupied the throne, and were succeeded by *Shah Alam* (1759–1806), who came to terms with the British.

THE MAHRATTAS.—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was *Sivaji* (1627–1680), a chieftain of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. *Balaji Vishvanath* (1712–1720), Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, Sivaji's descendants thenceforth holding a merely nominal position. Under the Peishwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence, conquering Gujarat, Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. Like the Pindaris, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who, at first attracted by love of adventure or hopes of gain, had gradually extended their power in India.

THE SIKHS.—The Punjab lay beyond the reach of the Mahrattas. There the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near Lahore in 1469. He preached the One God, purity of life, and abolition of caste. He had ten successors, named *gurus* or apostles, ending with *Govind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780–1839), who, revolting against the Afghan Amir, by whom he had been appointed Governor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision which he himself had carefully avoided, and after two wars with the British the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calicut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost their naval supremacy, a century later, the *Portuguese* enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505–1509), established numerous factories and fortresses; while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. When the crowns of Spain and Portugal were united in 1580 under Philip II., the Asiatic interests of Portugal were subordinated to the European interests of Spain, and the decline of Portuguese power in Asia was rapid. Till then the Portuguese brought Indian products to Lisbon, whence the Dutch carried them to the other ports of Europe. But when Philip II., on account of the Dutch revolt, shut Lisbon against them, the *Dutch* were driven to trade directly with the East. In 1602 they formed "The Dutch East India Company" by amalgamating previously existing trading societies, and the principal Portuguese settlements in the East were gradually captured. By 1661 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch occupied the Cape as a halfway station. After a time they firmly established themselves in Java and the neighbouring coasts and islands, but were forced by the British to relax their hold on India. *French* and *Danish* East India Companies were established in 1601 and 1616 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English, like the Dutch, became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The new competitors were resisted by the Portuguese; but a permanent footing was obtained at Surat after several stubborn engagements off Swally in 1612. In 1615 the British ambassador, Sir Thomas Roe, aided by the influence of the Emperor Jahangir, greatly improved the position and prospects of the Company. In 1639 the English, who had acquired a narrow strip of land on the coast below Masulipatam, built a factory there, surrounded it with a wall, mounted guns, and named it Fort St. George; in 1653 this settlement of Madras became a Presidency. In Charles I.'s reign rival enterprises led to confusion and to piratical excesses in the East, but in 1657 co-operation and discipline were secured by the charter granted by the Protector Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay; in 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the Western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territorial possessions as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but they were invited to return, and in 1690 were laid, amid swamp and jungle, the foundations of Fort William, which was destined to develop into the modern city of Calcutta. In 1698 a rival company called "The English East India Company," to distinguish it from the old "London Company," was started with a capital of two millions. After a period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708 they were finally amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix received continuous support from home, he might have succeeded in founding a French Empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French Company. The territory retained by the French in India since that date is insignificant; and in these possessions they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 Clive (now Lord Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. As a result of Clive's efforts, the East India Company in 1765 received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Behar, and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under the government of the Company. Thus were laid the foundations of England's territorial dominion in India.

After an interval of misrule *Warren Hastings* (1772-85) was appointed Governor of Bengal, and in 1774 he became Governor-General, on the creation of that office under the Regulating Act of 1773. He vigorously reformed the revenue arrangements and judicial procedure. Hastings was the first great administrative organiser of the British possessions. He greatly increased the power and territory of the Company, notwithstanding the opposition of a hostile Council. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Mahrattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached, but acquitted.

The first administration of *Lord Cornwallis* (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of the permanent settlement of the land revenue in Bengal, by the remodelling of the judicial system, and by the third Mysore War, in which he defeated Tippoo, the son and successor of Hyder Ali. The rule of *Sir John Shore* (1793-98) was uneventful.

The administration of the *Marquess Wellesley* (1798-1805) was distinguished by many important events. Tippoo, as courageous and as hostile to the English as his father, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were strongly established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta confederacy, but led to the Second and Third Mahratta Wars, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a

political power with a preponderating influence throughout India.

During the brief second administration of *Lord Cornwallis* (1805), and that of *Sir G. Barlow* (1805-7), Wellesley's policy was reversed. *Lord Minto* (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the missions of Metcalfe, Elphinstone, and Malcolm respectively, and captured Mauritius. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished.

Under the *Marquess of Hastings* (1814-23) a severe struggle with Nepaul ended with the Treaty of Sagauli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Mahratta Peishwa enlarged Bombay Presidency to its present dimensions. Lord Hastings in the same year crushed the Pindaris of Central India, freebooters who organised large bands that devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. He encouraged education. *Lord Amherst* (1823-8) succeeded Lord Hastings. Encroachments on British districts by the King of Ava and his insolent refusal of all redress led to the first Burmese War, which cost 20,000 lives and nearly £14,000,000, but gave to India the fertile provinces of Aracan and Tenasserim, and, practically, Assam.

While *Lord William Bentinck* was Governor-General (1828-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and did away with the restrictions on the residence of British subjects in India. The resolution of *Lord Auckland* (1836-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan War (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of *Lord Ellenborough* (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). *Lord Hardinge* (1844-48) conducted in person the first Sikh War, and fought a series of severely-contested battles, ending with Sobraon (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *viâ* the Red Sea, and opened the Ganges Canal, still one of the largest irrigation works in India. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 the "doctrine of lapse" was applied to Satara, and in 1853 Jhansi similarly became British territory; while on the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or fighting.

Earl Canning (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened the British Empire in India. A mutiny of sepoys broke out on the 10th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, the Central India campaign, and all the heroism of that momentous time will never be forgotten. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the Great Mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established in India. *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863. *Sir John (Lord) Lawrence* (1864-69) took measures to reform the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864), and by the terrible Orissa Famine of 1866. He encouraged irrigation. *Lord Mayo* (1869-72) effected many administrative reforms, instituted State railways, and inaugurated the system of provincial finance, which has since been extended. He promoted the construction of roads and canals. During the tenure of office of *Lord Northbrook* (1872-76), H.M. King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty. *Lord Lytton's* administration (1876-80) was made eventful by a terrible famine in Southern India, by the Second Afghan War, and by the Queen's assumption of the title of EMPRESS OF INDIA in 1877. He was succeeded by the *Marquess of Ripon* (1880-84), whose peaceful term was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms. His successor was the *Marquess of Dufferin* (1884-88), during whose viceroyalty occurred the Third Burmese War, by which Upper Burma with the Shan States was added to the Empire. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and extending and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. As regards domestic policy, he took the first step in currency reform by closing the Indian mints to the free

coinage of silver. He also reconstituted the Legislative Councils in 1892 by introducing a more popular element. The viceroyalty of *Lord Elgin* (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the tribes along the whole border from Chitral to Baluchistan rose against the British garrisons. In the Tirah Campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong: the frontiers of Afghanistan, Persia, and China were also defined. Among the internal proceedings were the reimposition of the general Customs tariff abolished in 1882, the creation of Legislative Councils for the Punjab and Burma, and the modification of the law against sedition.

Lord Curzon (1899–1904, and 1904–5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to the sovereign. Lord Curzon was thrice called on to defend Imperial interests by the despatch of troops from India—to South Africa in 1899, to China in 1900, and to Somaliland in 1903-4. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions, of whom more than half were in native States. At one time over 6,500,000 were under relief. The loss due to this famine has been estimated at 50 millions sterling, while the expenditure of Government was very heavy. Lord Curzon's term of office was a period of reform and reconstruction. Among his measures for aiding cultivators were the institution of agricultural banks and departments, and reforms in revenue law and administration designed to free the cultivators from the moneylenders. The famine codes were amended. Better arrangements were made for controlling the tribes and for distributing the troops on the frontier, and a new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. The Viceroy appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. A Railway Board was constituted to administer the railways, and a Commerce and Industry Department, in charge of a new Member of Council, was created. Educational policy was reviewed and reforms introduced. The reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. Indian princes and native troops visited England in 1902 to attend the coronation of H.M. King Edward VII. The Viceroy held a great Imperial Durbar at Delhi on 1st Jan., 1903, to celebrate the coronation of the first British Emperor of India. It was attended by the leading princes and nobles of India. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. Lord Curzon returned to England for a few months in 1904. During his absence *Lord Ampthill* occupied the post of Viceroy. *Lord Curzon* returned to India on reappointment in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, which had become unwieldy for administrative purposes, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. Lord Curzon carried out great reforms in the organisation of the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter which seemed to menace the supremacy of the civil authority, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905). *Lord Minto*, his successor, arrived in Nov., 1905. The Prince and Princess of Wales made a tour in India during the winter of 1905-6. There was a considerable agitation among Bengalis in 1905-6 and 1906-7 owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In 1907 also there was a brief period of unrest in the Punjab. In his Budget speech in 1907, the Secretary of State foreshadowed important reforms in Indian administration, designed to bring all classes of the people into closer relations with the Government and its officers. He appointed two native members to his Council. Proposals are under discussion for extending the native element in the Viceregal and Provincial Legislative Councils in India, and for the formation of Imperial and Provincial Advisory Councils of Notables. Viscount Morley appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour. In 1908 the unrest in Bengal assumed an anarchical character, and the laws relating to the Press and to explosives were strengthened.

IMPERIAL LEGISLATION.—The original charter of the East India Company was granted by Queen Elizabeth at the end of 1600. *The Regulating Act* (1773), which created the first Governor-General and his Council, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act* (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while in 1833 the monopoly of the China trade was abolished, and a legal member was added to the Governor-General's Council. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), which still regulates Indian affairs, all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council of 15 members. This Act, as amended by Acts of 1889 and 1907, lays down that at least 9 members of Council must have resided in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 14. The term of office is now 7 years, with power of extension. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India.

The Government of India.

EMPEROR OF INDIA—H.I.M. EDWARD VII.

Secretary of State—The Rt. Hon. Viscount Morley of Blackburn, O.M.

H.M. Secretary of State for India is the head of the Indian Administration in England, and as a member of the Cabinet he is responsible to, and represents the supreme authority of, Parliament. In all matters the Secretary of State can impose his orders on the Government of India. No expenditure from the revenues of India is legal unless sanctioned by him and a majority of his Council. In matters requiring secrecy (*e.g.*, foreign policy and the affairs of native States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. (For constitution of Council, see p. 515.) Indian Government business in England is transacted at the India Office (see p. 187).

The King-Emperor appoints the Governor-General, the Governors of Madras and Bombay, the Commander-in-Chief, the Ordinary Members of the Councils of the Governor-General and of the Governors of Madras and Bombay, and the Judges in the High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the Secretary of State's approval. The term of these appointments, except judgeships, is usually five years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains six ordinary members (of whom three must have served in India ten years), as well as himself and the Commander-in-Chief, who is an extraordinary member. The Governors of Bombay and Madras have each an Executive Council of two members. All acts of the Supreme Government in India run in the name of "The Governor-General in Council"; ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. The Governor-General's Council, when it meets for purposes of legislation, consists of the above eight members and of not more than 16 "Additional Members for making Laws and Regulations," nominated by the Governor-General. There are similar Legislative Councils in Madras, Bombay, Bengal, Eastern Bengal and Assam, the United Provinces of Agra and Oudh, the Punjab, and Burma. The Indian Councils Act of 1892 increased the number of representative natives, and conferred a limited right of interpellation and of criticism in financial matters. Government proposals for rendering the Councils more representative are now under discussion. Every Indian Act requires the Governor-General's assent, but the Crown may disallow it.

As the result of important changes in administration, business is now conducted by ten Departments — Finance, Foreign, Home, Legislative, Revenue and Agriculture, Public Works, Commerce and Industry, Railway, Army, and Military Supply. Each Department is in charge of a Secretary to Government, and under the care of a member of the Supreme Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign Department. The *Finance Department* deals with public accounts, loans, taxation, excise, opium, salt, currency, banking, mints, &c. The *Foreign Department* conducts relations with Afghanistan, Nepal and other conterminous countries, and, through its Political Residents and Agents, in the various native States, supervises their administration and regulates their relations with the paramount Power. Its Agents in the Persian Gulf, Muscat, and Turkish Arabia look after the commercial and political interests of India in those quarters. The *Home Department* deals with the civil service, education, public health, ecclesiastical and judicial affairs, municipalities, district local boards, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connection with the *Legislative Department*. The most important subjects that come before the *Revenue and Agriculture Department* are land revenue and surveys, forests, agricultural development, famine, and meteorology. The *Public Works Department* deals with irrigation, roads, buildings, &c. A new department for *Commerce and Industry* has been created, and placed in charge of a special member, to deal with trade and shipping, customs, ports, post-office, telegraphs, mines, factories, statistics, &c. Railway administration is now entrusted to a *Railway Department*, which is in charge of the Commerce and Industry Member of Council, and controlled by a Railway Board. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council, while the Military Member of Council has charge of the *Military Supply Department*.

British India is no longer divided into three Presidencies, but into 13 *Local Governments and Administrations*, viz.:—Under Governors, Madras and Bombay, still termed Presidencies; under Lieutenant-Governors, Bengal, Eastern Bengal and Assam, the United Provinces of Agra and Oudh, the Punjab, and Burma; under Chief Commissioners, the Central Provinces and Berar, Ajmer-Merwara, Coorg, British Baluchistan, the North-West Frontier Province, and the Andaman Islands. The chief Local Governments enjoy a large measure of financial and administrative independence. Proposals for further decentralisation are under discussion. The Governors of Madras and Bombay have greater independence than the others, being alone permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination (in most Provinces) to a Commissioner, who corresponds direct with the Provincial Government, he has control in every department of administration, and is the responsible head of his jurisdiction. There are now 267 Districts in British India.

There are separate *High Courts* for both civil and criminal cases in Madras, Bombay, Bengal (with jurisdiction also over the new province of Eastern Bengal and Assam), and in the Province of Agra. Appeals may be carried to the English Privy Council. The Punjab and Lower Burma have Chief Courts. The Central Provinces, Berar, Oudh, Sind, North-West Frontier Province, and Upper Burma have each a Judicial Commissioner.

THE SUPREME GOVERNMENT, CALCUTTA.

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees *per mensem.*]

Viceroy and Governor-General, His Excellency the Right Hon. the Earl of Minto, P.C., G.M.S.I., G.M.I.E., G.C.M.G., *b.* 1845, assumed charge 18th Nov., 1905 ..... *per mensem* Rs.20,833

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

(1) MADRAS (area, 141,726 sq. miles; pop. 38,209,436) was the most important of the three Presidencies before Clive's conquest of Bengal, but it was small in extent until the annexation of the Carnatic in 1801. With a coast-line of 1,730 miles the province has no good natural harbour, though an artificial harbour has been completed at Madras at great expense. The province is not naturally fertile, but irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. The people are chiefly Hindus. Many natives of Madras Presidency emigrate to Burma and Ceylon, some only temporarily. There are over one million native Christians, mainly Roman Catholics. The languages principally spoken are Tamil and Telugu. The Governor of Madras is assisted by a Council, ordinarily of two members, to whom are added, for legislative business, other members not to exceed 21 (including the Advocate-General *ex officio*), of whom the first seven are appointed on the recommendation of the following bodies: Madras Corporation (1), other Municipal Councils (2), District Boards (2), Chamber of Commerce (1), and University (1); the rest are selected by Government. Madura (105,984) and Trichinopoly (104,721), famous for their Hindu temples, are the chief cities after the capital.

CHIEF CITY, Madras. Population, 509,346.

Governor, H.E. the Hon. Sir Arthur Lawley, G.C.I.E., K.C.M.G. (March, 1906).....Rs. 10,000
Priv. Sec., A. Y. G. Campbell.....Rs. 1,500
Mil. Sec., Major G. C. Glyn, D.S.O., N. Somerset Impl. Yeomanry .....Rs. 1,000

Judges, Hons. Sir R. S. Benson; J. E. P. Wallis; L. C. Miller; J. H. Munro; C. Sankaran Nair, C.I.E.; Abdur Rahim .....Rs. 4,000

(2) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including *Sind*, but not *Aden* and *Perim*, which are also attached to it) contains 122,984 square miles (nearly equal in size to Prussia), with a population of 18,515,587; it has 1,050 miles in length. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 77 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis, who are very prominent in trade, are mainly found in Bombay. The people have suffered greatly from plague and drought in recent years. Marathi, Gujarati, Sindhi, and Kanarese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (now combined with the Indian Midland system) eastwards; south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. The Governor is assisted by a Council similar to that in Madras, except that the first eight of the additional members are appointed on the recommendation of the following bodies: Bombay Corporation (1), other Municipal Corporations (1), District Boards (2), Sardars of the Deccan (1), Jaghirdars and Zamindars of Sind (1), Bombay and Karachi Chambers of Commerce (1), and Bombay University (1). Ahmedabad (185,889), Poona (153,320), Surat (119,306), and Karachi (116,663), the capital and chief port of Sind, are important cities. For Aden and Perim, *see* p. 524.

CHIEF CITY, Bombay. Population, 977,822 (1905).

Governor, H.E. the Hon. Col. Sir G. S. Clarke, G.C.I.E., G.C.M.G. (Oct., 1907) .....Rs. 10,000
Private Sec., L. Robertson ..... Rs. 1,500
Military Sec., Capt. J. G. Greig, 121st Pioneers Rs. 1,000
Aides-de-Camp, Capt. E. G. Drummond, 4th Goorkha Rifles; Capt. R. E. Solly-Flood, Rifle Brigade.
Native A.D.C., Risaldar Bhagavan Singh.
Medical Officer, Dr. Cogill.....Rs. 1,000

COUNCIL OF THE GOVERNOR.

J. W. P. Muir Mackenzie, C.S.I.; Sir S. W. Edgerley, K.C.V.O., C.I.E. .....each Rs. 5,333

SECRETARIES TO GOVERNMENT.

Commr. of Customs, W. T. Morison .....Rs. 3,000

* The areas and populations of the separate provinces are for British territory only. The populations are according to the census of 1901.

HIGH COURT OF JUDICATURE.

Chief Justice, Basil Scott .....Rs. 5,000
Judges, Hons. L. P. Russell; Narayan Ganesh Chandavarkar; S. L. Batchelor; D. D. Davar; F. C. O. Beaman..... .....each Rs. 4,000
Judicial Commr. in Sind (Karachi), J. J. Heaton .....Rs. 4,000

(3) BENGAL (reconstituted area, 115,819 sq. miles; pop. 50,722,067) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but the present province comprises part of Bengal proper, Behar, Orissa, and Chota Nagpur. Fifteen districts of Eastern Bengal were detached from the province in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. Bengal occupies the Ganges Valley eastward of Benares, and extends from the Himalayas to the mouth of the Mahanuddy. Only 5 per cent. of the population live in towns. Nearly 78 per cent. of the population consists of Hindus. The principal languages are Bengali and Hindi. For the most part the province is a great alluvial plain, producing rice, and is the most populous and productive in all British India. Orissa and Chota Nagpur are ill-watered and liable to drought. The chief products of the province, besides rice, are opium, indigo, oilseeds, sugar, tobacco, silk, tea, and jute. In the hills bordering the great plain coal measures, yielding the greater part of India's coal output, are worked. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running N. from Calcutta, is also important. Other extensive systems are the Bengal and North-Western in the north and the Bengal-Nagpur in the south. The Lieutenant-Governor is assisted by a Legislative Council of not more than 20 members, including 7 members appointed on the recommendation of the following bodies: Calcutta Corporation (1), other Municipal Corporations (2), District Boards (2), Bengal Chamber of Commerce (1), and Calcutta University (1). Important cities are Patna (134,785) and Howrah (157,594), a great jute-manufacturing centre adjoining Calcutta.

CHIEF CITY, Calcutta. Pop., including suburbs and Howrah, 1,106,738.
Lieutenant-Governor, The Hon. Sir E. N. Baker, K.C.S.I. (Nov., 1908).....Rs. 8,333
Private Secy., B. A. Collins.....Rs. 767
Aides-de-Camp, Lt. R. C. Dodgson, R.F.A., and Capt. A. H. B. Foster, The King's Own.

SECRETARIES TO GOVERNMENT.

Chief Sec., F. W. Duke (*offg.*).....Rs. 2,972

Fin. and Munic. Sec., C. E. A. W. Oldham .....Rs. 2,750
Public Works Secs., (*Irrig., Rys., and Marine*) W. A. Inglis, C.S.I. (Rs. 2,750), and (*Bldgs. and Roads*) M. J. Scoble .....Rs. 2,500
Board of Revenue, F. A. Slacke; W. C. Macpherson, C.S.I.....each Rs. 3,750

HIGH COURT OF JUDICATURE.

Chief Justice (vacant) ..... Rs. 6,000
Puisne Judges, Hons. R. Harrington; C. M. W. Brett, C.S.I.; H. L. Stephen; Sarada Charan Mitra; J. G. Woodroffe; Dr. A. Mukharji; C. P. Casperz; H. Holmwood; C. W. Chitty; E. E. Fletcher; Saiyid Sharf-ud-din; H. R. H. Coxe .....each Rs. 4,000

(4) EASTERN BENGAL AND ASSAM (reconstituted area, 106,130 sq. miles; pop. 30,961,459). In 1905 this province was formed by the addition to Assam of 15 districts of Bengal, and was placed under a Lieutenant-Governor, with a Legislative Council of not more than 15 members. Assam had been constituted a separate administration in 1874, out of certain Bengal districts, most of which had been ceded by Burma in 1825. Much of the transferred portion of Bengal belongs to the great Gangetic plain. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Gauhati and Sylhet respectively. The forest area is very large. The rainfall is abundant and well distributed. Rice, tea, jute, wheat, oilseeds, sugar, and tobacco are cultivated. About 58 per cent. of the people are Muhammadans, and 37 per cent. Hindus. Large towns are few. There is a great variety of languages, Bengali and Assamese being the principal. The Assam-Bengal and Eastern Bengal Railways traverse the province, and the former terminates at the growing port of Chittagong. The census of 1901 showed that Assam contained 775,844 immigrants from other parts of India, mostly coolies for tea-gardens.

CHIEF CITY, Dacca. Population, 90,542.
Lieutenant-Governor, The Hon. Sir Lancelot Hare, K.C.S.I., C.I.E. (Aug., 1906) ...Rs. 8,333
Pte. Secs., Capt. L. E. Dening, 33rd Lt. Cav. Rs. 724
Aide-de-Camp, Lt. J. C. Pearse, 4th Cav. Rs. 476
Chief Sec., P. C. Lyon .....Rs. 3,000
Fin. and Munic. Sec., L. J. Kershaw ...Rs. 2,250
Judicial and Gen. Sec., J. E. Webster...Rs. 1,800
Public Works Sec., W. B. Gwyther .....Rs. 2,500
Board of Revenue, H. Savage, C.S.I.; P. G. Melitus, C.I.E. .....each Rs. 3,500

(5) The UNITED PROVINCES of AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 107,164 sq. miles; pop. 47,691,782), form the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. In population they come next to Bengal. Originally these provinces (excluding Oudh) formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief staple is wheat, while rice, barley, pulse, tobacco, millet, indigo, cotton, sugar, opium, and oilseeds are widely cultivated. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Hindi and Bihari are the chief tongues. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. In 1887 a Legislative Council, of not more than 15 members, was established. Six members are appointed on the recommendation of the following bodies:—Municipal Corporations (2), District Boards (2), Chamber of Commerce of Upper India (1), and Allahabad University (1). Among the important cities may be named the ancient city of Agra (188,022), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (209,331), the great manufacturing centre, Cawnpore (197,170), and Meerut (118,129).

CHIEF CITY (Agra), Allahabad. Pop. 172,032.
,, (Oudh), Lucknow. Pop. 264,049.

Lieutenant-Governor, The Hon. Sir J. P. Hewett, K.C.S.I., C.I.E. (Jan., 1907) .....Rs. 8,333
Priv. Sec., Maj. R. F. C. Gordon, 15th Lrs. Rs. 991
Aide-de-Camp, Lieut. R. V. Pollok, 15th Hussars .....Rs. 476
Chief Sec. to Govt., J. M. Holms, C.S.I. ...Rs. 3,000
Financial Sec., J. W. Hose .....Rs. 2,250
Judicial Sec., F. E. Taylor .....Rs. 2,250
Public Works Secs., (Rys., &c.) (vacant) (Rs. 2,750) and (*Irrign.*) N. F. McLeod .....Rs. 2,500
Board of Revenue, L. A. S. Porter, C.S.I., and H. Z. Darrah, C.S.I. .....each Rs. 3,500

HIGH COURT OF JUDICATURE (FOR AGRA ONLY).

Chief Justice, Sir John Stanley, Kt. .....Rs. 5,000
Puisne Judges, Hons. Sir G. E. Knox, Kt.; Pramada Charan Banarji; R. S. Aikman; H. G. Richards; Saiyid Karamat Husain; H. D. Griffin .....each Rs. 4,000

Judicial Commr. of Oudh, E. M. D. Chamier Rs. 3,500
1st Add. do., L. G. Evans .....Rs. 3,333
2nd Add. do., T. C. Piggott (*offg.*) .....Rs. 2,250

(6) The PUNJAB (area, 97,209 sq. miles; pop. 20,330,339) occupies the N.W. angle of the great northern plain of India, and derives its name from "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849, and up to 1853 was under a Board of Administration. This Board was then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being largely extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Wood is scarce. More than half the population are Muhammadans, and more than a third are Hindus. Of the former, the Pathans are found chiefly in the north-western hill districts. The Sikhs number over 2,100,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western Railway serve the Punjab. In 1897 a Legislative Council was constituted, consisting of 9 nominated members (5 official and 4 non-official). The ancient imperial city of Delhi, with 208,575 inhabitants, is the largest city; while Amritsar, the sacred city of the Sikhs, has 162,429 people.

CHIEF CITY, Lahore. Population, 202,964.

Lieutenant-Governor, The Hon. Sir Louis W. Dane, K.C.I.E., C.S.I. (May, 1908) .....Rs. 8,333

Public Works Secs., (*Irrign.*) J. J. Mullaly (Rs. 2,750); (*Bldgs. and Roads*) T. J. Farrant (*offg.*) .....Rs. 2,500
Financial Commissioner, J. Wilson, C.S.I. Rs. 3,500
Settlement Commissioner, A. H. Diack, C.V.O. .....Rs. 2,750

CHIEF COURT.

Chief Judge, Sir W. O. Clark, Kt. .....Rs. 4,000
Judges, A. H. S. Reid; F. A. Robertson; A. Kensington; D. C. Johnstone...each Rs. 3,500

(7) BURMA is bounded by China, French Indo-China, and Siam on the east, by the province of Eastern Bengal and Assam on the north, and by the Bay of Bengal. It is the largest province of the Indian Empire, having a total area of 236,738 sq. miles, with a population of 10,490,624. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Aracan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States are administered by local sawbwas, or chiefs, under the superintendence of a political officer. The province is thinly peopled; but, owing to remarkable prosperity, the population is rapidly increasing. The inhabitants—of the common Indo-Chinese stock—belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. About 75 per cent. speak Burmese. Buddhism, now almost confined to Burma, is the religion of nearly 90 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum and jadestone: gold and silver are also known to exist. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important navigable waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railway has reached Myitkina on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin. The Lieutenant-Governor of Burma has a Legislative Council of 9 nominated members (5 official and 4 non-official). The present capital, Rangoon, is fast increasing in population owing to commercial prosperity, while the old native capital, Mandalay, tends to decline.

CHIEF CITY, LOWER BURMA, Rangoon. Population, 234,881.

CHIEF CITY, UPPER BURMA, Mandalay. Population, 183,816.

Lieutenant-Governor, The Hon. Sir H. Thirkell White, K.C.I.E. (May, 1905) .....Rs. 8,333
Private Sec., Capt. A. F. S. Hill, R.E. ...Rs. 833
Aide-de-Camp, Lt. E. L. Caldecott, R.A.

Settlement Commissioner, T. C. Wilson Rs. 2,750
Supt. & Political Offr., S. Shan States, Sir J. G. Scott, K.C.I.E. .....Rs. 2,250

CHIEF COURT OF LOWER BURMA.

Chief Judge, Sir C. E. Fox, Kt. .....Rs. 4,000
Judges, A. M. B. Irwin, C.S.I.; H. S. Hartnoll; E. W. Ormond.....each Rs. 3,500

Judicial Commissioner (Upper Burma), G. W. Shaw, C.S.I. .....Rs. 3,500

(8) The CENTRAL PROVINCES and BERAR constituted area, excluding Berar, given low, 82,635 sq. miles; pop. 9,237,654). The ntral Provinces were formed in 1861 out territory taken from the North-West Proces and Madras, but originally belonging the Mahratta Kingdom of Nagpur. One strict was detached and added to Bengal 1905. The country is hilly and forest-clad, d contains a large population of aboriginal bes. Much of the waste land is covered with ngle. The people are mostly Hindus, and ey speak mainly Hindi and Marathi. Much s been done by constructing roads and railways elonging to the Indian Midland and Great dian Peninsula system and the Bengal-Nagpur e) to open up the country, which possesses alfields and iron-ore, and is an important proer of rice, wheat, millet, pulse, oilseeds, and tton. There are cotton mills at Nagpur. Since 1st October, 1902, BERAR has been nalgamated with the Central Provinces. Berar ea, 17,710 sq. miles; pop. 2,754,016), which s to the north of Hyderabad, was placed in r hands by the Nizam in 1853, in payment of rears, and its revenues were charged with the ture cost of the Hyderabad Contingent. In 02 Berar was leased in perpetuity to the vernment of India on payment of £167,000 a ar to the Nizam, who thus obtains an assured tead of a fluctuating income therefrom. rar is purely agricultural. It is very fertile, l yields the finest cotton in India, besides llet, oilseeds, &c. The chief language is rathi, and most of the people are Hindus. There is no Legislative Council for the Central ovinces and Berar, and all legislation is done the Governor-General's Council.

CHIEF CITY, Nagpur. Population, 127,734.

enue Commr., M. F. O'Dwyer ..... Rs. 2,500

(9) AJMER-MERWARA (area, 2,711 sq. miles; 476,912), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is *ex officio* Chief Commissioner of Ajmer-Merwara and the chief executive and judicial authority.

CHIEF CITY, Ajmer. Population, 73,839.

Chief Commissioner, E. G. Colvin, C.S.I. Rs. 4,250
Commr., Lt.-Col. C. H. Pritchard ..... Rs. 1,800

(10) COORG (area, 1,582 sq. miles; pop. 180,607), annexed in 1834. The Resident at Mysore is *ex officio* Chief Commissioner and the chief executive and judicial authority.

Chief Commissioner, The Hon. Mr. S. M. Fraser, C.I.E. ..... Rs. 4,000
Commr., L. T. Harris ..... Rs. 1,900

(11) BRITISH BALUCHISTAN (area, 45,804 square miles; pop. 308,246) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the rest of Baluchistan up to the Persian frontier. The districts it comprises were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. British Baluchistan includes the Assigned Districts of Sibi, Pishin, Thal-Chotiali, Quetta, Nushki, Zhob, Chagai, Nasirabad, and the Bolan. The rest of the territory belongs to the native States of Kalat and Las Bela. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. About 44 per cent. of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans. The Afghan-Baluch frontier was demarcated in 1896–7. To Chaman, on this frontier, a railway runs through Baluchistan *vid* Quetta. A new trade-route between India and Seistan, in Persia, *vid* Nushki, in northern Baluchistan, was opened in 1896. A railway runs from Quetta to Nushki. The Khan of Kalat is the head of a loose confederacy, and is amenable in all important matters to the Governor-General's Agent. He receives about £11,000 per annum for quit-rents and subsidy. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

Chief Commissioner of British Baluchistan, Major Sir A. H. McMahon, K.C.I.E., C.S.I. ... Rs. 4,000
Judl. and Rev. Commr., A. Williams ... Rs. 2,500

(13) The ANDAMANS and NICOBARS (area, 3,143 square miles; pop. 24,649) form a chain of islands in the eastern part of the Bay of Bengal. The *Andamans*, in two groups, the Great and Little Andamans, are covered with luxuriant vegetation, and inhabited by a tribe of Negritos. The race is dying out. Since 1858 these islands have been used as a penal settlement by the Indian Government. Port Blair, with its safe and spacious harbour, on South Andaman, is the convict station. The number of convicts in 1907 was 14,500. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, which lie almost due south of the Andamans, formerly belonged to Denmark, and were first occupied by the British in 1869. They comprise 19 islands (seven uninhabited), of which the northernmost (Car Nicobar) contains half the population. The principal products are coco-nuts. The inhabitants, Malay in type, are indolent, and are becoming extinct.

Chief Commissioner and Superintendent (Port Blair), Lt.-Col. H. A. Browning ..... Rs. 2,600

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,274.)

Aden, Perim, and Protected Chiefships.—From old time Aden, situated on a peninsula of volcanic origin, on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important trade centre. Aden trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of N.E. Africa and S. Arabia. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling station at the southern entrance to the Red Sea, occupied in 1857—are legally part of the Bombay Presidency, and have an area of 80 square miles and a population of 43,974 (1901). Aden is a free port. The traffic in arms and ammunition is subject to special regulations. Aden serves as an *entrepôt* for the adjacent Arabian and African coasts. India, the United Kingdom, Austria-Hungary, and the United States have a considerable trade with Aden, the chief imports being cotton goods, grain, spices and sugar, and the chief exports salt, precious stones, and hides and skins. T total trade in 1907-8 was over £5,959,000. the same year, 1,436 vessels entered Aden a 401 entered Perim. Aden has a Port Trust and Chamber of Commerce. In the hinterland Aden the British Government has treaty engag ments with, and subsidises, the neighbouri Arab tribes, both inland and along the coa (Hadramaut), from the Straits of Bab-el-Man-d to Muscat territory at Ras Sair. As the resu of an agreement arrived at in 1903-4 with Turk a line fixing the boundary of the tribes wi which the British Government has treaty rel tions has been demarcated by a joint British a Turkish Commission from Sheikh Sayad, on t coast opposite Perim, to the river Bana.

The *Kuria Muria* Islands, to the S. of Omã have been in British possession since 1854. 1834 the East India Company occupied *Sokotr* (area, 1,400 sq. ms.), 150 miles from Cape Guard fui, which has a primitive, pastoral, Muhamm dan population of 12,000, mainly Arabs. A form protectorate was established in 1886. The Sheik receives a small subsidy from the British Gover ment in exchange for a pledge not to cede t island to any foreign Power.

Aden: Political Resident, Major-Gen. E. Brath, C.B., C.I.E.....*per mensem* Rs. 3,0

INDIAN APPOINTMENTS.

The higher civil administration of British India is recruited from four sources—1. Open competitive examination in England. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—Important changes in the regulations took effect in 1906. The next examination will commence in London on 1st August, 1909, the number of appointments (usually about 50) depending on the requirements of the local Governments. Candidates must be over 22 and under 24 on that date, and of good health and character. Application for admission to compete must be made on or before the 1st July, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. Examination fee, £6. The selected candidates will be on probation in England for one year, and will receive an allowance of £150 if they pass their probation at one of the Universities or Colleges approved by the Secretary of State for India, conduct themselves well, and comply with all rules laid down for their guidance. A final examination is held in Indian law, languages, history, &c. Seniority in the service depends on the order in which candidates stand in the list resulting from the combined marks of the open competitive and final examinations. Selected candidates must qualify in riding. Successful candidates are allotted to the various provinces upon a consideration of all the circumstances, including their own wishes, but always subject to the needs of the public service. Within a certain time of the candidate's arrival in India, he must elect to serve in the executive or the judicial branch of the administration, the summit of the profession in one branch being the Lieutenant-Governorship of a Province, in the other a Judgeship of a High Court. The salary of a covenanted civil servant commences usually at Rs. 4,800 (£320) a year. The number of civilians at present in the service is about 1,100, including a few natives who have obtained appointmen by nomination.

Indian Army.—The Native Army absorbs t larger proportion of the officers: but a conside able number are selected for civil employmen A certain number of appointments in the Indi Army are offered to cadets of the Roy Military College, and a certain number candidates from the Universities (regulatio obtainable from War Office). All King's Cadet British and Indian, and Honorary Kin Cadets, nominated by the Secretary of Sta for India (rules on application to the Milita Department, India Office), have the optio during their last term at the Royal Military C lege, of electing for appointment to the Indi Army or for commissions in the British Cava or Infantry. After the claims of these cad have been satisfied, remaining appointmen in the Indian Army are allotted in order of me to successful candidates at the final examinati at Sandhurst. Election is final, no transfer bei subsequently possible except by exchange. receiving his commission a successful candida is gazetted as second lieutenant on the u attached list of the British Army (receivi the pay of that rank), provided with a passa to India, attached for a year to a British re ment, and then transferred to a native regime as second lieutenant. Unless he is found fit every respect and passes certain language a professional tests before the end of the thi year from appointment to the Indian Army, will be removed from the service. Any office who may from time to time be required t supplement the direct supply from Sandhurst w be drawn from the R.A. and Cavalry and Infant of the Line serving in India, subject to certa conditions. On appointment to a native re ment a second lieutenant or lieutenant's initi pay is not less than Rs. 3,900 (£260) a year.

The Public Works Department includes a st of engineers engaged in the construction a maintenance of State public works. They a recruited from the corps of Royal Engineers, fro persons appointed by selection in the Unite

Kingdom, and, in respect of natives, from the civil engineering colleges in India. Other qualified persons are occasionally admitted. In 1909 not less than 30 appointments of assistant engineers will be made by a Selection Committee including at least one eminent engineer. Candidates must be between 21 and 24 years of age on 1st July, 1909, must be of good health and character, be able to ride, have passed the A.M.I.C.E. examination, or have obtained a University degree or an equivalent diploma or distinction in engineering, and have had some experience of important work. Intending candidates should apply on a prescribed form to the Secretary, Judicial and Public Department, India Office, S.W., before 1st May, 1909. Assistant engineers in India commence at Rs. 4,560 (or £304) a year, and there is a prospect of pension and also a provident fund.

The Forest Department of India is recruited from this country. New regulations are in preparation, and future arrangements are not definite. The next selection of candidates will be made in the summer of 1909. Candidates must be from 20 to 23 years of age, preference being given to those who possess a diploma in forestry or a degree in science. Selected candidates, if they succeed in passing a strict medical examination, will spend two years in training, including practical training in Germany. Assistant Conservators commence at Rs. 4,560 (£304) a year. There is a prospect of pension and a provident fund. The number of appointments in 1909 will be not less than 12. Intending candidates should apply to the Secretary, Judicial and Public Department, India Office.

Indian Police.—An examination is to be held in this country on 29th June, 1909, for about 39 appointments: Madras, 5; Bombay, 3; Bengal, 6; United Provinces, 5; Punjab, 5; Burma, 6; Central Provinces and Berar, 4; Eastern Bengal and Assam, 4. Candidates must be between 19 and 21 on 1st June, 1909, and applications must be sent before 1st May, 1909, to the Secretary, Judicial and Public Department, India Office, on a printed form to be obtained from him. There is a strict medical examination, and a test of proficiency in riding. Selected candidates "will be allotted as probationers to the various provinces upon a consideration of all the circumstances, including their own wishes." On passing the prescribed departmental examinations, which must be done within two years of arrival in India, and being found otherwise fit, a probationer is appointed an assistant-superintendent. A general increase of pay has recently been introduced, and a larger number of higher posts created. The initial salary of a probationer is Rs. 3,600 (£240) a year. There is a prospect of pension and a provident fund.

Indian Medical Service.—Examinations are usually held in January and July. The number of appointments offered is about 15. Candidates must be between the ages of 21 and 28, of good health and good character, and must possess a registrable qualification to practise both medicine and surgery in the United Kingdom, and a certificate of ophthalmic instruction. They may be married or not. Successful candidates are required to attend courses of instruction at Aldershot and at the Royal Army Medical College, Millbank, during which period they receive pay and certain allowances to cover cost of maintenance. A final examination is then held, and the position on the list of the service depends on the combined results of the preliminary and final examinations. Officers will be liable for military employment in any part of India, but, with a view to transfers to civil employment, they will stand posted to one of four civil areas, their allocation being determined on a consideration of all the circumstances, including their own wishes. Officers in one civil area are liable to be transferred elsewhere or recalled to military duty. Private practice is usually permitted. The commencing grade pay of a lieutenant is Rs. 4,200 (£280) a year; the highest medical appointment carries a salary of Rs. 36,000. Full information can be obtained from the Military Secretary, India Office, S.W.

The *patronage of the Secretary of State for India* is very small, and is chiefly dependent on the uncertain requirements of the Government of India in the Judicial, Educational, or Ecclesiastical Departments.

Appointments, usually of distinguished graduates of the Universities of the United Kingdom with a knowledge of teaching, are made by the Secretary of State to the Indian *Educational Service*, which includes teaching and inspecting posts. Conditions of pay and service are the same for both. The age is usually from 23 to 30. Appointments are in the first instance for two years, the salary beginning at Rs. 500 a month, with annual increments of Rs. 50 a month to Rs. 750 or Rs. 1,000, and with prospects of promotion if service is extended. The number of appointments varies from year to year, and is not large.

The *Ecclesiastical Establishment*, which forms a civil department, consists of the Bishops of Calcutta, Madras, and Bombay (others whose names are found at page 263 are not Bishops on the Establishment), and 150 Chaplains of the English and Scottish churches. Chaplains (who must be under 34 years of age) are on probation for three years after appointment, and receive a salary of Rs. 5,760 (£384) a year. Applications should be addressed to the Secretary of State, India Office. Certain allowances are also paid from Indian revenues to other clergymen, and to priests and ministers of other denominations when serving with British regiments.

Appointments are also made by the India Office to the *Royal Indian Marine* (limits of age for officers 17 to 22, for engineers 21 to 25), *Bengal Pilot Service* (age 18 to 22), *Civil Veterinary Dept.* (age not over 26), *Financial Dept., Enrolled List* (age 20 to 25), *Geological Survey Dept.* (age not over 25), *Imperial Customs* (age 20 to 25), *Agricultural Service* (age 23 to 30), *Assist. Supt., Traffic Dept., Indian State Railways* (not over 25), *Telegraph Dept., Public Works Accounts Branch*, and *Military Nursing Service* (age 25 to 32).

The patronage of the Local Governments is considerable, but no one who is not a native, a covenanted civilian, or an officer of the Indian Army can be appointed to a post of over Rs. 200 a month without the sanction of the Government of India—the departments excepted from this rule being: *Opium, Salt, Customs, Survey, Mint, Public Works, and Police.*

Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, of which a partial summary will be found in the *India Office List*, published by Messrs. Harrison, 45, Pall Mall, S.W. This volume also contains the full regulations regarding Indian appointments.

THE FINANCES OF INDIA FOR THE YEARS ENDED 31st MARCH, 1906, 1907, AND 1908

The figures below are given in £, rupees being converted at 1s. 4d. the rupee, or 15 rupees to the £.

Gross Revenue and Receipts.

Principal Heads of Revenue:	1905-6.	1906-7.	Revised Estimate, 1907-8.
	(000 omitted.)		
Land Revenue	£18,836	£19,794	£18,525

Total Expenditure from Revenue*	£68,750	£71,555	£70,9

* Certain heads in the above tables of gross revenue and expenditure and also the grand totals have been affected by recent changes in the form of the Indian accounts:

(1) Working expenses of railways are no longer treated as expenditure, but as a deduction from revenue;

(2) Transactions of District Boards and certain other local bodies are now excluded;

(3) Interest charges have been redistributed between ordinary and railway and irrigation debt;

(4) Marine receipts and charges, other than for Ports and Pilotage, have been transferred to Army Services.

GROSS AND NET REVENUE AND EXPENDITURE.

he statement of Gross Revenue and Expendi-
re exhibits all revenue receipts and payments
herefrom, but as the entries on both sides
re swollen by railway, irrigation, post office,
elegraph, and mint receipts and payments
xcept railway working expenses), a clearer
iew of the financial position is obtained from
he following statement of Net Revenue and
xpenditure. In this departmental receipts,
hich are a set-off against expenditure, have
een deducted, as also refunds and assignments,
ost of cultivating and manufacturing opium, &c.

In 1905-6 there was a surplus of Revenue
ver Expenditure of £2,092,000, in 1906-7 of
1,589,000, and in 1907-8 (revised estimate) of
235,000.

	£44,596	£47,366	£46,757
SURPLUS	£2,092	£1,589	£235

CAPITAL EXPENDITURE.—In addition to the expenditure from revenue there was a capital outlay in 1906–7, not charged to revenue, of £7,925,000 on State Railways, and of £798,000 on Irrigation Works.

BURDEN OF TAXATION.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, Customs, and other duties which fall on persons in the native States, the burden in 1907–8 was 1*s.* 8¾*d.* per head, or, if land revenue (which is equivalent to rent) be added, 3*s.* 2¾*d.* per head. In 1907 the burden of taxation was lightened by a further reduction of the salt tax.

DEBT AND ASSETS.—On 31st March, 1908, the debt of India amounted to £245,034,000, viz., Sterling Debt, £157,481,000, and Rupee Debt (converted into sterling at 1*s.* 4*d.* the rupee), £88,553,000. Miscellaneous obligations (Savings Bank balances, &c.) amounted in addition to about £20,460,000. Up to the same date the Indian Government had devoted £110,002,000 to the construction of railways and £29,348,000 to the construction of irrigation works. It had purchased, by cash payments, annuities, or the issue of India stock, eight railways, on which, at the time of purchase, £108,092,000 had been spent. It had lent £13,402,000 to native States, corporations, agriculturists, &c., and had advanced £12,470,000 to railway companies. Other assets were the Gold Standard Reserve of £18,317,000, and the cash balances in India and England, £12,833,000 and £4,607,000 respectively. The assets of India exceed the liabilities. In 1907–8 a 3½ per cent. loan of £3,500,000 was raised in England, at 98½, a second 3½ per cent. loan of £5,000,000 at 99, and a 3½ per cent. loan of 3 crores (£2,000,000) in India. These loans were for railway purposes.

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in thirty years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Sind, Assam, and most of Madras and Bombay) the *raiyatwari* tenure prevails, and each raiyat, or peasant proprietor, holds direct from the State. In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent. of the actual rental, while in temporarily settled raiyatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State in 1906–7 amounted to £20,801,000, of which £1,007,000 was due to irrigation and credited under that head.

THE OPIUM REVENUE.—Poppy may be grown only in parts of Bengal and the United Provinces, in the Punjab (for local consumption), and in the Central Indian (Malwa) native States. Except in these States the manufacture is a Government monopoly. In 1906–7 52,800 chests

of Bengal opium were sold for export. The monthly auction sales at Calcutta realised £5,106,740, the cost of production was £1,744,008, and the net receipts £3,196,818. In addition £550,418 (net) was derived from the duty (Rs. 600 a chest) levied in Bombay on Malwa opium. Most of the opium produced is exported to China and the Straits Settlements. Duty and licence fees on opium consumed in India (credited to Excise) yielded about £932,000. The total opium revenue, therefore, was about £4,680,000. It has been decided to restrict the cultivation of opium in India in order to reduce exportation to China, on the understanding that China will reduce her own output.

EXCISE.—Licence fees and duties are levied on the sale of intoxicating liquors and drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded since 1897–8, and amounted to £5,835,000 net in 1906–7. Reforms in excise administration are being effected.

CUSTOMS.—The net revenue was £4,232,000 in 1906–7. (For tariff see page 531.) The export duty on rice yielded £702,000, and the countervailing duty on Indian cotton goods £193,000.

INCOME TAX.—This is levied on non-agricultural incomes of Rs. 1,000 to Rs. 2,000 at about 2 per cent., and on those above Rs. 2,000 at 2½ per cent. It yielded £1,416,000 (net) in 1906–7.

STAMPS.—Stamps yielded £3,986,000 (net) in 1906–7. Most of the revenue is from court fee and commercial stamps.

SALT.—The salt duty, which was Rs. 2½ a maund (82 lb.) up to 1903, over practically the whole of India, was then reduced to Rs. 2. In 1905 it was reduced to Rs. 1½, and in 1907 to Re. 1. The rate for Burma remains as before at Re. 1. The consumption of salt has increased, owing to the reduction of duty, to 1,511,000 tons, yielding a net revenue of £4,095,000 in 1906–7.

FORESTS.—Over 92,000 square miles of forests are reserved and scientifically worked by the State, while about 168,000 square miles are under State management. They yielded in 1906–7 a net revenue of £1,764,000. A third of the revenue comes from Burma.

TELEGRAPHS.—The length of telegraph wires on 31st March, 1907, was 259,948 miles, and the number of messages sent was 11,385,000. They yielded in 1906–7 a revenue of 2·95 per cent. on their capital cost of £6,583,757. In addition the Indo-European Telegraph Department gave a profit of 3·09 per cent. on its capital of £988,204. Owing to reductions in rates there is at present a net loss on telegraphs.

POST OFFICE.—The Post Office, which in 1906–7 conveyed 780 millions of letters, postcards, newspapers, &c., and issued 22 millions of money orders, was worked at a net profit to Government of £148,000. Reductions in postal rates have recently become operative, and inland letter rates are the lowest in the world.

RAILWAYS.—Nearly all the railways in India are owned by the State, though many are leased to and worked by companies. The number of miles open for traffic on 31st March, 1908, was 30,206, of which 985 were opened in 1907–8. The mileage under construction or sanctioned was 2,457 miles. Of the mileage open or in hand on 1st April, 1908, about 53 per cent. was on the standard gauge (5½ ft.), and about 42 per cent. on the metre gauge. Up to the end of 1907 there was a capital outlay of £265,621,000. The net earnings of the railways in 1907 were £15,300,000, or a return of over 5¾ per cent. on the capital. The number of passengers increased to 306 millions, and the goods traffic to 62 million tons. The net gain to the State on the working of the railways was £2,002,000 in 1905–6 and £2,308,000 in 1906–7, after charging to expenditure interest on capital outlay and annuity payments for redemption of capital. The total capital expenditure on railways was £9,000,000 in 1905–6 and £9,792,000 in 1906–7. Rates are very low; third-class passengers travelling on the average five miles for a penny. A Railway Board controls the Railway Department. In 1908 a special committee of inquiry into the railways recommended the raising of larger loans for construction and equipment, so that £100,000,000 may be expended in the next eight years. In 1907 the State purchased the Madras Railway, the last of the old guaranteed lines.

IRRIGATION.—The total capital outlay on State irrigation works up to 31st March, 1907, was £33,000,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State of about 7¾ per cent. The area irrigated was nearly 23 million acres, while the annual value of the crops raised is estimated at about 108 per cent. of the capital outlay. The Irrigation Commission of 1901–3 recommended the construction of further works estimated to cost eventually nearly £30,000,000. Three large canals in the Punjab, besides less important works, have been put in hand. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The net expenditure in England, chargeable to Revenue, amounted in 1906–7 to £18,334,000:—Railway Revenue Account, chiefly Railway Debt, £7,970,000; Interest and Management of Debt, other than that for Railways and Irrigation, £1,539,000; Stores, £2,482,000, of which £1,900,000 were Marine and Military; payments for British forces, troop service, &c., £769,000; Army non-effective charges, £1,405,000; Civil annuities, pensions, &c., £2,035,000. Furlough payments, civil and military, amounted to £744,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use is the silver rupee, which contains 165 grains of fine silver and 15 grains of alloy. Until June, 1893, the Indian Mints were open by law for the unrestricted coinage of silver into rupees, and the rupee circulated at nearly its intrinsic value. Owing, however, to the fall in the value of the rupee, legislation of that date closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and since January, 1898, has been practically stable at 1*s.* 4*d.* This rate has now a legal sanction, since an Act of 1899 makes the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount. At the present low price of silver, the rupee at 1*s.* 4*d.* is worth much more than the value of the silver which it contains. For some years after 1893 the coinage of Indian rupees almost ceased, but in recent years there have been large coinages. From 1900–1 to 1906–7, the whole, and in 1907–8 one-half, of the profit on silver coinage

s been held as a special reserve—now called e Gold Standard Reserve—which is mostly in- sted in England in sterling securities, for the rpose of maintaining the rate of exchange tween England and India. On 31st March, 8, the investments of this fund in sterling vernment stocks amounted to a nominal value over £13,186,000, while £4,000,000 was held India in rupees, and £1,131,000 in cash in gland. India has a paper currency. The upee note is legal tender everywhere in India pper, but other notes only within the circles issue. A nickel anna piece was adopted in 6.

RMY.—The Army in India consists, first, of tish troops, about 79,000; and, secondly, of native troops (largely Muhammadans), about ,000 (for details see page 519). In addition, native Army Reserves number 34,450 men, the Imperial Service Troops furnished by ive States contribute 20,500, including cavalry, nsport corps, and sappers. Further, there 32,730 European and Eurasian volunteers cients). For police duties and frontier service regular military is supplemented by frontier tia and local levies. The Army was re- bered and renamed in 1903. Since 1902, n Lord Kitchener (whose term has been nded till 1909) became Commander-in-Chief, siderable changes have been effected in the nisation, &c., of the Army. On 1st June, , there was a redistribution of the Army of a. which now consists of the Northern and hern Armies, each under a general officer staff. The Northern Army includes five sions and the three independent frontier ades, while the Southern comprises four sions and the Burma and Aden garrisons. ories for making rifles, cordite, and gun ages have been erected. The transport ice is being improved. A Staff College has established at Quetta. Additions to ers' pay and enlarged expenditure on quick- g guns, coast and frontier defences, stores, nport, factories, &c., have increased the net ary expenditure (including marine) from 376,000 in 1899-1900 to £20,170,000 in 1906-7. ng 1908-9 there will be increased expenditure rtillery, reserve of rifles, &c. The health of Army has improved in recent years. Ague e chief cause of sickness among British ps, and enteric fever the chief cause of death. rooping service between England and India ried out by hired steamers, under the super- dence of the Admiralty.

ROYAL INDIAN MARINE consists of the troopships of over 1,500 tons given below, other steamers of about 1,000 tons each, maller craft for harbour and river naviga- surveying, and submarine mining. The ipal officers and troopships of the R.I.M. follows:

ior R.I.M., and Resident Transport Officer, *abay*, Capt. G. H. Hewett, R.N., A.D.C., C.I.E. Rs. 2,500

e ditto (*Calcutta*), Capt. W. Chandler.
ditto (*Bombay*), Capt. A. W. McArthur.

ssie, 1524 (2202). *Comm.* C. B. Henley.

INDIAN DOCKYARDS, see page 222.

EDUCATION during 1906 benefited by increased grants for primary education. Increased attention is being given to primary, commercial, agricultural, and technical education. In State institutions education is secular. The institutions in 1906–7 numbered 162,690 and the scholars 5,397,852, including 622,490 females. Of the institutions, about 70 per cent. are maintained by the State or aided by grants, the remainder being private and unaided. There are five Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, and the Punjab. The Indian Universities Act of 1904 provides for a teaching system. Of the total expenditure on education in 1906–7, £3,734,207, £989,279 came from fees, and £1,980,573 from provincial revenues or local and municipal funds. The census of 1901 showed that only 1 male in 10 and 1 female in 144 can read and write.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities in 1906–7 were 750 in number, controlling a total population of 16,760,500, and receiving an income of £2,678,682 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.), of £2,166,101 from loans, &c., and £1,001,727 from other sources. The members of municipal bodies are chiefly natives and non-official. In almost all districts in British India there are local district boards, partly representative. Nearly one-half of their total expenditure of £3,040,119 in 1906–7 was devoted to civil works, over one-fifth to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are about 7,000 officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are natives. In 1906 2,941,636 civil cases were decided; while 1,805,707 persons were tried, and 864,493 convicted, in criminal cases, and of these 505 were sentenced to death, 1,902 to penal servitude, and 163,702 to imprisonment. The strength of the police in 1906 was 9,573 officers and 154,887 men. There were 743 prisons, with a daily average of 101,227 prisoners, in 1906. At the convict settlement of Port Blair (Andamans) there were 14,496 prisoners on 31 March, 1907.

VITAL STATISTICS.—The statistics of births and deaths are defective, and the apparent increase in mortality in recent years is really due to completer returns. The recorded death rate for British India in the decennium ended 1906 ranged from 26·44 per 1,000 in 1898 to 38·91 in 1900. In 1906 it was 34·80. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhœa, small-pox, and (since 1896) plague, being other chief causes. The deaths from plague up to the end of 1906 were about 5,921,000 in India as a whole. About 23,000 people are killed by snakes every year. In 2,464 hospitals and dispensaries, maintained mostly from public funds, 24,748,000 patients were treated in 1906. The number of persons vaccinated was 9,064,451. According to the census of 1901 there were 97,340 lepers in India.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, and botanical surveys are in operation, while the archæological survey has been recently extended. The Meteorological Department is of great service in forecasting rainfall.

Trade of India.

The following statement shows the chief articles of the foreign trade of India in 1907-8:—

Imports. (000 omitted.)	
Cotton Goods and Yarn	£32,028
Metals	8,792
Sugar	6,151
Railway Material	4,801
Machinery, &c.	4,390
Hardware, &c.	2,110
Mineral Oil	2,103
Woollen Goods	1,845
Provisions	1,827
Apparel	1,722
Silk Goods	1,423
Liquors	1,337
Spices	1,041
Glass	963
Instruments, &c.	909
Dyes & Tans	695
Paper, &c.	662
Silk (raw)	654
Drugs, Medicines, &c.	606
Jewellery, &c.	575
Tobacco	562
Salt	535
Chemicals	529
Matches	492
Government Stores:	
Railway Material	1,791
Arms, &c.	283
Metals	540
Machinery, &c.	180

Exports. (000 omitted.)	
Cotton (raw)	£17,135
Rice	13,559
Jute Manufacts.	12,198
Jute (raw)	11,982
Seeds	11,210
Hides and Skins	7,301
Cotton Yarn and Cloth	7,178
Tea	6,867
Wheat & Flour	6,097
Opium	5,782
Lac	2,722
Wool (raw)	1,402
Pulse, Millets, &c.	1,349
Fodder, &c.	985
Coffee	743

Silk (raw)	425
Coal, &c.	393
Spices	351
Re-Exports:	
Cotton Yarn and Cloth	990
Wool (raw)	218
Metals	138

Among the countries constituting the British Empire, India comes second to the United Kingdom itself in the volume of its sea-borne trade which is greater than that of Canada and Australia combined. The ordinary course of India's trade shows a large yearly net export of merchandise and a net import of treasure. The above table exhibits the leading figures for the last five years in thousands of pounds sterling. It will be observed that the year 1907-8, like the four preceding years, was remarkably prosperous, especially as regards imports, but the export trade fell away during the latter half of the year. During the years 1906-7 and 1907-8 India absorbed over £50,000,000 of gold and silver.

As will be seen, the great bulk of the imports consist of manufactured articles, while nearly 70 per cent. of the exports consist of food and raw materials. Of the imports in 1907-8 cotton goods and yarn constituted about 37 per cent. (nearly all from the United Kingdom), and metals and metal manufactures 23 per cent. The imports of cotton goods in 1907-8 were again of great magnitude. Large imports of machinery were a sign of industrial activity. Sugar imports continue to grow, and mineral oil has increased despite the larger output in Burma. The imports of Government stores are mainly railway materials and army stores. In the export trade there was an increase in rice, in wheat and other grains, cotton (raw), tea, lac, seeds, and jute goods, but a severe decline in raw jute owing to the falling off in prices, while hides and skins, cotton yarn, opium, and wool decreased. The exports of indigo have fallen rapidly in recent years, but were rather better in 1906-7 and 1907-8.

The following table shows the distribution of dian sea-borne trade in 1907-8 :—

Countries.	Private Merchandise only.	
	Imports.	Exports.
tal Value (000 omitted) ...	£86,571	£115,585
	Per cent.	Per cent.
ited Kingdom	66·8	25·8

pan	1·7	5·1
aits Settlements.....	2·4	4·0
stria-Hungary	2·0	3·3
lon	0·7	3·6
ly.....	0·9	3·2
uritius	1·9	0·6
sia	0·3	0·8
other countries.....	9·5	14·2

n imports, the United Kingdom comes easily t with nearly two-thirds of the total, while all ers, except Belgium and Germany, send less n 4 per cent. In exports, the United Kingdom much less prominent, on account of the wide and for India's raw produce for food and nufactures.

bout 67 per cent. of India's total trade is Europe, and about 21 per cent. with Asia.

STOMS DUTIES.—Under the Indian Tariff Act, t goods imported pay a duty of 5 per cent. *ad em.* Cotton yarn and thread are exempted duty; but the tax on other cotton goods is er cent., a corresponding Excise duty being ed on those woven in Indian mills. There pecial duties on arms and ammunition, which taxed mainly for police purposes. Spirits generally Rs. 7 a gallon; and salt now pays a maund (82 lb.). Refined petroleum pays anna a gallon. Iron and steel goods pay per cent. Machinery, coal, raw cotton and grain, oilcake, manures, living animals, anufactured tobacco, quinine, gold, precious es and pearls, and a few other articles are -free. Bounty-fed sugars pay countervailing s varying with the amount of the bounty. There is an export duty of 3 annas per d on rice. The Government of India have ted an attitude of strong opposition to rential tariff proposals. They point out two-thirds of India's imports come from the ed Kingdom, while among the remainder are articles which this country cannot produce. exports are chiefly commodities that are un- or lightly taxed in foreign countries, and if datory imposts were levied on these India's would decline and her capacity to meet her cial obligations abroad would be impaired.

PPING.—In 1907-8 the number of vessels entered from and cleared to foreign ries was 9,312, with a tonnage of 14,239,180

Of this tonnage, approximately 61 per was from or to the United Kingdom and h possessions; and 80 per cent. of the total of India was under the British flag.

TS.—The chief ports are Calcutta and ay, which together do about 73 per cent. e total trade. Next come Rangoon, hi, Madras, and Chittagong. These ports dministered by port trusts having wide s, but subject to Government supervision.

Foreign Land Trade of India.—As registration is difficult, the statistics are of doubtful accuracy, and they include much that is really trade with border tracts administered by, or States subject to, the Indian Government. The most important countries are Afghanistan, Nepal, and the Shan States. The total frontier trade in merchandise and treasure has been as follows :—

	Imports. 000 omitted.	Exports. 000 omitted.	Total. 000 omitted.
1905-6	£5,155	£3,992	£9,147
1906-7	5,151	4,275	9,426
1907-8	5,718	4,643	10,361

Agriculture is by far the most important occupation of the people of India. Out of a surveyed area of 584 million acres in British territory in 1906-7, 254 millions were cropped or fallow, 107 millions cultivable, 137 millions not cultivable, and 82 millions under forests. The total area cropped was 246 million acres, of which over 10 per cent. was under wheat, 30 per cent. under rice, and 40 per cent. under other food-grains and pulses, 6 per cent. under oilseeds, and 8 per cent. under cotton, jute, and other fibres. The area under wheat has been considerably increased by the aid of irrigation in the Punjab and United Provinces. The cultivation of jute has been extraordinarily profitable. Sugar, spices, tea, opium, and tobacco are other important crops. The cultivation of indigo has greatly declined. The agricultural departments (central and provincial), which were greatly developed in 1906-7, supply information as to crop prospects, new staples, manures, crop experiments, implements, cattle-breeding, &c., and distribute seeds. Owing to the increasing world demand for raw cotton, great efforts are being made to cultivate a superior long-stapled cotton in India.

Minerals.—The output of the coal mines in India in 1907 was 11,147,000 tons. The production has much increased in recent years. Four-fifths of the total comes from Bengal. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1898 to 152 millions in 1907. The production of salt in 1907 was 1,103,000 tons. The output of manganese ore has been much increased, and amounted in 1907 to 548,000 tons. About 20,000 tons of saltpetre are produced annually and exported. The yield of gold (nearly all from Mysore) was 553,246 oz. in 1907. There is a considerable output and export of mica, and a fluctuating output of rubies and jade stone.

Manufactures.—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The 217 cotton mills at work in 1906-7, mostly in Bombay and Ahmedabad, representing a capital of about £12,600,000, contained 5,546,000 spindles and 59,375 looms. Up-country cotton mills have increased. The production in 1907-8 was 638 million lb. of yarn (mostly of low counts) and 189 million lb. of woven goods. There is a tendency to produce finer yarns, and to pay more attention to weaving. The 44 jute mills, situated in Calcutta and its vicinity, with a capital of £6,330,000, contained 520,500 spindles and 25,284 looms. There were, in 1906, 6 woollen and 8 paper mills, 26 breweries, and various other factories. Complaints are made of the long hours worked in some Bombay mills. Reforms in the Indian Factory Act are under discussion.

TABLE OF PRINCIPAL INDIAN CHIEFS, SHOWING SALUTES TO WHICH THEY ARE ENTITLED, AND AREA, POPULATION, PREVAILING RELIGION, AND REVENUE OF THEIR STATES.

Salute and Title of Chief.	Date of Succession.	Area in sq. miles.	Population in 1901.	Prevailing Religion.	Revenue for last year recorded or approximate.

N.B. - There are also 13 other chiefs entitled to salutes of 11 guns.

NATIVE STATES OF INDIA.

Native or Feudatory States, whose chiefs subordinate alliance with, or under the inty of, the King-Emperor, comprise about ths of the area, but only one-fifth of the ation of India. Their administration, with unimportant exceptions, is not under the control of British officials, but it is t, in varying degrees, to the Supreme nment. The chiefs are entitled to British tion, but have no power of making war eace, or of sending ambassadors to one r or to foreign States; the military force naintain is strictly limited; no European ved to reside at any of their courts with- cial sanction; and in case of misrule the e Government can dethrone the chief or arily suspend him from the exercise of wers. In matters of Imperial interest, main lines of railway, &c., the Supreme ment has jurisdiction. Some States pay , most do not. Generally speaking, the are governed by their native Princes, rs, and Councils, with the advice of a l officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all native States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-General or of the Provincial Governments cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta and Pishin), and Berar are still technically Native States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the native States have a combined area of 679,393 square miles, and a population of 62,461,549. The aggregate revenues of the chiefs are about £15,000,000, out of which a tribute of £601,000 (£233,000 from Mysore) was paid to the Government of India in 1906-7. They maintain troops of inferior military organisation to the aggregate number of 85,000 men in addition to their Imperial Service troops, numbering

* The present chief has a personal salute of two additional guns.
† The present chief has a personal salute of four additional guns.

19,800 in 1908. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of native States served in almost every Indian campaign of the 19th century. The States vary greatly in size and importance. Hyderabad is as large as Italy, and the Nizam enjoys a gross revenue of nearly £2,400,000. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute subdivision, there are many chiefs of single villages. In the case of such petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over a native State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connection with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the native States, large and small, number 680, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. Thus the rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. Lord Curzon reformed the Chiefs' Colleges and inaugurated an Imperial Cadet Corps of Indian princes and nobles.

The salutes enjoyed by the native princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 532–3 will be found the names of 69 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. In each group the States are given in alphabetical order. Some well-known Indians, such as H.H. the Agha Khan, G.C.I.E., H.H. the Maharaja of Benares, G.C.I.E., and the Maharaja of Darbhanga, K.C.I.E., are not ruling chiefs.

The native States may be thus classified:—
1. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier. 2. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 3. The Himalayan Hill States, west of Nepal (including Kashmir). 4. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. The names of many of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many recent expeditions against them. 5. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. 7. The three northern Muhammadan States of Khairpur (Sind), Bahawalpur, and Rampur, from which Warren Hastings expelled the Rohillas in 1774. 8. The ancient sovereignties of Rajputana, lying between Sind and the United Provinces. 9. The States of Central India, lying to the north of the Nerbudda, and to the south and east of Rajputana. 10. Gujarat, including Kutch and the numerous petty chiefships of Kathiawar. 11. Baroda. 12. The Southern Mahratta States. 13. Hyderabad. 14. Mysore. 15. The Malayalim States of Travancore and Cochin, lying together in S.W. India.

The States of Hyderabad, Mysore, Baroda, Kashmir, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. Numerous minor States are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Kashmir, Jaipur, Udaipur, Gwalior, Indore, Baroda, and Travancore and Cochin. *Hyderabad* is the premier State in India. Its capital, Hyderabad (448,466), is the fourth city in India in population. The important frontier State of *Kashmir* (capital, Srinagar, 122,618) was granted to Gholab Singh by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. The administration of the State has been much improved under the advice of the British Resident. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. Of the Sikh States the most important is *Patiala*. *Rajputana* (pop. 9,723,301) extends some 460 miles from north to south, and is 530 miles in breadth. About half of the area is desert. It comprises 19 States of varying size and importance. Of these 16 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Moghul Empire, and resemble feudal monarchies. A large part of the area of Jodhpur, Bikaner, and Jaisalmir is desert. The *Central India States*, although one-third less in extent than Rajputana, are split up into nearly four times as many States, of which all but six are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. In Jan., 1903, the Maharaja Holkar of Indore abdicated in favour of his son. The 31 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency. *Bhopal*, one of the principal Muhammadan States in India, is now for the fourth generation under female rule. In 1875 the reigning Gaekwar of *Baroda* was deposed, but the native administration was continued under an adopted heir. In 1881 *Mysore*, which had been administered by the Indian Government since 1831, was restored to native rule. The important States of *Travancore* and *Cochin*, attached to Madras Presidency, represent ancient Hindu dynasties. The former stands third in population among the native States, and is exceedingly prosperous. Their Christian population numbers about 900,000. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention.

Countries within the Indian Sphere of Influence.

THE native States of Nepal and Bhutan, though *in* India, enjoy a large measure of independence, and may be most conveniently treated as within the Indian sphere of influence. Outside India, but within its sphere of influence, is Afghanistan. For French and Portuguese possessions in India, see pages 617 and 644.

NEPAL.

Sovereign, H.H. Maharaja Dhiraj Prithvi Bir Bikram Jang Bahadur Shah Bahadur Shamsher Jang, *b.* 1875; *suc.* 1881. Salute in British territory, 21 guns.

Prime Minister, H.E. Maharaja Sir Chandra Shamsher Jang, Rana Bahadur, G.C.B., G.C.S.I. (1901).

Nepal (500 miles long by 100 miles broad; area, about 54,000 sq. miles; pop. about 4,000,000, chiefly Hindus and Buddhists) lies between British India and Tibet on the S. slopes of the Himalayas, and includes, among other lofty peaks, Mt. Everest (29,141 ft.). Amid the wild, sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces and fifteen districts. In 1907-8 its exports to British India were £2,275,000, while its imports amounted to £1,012,000. The principal trade route is that between Katmandu and the Bengal frontier (76 miles). Nepal exports rice and other grains, oilseeds, ghi, cattle, jute, &c., and imports cotton goods and yarn, sugar, salt, petroleum, metals, &c. The revenue, realised chiefly from land rent, forests, Customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. The Maharaja is a Sisodiya Rajput (Hindu). Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly, and the Prime Minister paid a most successful visit to England in 1908. The policy of seclusion is, however, consistently followed by the native rulers. The real political power rests with the Prime Minister. The British Political Resident at the capital does not interfere in internal affairs, but foreign relations are controlled by the Indian Government. The army numbers about 45,000. Complimentary missions are sent quinquennially to China. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

CAPITAL, *Katmandu* (pop. 75,000)—*British Resident*, Maj. J. Manners Smith, C.I.E., V.C. Rs. 2,500

BHUTAN.

Bhutan (area, about 20,000 sq. miles; pop. about 50,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance of £3,333 being now paid by the Indian Government as compensation. The former dual government of a spiritual chief and a temporal chief came to an end when the chief councillor and virtual ruler, known as the Dongsa Penlop (Sir Ugyen Wangchuk, K.C.I.E.), was chosen hereditary Raja in 1907. Bhutan's total trade with India in 1907-8 was £40,000. There is no British Resident.

CAPITAL, *Punakha*.

AFGHANISTAN.

Amir of Afghanistan and its Dependencies, His Majesty Siraj-ul-millat-wad-din Amir Habibullah Khan, G.C.M.G.; *b.* 1872, *suc.* October 7, 1901. Salute in British territory, 21 guns.

Afghanistan (called Khorassan by the natives) lies on the N.W. frontier of India. Its area is estimated at 246,000 sq. miles, and its population at 5,000,000. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the Punjab and N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1903. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, the Helmand, and the Kabul. The climate is dry, with extreme temperatures in winter and summer. The population is very mixed. The Afghans (or Duranis) have been predominant since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu.

Afghanistan is divided into six provinces, Kabul, Kandahar, Herat, Turkestan, Farrah, and Badakshan (with Kafiristan and Wakhan), which are under governors, with subordinate nobles and judges, police, and revenue officers. The late Amir (1880-1901) established a strong central government, and introduced a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself, with transport services, &c. It comprises about 70,000 regulars and 20,000 irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for guns, rifles and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. Recently steps have been taken to develop education, hitherto controlled by the Mullahs. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There is excellent irrigation and all profitable soil is utilised. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manu-

factured. Salt, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but have lately been improved, particularly where they may serve military purposes. Goods are conveyed by pack-animals. The trade of Afghanistan with India in 1907–8 was over £1,438,000. The exports to India are mainly fruits, raw wool, and *ghi*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, tea, and sugar. The Afghan Customs duties are heavy. The chief trade routes to India are the Khaibar Pass, from Kabul to Peshawar (191 miles), and the road from Kandahar to Quetta (125 miles). The Sind-Pishin railway terminates at Chaman, on the frontier, 65 miles from Kandahar, from which a fine road of 318 miles runs to Kabul. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. Russia gives bounties and rebates. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £900,000, including the subsidy of £120,000 a year from the Government of India. There are taxes on land, a grazing tax, Customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

By agreement with the Amir, the "buffer State" of Afghanistan has no foreign relations with any Power except the Government of India. In all other respects it is independent, and the rule of the Amir despotic. The modern history of Afghanistan dates from 1881, when Abdurrahman, the late Amir, was recognised as ruler. As the result of a British mission to Kabul in 1904–5 the engagements which had existed with the late Amir since 1880 were renewed by the treaty of 21 March, 1905. Under this treaty the British Government engaged to refrain from interference in internal affairs, but promised to preserve the safety and integrity of Afghanistan against any unprovoked attack, provided that the Amir acted as a friend and ally, and followed unreservedly the British Government's advice in all his external relations. The Amir visited India in 1907. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence, and engaged to conduct all her political relations with Afghanistan through Great Britain. Great Britain declared her intention not to change the political status of Afghanistan, to exercise only a pacific influence, and not to take or encourage measures that might threaten Russia. After reciting the treaty with the Amir in 1905 Great Britain engaged not to annex or occupy any part of Afghanistan in contravention of that treaty. It was agreed that specially designated Russian and Afghan frontier officials might establish direct relations for settling local non-political questions, and that Great Britain and Russia should enjoy equality of commercial facilities.

There is a native British Agent (a Muhammadan) at Kabul. The Amir has an agent with the Government of India, and an agent at Peshawar, and also commercial agents in England and India.

CAPITAL, *Kabul* (about 150,000). The chief commercial centre is Kandahar (30,000). Other provincial capitals are Herat (12,000) and Tashkurgan (17,000).

British Agent, Fakir Syed Iftikhar-ud-din.

Foreign Countries Contiguous to India.

THE PERSIAN GULF.—For three centuries England has taken the lead in Persian Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. England and India still have the lion's share of the trade, 95 per cent. being carried in British vessels. The bulk of it is done by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; while at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. The southern shores are Turkish from Katif Town up to the vicinity of Koweit, and beyond those limits as far as Basra.

Bahrein (capital, Manama), governed by Sheikh Isa and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab coast (El Katr). It is the head-quarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland. Pearls are the only notable export; rice, cotton goods, dates, and spices the chief imports. In 1906 the exports were £1,517,500, and the imports £1,637,000. The people (about 75,000) are Muhammadans. The Sheikh has been in treaty relations since 1861 with the Government of India, which has a Political Agent at Bahrein. In 1880 he engaged not to make treaties with any other State.

The independent tribes on the *Pirate* (Arab) *Coast* from Ras-el-Kheima to Odeid are bound together under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf, stationed at Bushire, is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. The trade of the Arab coast ports largely consists of exports of pearls to India *viâ* Lingah and Bahrein.

Important caravan routes converge at *Koweit*, the proposed terminus of the Baghdad railway, which has an excellent harbour, recently buoyed by the British India Steam Navigation Company, whose steamers call fortnightly. The Sheikh of Koweit (Mubarak bin Sabah) is under treaty obligations with the Indian Government in respect of Koweit and its vicinity.

The Sultan of *Omân* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court (*see* page 639).

In the negotiations connected with the Anglo-Russian Convention of 1907 the policy of Great Britain was declared to be the preservation of the *status quo* and the maintenance of British trade, and Russia did not deny the special interests of Great Britain in the Gulf.

Political Resident, Persian Gulf (Bushire), A. L. P. Tucker, C.I.E. ..... *per mensem* Rs. 2,750
Do., Turkish Arabia (Baghdad), Maj. J. Ramsay, C.I.E. ..... Rs. 2,500
Political Agent, Muscat, R. E. Holland Rs. 1,440
Pol. Agent, Bahrein, Capt. F. B. Prideaux Rs. 1,440
(For Persia, *see* pp. 640–642).

PERSIA borders on Baluchistan. The demarcation of the Perso-Baluch frontier, partially

rried out in 1872 and 1895, was completed in 95 by Col. McMahon, who, under the treaty of 57, was deputed to examine a Perso-Afghan spute arising from a change in the course of e Helmand. A railway was opened in 1905 om Quetta to Nushki, whence there is a cara- n route (478 miles), with wells, rest-houses, egraph, &c., to Persian Seistan, but traffic is all. In Persia consular officers representing itish and Indian interests work side by side. the Anglo-Russian Convention of August, 07, S.E. Persia, east of a line drawn from the ghan frontier, *viâ* Gazik, Birjand, Kerman, d Bunder Abbas, is assigned as a region in ich Russia will not seek political or commer- l concessions (for railways, &c.), or oppose nilar concessions supported by the British vernment (*see* also p. 640).

ASIATIC RUSSIA.—The Anglo-Russian Conven- n of Aug., 1907, recognises N.W. Persia as a gion in which Russia, and S.E. Persia and ghanistan as regions in which Great Britain, ve special interests. A portion of the Russian pire, including the vassal State of Bokhara d part of the Pamir Region, is conterminous th Afghanistan. The Russian Trans-Caspian ilway runs from Krasnovodsk, on the Caspian, Merv, to Samarkand and Tashkent. The rghab Valley branch from Merv to Kushk the Afghan frontier, opened in 1898, brings the ssian railways within 70 miles of Herat, and hin 450 miles of the Chaman terminus of the lian railways. Another important strategic e connects Tashkent directly with the main ssian system at Orenburg. The Amu-Darya, or us, which separates Bokhara from Afghanistan 330 miles, is navigated by Russian steamers. ssian territory stretches into the Pamir gion—the "Roof of the World"—a wind- pt, icy mountain-land, snow-bound for half year. Its southern boundary was fixed 895 by the Anglo-Russian Pamir agreement.

HINA. — India is in contact with two endencies of China, Chinese Turkestan Tibet, and one province of China proper, nnan.

hinese Turkestan is surrounded by the moun- s of Tianshan, the Pamirs, and Kuenlun. re are three difficult passes into Russian kestan and two still more difficult ones into a. The boundary between Kashmir and nese Turkestan has not been officially defined. sia has special treaty rights in the depen- cy. There is a British consul at Kashgar Macartney, C.I.E.). Trade with India has to arried over the Karakoram Pass (18,500 feet) Ladakh, in Kashmir, or over the Kilik Pass 00 feet) in the Hindu Kush *viâ* Hunza.

bet, a plateau seldom lower than 10,000 feet, is the northern frontier of India, from imir to Burma, but is separated therefrom by Himalayas. Northern Tibet is arid, but in south there are fertile tracts in the valley he Tsan-po. India imports from Tibet wool, x, salt, living animals, and musk, in ange for cotton and woollen goods, coral, grain. The total trade in 1907-8 was about 8,000. Trade passes from Bengal through im or direct from the Punjab and the United inces. The once mysterious capital, Lhasa 30 ft.), is 333 miles from Darjiling (Bengal). Lamas, or monks, who control the country, ed access to European travellers after 1846. er the Anglo-Chinese Sikkim Convention 890, a trade mart was opened at Yatung; but as the Tibetans disregarded the Convention, a political mission was despatched from India, with a military escort. It reached Lhasa after a very arduous march and several sharp fights on 3 August, 1904. A new Convention was signed (7 Sept.), and the mission left Lhasa on 23 Sept. This Convention provided for the erection of boundary pillars between Sikkim and Tibet; for trade marts at Gyantse and Gartok as well as at Yatung, and for unrestricted traffic by existing routes; for British and Tibetan agents at the trade marts; and for payment of an indemnity of £500,000 (reduced to £166,667). The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (27 April, 1906) China agreed to the terms of the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognise the suzerain rights of China in Tibet, agree to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. The new trade marts have been opened and trade regulations signed (1908). In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited the chief cities in Northern India.

Yunnan is a Chinese province to the N.E. of Burma. By the Anglo-Chinese agreements 1894 and 1897, a boundary was fixed between Burma and Yunnan, and arrangements were made about trade, extradition, &c. The boundary towards Assam is undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Western Yunnan, with its trade centres of Hsiakuan and Tali-fu, is reached by a difficult route from Bhamo, in Upper Burma, and the direct trade was about £386,000 in 1907-8. Burma imports from Yunnan hides, &c., and exports raw cotton, cotton goods, and jade. A railway from Bhamo to Têng-yuêh (120 miles) is under survey. There are treaty "ports" at Têng-yuêh and Ssumao, near the Burma frontier. British consuls are stationed at Têng-yuêh and Yunnan-fu (*see* p. 608).

FRENCH LAOS.—Through the cession of a portion of Laos by China in 1894, France obtained access to the left bank of the Mekong at a point where this river forms the boundary of the Shan States of Burma. The territory forms part of French Indo-China (*see* pp. 617-8).

SIAM (*see* pp. 649-650) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier *viâ* Raheng and Chiengmai, the imports being chiefly teak, cattle, and raw silk, and the exports cotton and silk goods. In 1907-8 the value of the total trade was £532,000. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

Imperial British Dominions.

THE following accounts of the Imperial Dominions have been revised by the various Governments, to whom the Editor begs to return his warmest thanks. He is also indebted to the "Colonial Office List," which contains information upon every subject connected with the Imperial Dominions.

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 53½′—9° 50′ N. lat. and 79° 48′—81° 52′ E. long. Its area is (with outlying islands) 25,481 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles.

The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. There are no great extremes of temperature, and throughout the low country the thermometer varies little in the course of the year, the mean temperature at Colombo being nearly 81° F. The coolest months are December and January; the hottest are April and May.

The estimated population on December 31, 1906, was 3,984,985, the most important element being the Singhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. (Census, 1901: Singhalese, 2,330,807; Tamils, a race of Southern India, 951,740; Moormen and "other races," 253,625; Burghers and Eurasians, 23,482; and Europeans, 9,211, including the military and shipping. "Other races" include a sprinkling of Veddahs, who are perhaps the aboriginal race of the island, and of Afghans and Malays.) In 1507 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but five years after, in 1801, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of padi and dry grain. The principal exports are tea, coffee, and products of the coco-nut palm, cinchona, rubber, cocoa, cinnamon, cardamoms, ebony, and a little vanilla.

About one-fourth of the island is under cultivation, and the leading areas in 1907, in acres, were: Rice, 688,824; other grain, 110,598; tea, 438,243; coffee, 2,433; coco-nuts, 993,831; rubber, 115,676; cinchona, 1,229; cinnamon, &c., 44,380; cocoa, 37,050; and tobacco, 16,235. Among the more important native industries are gold, silver, ivory and tortoise-shell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and the pearl fishery in the Gulf of Mannar, off the N.W. of the island, yielded a revenue of Rs.2,405,645 in 1905. The manufacture of salt is a Government monopoly, and yielded in 1907 a revenue of Rs.1,737,871.

There are 562 miles of railway open, 495 being 5 ft. 6 in. gauge and 67 miles 2 ft. 6 in.; and in 1907 the post and telegraph offices numbered 396, there being 3,651 miles of telegraph wire.

The Government of Ceylon is administered by a Governor, aided by an Executive Council of 5 members, and a Legislative Council of 18 members including the Governor and the Executive Council. The Legislative Council contains representatives of the principal races and interests in the island.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. Ceylon, a few degrees north of the equator. alé, the seat of government, is about 400 miles stant from Ceylon, to which the islands have ways been nominally tributary. The Sultan knowledges his allegiance by sending an annual bassy to Colombo. The natives are Mohamedans. The islands are unhealthy, and the ain exports are dried fish, cowry shells, coco-nut ir, and tortoiseshell.
Colombo, distant 6,300 miles; transit, 16 days.

STRAITS SETTLEMENTS.

The Settlements forming what is known as the leny of the Straits Settlements have an entire ea of about 1,660 square miles. The population 1901 was 572,249, exclusive of Labuan, Cocos, d Christmas Island (Singapore, 228,555; Peng, Prov. Wellesley and Dindings, 248,207; alacca, 95,487). The great bulk of the popuion consists of Chinese and Malays.
The Government consists of a Governor, assisted an Executive Council of 7 members, and a gislative Council of 8 official and 7 unofficial mbers, appointed by the Crown. Two of the official members are nominated by the Chamrs of Commerce at Singapore and Penang reectively. The Resident Councillors of Penang d Malacca have seats in both Councils. The y of the colony is the common and statute law England as it was in 1826, qualified by Indian ts until 1867 and since then by local ordinces. The Supreme Court consists of the Chief stice and four puisne judges, and constitutes o a court of appeal, from which there is yet other appeal in certain cases, viz., to the Privy uncil. The jurisdiction of the Supreme Court ludes that of a Colonial Court of Admiralty. ere are also in each Settlement and in Labuan trict courts with limited civil and criminal isdiction, and the usual police magistrates' d coroners' courts.
The climate of the colony is almost uniform oughout the year, and foliage is perennial. e rainfall in 1907 amounted in Singapore to 85 inches, in Penang to 87·53 inches, and in lacca to 71·35 inches.
The exports comprise—gutta-percha, gambier, per, india-rubber, horns, hides, canes, sugar, , sago, tapioca, spices, dye-stuffs, copra, rats, coffee, tobacco, gums, tin, &c.
The chief imports are rice, cotton piece goods, um, petroleum, and coal.

Inspector of Prisons, L. P. Ebden £900 to 1,020

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 206 square miles. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16′ N. and long. 103° 53′ E., with 228,500 inhabitants in 1901. The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and the Netherlands Indies, and is strongly defended. The Tunjing Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of $29,000,000, and extensive works for their improvement and for the improvement of the harbour are now in progress. The trade returns for 1907 (including inter-settlement trade) amounted to $481,027,041, the value of exported tin being $43,928,746.
The number of merchant vessels entered and cleared in 1907, exclusive of native craft, was 10,329, with a tonnage of 13,579,730. The total for the whole colony was 17,862, with a tonnage of 20,055,874. The total native craft entered at all three ports during the same year was 15,210 (tonnage 709,898). The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. It is a free port; no duties are levied upon anything except opium, spirits, wines, and beer consumed in the colony. The opium and spirit trades are farmed out to Chinese, and the Chinese element is conspicuous among the trading classes.

LABUAN is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16′ N. lat. and 155° 15′ E. long., and forms part of the Settlement of Singapore. Its area is about 31 square miles; and its population is 8,286. It was ceded to Great Britain by the Sultan of Borneo in 1846, being at that time uninhabited. The island has a fine harbour, and possesses extensive coal-mines, which are now being developed, the annual

export being nearly 50,000 tons. The exports consist of cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Revenue (1907), $104,660; expenditure, $96,835; imports, $1,223,031; exports, $1,254,542.
Resident, M. S. H. McArthur.

CHRISTMAS ISLAND, in the Indian Ocean, about 200 miles South-west of Java, and 700 miles East of the Cocos-Keeling Islands, has an area of about 56 square miles and a population about 1,200. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1907 was 110,375 tons.

THE COCOS-KEELING ISLANDS are a group of about 20 small islands about 700 miles South-west of Sumatra. The population is about 700, and the island exports about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company Direction Island.

PENANG is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (population, 1901, 128,830), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (population 1901, 115,254), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18′ N., long. 100° 21′ E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kédah. Area, 107 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1907 (including inter-settlement trade) amounted to $193,490,300; the export of tin from the port being $39,279,661 in 1907.

PROVINCE WELLESLEY is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kédah in 1798, with some land S. of the Krian river acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, sugar, spices, tapioca and rubber plantations.

THE DINDINGS (area 260 square miles, population in 1901 4,113) are at present little developed; but they contain what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor. They comprise a group of islands (of which Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula cut out of the State of Pérak, and measuring about 22 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 659 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, 17 March, 1824, being exchanged for the British settlements in Sumatra.

Revenue (1875, $118,000), 1906 ..... $707,880
Aggregate trade, 1907 ..... $9,539,992
(Including tapioca, $1,794,143, exported in 1907.)
Singapore, distant 8,700 miles; transit, 22 days.
Penang, 20 days; and Malacca, 24 days.

THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Pérak, Sélángor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a British Resident General, who controls the Residents subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control.

There are 453 miles of railway open, and a line connecting Penang with Singapore is under construction, all constructed from revenue, 1,860 miles of roads, and 730 miles of bridle-paths, while the principal rivers are navigable for small boats. The chief export and source of revenue is tin, of which about seven-tenths of the world's supply is produced. Coffee, cocoanuts, sugar, rice, and rubber are extensively cultivated. The climate is very uniform, and may be described as hot and moist. There is no well-marked dry season, and the rainfall in the low country is about 95 inches. The average maximum shade temperature is 90°, and the minimum 70°.

The States maintain a highly efficient regiment of Sikh troops (the Malay States Guides), and are policed by a mixed force of Indians and Malays, officered by Europeans.

Kuala Lumpur (Pop. 35,000) is distant 8,500 miles from London ; transit, 21 days (*vid* Penang).

HONG KONG.

The Crown Colony of Hong Kong consists of an island situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10′—22° 17′ N. lat. and 114° 6′—114° 18′ E. long., and of a portion of the mainland.

Hong Kong was first taken possession of by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842, British Kowloon being subsequently acquired by the Peking Convention of 1860 ; and the "New Territories," being the southern part of the Kwang-tung province, by a lease signed June 9, 1898. It is a military and naval station for the protection of British commerce. The island is about 11 miles long and from 2 to 5 miles broad, with an area of 30½ square miles ; the whole colony comprises an area of about 400 square miles. The island lies close to the mainland, being separated at one point by a narrow strait (Lyeemoon) not more than a quarter-mile wide. The city of Victoria lies along the northern shore of the island, facing the mainland ; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. The port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered 1906) 16,394,508 tons ; (1907) 18,013,387 tons.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 2,000 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The thermometer ranges from a minimum of 32° in February to a maximum of 93° in August. The average annual rainfall is 84 in., of which not less than 70 in. are received between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast tradé in many kinds of produce, chiefly opium, sugar, flour, oil, amber, cotton, ivory, betel, sandalwood, rice, tea, woollens, silks, salt, &c.

The population of the colony in 1907 was 454,308, of whom 395,591 were Chinese. The white residents, including naval and military, numbered 18,777.

Much encouragement is given by the Government to education in the colony. In 1907 there were 79 schools subject to Government supervision, attended by 5,924 pupils.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 8 members, together with a Legislative Council of 14 members, including himself and a representative from the Chamber of Commerce. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

Hong Kong, 9,834 miles, *vid* Suez Canal ; transit, 29 days.

WEIHAIWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on the 1st day of July, 1898, and lies in latitude 37° 30′ N., longitude 122° 10′ E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and an estimated population of 150,000, in which are included 4,000 resident on the island of Liu Kung. In addition to the leased territory there is a sphere of influence which comprises that portion of the province of Shantung lying east of the meridian 121° 40′—an area of 1,500 square miles. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The Government is administered by a Commissioner, who discharges his functions under the Weihaiwei Order in Council of 24th July, 1901, by which he is empowered to make ordinances, subject to the approval of the Secretary of State for the Colonies, for the administration of the territory, and provision is made for a High Court, in which all jurisdiction, civil and criminal, is vested, subject to an appeal to the Supreme Court of Hong Kong, and for District Magistrates' Courts. The village communities are administered through their headmen. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the port of Shanghai.

Commissioner, Sir J. H. Stewart Lockhart, K.C.M.G.
Sec. to Government and Magistrate, R. Walter.
District Officer and Magistrate, R. F. Johnston.
Medical Officers, H. Hickin, M.B. ; W. M. Muat.

BORNEO.

Borneo was discovered by the Portuguese in 1521, and is situated in the Eastern Archipelago, extending from lat. 7° 4′ N. to 4° 10′ S., and from long. 108° 50′ to 119° 20′ E. It is about 850 miles in length and 600 in breadth, and contains an area of 280,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, and Bugis (the aboriginal Celebes). Rather more than two-thirds of the island is now included within the Dutch possessions in the East Indies. The remainder of the island is under British protection.

THE BRITISH NORTH BORNEO COMPANY.

The territory of British North Borneo occupies the northern part of the island of Borneo, with a total area of about 31,000 square miles, and a coast line of over 900 miles. The population is about 175,000, consisting mainly of Mohammedan settlers on the coast, and aboriginal tribes inland, with some Chinese traders and artisans. The interior is mountainous, Mount Kinabalu being 13,700 feet high, and is densely timbered.

The chief town is Sandakan, on the north-east coast. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole district is divided into ten provinces. The laws are based on the Indian codes of criminal and civil procedure, by local proclamations. There is an Imam's Court for Mohammedan law.

	1905.	1906.	1907.
Revenue	$959,539	$896,286	$1,139,554
Expenditure ...	535,965	497,745	683,326
Exports	4,537,486	4,857,943	4,332,913
Imports	2,836,676	2,988,976	2,921,100

The principal sources of revenue are opium, spirit farms, birds'-nests, court fees, stamp duty, licences, import duties, royalties, land sales, &c. The chief products are timber, tobacco, sago, rice, gums, gutta-percha, coco-nuts, rattans, and all varieties of jungle produce. The country is suitable for the cultivation of sugar, tapioca, rubber, pepper, and gambier on a large scale. Coal and gold have been found. Exports of leaf tobacco, (1906) $2,943,645; (1907) $2,459,122.

Borneo is now connected by cable with the outer world by a branch of the cable between Labuan and Singapore, and between Labuan and Hong Kong. A telegraph line has been constructed from Mempakol, where the cable reaches land, to Sandakan, where there is also a telephone exchange. A railway has been constructed from Weston to Beaufort (20 miles) where it connects with the line from Jesselton (56 miles), which has been extended to Tenoom (33 miles). A further extension is under construction.

There is a native military force of 650 men under European officers, with one machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

List of Officers (British North Borneo).

Governor and Commander-in-Chief, E. P. Gueritz, *and entertainment allowance*	$11,400
Finance Commissioner, A. Cook	6,924
Judicial Commr., A. C. Pearson (*acting*)	3,864
Commissioner of Lands, H. Walker	6,576
Resident, West Coast, A. E. Dunlop	4,800
Resident, Kudat, E. H. Barraut	4,800
Resident, East Coast, W. H. Hastings ...	3,480
Resident, Interior, F. W. Fraser	3,600
Commandant Armed Constabulary, Maj. C. H. Harington	4,800
Auditor, J. W. Wilson	5,554
Princ. Medical Officer, F. H. Davies	£400
Postmaster-General and Supt. of Telegraphs, R. Scott Atkinson	$3,876
General Manager, Railways, A. J. West	6,600

BRUNEI.

Sultan, H.H. Mohamed Jemal-ul-alam, *succ.* 11 May, 1906.

A native State on the west coast of the island of Borneo. The total area exceeds 3,000 square miles. The territory was placed under British protection in 1888, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of nearly 10,000, and is built entirely on the water, communication being possible only by boat.

High Commr., The Governor of the Straits Settlements.

British Resident, Brunei, M. S. H. McArthur (J. Fortescue Owen, *acting*).

Brunei is 5 hours by steamer from Labuan.

SARAWAK.

Raja, H.H. Sir Charles Johnson Brooke, G.C.M.G., *born* 3 June, 1829; *succ.* his uncle, the Raja Sir James Brooke, 11 June, 1868; *m.* 1869, Margaret Alice Lily de Windt, of Highworth, Wilts.

Heir, Charles Vyner Brooke (H.H. the Raja Muda), *b.* 26 Sept., 1874 (administrating the Government during the absence of H.H. the Raja).

Resident, 1st Div., Hon. Sir Percy Cunynghame, Bart.	$7,200
Resident, 3rd Division (vacant)	
Commandant, Stuart Cunynghame	2,640
Treasurer, Hon. F. H. Dallas	6,000
Postmaster-General, C. C. Robison	4,200
Commissioner of Public Works and Surveys, &c., H. F. Carew-Gibson, A.M.I.C.E.	£600
Principal Medical Officer, A. J. G. Barker	$4,800

The Sarawak territory lies on the west coast of Borneo, with a seaboard of 400 miles, an area of about 50,000 square miles, and a population of about 600,000, composed of various races. The government of this district was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Raja Brooke of Sarawak, and was uncle of the present Raja. Other concessions have been made in 1861, 1882, 1885, 1890, and 1904, when the Limbang River was obtained. The Lawas River was purchased from the B. N. Borneo Co. in 1906. The country produces sago, gutta-percha, indiarubber, beeswax, birds'-nests, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. Gold exports, (1905) $1,824,320; (1906) $425,470; (1907) $1,513,800.

	1905.	1906.	1907.
Revenue	$1,353,477	$1,327,800	$1,441,194
Expenditure	1,240,523	1,262,169	1,359,273
Imports	5,881,116	5,174,280	5,172,004
Exports.....	7,541,101	6,883,704	6,727,419

CHIEF TOWN, Kuching. Distance from London, 8,700 miles; transit, 25 to 30 days. Telegrams *sent by post* from Singapore; steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday arriving on Thursdays.

The Imperial Dominions in North America include the whole of the northern part of that continent, excepting Alaska, and the small islands of St. Pierre and Miquelon, in the Gulf of St. Lawrence, and extend from the United States northern boundary to the Arctic Ocean. From a physical point of view the whole region may be divided into an eastern and a western division, the Red River Valley, in long. 97°, forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Quebec, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The country possesses great mineral wealth; coal, gold, silver, copper, nickel, lead, and asbestos are produced, and Canada is the principal oil-producing country in the British Empire; while iron, phosphates, salt, graphite, &c., occur; the total value of the minerals produced in 1907 was about $86,000,000. The soil is generally fertile; all the products of the temperate zone are cultivated, and Canada, with its vast wheat-growing belt in Manitoba and the North-West, justifies its claim to be "Britain's Granary."

THE DOMINION OF CANADA.

The Dominion of Canada includes the various Provinces of North America formerly known as Upper and Lower Canada (now Ontario and Quebec respectively), New Brunswick, Nova Scotia, Prince Edward Island, British Columbia, and the territories of the Hudson Bay Company, now styled Manitoba, Saskatchewan, Alberta, the North-West Territories, and the Yukon Territory; in fact, the whole of British North America except Newfoundland and Labrador. This territory, nearly as large as Europe, stretches from the Atlantic to the Pacific Ocean, and is estimated to contain a total area of 3,745,574 square miles, and a population of 5,766,606, which, notwithstanding its diversity of origin, is fast being welded into one harmonious and homogeneous whole. The descendants of the French colonists reside chiefly in the Province of Quebec, where, out of a total population (1901) of 1,648,898, 1,429,260 are Roman Catholics, the majority of whom still very generally use the French language. A Religious Census of Canada was taken in 1901, and the numbers were:—Roman Catholics 2,229,600, Methodists 916,886, Presbyterians 842,442, Church of England 680,620, Baptists 316,477, Congregationalists 28,293, and Lutherans 92,524. Canada possesses an Active Militia numbering 54,097 men (including infantry, cavalry, and artillery), and a reserve estimated at 1,030,000. The table on page 545 shows the expansion of the revenue, particulars being given for 1868, 1878, and 1888-1907. The revenue has increased from $13,687,928 in 1867-8 to $96,054,566 in 1907-8, and there has been a total net surplus since Confederation of $130,362,568. The population has increased from 1,538,500 in 1841 to 5,371,315 in 1901, and 6,863,500 *(estimated* 1st March, 1907), the intermediate enumerations being (1851), 2,380,988; (1861), 3,182,418; (1871), 3,635,024; (1881), 4,324,810; and (1891), 4,833,239. In 1881 there were 35 cities and towns of 5,000 inhabitants and upwards, having a total population of 860,040; in 1901 there were 62 of such cities and towns, and their total population was about 1,330,000. Montreal has a population of 450,000 (with suburbs), and Toronto, the capital of Ontario, has over 335,000 inhabitants (including suburbs). Ottawa, the political capital, has in 1908, 85,332 inhabitants (100,000 including suburbs); Winnipeg, in Manitoba,

from 241 in 1871, has grown to 42,300 in 1901, and the census of 1906 gives 90,234. Vancouver, in British Columbia, which had no existence in 1885, numbers over 20,000. The city of Dawson, the "business centre" of the Klondyke gold region, was a barren waste in 1897, and in 1901 had a population of 9,142. The general rate of increase throughout the Dominion in the last decade was a little over 11 per cent.

Canada was originally discovered by Sebastian Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America. In 1870 the Province of Manitoba was formed, and, with the remainder of the Hudson Bay Territory, then known as the North-West Territories, admitted into the Dominion. In 1905 the Provinces of Saskatchewan and Alberta were created, having previously formed part of the North-West Territories. British Columbia was admitted to the Dominion in 1871, and Prince Edward Island in 1873. By chaps. 3 and 27 of the Acts of 1905, the four provisional districts of Alberta, Assiniboia, Saskatchewan, and Athabaska were formed into the two Provinces of Alberta and Saskatchewan, and were admitted into the Dominion on the 1st Sept. 1905. Yukon was made a separate territory by Chap. 6, Acts of Canadian Parliament 1898. Newfoundland remains a separate colony.

OTTAWA is 3,540 miles from London; letters are six to nine days in transit. Telegraph charges, from 1*s.* to 3*s.* 2*d.* per word.

GOVERNMENT.

Governor-General and Commander-in-Chief, Right Hon. the Earl Grey, P.C., G.C.M.G. (appointed 1904 for five years) £10,000

Aides-de-Camp, Capt. D. O. C. Newton, M.V.O., Mdx. Reg.; Lt. F. A. U. Pickering, 2 Dns., each 205

Governor-General's Secretary & Military Sec., Col. Sir J. Hanbury-Williams, K.C.V.O., C.M.G. 750

Comptroller of the Household, Clement Edward Gresham Leveson-Gower.

Private Secretary, Arthur F. Sladen.

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council. The legislative power is a Parliament, consisting of an Upper House, styled the Senate, and a House of Commons. The Senate consists at present of 87 members, distributed between the various provinces thus: 24 for *Ontario*, 24 for *Quebec*, 10 for *Nova Scotia*, 10 for *New Brunswick*, 4 for *Prince Edward Island*, 3 for *British Columbia*, 4 for *Manitoba*, 4 for *Alberta*, and 4 for *Saskatchewan*. The members of the Senate are appointed for life by the Crown on the nomination of the Ministry for the time being; each nominee must be thirty years old, a resident in the province for which he is appointed, a naturalborn or naturalised subject of the King, and the owner of a property qualification amounting to $4,000. The House of Commons is chosen every five years at longest, and the newly-elected Parliament consists of 221 members; 86 being elected for *Ontario*, 65 for *Quebec*, 18 for *Nova Scotia*, 13 for *New Brunswick*, 10 for *Manitoba*, 7 for *British Columbia*, 4 for *Prince Edward Island*, 7 for *Alberta*, 10 for *Saskatchewan*, and 1 for *Yukon*. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, each of which returns a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Each province has also a separate Legislature and

administration, with a Lieutenant-Governor, appointed by the Governor-General, at the head of the Executive. Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by a separate judge, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

Trade with United Kingdom.

The principal articles of trade between Canada and the U.K. in 1908 were as follows :—

Domestic Exports to United Kingdom :

Animals	$8 800,915	Fish	$3,502,954
Bacon	10,784,930	Fruit (Apples)	4,422,772
Butter	823,761	Hams	568,829
Cheese	22,763,735	Leather	1,871,397
Corn : Wheat	35,349,602	Pulp for Paper	485,199
Oats	2,644,863	Skins & Furs	1,140,476
Pease	387,266	Wood & Timber	11,843,094
Flour	4,815,805		

Domestic Imports from United Kingdom :

Cottons	$12,266,128	Flax, Hemp & Jute Manufs.	$2,681,633
Earthen & China Ware	1,250,296	Jute Cloth	1,231,043
Oats	1,501,821	Leather Manufs.	856,267

* The financial year now ends on March 31, and not on June 30 as formerly.

THE PROVINCE OF ONTARIO contains a total area of 222,000 sq. miles, and a population of 2,167,978, according to the census of 1901.

The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 106 members elected for four years (no property qualification being necessary), representing 102 electoral districts into which the Province is divided, but which differ from those sending members to the Dominion Parliament. The Executive Council consists of ten members, eight of whom act as the Ministry of the Province, and two are without portfolio; the legislature meets every year at Toronto. The principal cities are Toronto, the capital of the Province, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity (population, 207,971); Hamilton, the "Birmingham of Canada" (52,550); Ottawa, the Federal capital, with a large lumber trade and woodenware manufactories (59,502); London (37,983), Kingston (18,043), Belleville (9,117), Chatham (9,075), Stratford (9,959), Guelph (11,496), St. Catharines (9,946), Brantford (16,613), St. Thomas (11,485), Windsor (12,154).

In 1907 the total area of cleared land was 14,116,554 acres, of which 9,323,624 acres were under crops, the total value of the land being $673,505,427. The total area under pasture was 3,349,101 acres, with 326,290 acres of orchards and vineyards. Average production in bushels per acre: Fall wheat, 23; spring wheat, 17·1; barley, 28·3; oats, 28·5; rye, 15·5; peas, 21·6; corn, 64·7; buckwheat, 22·5; beans, 16·6; potatoes, 113; turnips, 392; hay (tons), 1·18. 1,237 cheese factories produced 157,418,139 lb. of cheese, valued at $18,569,207, and 215 creameries made 11,289,126 lb. of butter ($2,513,922). There were 725,666 horses, 2,926,236 cattle, 1,106,083 sheep, 2,049,666 pigs, and 13,428,076 poultry in 1907. Fruit is grown on an extensive scale; there are vineyards and peach orchards of 50 or 60 acres in extent, and innumerable apple orchards. The Ontario Agricultural College at Guelph supplies a general education, together with a technical training in agriculture. The students meet part of their expenses by labouring on the experimental farm, the annual balance of cost for board, washing, and tuition being from £10 to £15 for natives and from £20 to £30 for students from other parts. Free grants of land are obtainable in this Province, and improved farms can also be bought at advantageous rates.

Lieutenant-Governor, Col. John Morrison Gibson, K.C., LL.D.	$10,000
Official Sec., Maj. J. F. Macdonald	1,400
Asst. Sec., Capt. D. D. Young; Lt. A. H. Gibson	600
Premier and President of the Council, Hon. Sir James P. Whitney, LL.D.	9,000
Attorney.-Gen., Hon. J. J. Foy, LL.D., K.C.	6,000
Deputy, J. R. Cartwright, M.A., K.C.	3,750
Treasurer, Col. A. J. Matheson	6,000
Assist. Treas., C. H. Sproule	3,000
Education, Hon. R. A. Pyne, M.D.	6,000
Deputy, A. H. U. Colquhoun, LL.D.	3,000
Agriculture, Hon. James S. Duff	6,000
Deputy, C. C. James, M.A.	3,000
Lands, Forests & Mines, Hon. F. Cochrane	6,000
Deputy, Lands, A. White	3,750
Deputy, Mines, T. W. Gibson	3,000
Provincial Secretary, Hon. W. J. Hanna	6,000
Assistant, Thomas Mulvey, K.C.	3,000
Public Works, Hon. J. O. Reaume, M.D.	$6,000
Assistant, A. W. Campbell	3,000
Without Portfolio, Hons. Col. J. S. Hendrie, Adam Beck.	

Chief Justice of Ontario, Hon. Sir Charles Moss	$8,000
Puisne Judges, Court of Appeal, Hons. F. Osler, J. T. Garrow, J. J. McLaren, and R. M. Meredith, each	7,000
C.J., King's Bench, Hon. Sir Glenholme Falconbridge	8,000
Puisne Judges, K.B., Hons. B. M. Britton and W. R. Riddell	7,000
Chief Justice Common Pleas, Hon. Sir W. R. Meredith	8,000
Puisne Judges, Com. Pleas, Hon. Hugh MacMahon and J. V. Teetzel, each	7,000
Chancellor, Hon. Sir John Alexander Boyd, K.C.M.G.	8,000
Puisne Judges, Hon. James Magee and Hon. F. Latchford, each	7,000
Chief Justice, Exchequer, Hon. Sir William Mulock, K.C.M.G.	8,000
Puisne Judges, Hon. F. A. Anglin and Hon. R. C. Clute, each	7,000
Master in Ordinary, Thomas Hodgins, K.C.	4,000
Registrar Supreme Ct., Ct. of Appeal, N. F. Paterson, K.C.	2,100
Master in Chambers, J. S. Cartwright, K.C.	3,300

Emigration Agent in England, P. Byrne, James Street, Liverpool.

THE PROVINCE of QUEBEC contains an area estimated at 346,928 square miles, and a population (census 1901) of 1,620,974.

The Government of the Province is vested in a Lieutenant-Governor and a Legislative Council, consisting of 24 members appointed for life, and a Legislative Assembly of 74 members elected for five years to represent the same number of electoral districts in the Province. The principal cities are Quebec (population, 68,824), the capital of the Province, with a large export timber trade, and the great seaport town of Canada; and Montreal (population, 300,000), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence Rivers. Other important cities are Three Rivers (8,334), Hull (11,265), Sherbrooke (10,110), St. Hyacinthe (10,016), Levis (7,301). Ocean-going steamers ascend the St. Lawrence as far as Montreal. In 1905 1,228,200 tons of ocean-going shipping entered, and 1,256,930 tons cleared at Montreal.

The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 100,000,000 acres, of which 45,000,000 are under licence to cut timber. The wood-pulp industry is assuming great importance; several large factories have recently been built, and the value of the output, which was only $800,000 at the last census, is now probably ten times that amount. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings,

and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on 30 June, 1907, was 6,468,215 acres. In 1906 there were 1,392 cheese factories, 627 butter factories, and 736 butter and cheese factories combined.

Lieutenant-Governor, Hon. Sir C. Alphonse P. Pelletier, P.C. £2,000
Aide-de-Camp, Captain V. Pelletier ... *hon.*
Private Sec., A. Genereux 250
Prime Minister and Attorney-Gen., Hon. Sir Lomer Gouin 1,000
Lands and Forests, Hon. Adelard Turgeon, C.V.O., C.M.G. 800
Provincial Treasurer, Hon. W. A. Weir... 800
Agriculture, Hon. L. Jules Allard..... 800
Provincial Secretary, Hon. L. R. Roy 800
Public Works and Labour, Hon. L. A. Taschereau..... 800
Colonisation, Mines, and Fisheries, Hon. Charles R. Devlin..... 800
Without Portfolio, Hon. John C. Kaine.
Chief Justice, K.B., Hon. Sir Henri T. Taschereau $8,000
Puisne Judges, Hons. H. Archambaault; Jean Blanchet, LL.D.; J. Lavergne; N. W. Trenholme; A. G. Cross .....each £1,000
Ch. Just. Sup. Court, Sir M. M. Tait..... $8,000
Do. (acting), Hon. Sir François Langelier 8,000
Puisne Judges, Sir L. A. Jetté; M. Mathieu; E. Cimon; L. O. Loranger; C. H. Pelletier, LL.D.; C. P. Davidson, LL.D.; Ch. C. de Lorimier, LL.D.; S. Pagnuelo; Louis Tellier; W. Lynch; J. A. Gagné; J. J. Curran; F. X. Lemieux, LL.D.; J. E. Robidoux; A. Rochon; H. C. St. Pierre; Thomas Fortin; N. Charbonneau; H. G. Carrol; John Dunlop; M. Hutchinson; A. Malouin; L. J. Cannon; J. C. McCorkill; A. A. Bruneau; D. Monet; P. Demers; Ed. Guerin; and P. G. Martineau
each $5,000 to $7,000

Quebec is 2,634 nautical miles from London.

NOVA SCOTIA, a Province of the Dominion, is a peninsula between 43° 30′—47° N. lat. and 60°—66° 15′ W. long., and is connected with New Brunswick by a low fertile isthmus about sixteen miles wide. It comprises an area (with Cape Breton Island) of 20,600 square miles, one-fifth part of which consists of lakes, rivers, and inlets of the sea; of the whole, about 9,000,000 acres are fit for tillage—that is, over half the entire area—and the soil in the western half of the Province, particularly in the Annapolis Valley and around the Basin of Minas, is unsurpassed for fertility, owing to the rich marine deposits left on the shore-land by the tides of the Bay of Fundy. The climate is delightful, and the winter is not so cold as in other parts of the Dominion. The population of the entire Province in 1901 was 459,574. In 1907 there were 5,064,968 acres of land occupied (2,219,573 improved), of which 883,472 acres were under crop, 1,282,050 acres in pasture, and 54,051 acres in gardens and orchards, the remainder being woodland. Hay is the most important crop of the Province, occupying one-fourth of all the improved land, and yielding over 900,000 tons. Fruit is extensively cultivated, and Nova Scotia apples are claimed to be the best in the world (2,000,000 bushels in 1907), the principal district being the Annapolis Valley. Halifax, the capital, is one of the terminals of the Inter-Colonial Railway, and has a magnificent harbour covering ten square miles, which is one of the principal winter ports of Canada, and the *entrepôt* of a large trade with the West Indies and South America, with a dockyard and a dry dock which can accommodate the largest vessels afloat.

The coal deposits are extensive and of good quality (5,730,660 tons in 1907); iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney, Cape Breton; gold mines are being profitably worked. The principal fisheries are upon the eastern coast, and the largest catches in value made are cod, halibut, haddock, mackerel, herring, salmon, and lobsters. The manufacturing interest is growing. There is a Government agricultural college and experimental farm near Truro for men and women. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at $80 per 100 acres, and 80 cents per acre for any additional quantity. Hunting, shooting and fishing abound; among wild animals there are bears, foxes, moose-deer, otter, mink, sable, musquash, hares, racoons, and squirrels; and among the feathered game are the woodcock, plover, snipe, partridges, ducks, geese, and curlew.

Nova Scotia has a Provincial Government, administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of 21 members, and a Legislative Assembly of 38 members.

CAPITAL, Halifax (population, 47,000). Other towns—Dartmouth (6,000), Truro (6,430), Windsor (3,398), Sydney (13,000), Sydney Mines (5,000), Glace Bay (17,000), N. Sydney (4,646), Annapolis Royal (1,018), Yarmouth (6,430), Amherst (8,000), Pictou (3,235), New Glasgow (4,447), and Lunenburg (2,916).

Lieutenant-Governor, His Hon. Duncan Cameron Fraser $9,000
Private Sec., Alister Fraser 1,250
Provincial Secretary, Hon. G. H. Murray *(Premier)* 6,000
Deputy Sec. and Clerk of the Executive Council, F. F. Mathers 2,400
Commissioner, Public Works and Mines, Hon. C. P. Chisholm 5,000
Deputy Comm. of Mines, &c., Hiram Donkin 2,400
Attorney-Gen., Hon. William T. Pipes, K.C. 5,000
Without Office, Hons. David McPherson, B. F. Pearson, J. M. Mack, O. T. Daniels, James Macdonald, and H. S. Le Blanc.
Chief Justice, Hon. Chas. J. Townshend..£1,000
Judge in Equity, Hon. Wallace Graham... 1,000
Puisne Judges, Hons. N. H. Meagher, Benjamin Russell, J. W. Longley, A. Drysdale, and F. A. Lawrence.....each 800
Judge, Vice-Admiralty Court, Hon. James McDonald 123
Secretary of Industries and Immigration, A. S. Barnstead .....

Agent-General for Nova Scotia in London, John Howard, 57A Pall Mall, S.W.

Halifax is 2,463 miles from Liverpool.

CAPE BRETON ISLAND, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,125 square miles, with a population of 97,190 inhabitants. The chief town is Sydney, on the eastern coast, having valuable collieries in the neighbourhood. The Inter-colonial Railway connects the island with the mainland.

NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47′—69° W. long., and comprises an area of 27,985 square miles, with a population in 1901 of 331,120. It was first colonised by British subjects in 1761, and in 1783 by disbanded troops from New England. The chief industrial pursuits arise from the produce of the forests and the fisheries. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities. According to the census of 1891 the occupied land amounted to 4,471,250 acres, of which 1,509,790 acres were improved, 1,018,704 acres being under crop, 479,607 acres in pasture, and 11,479 acres devoted to gardens and orchards. The value of agricultural produce in 1900 was $12,873,480. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. Sport of all kinds is abundant. The fisheries include salmon, cod, mackerel, herring, and shad, and were in 1905 of the value of $4,671,084, ranking second in importance to those of Nova Scotia. St. John is one of the principal winter ports of Canada, and is connected by the Intercolonial Railway with Montreal.

The Provincial Government of New Brunswick is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 46 members elected by the people.

CAPITAL, Fredericton. Pop. (1901), 7,117; chief cities, St. John (40,711) and Moncton (9,026).

Lieutenant-Governor, Lemuel John Tweedie, K.C., LL.D.	$9,000
Premier and Attorney-General, Hon. J. Douglas Hazen	2,100
Provincial Secretary, Hon. James K. Flemming	2,100

Public Works, Hon. John Morrissy	2,100
Surveyor-Gen., Hon. W. C. Hazen Grimmer	1,700
Agriculture, Hon. Lauchlan P. Farris	1,700
Solicitor-Gen., Hon. Harry F. McLeod	1,200
Chief Justice, Hon. Frederick E. Parker	6,000
Judge, Vice-Admiralty, Hon. E. McLeod.	
Judge, Divorce and Matrimonial Causes, Hon. G. F. Gregory	
Puisne Judges, Daniel L. Hanington, Pierre A. Landry, Ezekiel McLeod, George F. Gregory, Albert S. White.	

Agent-General in London, Hon. Charles A. Duff Miller, 17 Leather Market, Bermondsey, S.E.

Fredericton is 2,748 miles from Liverpool *viâ* Cape Race, or 2,535 miles *viâ* Belleisle and Chatham, N.B.

MANITOBA, formerly the Red River Settlement, was formed into a distinct Province in 1870, and admitted into the Confederation on 15th July in the same year. It is situated in about the centre of the continent, between 49°—53° N. lat. and 95°—101° W. long. (these parallels and meridians forming its boundaries). Its area is 72,864 square miles. Its population, census 1906, was 365,688. The Assiniboine and Red Rivers intersect the Province, and the soil is fertile and productive; emigration is invited and encouraged, and liberal grants of land are made to settlers. In 1907 4,834,827 acres were cultivated, of which 2,789,553 acres were under wheat, and the crops were 39,688,266 bushels of wheat, 42,140,744 oats 16,752,724 barley, and 33,628 flax, rye, and peas. The main line of the Canadian Pacific, the Canadian Northern and Grand Trunk Pacific Railways traverse Manitoba, and there are several other lines in operation. The Red and Assiniboine Rivers are also navigable for a considerable course in the Province.

The Government of the Province is administered by a Lieutenant-Governor, assisted by an Executive Council of 6 members and a Legislative Assembly of 41 members.

CAPITAL, Winnipeg. Population (1908), 127,000. Other towns, Portage la Prairie, pop. 5,500; and Brandon, pop. 11,000; Neepawa, Minnedosa, Morden, Deloraine, Virden, Carberry, Boissevain, Carman, Dauphin, Emerson, Gretna, Killarney, Manitou, St. Boniface, Selkirk, and Souris.

Lieut.-Gov., Hon. Sir Daniel Hunter McMillan, K.C.M.G.	£1,800
Pres. of Council, Minister of Agriculture and Immigration, and Commissioner of Provincial Lands, Hon. Rodmond P. Roblin	1,200
Provincial Treasurer (vacant)	1,000
Attorney-Gen., Hon. Colin H. Campbell	1,000

Provincial Secretary and Minister of Telephones and Telegraphs, Hon. J. H. Howden	1,000
Chief Justice, Hon. Joseph Dubuc	1,400
Do., Court of Appeal, Hon. H. M. Howell	1,600
Puisne Judges (Appeal), Hons. A. E. Richards, W. E. Perdue, F. H. Phippen, each £1,400; (*K.B.*). Hons. T. G. Mathers, D. A. Macdonald	each 1,200

THE PROVINCE OF SASKATCHEWAN was formed, by an enactment of the Parliament of Canada taking effect September 1, 1905, out of the territory formerly known as the North-West Territories. Saskatchewan covers the area included between longitude 102° and 110° W. of Greenwich, with a small extension east of 102° at the south-eastern corner, and between latitude 49° and 60° N. The Surveyor-General of Canada estimates the Province to contain over 250,000 square miles, of which 86,000 square miles are land suited for grain-growing, 32,000 are land requiring irrigation, 106,387 are land suitable for ranches or other description of farming, and 27,000 square miles are water.

The census of 1901 showed the number of people within the area as 91,460, whilst the quinquennial census taken on June 24, 1906, showed the population to have increased to 257,763. The Province is being rapidly opened up by the means of railways, and is now traversed by the C.P.R. and the Canadian Northern Railway, while the Grand Trunk Pacific will cross the Province from east to west, with a network of branches. Several other railway projects are under consideration for opening up communication between the Province and the deep-water ports on Hudson's Bay, by which it is expected that for a number of months in each year the distance between Saskatchewan and European markets will be reduced almost to that of New York, the greater part of which will be by water.

The principal products of Saskatchewan are grain and cattle, and Government encouragement is being given to the dairy industry. In 1898

here were but 276,253 acres under wheat, whilst n 1907 there were 2,374,058. In 1898 4,780,440 bushels were produced; in 1908 the yield increased to 45,000,000 bushels.

The range country in the Province is of limited extent, being almost entirely confined to the south-western corner, adjoining the range country of Southern Alberta. The northern two-thirds of the Province is known only to the traders of the Hudson's Bay Company and the Indian missionary.

The Government is vested in the Lieutenant-Governor, aided and advised by an Executive Council of four members chosen from time to time by the Lieutenant-Governor. Following the regular procedure of similar British institutions, the members of the Executive Council seek re-election to the Legislative Assembly, in which manner the fullest responsibility to the people is secured. The Province is divided into forty-one electoral districts, each of which is represented in the Legislative Assembly by one member.

The Supreme Court consist of a Chief Justice and 4 puisne judges; it has original and appellate jurisdiction. There are 8 judicial districts, each presided over by a District Court Judge, who also acts as Surrogate Court Judge for his district.

Rural educational areas, approximating twenty-five square miles in extent, are established as school districts, and their affairs each managed by an elective board of trustees.

The climate has a wide range—from 90° to −40° at its greatest extremes. Rainfall is not excessive, and there is an unusual amount of sunshine at all periods of the year.

CAPITAL, Regina.

Lieutenant-Governor, His Honour Amedée Emmanuel Forget	$9,000
Premier, President of Council, and Commissioner of Public Works, Hon. Walter Scott	6,000
Attorney-General, Hon. Alphonse Turgeon	5,000
Provincial Treasurer and Commissioner of Education, and Commissioner of Railways and Telephones, Hon. J. A. Calder	5,000
Provincial Secretary and Commissioner of Agriculture, Hon. W. R. Motherwell	5,000
Clerk of the Executive Council, J. A. Reid	3,000
Clerk of the Legislative Assembly, S. S. Page	750
Chief Justice, Hon. E. V. Wetmore.	
Puisne Judges, Hons. H. W. Newlands, C. Johnstone, J. E. P. Prendergast, and J. H. Lamont.	

THE NORTH-WEST TERRITORIES of Canada comprise the present unorganised part of British North America lying to the north of the Provinces of Quebec, Ontario, Manitoba, Saskatchewan, and Alberta. Their administration is entrusted to the officers of the Royal North-West Mounted Police, the Comptroller of the Force, Lieut.-Col. Fred. White, C.M.G., being also Commissioner of the Territories, with full executive, legislative, and administrative authority. The Territories for nearly 250 years have been under the almost absolute control of the Hudson's Bay Company, but of recent years the Dominion of Canada has taken an increasingly active part in the administration of the affairs of the country. Several expeditions to Hudson's Bay with a view to ascertaining the feasibility of the navigation of the Bay and Straits have been made, and at several points on the shores of the Bay police posts are maintained, being visited from time to time by an exploring ship sent into the Bay for that purpose.

THE PROVINCE OF ALBERTA was erected into a Province by an enactment of the Parliament of Canada, taking effect Sept. 1, 1905, out of the territory acquired from the Hudson's Bay Company, and until the date above mentioned it formed part of the North-West Territories. The total area of the Province is about 253,000 square miles, including about 2,500 square miles of water, and the population (1906) is estimated at 185,000. The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of twenty-five (25) members, elected for four years, representing 25 electoral districts into which the Province is divided. The Executive Council consists of four members.

Alberta is rapidly developing into a grain-producing territory, and where, twenty years ago, there existed a wilderness with scattered bands of primitive Indians and strong detachments of North-West Mounted Police for the sole inhabitants, there is now a succession of wheat fields, homesteads, villages, and towns. While settlers from the U.S., Eastern Canada, and the British Isles arrive in annually increasing numbers. The total area in crops, year 1906, 540,000 acres. Spring wheat, 97,760 acres, yielding 3,332,292 bushels; winter wheat, 43,661 acres, yielding 907,421 bushels; oats, 322,923 acres, yielding 13,192,150 bushels; barley, 75,678 acres, yielding 2,201,179 bushels. The Provincial Government operate 18 creameries, where they manufacture butter. Free homesteads are available for thousands of settlers in desirable localities.

The principal cities are Edmonton, Wetaskiwin, Calgary, Medicine Hat, Lethbridge, and Strathcona.

CAPITAL, Edmonton.

Lieut.-Governor, His Hon. G. H. V. Bulyea	$9,000
Premier and President of the Council, Provincial Treasurer, and Minister of Education, Hon. A. C. Rutherford	6,000
Public Works, Hon. W. H. Cushing	5,000
Attorney-General, Hon. C. W. Cross	5,000
Provincial Secretary and Minister of Agriculture, Hon. W. T. Finlay	5,000
Clerk of the Executive Council, M. J. Macleod	800
Chief Justice, Hon. Arthur L. Sifton.	
Puisne Judges, Hons. Horace Harvey, D. L. Scott, C. A. Stuart, and N. D. Beck.	

THE PROVINCE OF PRINCE EDWARD ISLAND lies in the southern part of the Gulf of St. Lawrence, between New Brunswick and Cape Breton, that is to say, between 46° 47′ N. lat. and 62° 4′–64° 30′ W. long. It is about 140 miles in length, and from 4 to 34 miles in breadth; its area is 2,000 square miles (about equal to that of the English county of Norfolk), and its population (census 1901) 103,259. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756–1763), and compelled the greater part of the French inhabitants to leave, and from that time it has remained British. The island is divided into three counties (King's, Queen's, and Prince), each of which elects 10 representatives. Its inhabitants are almost exclusively engaged in agriculture, considerable attention, however, being devoted to the fisheries and to the breeding of horses and sheep. There were (1891) 718,092 acres of improved land, of which 536,175 acres are under crops, 178,072 acres of pasture land, and 3,845 acres of gardens and

orchards. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at about 20 dollars an acre.

The Provincial Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people.

CAPITAL, Charlottetown, on the shore of Hillsborough Bay, which forms a good harbour, is distant from Liverpool 2,630 miles, transit about 8 days. Population, 12,080. Summerside (pop. 2,875) and Georgetown (pop. 1,060), on the east coast, are also ports of considerable size, and the centres of shipbuilding trade.

Lieutenant-Governor, Hon. D. A. McKinnon, LL.B., K.C. $7,000
Premier, Hon. Francis L. Haszard, K.C. ... *unp.*
Attorney-Gen., H. James Palmer, K.C. 1,200
Prov. Sec. and Treas. and Commiss. of Agriculture, Hon. S. E. Reid 1,200
Public Works, Hon. J. H. Cummisky 1,200
Without Portfolio, Hons. Peter McNutt; Mathew Smith; George E. Hughes; Benjamin Gallant; John M. Clark; and James D. McInnis.
Provincial Auditor, Benjamin Balderston 1,200
Sup. of Education, A. Anderson, LL.D. 1,200
Assist. Sec. and Treas. and Clerk of Exec. Council, Arthur Newbery, L.S.O. 1,200
Sec. Public Works, L. B. McMillan 1,000
Official Court Stenographer and Librarian, W. H. Crosskill 1,200
Registrar of Deeds and Commissioner of Public Lands, W. C. White 1,200
Prothonotary and Clerk of the Crown, John A. Longworth 1,250
Deputy do., Leith E. Brecken 650
Chief Justice and Judge of Vice-Admiralty Court, Hon. W. W. Sullivan 6,000
Assistant Judge of Superior Court & Master of the Rolls, Hon. Edward J. Hodgson ... 5,200
Assist. Judge & V.-C., R. R. Fitzgerald ... 5,200

Agent-General, Harrison Watson, 73 Basinghall Street, E.C.

BRITISH COLUMBIA occupies the western frontier of the Dominion of Canada, extending from the summit of the Rocky Mountains and the 120th meridian of longitude west by the 60th parallel of north latitude to the boundary of Alaska; thence southward and along the Pacific coast (including QUEEN CHARLOTTE ISLANDS and VANCOUVER ISLAND) to the Strait of Fuca; thence easterly along the 49th parallel of latitude to the summit of the Rockies. The area of the mainland is calculated at 383,300 square miles, including Queen Charlotte Islands and Vancouver Island. Coal (output, 1907, 1,800,000 tons) is obtained from the latter, and in the south-eastern parts of Kootenay district near the Crow's Nest Pass; there are also extensive deposits in the Queen Charlotte Islands, in Southern Yale, and in the Skeena River district. The main line of the Canadian Pacific Railway runs through the Province, and several branch lines have been constructed, while the Esquimalt and Nanaimo Railway runs from Victoria to Wellington on Vancouver Island, and the Nelson and Fort Sheppard runs south from Nelson; the Red Mountain Railway from Rossland to the American boundary; the Kaslo and Slocan Railway connects the mines of the Slocan district with Kaslo on Kootenay Lake; the Nakusp and Slocan line connects with the C.P.R. at Arrow Lakes. The Columbia and Western Railway has been built from Trail to Rossland in the Trail Creek mining district, and thence to Midway, in the Yale district, and a short line runs from Victoria to Sidney on Haro Strait. The Grand Trunk Pacific has begun building its main line from Prince Rupert eastward, and the C. P. R. and Canadian Northern are preparing to build trunk lines through the Province. Vancouver and New Westminster cities are connected by an electric tramway. There is a very extensive reserve of timber on the coast, consisting of Douglas fir, spruce, red and yellow cedar, and hemlock; some 160 mills are in operation, with a daily capacity of about 3,400,000 feet. The principal centres of the mines are Rossland, Slocan, Nelson, and Lardeau in West Kootenay, Fernie in East Kootenay, Boundary in Yale, Alberni, Cowichan, and Clayoquot on Vancouver and Texada Islands, and the old placer diggings in Cariboo. The output of the mines was valued at $25,882,560 in 1907, and that of the fisheries at about $7,000,000. Salmon canning (total pack, 1907, 547,459 cases) on the Fraser River and the coast inlets is the principal branch of the fishing industry, but deep-sea fishing is rapidly growing in importance.

The population of the Province, now estimated at 260,000 whites, was in 1901 178,657, classified as follows:—Whites, 133,599 (including half-breeds); Indians, 29,000; half-breeds, 3,356; Chinese, 13,000; Japanese, 6,000; negroes, 500. Several lines of steamships ply to and from the Orient, Great Britain, Australia, San Francisco, and Mexico.

CAPITAL of the Province, Victoria; population (1908), 36,000. Vancouver City, population, 85,000. New Westminster, 9,500; Nanaimo, 7,000; Rossland, 6,100; and Nelson, 6,500.

	1904-1905.	1905-1906.	1906-1907.
Revenue.....	$2,920,461	$3,044,442	$4,444,593

Imports	12,565,019	15,718,579	24,180,452*

* Year ending March 31, 1908.

The Government of the Province consists of a Lieut.-Governor and an Executive Council, together with a Legislative Assembly of 42 members, 6 of them being the Executive Council.

Lieut.-Governor, Hon. James Dunsmuir ... $9,000
Private Sec., H. J. S. Muskett 1,200
Premier & Minister of Mines, Hon. Richard McBride, K.C. 6,500
Provincial Sec. & Minister of Education, Hon. Henry Esson Young, M.D. 5,000
Finance and Agriculture, Hon. R. G. Tatlow 5,000
Attorney-General, Hon. W. J. Bowser 5,000
Lands & Works, Hon. F. J. Fulton..... 5,000
President of Executive Council, Hon. F. Carter Cotton ..... *unp.*
Chief Justice, Hon. Gordon Hunter 7,000
Puisne Judges, Hon. P. Æ. Irving, $6,000; Hon. Archer Martin (*and Admiralty*), $7,000; Hons. Lyman P. Duff; and Aulay Morrison ..... each 6,000

Agent-General, John Herbert Turner, Salisbury House, Finsbury Circus, E.C. $2,000

CANADIAN RAILWAYS.

The CANADIAN PACIFIC stretches across the tire continent, from Montreal to Vancouver on e coast of British Columbia, a total distance 2,909 miles. (*Headquarters*, Montreal.)—he share capital amounts to $194,819,332 and 15,657,077 Debenture Stock. *Chairman*, Sir illiam C. Van Horne. *President*, Sir Thos. G. haughnessy, K.C.V.O. *Secretary*, W. R. Baker. he total length of the Canadian Pacific Railay system is 9,426 miles, 300 of which are cut rough the solid rock. The distance from China, apan, and the Pacific coast generally to Liverool is from 1,000 to 1,200 miles less by the anadian Pacific Railway than by other routes.

The GRAND TRUNK was originally formed in 53 by an Act of the Legislature, and in 1893 a umber of lines were consolidated, forming a ontinuous line through the Provinces of Quebec nd Ontario. *President*, Sir Charles Rivers ilson, G.C.M.G., C.B.; *Vice-President*, Alfred W. mithers; *Secretary*, H. H. Norman. *London ffice*, Dashwood House, New Broad Street, E.C. he total loan and share capital of the company mounts to over £71,000,000 sterling. The ileage of the lines owned and leased is 5,467 iles, including the mileage in the U.S. The astern extremities of the line are Quebec and ortland (Maine), and it extends westward to etroit, Chicago, Grand Haven, and Muskegon, pplying the means of communication with ontreal, Toronto, Hamilton, Niagara, Buffalo, etroit, and all the principal cities and towns the Provinces of Quebec and Ontario. The *nternational Limited*, "The Railway Greyhound f Canada," runs every day of the year. About 500 miles are under construction, including *he Grand Trunk Pacific Railway*, an "All ted" route and the only "all Canadian" transontinental route connecting Halifax, Nova cotia, on the east over the Rocky Mountains to he Pacific Coast.

The INTERCOLONIAL RAILWAY of Canada and he PRINCE EDWARD ISLAND RAILWAY, owned nd operated by the Dominion Government of anada, are the great thoroughfares for travel hrough the Provinces of Quebec, New Brunswick, Nova Scotia, and Prince Edward Island. he mileage of the Intercolonial is 1,449 miles, nd of the Prince Edward Island Railway 267 iles. The building of an inter-provincial ailway was one of the stipulations embodied in he British North America Act, 1867; and in November, 1872, the already partly-constructed ntercolonial Railway, together with the Nova cotia Railway and the European and North merican Railway, were consolidated under the ame of the "Intercolonial Railway of Canada." he railway was extended to Montreal on larch 1, 1898. It is the only railway conecting Nova Scotia and the greater part of ew Brunswick with the rest of the Dominion f Canada, and connecting Montreal, Levis, Riviere du Loup, Campbellton, Moncton, St. ohn, Halifax, Sydney, and North Sydney. At North Sydney connection is made with the Reid Newfoundland Company's Steamship Line for all oints in Newfoundland. Between Prince Edward sland and the mainland there is connection hroughout the year by steamship service.

The CANADIAN NORTHERN RAILWAY was ounded in 1897, has an aggregate mileage of over 5,000 miles, and stretches from the Atlantic to the Rocky Mountains. It runs principally in the wheat-growing and lumbering districts of Manitoba, Saskatchewan and Alberta. *Headquarters*, Toronto; *London Office*, Bond Court, Walbrook, E.C.

Newfoundland.

This island, situated between 46° 37′—51° 39′ N. lat. and 52° 35′—59° 25′ W. long., on the north-east side of the Gulf of St. Lawrence, is about 317 miles long and 316 miles broad, and contains about 40,200 square miles, and at the census of 1901 it had a population of 217,037; not including those resident in the portion of Labrador (3,947) within the jurisdiction of Newfoundland. Of these 75,989 are Roman Catholics, 73,008 Church of England, 61,388 Methodists, 1,497 Presbyterians, and 9,099 various. At the end of 1907 the estimated population of Newfoundland was 230,139, and of Labrador 4,024.

This is the oldest English colony, for it was discovered by John Cabot in 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bona Vista. The inhabitants are chiefly located on the coast-line of the shore and bays, and the greater part are engaged in fishing—for cod in summer, and seal fishing in winter and spring; agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills are in course of erection. Lakes and rivers abound; it is estimated that about one-third of the surface is covered with water. The interior is practically in a state of Nature; but 638 miles of railway have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. The trans-insular line runs to Port-aux-Basques, *viâ* Exploits River and Bay of Islands, with branch connections to Placentia, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). The climate is salubrious, and the people are a strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

The principal exports of the Colony are codfish, value $7,873,172; cod, whale, and seal oil, value $1,011,426; sealskins, $194,300; tinned lobsters, $383,767; copper, copper ore, iron pyrites and other minerals, $1,353,760. The total value of the fishery products in 1907 was $9,942,688.

LABRADOR, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon, in the Straits of Belleisle, on the south, to Cape Chudleigh, at the entrance to Hudson's Straits, on the north; it possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the universe is provided by the Great Falls of Labrador, on the Hamilton River.

The Government is administered by a Governor appointed by the Crown, a responsible executive of nine, a legislative council of not over eighteen, appointed for life, and a House of Assembly of thirty-six, elected by the people every four years. In 1890 the franchise was given to all males of twenty-one years and over.

	1904-5.	1906-7.

Do., Hon. G. M. Johnson	822

* The ministers with an asterisk before their names, together with the Hons. George Knowling, J. S. Pitts, C.M.G., George Shea, and Henry Gear, form the Executive Council.

St. John's, 2,500 miles; transit, seven days.

BRITISH GUIANA,

which includes the settlements of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America. The boundaries have recently been definitely determined by the awards of the arbitrators in the Venezuela-British Guiana and Brazil-British Guiana boundary cases. It has a total area of 90,277·4 square miles, and a seaboard of more than 300 miles. The Essequibo River intersects the country in its entire length, the Corentyne River separates it from Dutch Guiana, and the Cuyuni is the great waterway on the west. The colony is bounded on the south by Brazil, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The two towns are Georgetown (estimated population, Dec. 31, 1906, 48,550) and New Amsterdam (estimated population, Dec. 31, 1906, 9,141). The climate is hot, but not generally unhealthy. The cultivated portion of the country, amounting to 189,457 acres (of which 78,370 acres are in sugar-cane), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like Holland, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potwa River is the Kaitew Falls, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The temperature ranges between 75° and 90° F. The birth-rate in 1906 was 32·9, and the death-rate 28·8 per 1,000. The chief product is sugar, which forms 66 per cent. of the export trade. The leading exports for the year 1906–1907 were as follow:—Sugar, value £1,059,503; rum, £108,460; gold, 86,125 oz., valued at £319,522; diamonds, 4,113 carats, valued at £6,797; timber, £15,556; and balata, £50,106. The population, 31 Dec., 1904, was 301,923, of whom about one-third were Indian immigrants. There are about 10,000 aboriginal Indians, belonging chiefly to Arawak, Acawoi, Carib, and Warau tribes; they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected by the direct vote of the people, in which the Governor has an original and a casting vote, and a veto on any measure at any stage. The Court of Policy discharges the functions of a Legislative Council, except as to levying taxes, which is the prerogative of what is called the Combined Court, composed of the Court of Policy and of 6 Financial Representatives elected directly by the people. There is, besides, the Executive Council, consisting of the Governor, 6 official and 3 unofficial members nominated by the Crown, which exercises all the executive and administrative functions of government other than those before mentioned. There are 1,395 miles of post-office telephone wire, with 4 miles of aerial cable and 535 of telegraph lines, 93 miles for railway signals and 24 miles submarine cables, and 72 post-offices; also post-office telephone exchanges in Georgetown and New Amsterdam, with over 470 subscribers. There is a line of railway along the east sea-coast from Georgetown to Rosignol, Berbice, 60½ miles in length, owned by the Demerara Railway Company, and another line has been opened along the west coast of Demerara, extending from Vreed-en-Hoop to Greenwich Park, 15 miles in length. There is another line connecting the Essequibo and Demerara Rivers, 19 miles in length, and an electric tramway service in the capital.

CAPITAL, Georgetown. Population, 48,802.

Georgetown, 3,963 miles; transit, 16 days by Royal Mail steamer on alternate Wednesdays from Southampton.

BRITISH HONDURAS.

This colony comprises about 7,562 square miles of territory in Central America, extending from 18° 29′ 5″ to 15° 53′ 55″ N. latitude, and from 89° 9′ 22″ to 88° 10′ W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively; it abuts on the Atlantic, and is bounded on the north by Yucatan and Mexico, on the west and south by Guatemala, and on the east by the Caribbean Sea. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten to twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary. The census (1901) gives the population at 37,497 (males, 19,140; females, 18,339); the 1907 estimate is 42,406 (21,606 males, 20,800 females).

The staple products are the natural woods of the colony, principally mahogany and logwood; the export of mahogany, of which the cost ready for shipment is $40 to $50 per 1,000 ft., amounted in the year 1907 to 9,569,566 ft., that of logwood ($10 to $15 per ton) being 6,663 tons. Sugar is grown, and cacao plantations have been started. Fruit, including bananas, plantains, cocoa-nuts, pineapples, oranges, and mangoes, grow well, while inland there are extensive regions of good pasturage, and there are indications that gold and other minerals exist. Other exports are cedar-wood, india-rubber, chewing-gum, and bananas. The latest returns show that about 50,000 acres are under cultivation. The best description of cocoa trees grow wild in the bush. Crown lands can be purchased at $1 per acre, plus cost of survey, which averages about $1.25 per acre, or leased at an annual rental of 10c. to 30c. per acre. There are 45 public elementary schools in the colony, of which 43 are denominational, and 40 in receipt of Government aid; there are also denominational secondary schools in Belize. British Honduras is governed as a Crown Colony. The Executive Council consists of the Colonial Secretary, the Treasurer, the Attorney-General, and two unofficial members appointed by the Sovereign. The Legislative Council includes the following members:—The Colonial Secretary, the Treasurer, the Attorney-General, and not less than five unofficial members appointed by the Sovereign. The Governor is President of both councils.

THE BERMUDAS.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15′ N. lat. and 64° 51′ W. long, comprising an area of about 19 square miles, and containing (1901) an estimated population of 17,535, of whom 6,383 are white, exclusive of army and navy. These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly fortified dockyard, where the British squadron refits.

The Government is administered by a Governor, who is also commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine parishes. There are 1,318 electors, whose individual qualifications are the possession of freehold property of not less value than £60. Hamilton is the chief town and the seat of government; population (1901), 2,246.

The Commonwealth of Australia, &c.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area: the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, often below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a rich grazing country, admirably adapted to the rearing of sheep. The seasons commence about March 21 (Autumn), June 21 (Winter), September 23 (Spring), and December 22 (Summer). The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast; on the east coast, the Hunter, Hawkesbury, Clarence, Richmond, Macleay, Brisbane, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; and the Victoria, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria, on the north. The most extensive mountain system on the Australian continent takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The chief ranges of the system are the Australian Alps in Victoria and New South Wales, the Blue Mountains and the Liverpool Range in New South Wales, and the Craig Range in Queensland, the highest point being Mount Kosciusko (7,328 ft.), 327 miles from Sydney, N.S.W. Lakes are numerous, but nearly all are salt, depending for their supplies of water upon the rivers and floods, and alternating from immense reedy swamps to areas of submerged levels, with broad mud-banks for shores that render the water absolutely unapproachable. But the scarcity of the natural water supply has been, to a great measure, mitigated by successful borings. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

HISTORICAL EPITOME.

"The Great South Land" is believed to have been first seen by De Gonneville, a French navigator, in 1503, and was inserted in a map constructed by Le Testu, of Dieppe, about the year 1542. About 1605 De Quiros, a Spaniard, sailed, with De Torres as his lieutenant, from Lima, Peru, for the Great South Land, and touching land, named it Tierra Austral. About twelve years later a Dutch venturer, with two ships, *Pera* and *Arnhem*, explored the northern coast of Queensland, where Jan Carstensz, in 1623, also penetrated the great northern gulf, and named it Carpentaria, after the Governor of the Dutch Indies. Further desultory exploration of the coast-line was carried on by the Dutch, who visited the southern and western shores from 1620 to 1630, and in 1642 Abel Jansen Tasman sailed to the islands of New Zealand and Tasmania, which he named Van Diemen's Land, after the Governor of Batavia. In 1688 Dampier visited and explored nearly 1,000 miles of the north-west coast of Australia, which he revisited in 1699 in H.M.S. *Roebuck*, but no further efforts of importance were made for seventy years, when Captain Cook, of H.M.S. *Endeavour*, with members of an astronomical expedition, landed at Poverty Bay, New Zealand, on October 8, 1769, and afterwards sailed round the islands and explored the south-eastern coast of Australia, which he named New South Wales. In his subsequent voyages round the world Captain Cook revisited New Zealand, and from his reports an English fleet anchored in Botany Bay (1788) and effected a settlement at Port Jackson, which was reinforced by free settlers in 1795, when Governor Hunter arrived at Sydney to take over the administration of New South Wales. In 1798 Bass and Flinders explored the coast of Victoria and sailed round Tasmania, while Port Phillip was discovered in 1802. Hobart was founded in 1804, and in 1805 sheep were introduced into New South Wales. The misadventures of Captain Bligh, of the *Bounty*, occurred in 1806, but in 1810 New South Wales was already on the road to prosperity, which was further enhanced by the discovery of the fertile plains westward of the Blue Mountains. Tasmania was made a separate government in 1825. Western Australia was founded in 1829, and in 1835 a permanent settlement was made at Melbourne, whence the present State of Victoria sprang in 1837, the same year seeing Adelaide founded by the colonists of South Australia. In 1840 the transportation of convicts to New South Wales was discontinued, and in 1841 New Zealand was constituted a separate government, the towns of New Plymouth and Nelson being founded in that year. In 1842 Brisbane was founded, the population of the Australian mainland being over 145,000 at that date. In 1851 the Port Phillip district of New South Wales, with a population exceeding 75,000, was proclaimed a separate colony, to be thenceforth known as Victoria. A great impetus to immigration was given in that year by the discovery of auriferous districts in New South Wales and Victoria. In 1854 the electric tele-

aph brought Australia into closer touch with reat Britain, and in 1856–7 responsible vernment was inaugurated in Tasmania and uth Australia. In 1859 the Moreton Bay settlement was erected into the colony of Queensland. 1861 the population of the various States as estimated at over 1,090,000, of which number ictoria contained 541,000, New South Wales 0,000, and Tasmania 90,000. In 1871 the pulation numbered nearly 1,700,000 (Victoria 0,000, New South Wales 500,000, South Australia 185,000, Queensland 120,000, Tasmania 0,000, and Western Australia 100,000). In 79–80 international exhibitions were held at dney and Melbourne, and in 1881 the population of Australia was taken at 3,000,000, the st notable increases being New South Wales to 0,000, Victoria 860,000, South Australia 280,000, d Queensland 213,000. In 1884–5 motions bodying the spirit of federation were successfly proposed in various legislatures. In 1885 e Government of New South Wales inaugurated e sharing of Imperial burdens by sending oops to help the "Old Country" in the Soudan. 1890 further steps were taken towards the option of the federation, and in that year the estern Australian Constitution was promulged, and from that date schemes embodying e idea were debated in the several States. 1897 the Diamond Jubilee of Queen Victoria presented an opportunity for a meeting the Premiers in London, and the free erchange of views between Australian and perial statesmen. On March 16, 1898, the nmonwealth Bill was adopted by the Federal nvention at Melbourne, and after ratification the several States the Act was ratified by e Imperial Parliament on July 9, 1900, the uguration of the Commonwealth of Australia ing place at Sydney on Jan. 1, 1901, a ssage from the Queen to the people of stralia being read by the *Earl of Hopetoun*, vernor-General. H.R.H. the Prince of Wales en H.R.H. the Duke of Cornwall and York) s designated by Queen Victoria for the purse of opening the Commonwealth Parliament, l bidden to undertake the duty by King ward VII., in spite of the lamented death of Queen in 1901. The Prince and Princess ed from Portsmouth, and declared Parliant open at Melbourne on May 9. The Earl Hopetoun (now Marquess of Linlithgow) igned his post in 1902, and was succeeded in 3 by *Lord Tennyson*, to be succeeded in 1904 by *d Northcote*, who held office until 9 Sept., 3, when the *Earl of Dudley* became Governor-neral. The area of the Commonwealth is estimated at 2,974,581 square miles, containing a population of 3,773,801 at the census of 1901, including 6,851 half-caste aborigines. Of this total 1,933,500 were ascertained to be of English descent, 413,700 Scottish, 651,000 Irish, 18,400 Aborigines, 36,000 Chinese, and 130,600 foreigners. By religions there were in 1901, 1,497,576 members of the Church of England, 426,105 Presbyterians, 504,101 Methodists, 319,731 other Protestants, 850,620 Roman Catholics, and 15,239 Jews. The capitals of the various States are Sydney (pop. 550,600 in 1907), Melbourne (pop. 538,000), Adelaide (pop. 178,300), Brisbane (pop. 135,655), Perth (pop. 50,380), and Hobart (pop. 35,685).

The Commonwealth of Australia is a confederation of the six "Original States" of New South Wales, Victoria, Queensland, South Australia, Tasmania, and Western Australia, the executive power being vested in the Sovereign (through the Governor-General), assisted by an Executive Council of seven members.

Legislative power is vested in a Federal Parliament, consisting of the Sovereign (represented by the Governor-General), a Senate of 36 (six from each of the Original States) and a House of Representatives elected on a population basis in such a manner that no Original State has less than five representatives. Such powers as are not vested in the Federal Parliament are regarded as remaining in the Legislatures of the several States, in which particular the Commonwealth differs from the Dominion of Canada, where the residuum of Legislative capacity is in the Dominion Parliament. The difference may be briefly stated in the following way:—In the Dominion the Central Parliament may legislate on all present matters, and such as may occur hereafter, except where its power is expressly delegated to the Provincial Legislatures. In the Commonwealth the Federal Parliament may only legislate on certain matters, or to the degree, surrendered to it by the federating States.

Defence.—A scheme of universal military training has been promulgated, and in eight years from its adoption 214,000 men trained and equipped for war would be available. Naval defence has formed the subject of negotiations with the Imperial Government, and appears to be in process of satisfactory settlement.

Commonwealth Capital.—The question of site for the Commonwealth capital has proved itself a stumbling-block. The decision was left over when the Commonwealth was inaugurated, and has been frequently postponed, the latest suggestion being Canberra, in N.S.W. Meanwhile the seat of Government is at Melbourne.

* Compiled mainly from census results of succeeding year.
† Including Revenue collected by Commonwealth Government.
‡ Figures given for years prior to 1904 are aggregates of entries and clearances for the six States and include Interstate Shipping. For the three years 1904 to 1906 the figures relate to Oversea Shipping only, and comprise one entry and one clearance only for each voyage.
§ For year ended 30 June.

I. NEW SOUTH WALES.

The State of New South Wales is situated ween the 29th and 37th parallels of S. lat. 141st and 154th meridians of E. long., and nprises an area of 310,367 square miles—*i.e.*, re than six times the area of England, and rly three times the size of Great Britain and land—with a population (census March 31, 1901) 712,456 males and 646,677 females, or a total 1,359,133, and 845,387 males, 737,232 females, a total of 1,582,619 on 30th June, 1908. The ths for the year 1907 were 42,195, deaths 16,410, marriages 12,189. The number of aborigines, luding half-castes, in the State is 6,960, of om 2,347 are full bloods.

The great plains are admirably adapted for ep-farming, and several breeds of sheep, in- ling the celebrated merino, were introduced 1813. In 1792 there were but 23 head of tle, 11 horses, 105 sheep, and 43 pigs. On the December, 1907, there were 578,325 horses, 016 dairy cows, 1,993,068 all other cattle, 31.839 sheep, and 216,145 pigs. In 1907, 446,000 lb. (stated as in the grease) of wool, ued at £17,185,000, were produced.

Minerals.—The goldfields were discovered in . Coal, coke, copper, silver, lead, zinc, nuth, tin, iron, antimony, asbestos, platinum, lite, cobalt, and kerosene shale are also found; in small quantities, diamonds, rubies, opals, other precious stones. The total value of erals raised during 1907 was £10,295,290, coal unting for £2,922,419, silver-lead and ore 558,632, and gold £1,050,730.

Agriculture is one of the principal industries he State; 2,570,137 acres are under cultivation, ducing during the year ended 31 March, 1908, 5,884 bushels of wheat, 4,527,854 bushels of ze, 851,776 bushels of oats, besides other kinds rain, with 55,882 tons of potatoes, and 3,438 of tobacco. Sugar-cane to the extent of 390 tons was produced; also 778,500 gallons of e, and 1,079,868 cases of oranges, lemons, &c. citrus fruit); and almost every kind of fruit vegetable may be grown. The total extent nd alienated and in process of alienation on e 30, 1907, was 50,486,733 acres, while the area nd leased for pastoral occupation and home- d, mining, and other purposes at the same was 126,081,293 acres. At Sydney the mean perature in the shade for 49 years averaged the mean temperature in the shade for the h coast is 65·9°, Hunter and Manning district , south coast 59·4°, northern tableland 57·8°, ral tableland 57·6°, southern tableland 52·7°, h-western slope 64·8°, central western slope , south-western slope 58·2°, north-western 67·5°, central western plain 65·3°, Riverina ict 61·4°, and western division 65·5.

e western portion of the country is not well ered, but immense reservoirs are being con- cted for irrigation purposes, and many sian bores have been laid down. The ing and the Murrumbidgee, both tributaries he Murray, which divides the State from oria, are only navigable for part of the year. eastern or coastal district is watered by the ed, Richmond, Clarence, Macleay, Hastings, ning, Karuah, Hunter, Hawkesbury, Shoal- n, Clyde, Moruya, Tuross, Bega, Towamba, Snowy.

Government.—"Responsible government" was olished by the Constitution Act, 18 & 19 c. 54, and is vested in a Governor appointed by the Crown, and a Legislative Council consisting of not less than 21 members; the Council in October 1908, consisted of 61 members. The Legislative Assembly consists of 90 members, representing 90 electoral districts. Each member of the Legislative Assembly receives £300 per annum, and members of both Houses travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. With few exceptions all natural-born or naturalised persons, 21 years of age, who have resided 12 months in the State and three months in the district, are entitled to the franchise, which was conferred upon women in 1902, and was first exercised by them in 1904.

Religion.—All religions are free. There is no establishment, and all payments are voluntary, with the exception of such as remain due by the State under former arrangements. About two-thirds of the people are Protestants, the members of the Church of England in New South Wales, according to the census of 1901, numbering 623,131; Roman Catholics numbering 347,286, Presbyterians 132,617, and Methodists 137,638. The places of worship in the State number about 5,850.

Education.—Education is compulsory and free, school fees in State, primary, and superior schools being abolished in October, 1906. The total enrolment in 1907 in 3,050 State schools was 235,736, and the average daily attendance 152,607. The State expenditure on Education, Science, and Art was £1,045,382. The University of Sydney, with which 4 colleges are affiliated, including the Women's College, was incorporated in 1851. In addition to the State schools there are 806 private colleges and schools, with 57,440 scholars.

Manufactories and Works.—In 1907 there were 4,387 manufactories and works. In 1906, 77,822 hands were employed, 66,667 being males and 20,527 females.

Old Age Pensions.—Since July, 1901, Old Age Pensions amounting to £26 a year have been granted under certain conditions to persons over 65 years of age, who have been resident in the State 25 years, and are in receipt of an income of not more than £52 per annum.

Hospitals.—There are (31 Dec., 1907) 135 hospitals in the State, 20 of them being in the Metropolitan district, and 115 in the country.

Communications.—There were open on 30 June, 1908, 3,473 miles of Government railway, upon the construction of which £45,683,484 have been spent. In 1907-8 the net earnings amounted to £2,229,295. There are also 81½ miles of private railway lines. There are also 132¼ miles of Government tramways (upon which £3,732,991 were spent, the working expenses 79·95, leaving a net profit in 1907-8 of £202,929), and 6¾ miles of private tramways. Of telegraphs there are 15,910 miles open, with 82,249 miles of wire and 1,278 stations; messages transmitted outside New South Wales numbering 1,143,988, inland 2,903,631, total 4,047,619, inclusive of 346,027 messages in transit; those received from outside New South Wales numbering 846,664, inland 2,903,631, total 3,750,295. The Post Offices and receiving offices numbered 2,319, the number of letters and postcards conveyed being 137,228,658; newspapers, 48,340,646; packets and book parcels, 35,816,853; and parcels, 1,374,701.

Shipping.—In 1907 the number of vessels entered and cleared was 6,443, with a total tonnage of 12,080,235.

Banking, &c.—There were (30 June, 1908) 14 banks of issue, with total assets £50,396,975, within N.S.W., and liabilities £45,971,186. The savings bank deposits on 1 Jan., 1908, amounted to £17,530,157.

Crime.—The number of prisoners of all kinds in gaol on 31 December, 1907, was 1,462, a decrease of 61 compared with the same day of 1906.

Defences.—On 31 December, 1907, the strength of the military and naval forces in the State was as follows:—*Military:* Permanent 501, militia 4,783, volunteers 1,908, rifle clubs 10,980, cadets 6,779, unattached list of officers, reserve of officers and chaplains 237, total, 25,188. *Naval Forces:* 403.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of over 200 miles, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The city extends four miles north and south by three miles east and west; and contains (1906) 116½ miles of streets, with 22,296 dwellings and a population of 128,370 on 31 December, 1907; or, including suburbs, 1,660 miles of streets, 208,918 houses, with a population of 577,180 on 31 December, 1907. In addition to the Government buildings, there are the Branch Royal Mint, the University, National Art Gallery, museums, free public library, observatory, two cathedrals, and numerous churches. The parks within the metropolitan area are 4,508 acres in extent, in addition to which the National Park measures 33,719 acres and Kuringgai Chase 35,300 acres. Other towns are Newcastle (with incorporated suburbs), 63,250; Broken Hill, 31,000; Bathurst, 9,400; Goulburn, 10,800; Granville, 6,500; Parramatta, 13,000; Lismore, 5,700; Maitland, E. and W., 11,000; Grafton and South Grafton, 5,900; Albury, 7,000; Tamworth, 6,400; Lithgow, 7,000; Wagga Wagga, 5,700; and Orange and E. Orange, 6,900.

	1906 1907.	1907 1908.

NORFOLK ISLAND, the residence of the descendants of the Mutineers of the *Bounty*, removed from Pitcairn Island, is attached to New South Wales, the officer of the administration being a Chief Secretary's Department Sydney.—*Dep. Administrator,* W. Houston, C.M.G.; *Officer in Charge,* M. V. Murphy. It was given a constitution with a resident magistrate and elective council in 1896. This was dissolved in 1903, when executive council of a President, two elected and four appointed members, was constituted. Pop. (1908) males 520, females 420, total 940, including Melanesians. *Resident Magistrate,* Captain C. S. Elliott, R.N.

Lord Howe Island (450 miles north-east of Sydney). Pop. (1908) males 61, females 40, total 101. *Visiting Magistrate,* Frank Farnell, J.P.

The Sydney, via Suez Canal, is 12,043 miles from London; transit, from 31 to 42 days.

II. VICTORIA.

This territory originally formed part of New South Wales (known as the Port Phillip district), which it was severed, and erected into a separate colony in the year 1851. It comprises the south-east corner of Australia, at that part of its territory projects farthest into the southern latitudes: it lies between the 34th and 39th parallels of south latitude, and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles. The entire area comprises 87,884 square miles, or 56,245,760 acres, of which 4,126,823 were under cultivation in 1907–8.

Population.—Its population at the census on the 31st March, 1901, was 1,201,341 (603,883 males and 597,458 females), including about 7,349 Chinese and 652 aborigines. At the census of 1901 the native Victorians numbered 876,003; natives of other Australian States, 65,094; English, 132,512; Irish, 61,512; Scottish, 35,751; Welsh, 5,178; Chinese, 6,230; and other nationalities 19,643. The Victorian aborigines at the time of the first colonisation of the district were about 15,000 in number; in 1851 the official return gave 2,693, and in 1901 652 (367 males and 285 females). The estimated population on Dec. 31, 1907, was 1,258,140; males, 631,140; females, 627,000. The birth-rate of Victoria for 1907 was 25·16 per 1,000; the death-rate was 11·66 per 1,000; and the marriage rate was 7·68 per 1,000.

Religion.—Members of the Church of England numbered 424,011, "Protestants" 8,693, Presbyterians 191,503, Methodists 180,272, Baptists 32,648, and Roman Catholics 263,710.

Minerals.—Victoria is one of the leading gold-producing States in Australia. From the discovery of gold in 1851 to the end of the year 1907, the quantity raised—69,956,448 oz.—amounted in value to £279,471,595, the amount produced in 1907 being 754,270 oz. The value of other minerals raised to the end of 1907, consisting principally of tin, copper, coal, and antimony, is estimated at about £6,516,924 (including building stone, &c., £3,537,644).

Communications.—There were 3,447 miles of railway completed at the end of June, 1907, all of which belonged to the Government, the capital cost amounting to £41,547,223. The gross receipts were £4,022,231, and the working expenses £2,370,695, leaving a net income of £1,651,536, or 3·98 per cent.

There were 1,115 stations for electric telegraphs, extending over 7,008 miles (poles), which produced a revenue of £136,542 in 1907, the total mileage of wire being 15,326, and the telegrams transmitted numbering 2,567,289. There were also 41,391 miles of telephone wire.

Trade and Industry.—Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State; and the manufactures (4,530 factories, &c., employing 90,903 hands in 1907) are mainly for home consumption. In 1907 the chief exports were: Wool, £7,372,148; gold (including specie), £2,690,540; butter, £1,917,910; wheat, flour, and biscuit £2,451,002; oats, £121,186; leather, £420,123; skins and hides, £1,106,766; and live stock, £1,176,473. A trade is also springing up in preserved and frozen meats, the value of the exports (excluding bacon and hams) being £677,625 in 1907. The principal imports of the State in 1907 were wool, £3,111,249; live stock, £2,361,137; sugar and molasses, £800,313; gold (including specie), £839,585; cottons, £1,331,761; woollens, £1,058,874; and timber, £759,433.

Agriculture.—Agriculture has of late years much improved, wheat and oats chiefly being cultivated; the dairy industry has also made marked progress. Of the 4,126,823 acres under cultivation in 1907–8, 1,847,121 were wheat crops, and 398,749 oats, and 682,194 acres were cut for hay. In 1907–8, 1,365,600 gallons of wine were produced. There were in 1907 709,279 milch cows, producing 63,746,354 lb. of butter and 4,397,969 lb. of cheese.

Shipping.—The shipping statistics of the State furnish abundant evidence of the magnitude and value of its trade. In 1907 4,800 vessels, of 8,460,051 tons, entered and cleared.

III. SOUTH AUSTRALIA.

South Australia was established as a British Province by 4 & 5 Will. IV., cap. 95, but not proclaimed until 28 Dec., 1836, so that its history falls within Queen Victoria's reign. It is situated between 11° and 37° S. lat. and 129° and 141° E. long., and covers 12° of longitude and 27° of latitude. The total length is 1,850 miles, the extreme breadth 650 miles, with about 2,000 miles of sea-board, the total area being 903,690 sq. miles.

Population.—The population at the 1901 census was 362,604 (males, 184,422; females, 178,182); on 31 December, 1907, 385,672 (males, 204,106; females, 181,566); birth rate (1906) 23·70 death rate 10·29, and marriage rate 7·12 per 1,000.

Meteorology.—The mean temperature of the original colony is 74°, with a mean rainfall of 16 inches on the plains and 42 inches in the hills, the 63 years' average at Adelaide being 20 inches. The winter temperature averages 53°, with 100° for summer, but the climate is so dry that the inconvenience is comparatively slight.

Government.—The government is administered by a Governor, the Legislative Council with 18 members, and the House of Assembly with 42 members. There are 4 Cabinet Ministers, members of the Legislature and *ex officio* members of the Executive Council, of which the Governor is president. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 55,068 (14,549 women) in 1906, those for the Assembly numbering 191,311 (94,124 women).

pcal Government.—There are 32 Municipalities 142 District Councils, the aggregate assessit of property within their boundaries being 858,545, and the revenue (1906) £208,183, and enditure (1906), chiefly on roads, £290,683.

aw and Justice.—The Supreme Court is pred over by the Chief Justice and two Puisne ges; there are Courts of Vice-Admiralty and olvency, as well as Local Civil Courts, with endiary magistrates and the usual Police rts. The Supreme Court convictions average it 112 annually, which is at the rate of 1 in y 3,360 of the population. The Real Property (1858) simplifies the transfer of land, and e the passing of the Act land to the value 17,148,760 has been dealt with.

eligion.—In 1905 accommodation was prod for 32,811 members of the Church of Eng-, 79,445 Methodists, 12,990 Congregationalists, 56 Baptists, 22,018 German Lutherans, in tion to about 50,000 Roman Catholics, in r places of worship.

ducation.—There is an endowed university at laide, founded in 1881, with 360 underuates; all classes are open to women. tate school of mines and industries has also n established. Primary education is prod by the State, and controlled by a responsible ster; it is secular, compulsory, and free; e are 711 State schools, with 1,429 teachers 62,822 scholars; the expenditure in 1906 was 7,828, the total capital outlay on school lings amounting to £525,670. Private schools ber 217 (1906), with 725 teachers and 10,570 lars. The Public Library, Museum, Art Gallery ocal institutes are supported or assisted by the e, the sum expended for 1906–7 was £12,205.

nking.—There are 7 banking institutions in aide, with 96 branches, having a total liy of £8,291,952 (including £313,751 Perl Inscribed Stock) and assets £7,760,674 in ; their note issue amounted to £418,072. Government Savings Bank on 30th June, had 163 agencies, with 161,855 depositors 320,872, bearing interest at 3½ per cent.), and 5 depositors with £16,168 not bearing est.

nmerce in 1906.—Total value, £21,635,435.

IV.—QUEENSLAND

This State, situated in lat. 10° 40′—29° S., and long. 138°—153° 30′ E., comprises the whole north-eastern portion of the Australian continent.

Queensland proper possesses an area of 670,500 square miles (*i.e.*, equal to more than 5½ times the area of the United Kingdom), of which the Government have parted with the fee simple of 14,924,417 acres; under a system of deferred payment, 4,778,908 more are in process of alienation out of the total of 429,120,000 acres, but an additional area of 263,716,812 acres has been leased out for sheep and cattle runs and grazing-farms, 275,621 acres as scrub selections, 110,145 acres under gold-mining and mineral lease, and 11,446 for special purposes, leaving 145,302,651 practically unoccupied. The estimated population, Dec. 31, 1907, numbered 546,467, of whom 298,040 were males and 248,427 females. Wheat, oats, and barley flourish on the Darling downs; while a still larger area is devoted to maize, which yields an average crop of about 22 bushels per acre. Both English and sweet potatoes are cultivated; as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, cocoa-nuts, mangoes, plums, and various English fruits. In the year 1907, 188,307 tons of sugar were produced. The chief articles of export the produce of the State in 1907 were: Wool, £4,133,130; gold, £1,756,543; silver, £84,257; tin, £223,451; copper, £1,043,928; pearl and tortoise-shell, £68,664; meat, including extract, £875,170; green fruit, £141,387; sugar, £1,779,624; hides and skins, £389,257; tallow, £235,824; live stock, £1,405,512. At Brisbane the average temperature for 1907 was 69·3°; the maximum in the shade was 96·2°, and the minimum 39·4°. Wool, gold, meat, and sugar are at present the staple productions; rich gold, copper, tin, lead, quicksilver, antimony, and coal deposits are found in several districts; timber also, of fine quality for cabinet manufacture, the Moreton Bay pine and the *Dammara robusta*, together with the cedar of Queensland, forming valuable products for export. At the end of 1907 the horses numbered 488,486, cattle 3,892,232, sheep 16,738,047, and pigs 133,246.

At the end of 1907 there were 3,197 miles of railway open. In 1907 there were 1,089 State schools in operation, with 2,394 teachers and an average daily attendance of 66,849 children; and 173 private and grammar schools, with an average attendance of 12,897.

The banking deposits on the 31st Dec., 1907, were £15,120,072, apart from the £4,790,626 in the hands of the Government Savings Bank.

The number of sea-going vessels entered inwards during 1907 was 846 (tonnage 1,446,635), and the number outwards 833 (tonnage, 1,402,331).

	1906.	1907.
Public revenue	£4,004,514	£4,490,440
Public expenditure	3,807,067	4,032,160
Public debt, 31 Dec.	39,068,827	39,068,827
Gold output	oz. 544,636	oz. 465,882
Total imports	£8,311,466	£9,429,691
Total exports	12,754,289	14,684,019

Domestic imports from U.K., 1907 (*B. of Trade*):—

Apparel, &c.	£62,416	Machinery	£100,555
Cottons	453,266	Iron	733,384
Woollens	273,098	Spirits	91,147

£2,737,961

Domestic exports to U.K., 1907 (*B. of Trade*):—

Butter	£473,104	Silver Ore	£77,223
Copper	833,409	Tallow and Stearine	223,779
Lead	68,564	Wool	1,726,309
Meat, Fresh	231,984		
Shells	108,121		

£3,868,56[illegible]

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that a Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane (pop. 135,655). Rockhampton (19,691), Maryborough (12,900), Townsville (15,506), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg. Other places of importance are Ipswich (15,246), Toowoomba (14,087), Charters Towers (20,976), and Gympie (14,430).

The Constitution comprises a Governor, Legislative Council of 44 members nominated for life by the Crown, and Assembly of 72 members elected by the people. There is a Supreme Court, with a Chief Justice, and three Puisne Judges; District Courts, presided over by District Court Judges; and Inferior Courts at all the principal towns, presided over by Police Magistrates.

CAPITAL, Brisbane. Population within 10-mile radius (1907), 135,655.

V.—TASMANIA

island in the South Pacific Ocean, off the ern extremity of Australia, from which it is ated by Bass Straits, in which are situated Furneaux Group and King Island, included n the colony. It lies between 40° 33′–43° lat. and 144° 39′–148° 23′ E. long., and con- an area of 26,215 square miles, or 16,778,000 of land, of which, on 1st March, 1905, 8 acres were under crop, and 378,346 under cially-sown grass; wheat, 43,091; while 302 acres (exclusive of mineral land) were d from the Crown principally for pastoral oses, the terms of purchase being £1 an for cash, or £1 6s. 8d. in 14 yearly instal-. The population (31 Dec., 1904) was 0, of whom 89,345 belonged to the Church gland, 32,355 were Roman Catholics, 26,952 odists, and 12,285 Presbyterians. The ginals have become quite extinct, the last male, "Truganini"—having died in 1876. sland was first discovered by Tasman, in nber, 1642, and named by him "Van n's Land," in honour of his patron, the overnor of the Dutch possessions in India. subsequently partially explored by Captain and in 1803 Lieut. Bowen, despatched from y with a few soldiers and convicts to form l settlement, fixed upon the spot where t now stands. In 1825 it was severed from outh Wales and formed into a distinct . Transportation of criminals was abolish- 853, and the name officially changed from iemen's Land to Tasmania. The climate and salubrious, and well suited to European utions, and the hot winds of Australia do ch the island. At Hobart in 1902 the mean annual temperature was 53·1°, the mean summer temperature being 58·6°, and that of winter 46·6°; the average rainfall for Hobart, 1904, was 22·08 inches. The surface of the country is generally undulating forest land with mountains from 1,500 to 5,000 feet in height, and wide expanses of level, open plains. The chief products of the State are wool, gold, silver, copper, timber, tin, and fruit, and sheep; the two latter being among the principal industries. The amount of stock on 1 March, 1905, was sheep (and lambs), 1,556,460; cattle, 208,206; horses, 36,565; and pigs, 77,943. The forests of Tasmania abound in the most beautiful cabinet woods and the largest size timbers, adapted for every variety of purpose. The fauna include the Tasmanian devil and native tiger, and the curious duck-billed platypus; while the wombat, the wallaby, and the opossum supply valuable skins. There are silver and copper fields on the west coast; over 45,000 acres have been taken on mineral leases, and mines of both lode and stream tin are being worked in the north. The value of tin exported in 1904 was £281,541; of silver £276,522, and of copper £568,982; iron-ore exists, and the value of gold exported in 1904 was £187,703. Coal of a good quality, and in easily accessible positions, is very generally distributed over the island. There are in all 620 miles of railway open, including the main line running from Hobart to Launceston, through the island; and 321 telegraph stations, with 3,432 miles of wire, including a submarine cable (432 miles) communicating with the Universal Telegraph System; 1,450 miles of telephone wire; 383 post-stations, and 3,231 miles of post roads. On Dec. 31, 1904, the total registered shipping for the year was 55 steamers and 158 sailing vessels, with a total tonnage of 24,717 tons. The inward entries during 1904 were 957 (tonnage, 1,043,425), and the outward entries 944 (tonnage, 1,050,182).

A Department of Agriculture was formed in 1902. Primary education is administered by a Department, and there are 356 State schools.

	1905-6.	1906-7
Public revenue	£900,657	£960,843
Public expenditure	853,105	893,800
	1905.	1906.
Public debt, 30 June	9,724,732	9,800,631
Total imports	2,651,752	3,030,514
Total exports	3,711,616	3,752,501
Imports from U.K. (1906–7)	406,407	461,237
Exports to U.K. (1906–7)	476,816	553,223

By the Act of 1855 the Legislative Council and House of Assembly are constituted "The Parliament." The former consists of 18 members, elected for six years; and the latter of 35 members, elected for three years. The Governor, who is appointed by the Crown, is aided by a Cabinet of responsible Ministers. The franchise has been extended to women.

CAPITAL, City of Hobart. Population, with suburbs, 34,949. Other towns are Launceston (pop. 21,650), Zeehan, Ulverstone, E. Devonport, Latrobe, Waratah, Westbury, Longford, Burnie, and Queenstown.

Governor, H.E. Sir Gerald Strickland, K.C.M.G., Count Della Catena (appointed 1904)	£2,750 *hon.*
Private Sec., George Brown, I.S.O.	
Private Secretary and A.D.C., Capt. W. O. Cottrell-Dormer, 6 D.G.

Secy., Herbert W. Ely.

Hobart, 13,250 miles; transit, 36 to 40 days.

VI.—WESTERN AUSTRALIA

includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 52′ E. long., and from 13° 30′ to 35° 8′ S. lat. Its extreme length is, from north to south, 1,480 miles, and 1,000 from east to west, and its total area 975,920 square miles. The jarrah (*Eucalyptus marginata*), sometimes erroneously called mahogany, covers immense tracts of land in the S.W. portion of the State; its timber is extraordinarily durable, and as it resists the white ant and the *Teredo navalis* it is admirably adapted for railway sleepers, and for piles for bridges and harbour works. The sandal-wood (*Santalum cygnorum*) has long been an article of export; the tuart (*Eucalyptus gomphocephala*) and karri (*Eucalyptus diversicolor*), eucalypti of enormous size, are valuable timber trees. A new industry, which has sprung up since 1903, is that of obtaining the bark of the mallet tree, exported for tanning purposes. In 1905 the export of this article amounted to £154,087, and in 1906 to £140,720. The occupied portion of the State extends along the western coast for about 1,200 miles, while the mining population has penetrated over 500 miles into the interior, and the population on June 30, 1907, was 254,182. The average temperature of Perth (lat. 32° S.) for the past 21 years was 65°, while the mean for the barometer for 21 years was 30·05 inches. There are wet and dry seasons, the former lasting from May to October. The total rainfall at Perth during 1906 was 31·5, the average for the past 31 years being 33·03. The chief products are gold, wool, timber, pearls and pearl-shells, silver, lead, copper, tin, coal, iron, sandal wood, mallet bark for tanning, cereals, fruit, wine, horses, cattle and hides and skins. Cultivation in the past was retarded by want of sufficient labour and means of transport, but the conditions are now rapidly improving; sandal-wood and other trees grow abundantly in the south-western district, and there are at present 3,525 acres of vineyard in the State. Large areas of good wheat-growing soil also exist in the southern division, and 250,283 acres were under cultivation for the cereal in 1906. Magnetic iron, lead, copper, and tin ores exist in large quantities.

Gold Statistics.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 207,111 fine oz. in 1895, 251,618 oz. in 1896, 603,847 oz. in 1897, 939,490 oz. in 1898, 1,470,605 oz. in 1899, 1,414,311 oz. in 1900, 1,703,416 oz. in 1901, 1,871,038 oz. in 1902, 2,064,801 oz. in 1903, 1,983,230 oz. in 1904, 1,955,316 oz. in 1905, 1,794,546 oz. in 1906, and 838,256 oz. in the first six months of 1907. To the Coolgardie group belong the following goldfields—North Coolgardie, Broad Arrow, North-East Coolgardie, East Coolgardie, and Coolgardie. The largest amounts have been obtained from the East Coolgardie field, Murchison being next in productiveness. Gold is also found in the Kimberley, Pilbara, West Pilbara, Ashburton, Gascoyne, East Murchison, Dundas, Donnybrook, Peak Hill, Yalgoo, Mt. Margaret, Yilgarn, and Phillips River districts. The total amount produced in the State from 1886 to 30 June, 1907, is 17,504,489 fine oz.; of this amount 8,259,050 oz. were received at the Royal Mint, Perth.

There are 2,507 miles of railway open. A proposed trans-continental line is now under survey. There is direct telegraphic communication with England and with South Africa. The principal ports are Fremantle, Albany, Bunbury, and Broome. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The exports are of wool, gold, jarrah and karri timber, silver, tin, copper ore, sandalwood, mallet bark for tanning, pearls and pearl-shells, kangaroo skins, &c. The estimated value of the exports for 1906 was:—Wool, £603,680; timber, £708,993; sandalwood, £70,958; pearls, £112,500 (estimated); shell, £142,682; gold, £2,935,102; gold specie, £4,413,592; hides and skins, £185,704. The stock returns of the State are as follows:—Horses, 104,922; cattle, 690,011; sheep, 3,332,983; and pigs, 56,203. In 1906 the vessels entered inwards numbered 607 (tonnage 1,787,712), and those outwards 609 (tonnage 1,792,176).

	1905-6.	1906-7.
Revenue	£3,973,050	£3,837,546
Expenditure	4,045,461	3,932,827
Gross debt, 30 June	18,058,553	19,222,638

	1905.	1906.
Imports	6,481,874	6,820,933
Exports	9,871,019	9,832,670
Raw Gold exports	3,300,402	2,935,192
Imports from U.K.	2,278,933	2,315,566
Exports to U.K.	4,210,201	5,147,346

The State is ruled by a Governor appointed

the Crown, a Legislative Council, and a Legis-
ive Assembly.

Religious Statistics.—At the census of 1901, 617 belonged to the Church of England, and 584 were Roman Catholics.

Education.—Education is compulsory and free, d numerous elementary schools are under the ntrol of the Minister of Education. There is a ining college, a technical school, a school of nes at Kalgoorlie, and a school in Perth for the gher education of boys. The foundation of a iversity is under consideration. The total ount expended on education during the year ded 30 June, 1907, was £169,754.

The principal towns in the State are :—Perth op., including suburbs, 53,800), on the right nk of the Swan River estuary, 12 miles m Fremantle ; Fremantle (including suburbs, 900), and the following municipalities :— pany (3,435), Coolgardie (3,830), Kalgoorlie 780), and Boulder (5,658).

ansit from London to Perth, 27 days.

Dominion of New Zealand.

The Dominion of New Zealand consists of three main islands in the South Pacific Ocean, known as the North, South and Stewart Islands, situate about 1,200 miles E. of New South Wales, between 33°—53° S. lat. and 162° E. long.—173° W. long., with several groups of smaller islands lying at some distance from the principal group. Portions of New Zealand were explored by Tasman, under the direction of the Dutch East India Company, in 1642, and visited at various times during the 18th century, and in 1777 by Captain Cook. The first settlement of Europeans was made in 1814, but no colonisation took place until 1839. In 1841 New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The entire area (inclusive of the Chatham, Auckland, Kermadec, Cook, and other islands) is stated at 104,751 square miles, or 67,040,640 acres (being a little smaller than Great Britain and Ireland), of which two-thirds are fitted for agriculture and grazing. The North Island comprises about 44,468 sq. miles ; South Island, 58,525 ; Stewart Island, 665, with only 288 inhabitants. An adjacent group, named the Chatham Islands, contain 375 sq. miles ; and the Cook and other Pacific islands recently included within the boundaries of the dominion, 280 sq. miles. Kermadec and other Islands 438 sq. miles.

The European population at the census of April 29, 1906, was 888,578 (471,008 males and 417,570 females). The native population (Maoris) in 1906, was 47,731 (25,538 males and 22,193 females), chiefly in the North Island, and 12,340, excluding 776 absent from the islands (6,224 males and 6,116 females) in the Cook and other Pacific islands, making the total population, including Maoris, &c., 948,649 persons. Since the census the estimated population on 30th June, 1908, is ascertained to have been 1,000,882 persons. In 1840 a treaty was concluded at Waitangi with the native chiefs, whereby the sovereignty of the islands was ceded to Great Britain, while the chiefs were guaranteed the possession of their lands, forests, &c., the right of pre-emption being reserved to the Crown if they wished to alienate any portion. This right was abolished by legislation in 1862, when the Crown relinquished its right of pre-emption, whilst at the same time the purchase of native lands for the Crown did not abate, but continued side by side with the private purchases until 1894, when the right of private purchase was withdrawn. The Maori Lands Administration Act of 1900 with its amendments restrains natives from pauperising themselves by parting with the freehold of the balance of their lands.

New Zealand in many parts is very mountainous ; a mountain chain traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height. The extremes of daily temperature vary throughout the year only by an average of 20° ; London is 7° colder than the North Island and 4° colder than the South Island. The mean annual temperature of the whole dominion for the different seasons is :— Spring, 55° ; Summer, 63° ; Autumn, 57° ; and Winter, 48° ; and the climate is admirably adapted for raising every fruit, flower, and edible that flourishes in Great Britain. Amongst the productions are the Kauri pine (found only at the northern extremity of the islands), much

valued for shipbuilding, and for its resin (Kauri gum); and the native flax, which is used for the manufacture of ropes and twine. The principal exports in 1907 were wool (£7,657,278), frozen meat (£3,420,664), gold (£2,027,490), butter and cheese (£2,277,700), agricultural products, tallow, Kauri gum and timber. Coal-mining is one of the largest industries, the output in 1907 being 1,831,009 tons, the approximate total output to the end of 1907 being 25,247,542 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, has been found in Taranaki, and in the form of brown haematite at Parapara, near Nelson; copper is also found.

The total extent of land under all kinds of crop (excluding lands in artificial grasses), and of land broken up but not under crop, is (1908) 1,758,864 acres, while there are 13,125,753 acres of land in sown grass, of which 8,167,520 acres had not been previously ploughed. In 1907 the number of sheep was 20,583,772; horned cattle, 1,816,299; and horses, 352,832. In March, 1908, there were 2,474 miles of Government railway lines in working order, and more under construction; and 113 miles of private lines, together with an excellent coaching system. During 1907 the vessels entered inwards numbered 645 (tonnage, 1,254,266), and those entered outwards 615 (tonnage, 1,225,382), exclusive of coasting vessels.

The general government consists of a Governor aided by a Ministry, a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for seven years only), at present consisting of 48 members, and a House of Representatives, consisting of 80 members elected for three years. Four of the members are Maoris elected by the natives. Women are entitled to possess as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election nor for appointment to the Legislative Council.

The State system of education is free, secular, and compulsory. There were (December, 1907) 1,963 public primary schools, with 3,937 teachers and 141,071 scholars; there are also 302 private schools, with 18,088 scholars, and, in addition, 99 village schools for the Maoris. The higher education of boys and girls in the cities and large towns is carried on in 28 endowed colleges and grammar schools. The University of New Zealand has power to confer degrees. The annual postal circulation was (1907) 92,136,573 letters and postcards, 25,417,073 newspapers, and 24,583,600 books and packets, and the work is effected by 2,064 post-offices. There are 9,656 miles of telegraph line with 29,343 miles of wire.

Defences.—New Zealand has torpedo-boats and submarine mining steamers; the Calliope Dock, capable of docking two warships, was subsidised by the Imperial Government in 1898.

CAPITAL, Wellington, in the North Island.

The estimated population of the chief cities and towns on 1 January, 1908, was as follows: Wellington (and suburbs), 70,947; Auckland (and suburbs), 89,577; Dunedin (and suburbs), 59,495; Christchurch (and suburbs), 73,462; Invercargill (and suburbs), 13,419; Napier, 10,115; Palmerston North, 11,299; Nelson, 8,305; and Oamaru, 5,180.

Governor and Commander-in-Chief, H.E. Rt. Hon. Lord Plunket, K.C.M.G., K.C.V.O. £7,000
Private Sec., H. C. Waterfield.
A.D.C.'s, Capt. the Hon. Nigel Charles Gathorne-Hardy, 5th Northd. Fus.; Lieut. Edward Lycett Lyon, 18th Hussars; Capt. John Hugh Boscawen (honorary).

* EXECUTIVE COUNCIL (August, 1908).
(His Excellency the Governor presides.)

Prime Minister, Minister of Finance, Defence, and Tourist and Health Resorts, Rt. Hon. Sir Joseph George Ward, P.C., K.C.M.G.....	£1,600
Min. of Public Works and Railways, Hon. William Hall-Jones	1,300

Cook Islands Administration.—The Cook and er islands, annexed to the British Empire in ober, 1900, and included in the boundaries of w Zealand since June, 1901, consist of the nds of Rarotonga, Aitutaki, Mangaia, Atiu, uke, Mitiaro, Penrhyn, Manihiki, Rakahanga, Niue or Savage Island, together with a few aller islands, and are situated in the South ific, between 8° to 23° S. lat. and 156° to ° W. long. The population consists of about oo natives, and 150 Europeans and other ionalities. The chief products are bananas, nges, and other tropical fruits, copra, coffee, ri-shell, and hats (Niue). The exports average ut £50,000, and the imports about £45,000. otonga is the chief island, with a native tulation of 2,300, and a European popula- of 107. The government is administered lly under the direction of New Zealand. The eral Council of the Cook Islands, under the ction of the Resident Commissioner at Raroga, legislates for all the islands except Niue, ch has a Resident Commissioner and an Island ncil of its own. Makea Ariki still remains he head native chief of the Cook Islands, and ives an allowance from the Government.

dent Commissioner and Chief Judge, arotonga, Lt.-Col. Gudgeon, C.M.G. ... £500
dent Commissioner and Magistrate, iue, H. G. Cornwall ... 300

Wellington, 16,000 miles; transit, 38 days.

Fiji.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45′—21° 10′ S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,435 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), cocoanut, sugar-cane, tea, cotton, maize, tobacco, and arrowroot. Sugar, pearl-shells, maize, bêche-de-mer, copra, and cocoanut oil were for some time the chief exports, but the principal exports in 1907 were sugar, copra, green fruit, turtle-shell, hides, bark, and cocoanuts. The Governor is appointed by the Crown, and is assisted by an Executive Council, consisting of five official members. Laws are passed by a Legislative Council, of which the Governor is president, and which contains ten official and eight unofficial members, of whom six are elected and two (natives) nominated by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (31 March, 1901) was 120,124 (94,397 native Fijians, 17,105 Indian immigrants, 2,459 Europeans, and some Polynesians and others).

* £55,215 to Imperial Government, bearing no interest.

Papua.

The territory of Papua, formerly known as British New Guinea, comprises the southern and south-eastern shores of the island, from the 141st meridian of east longitude eastward as far as East Cape, and thence north-westward as far as the 8th parallel of south latitude in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8th parallel to the 147th degree of east longitude, then in a straight line in a north-westerly direction to the point of intersection of the 6th parallel of south latitude and of the 144th degree of east longitude, and continuing in a west-north-westerly direction to the point of intersection of the 5th parallel of south latitude and of the 141st degree of east longitude, together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups of islands, and all other islands lying between the 8th and the 12th parallels of south latitude, and between the 141st and the 155th degrees of east longitude, and not forming part of the Colony of Queensland; and, furthermore, including all islands and reefs lying in the Gulf of Papua to the northward of the 8th parallel of south latitude. The ports of entry are Samarai, Port Moresby, Daru, and Boiagri.

There is an Executive Council of 6 members, who, with 3 non-official members, form also the Legislative Council.

CAPITAL, Port Moresby. Pop., about 1,500 natives and 100 Europeans.

Pacific Islands.

(1) *The British Solomon Islands*, protected since 1893, and consisting of Guadalcanar, Malaita, San Cristoval, New Georgia, and other islands situated in about 8° S. and 160° E., with a total area of about 8,500 square miles. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1907–8 was £7,430, and the expenditure, £5,923; exports, 1907, £51,602; imports, £49,252. European residents, 230; native pop., 150,000. The seat of government is Tulagi.

Resident Commissioner, Charles M. Woodford £800

(2) *The Gilbert and Ellice Islands Protectorate.* The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 58′ W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52′ S. and long. 169° 35′ E., was included in the Protectorate in 1900. Total area, 166 square miles; population, about 35,000 and 80 Europeans. Revenue, 1906, £4,345; expenditure, £3,385; imports (1900), £20,369; exports (chiefly copra), £21,582.

Resident Commissioner, W. Telfer Campbell £800

(3) *The Tonga or Friendly Islands.*—A protectorate over the Tonga Islands was proclaimed 19 May, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and a population on Jan. 1, 1905, of 21,103 natives of Tonga, 300 other natives, 151 British subjects, 89 foreigners, and 120 half-castes. The limits of the group are between 15′ and 23° 30′ S. and 173° and 177° W. Tongatabu is the seat of government, the king being Jioaji Tubou II. Soil generally is fertile; the principal exports are copra, fungus, green fruit, kava, and candle-nuts. Revenue, 1907, £34,912; expenditure, £33,540; imports, £97,820; exports, £134,193. Of the total shipping, 93,994 (1905), 77,340 tons were British.

Agent and Consul, Hamilton Hunter, C.M.G. £850

(4) *The Phœnix Islands* (Wilkes, Gardner, Birnie, Hull, Enderbury, Phœnix, and Sidney), between 2° 30′ and 4° 30′ S. and 171° and 174° W.

(5) *The Union*, or *Tokelau, Group* of six islands and some islets (Quiros, Fakaafo (3), Nukunono, and Atafu).

Deputy Commissioner, H.M. Agent, Tonga.

(6) *Pitcairn Island*, situate in lat. 25° 3′ 30″ S., long. 130° 8′ 30″ W. Pop. (April, 1907) 144, descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported.

Deputy Commissioner, (*H.M. Consul for the Society Islands*).

Chief Magistrate, Arthur H. Young.

(7) *Fanning Island*, in lat. 3° 51′ 23′ N., long. 159° 21′ 50″ W. Pop., 21 Europeans in connection with Pacific cable station, and about 200 Gilbert Islanders in copra industry.

Deputy Commissioner, William Bent.

(8) *The New Hebrides Group* lies between the 12th and 20th degrees of south latitude and the 165th and 170th of east longitude. A joint commission consisting of British and French naval officers has been appointed to protect the lives and property of British and French subjects, and to maintain order. In 1906 a Convention was signed between Great Britain and France, under which the administration of the Group was assumed by the two Powers. British and French Resident Commissioners were appointed in 1907. Nat. pop. about 100,000, European 677. Principal exports, maize, copra, and bananas, also coffee, timber, and sulphur. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia.

High Commissioner, Sir Everard im Thurn, K.C.M.G., C.B.

Assistant to the High Commissioner, A. W. Mahaffy £800

British Resident Commissioner, M. King ... 800

French Resident Commissioner, C. Nouffiard

(9) There are also a large number of scattered groups and isolated islands.

High Commissioner, The Governor of Fiji... £300

Chief Judicial do., The Chief Justice of Fiji 300

Sec. to High Commn., A. Montgomerie (*actg.*) 450

THE West Indies are an immense number of islands and islets, some of them mere rocks, tending from 10° to 27° North, and from 59° 30′ to 85° West. They are divided by ographers into (1) the Bahamas, (2) the Greater Antilles, and (3) the Lesser Antilles, which the last-named are subdivided into the Leeward and Windward Islands. The ands lying off the coasts of South America and Central America respectively form o separate groups in addition to those already mentioned. The total area of the West lies is probably about 95,000 square miles, of which the Greater Antilles occupy not s than 83,000 square miles. The prevalent character of the islands is bold and moun- nous. The highest points are about 8,000 feet above the sea-level, and several of e islands contain active volcanoes, while nearly all of them show signs of volcanic tion. The mean yearly temperature of the islands is about 78°, but that of the higher nds is often much less. The seasons alternate from drought to moisture, and in most rts of the archipelago there are two wet and two dry seasons. On the whole it may be id that the climate is generally healthy, and between the months of November and May many of the islands it is delightful. The vegetable productions are both varied and undant, the principal articles of commerce including sugar, bananas, oranges, coffee, oa, cotton, pimento, nutmegs, indigo, tobacco, maize, guava, ginger, coco-nuts, notto, aloes, sassafras, the castor-oil tree, cabbage-tree, and medicinal drugs. Of the re common fruits there are the pineapple, pomegranate, cocoa-nut, oranges, lemons, nes, citrons, the mango, shaddock, papaw, banana, and plantain. Yams, sweet potatoes, l manioc also grow freely. The mountains in the greater islands furnish a varied undance of timber, including mahogany, cedar, lignum-vitæ, iron-wood, Indian-fig, well pted for cabinet-work, shipbuilding, and other arts. Indian corn yields abundant crops most everywhere; and rice in the island of Trinidad. The total population is nearly 00,000, of whom above half are negroes, while the remainder are chiefly mulattoes. The nds at the time of their discovery were inhabited partly by the Caribs, a fierce and rlike race, and partly by a less savage race known as the Arrowauks; but both these ive Indian races are now practically extinct. By far the largest of the West Indies are magnificent islands of Cuba and Hispaniola.

The first spot on which Columbus landed in the New World in 1492 was San Salvador, of the Bahamas. On the same voyage Cuba and Hispaniola were discovered, and other islands very shortly afterwards. For some time the West Indies remained in the disputed possession of Spain, subject only to occasional visits from French and English ps. At the commencement of the 17th century, however, the English, French, and tch began to form settlements, and to import negroes from West Africa to work the ntations; and whenever war broke out in Europe it spread to the West Indies. They now divided as follows:—*British:* Jamaica, Turks and Caicos Is.; all the Bahamas; tigua, Montserrat, Nevis, St. Christopher, Dominica, the Virgin and the Cayman Islands, nada, St. Vincent, St. Lucia, Barbados, Trinidad and Tobago; and the islands off the st of British Honduras. *French:* Martinique, Guadaloupe, Deseada, Marie Galanta, Les ntes, St. Bartholomew, and St. Martin (the last partly Dutch). *Dutch:* St. Eustatius, ba, Bonaire, Curaçao, Aruba. *Danish:* Santa Cruz, St. Thomas, St. John. *U.S.A.:* erto Rico. *Venezuelan:* Coche Cuagua, Tortuga, and Margarita. *Independent:* Hispa- la, divided into Hayti and San Domingo and Cuba. The British Islands have an area of ut 13,750 square miles, and a population of 1,350,000. In 1898 a most disastrous ricane swept over the group of islands, almost all of which were affected, while Vincent, Barbados, and St. Lucia were practically devastated. On August 7th, 1899, urther hurricane devastated the island of Montserrat, doing damage also to St. Kitts, is, and Antigua. The island of Puerto Rico (U.S.A.), Guadaloupe (French), and Santa z (Danish) also suffered severely. Further disaster befell St. Vincent in 1902 by the otion of "La Soufrière," one-third of the island being devastated, and Mont Pelée, in rtinique, entirely destroyed the town of St. Pierre. On the 14th January, 1907, nearly entire city of Kingston, Jamaica, and many of the principal residences in the suburbs adjoining parishes of St. Andrew and St. Catherine were destroyed by an earthquake, sing great loss of life and property. The British Islands have still a future in store for n when cane-sugar growing can again profitably be carried on, and in the fruit, cotton, wool industries, which are now rapidly increasing.

JAMAICA.*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43′—18° 32′ North lat. and 76° 11′—78° 21′ W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,193 square miles, and a population, in April, 1891, of 639,491, showing an increase during the previous decade of 58,687; in 1891 the whites numbered 14,692; coloured, 121,955; blacks, 488,624, and there were a number of coolies and Chinese. The estimated population on March 31, 1907, was 830,261.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,423 feet. From those mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 185 miles of railway open. Telegraph stations and post-offices are established in every town and in very many villages; the number of accounts open in the savings banks was 38,830 (1908). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the senior military officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), and of such other persons, not exceeding 10, as the King or the Governor may appoint, called Nominated Members, and 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. 46,542; the next in importance are Spanish Town, pop. 5,019, and Montego Bay, 4,803.

The chief articles of export are: Fruit, 53·9; coffee, 6·4; sugar, 5; dye-woods, 3·6; pimento, 3·1; rum, 8; and minor products, 20. The chief customers are the U.S.A., 59, and the U.K., 21·4.

TURK'S AND CAICOS ISLANDS.

These islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-west of which they are distant about 420 miles. They have an area of about 170 square miles. The population in 1901 was 5,287, of which the principal island, Grand Turk, contains 1,751. Salt is the principal industry of the islands, and Sisal hemp is grown and exported.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turk's and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes.

THE BAHAMAS,

chain of islands lying between 21° 42′—27° 34′ N. lat. and 72° 40′—79° 5′ W. long. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 5,794 square miles, and a population in 1907 of 59,713, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Mayaguana Harbour Island, Great Inagua, Andros Islands, Watlings Island, Rum Cay, Long Cay (T.I.), Ragged Island and Biminis. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1907 being valued at £129,699. The fruit trade, principally with the United States, is also important, the total value of pineapples exported in 1907 being £4,242; bananas, coco-nuts, fruit and vegetables are also exported. Mahogany, lignum-vitæ, logwood, ebony, logwood, and satinwood are found throughout the islands; tobacco, castor-oil plants, and cotton flourish, but enterprise is lacking to encourage these industries. A fibre industry is fairly established, the land under the fibre plant being 25,000 acres, and the value of Bahamas hemp fibre exported in 1907, £46,669. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a Legislative Council of 9 members, and a Representative Assembly of 29 members.

THE LEEWARD ISLANDS.

The Leeward Islands under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3) Dominica, under Administrators; (4) Montserrat; and (5) the Virgin Islands, all, except the latter, having their own local legislature. These 5 presidencies make up the colony of the Leeward Islands, which is administered by a Governor, to whom the Administrators and Commissioners are subordinate, and which has also a general Legislative Council, possessing concurrent legislative powers with the local Legislatures on certain subjects. The federal colony in 1901 contained 127,536 inhabitants (56,952 males and 70,584 females). The General Legislative Council consists of 8 *ex-officio* and 8 elective members with the Governor as President.

(1) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6′ N. lat. and 61° 45′ W. long., and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 17,000 are under cultivation. The population (with Barbuda) in 1901 was 34,953, including 15,861 males and 19,092 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., this is one of those islands which has always been more distinctively English. It was at one time a naval and military station of some importance. It is much less hilly and wooded than the other Leeward Islands. It is largely given up to the cultivation of sugar, and two central sugar factories have been erected, sugar canes being purchased from surrounding estates and peasants. A considerable amount of cotton is being planted; it also exports molasses, tamarinds, and arrow-root. In March, 1898, the Crown Colony system of government was instituted.

	1905–6.	1906–7.	1907–8.

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35′ N., long. 61° 45′ W. Area, 75 square miles. Population, 775. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables. It was formerly a possession of the Codrington family.
Magistrate, O. Nugent £50
Manager, H. G. S. Branch 150
Redonda, a small island with a phosphate industry, has a population (1901) of 18.

(2) ST. CHRISTOPHER (ST. KITTS) AND NEVIS (WITH ANGUILLA).

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population (1901) of 46,446, and a total area of about 150 square miles.

The climate is decidedly healthy for the tropics, the temperature being from 78° to 85°.

St. Kitts, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat. 17° 18 N. and long. 62° 48′ W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 3,711 feet (Mount Misery). The capital, Basseterre, pop. (1901) 9,962, is a port of registry, and had 64 sailing vessels of 1,135 tons in 1907.

Nevis (separated from St. Kitts by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1901 of 12,774. Sugar-cane and cotton are grown. Its greatest elevation is 3,596 feet. Chief town, Charlestown. Pop. (1901), 1,050.

Anguilla is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. Population (1901) 3,890. Salt is the principal production, besides cattle, ponies, and garden stock, while cotton is extensively cultivated.

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20′-15° 45′ N. lat. and 61° 13′—61° 30′ W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coffee, and fruit. The population numbered 29,000 in 1901. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council, consisting of the Administrator who sits as President, and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau, on the south-west coast, population (1901) about 6,000, and Portsmouth, population about 2 500.

(4) MONTSERRAT

is situated in 16° 45′ N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 33½ square miles, and in 1904 a population of 13,127 (6,087 males, 7,040 females). Discovered by Columbus in 1493, it was settled by Englishmen, but conquered and held by the French, and only finally assigned to Great Britain in 1784. It is justly considered the most healthy and beautiful of the Antilles; it contains three active Soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. The lime-tree is largely grown, and 365,000 lb. of Sea Island cotton, to the value of £27,850, were exported in 1907-8. A flourishing fruit and vegetable preserving industry has been started—jams, preserves and pickles, of various sorts, being made in considerable quantities, and shipped to the U.K. and Canada. The chief town is Plymouth, with a population (1901) of 1,461.

	1905-6.	1906-7.	1907-8.

Senior Medical Officer, M. P. Duke 306

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and Denmark, form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27′ N. lat. and 64° 40′ W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1901 was 4,908. There is good pasturage for cows, sheep, and goats. Sugar and cotton are grown in increasing quantity; fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda. The capital of the group is Road Town, on the south-east of Tortola; population (1901), 352.

	1905-6.	1906-7.	1907-8.

Commissioner and Treasurer, R. S. Earl, M.B. £300

THE WINDWARD ISLANDS.

The Windward, or Southern, group of the West Indian islands includes Barbados, St. Lucia, St. Vincent, the Grenadines, Grenada, and Tobago. Of these, Barbados is a separate colony with its own governor, and Tobago is attached to Trinidad. The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of

ernment), St. Vincent, and St. Lucia, with ir dependencies, the Grenadines being divided ween Grenada and St. Vincent. There is one ernor for the three islands; but there is no eral Legislative Council as in the Leeward nds, and no common tariff or treasury. There Court of Appeal, consisting of the judges he three colonies and of Barbados, a common lit, and a common Lunatic Asylum; but, h this exception, each island retains its own itutions, and in the governor's absence is erned by an Administrator subordinate to .

The aggregate population (1906) was 027, and the total area 508 square miles.

ernor and Commander-in-Chief, H.E. SirRalphChampneysWilliams, K.C.M.G. £2,500
rivate Secretary, T. C. Fitzherbert 200
ransit, about 14 days.

GRENADA (AND THE GRENADINES).

renada is situated between the parallels of 30'–12° 58' N. lat. and 61° 20'–61° 35' W. long., is about 21 miles in length and 12 miles in dth; it is about 96 miles north of Trinidad, miles S.S.W. of St. Vincent, and 100 miles . of Barbados. It contains about 85,120 acres, which 30,239 acres are cultivated, and a ulation (including some of the Grenadines) 59,784 (1906). The country is mountainous very picturesque, and the climate is healthy. Grand Etang, a lake on the summit of a ntain ridge about 1,740 feet above the level he sea, and Lake Antoine, are the most re kable natural curiosities: near the former a torium, under Government auspices, has n established. Grenada was discovered by mbus in 1498, and named Conception. It originally colonised by the French, and definitely ceded to Great Britain by the ty of Versailles in 1783.

he soil is very fertile, and cocoa, spices, ber, cotton, coffee, and fruit are grown. The sts are rich in timbers, particularly bullet d, locust, mahogany, white cedar, and a, and vanilla and several varieties of -yielding trees are indigenous. Turtles caught and exported, and whales are met , especially among the Grenadines. The orts chiefly comprise dry goods, bread-stuffs, dware, &c. The Legislative Council consists 4 members, seven of whom are officials. . George's, on the south-west coast, is the f town, and possesses a good harbour.

	1905-6.	1906-7.	1907-8.

The GRENADINES are a chain of small islands between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1907) 7,545.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N. lat. and 60° 58' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (in 1907) of 54,599. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are sugar (5,364 tons in 1907), molasses, cocoa (1,719,700 lb. in 1907)—which is now being extensively cultivated—fuel, and sticks. The chief places are Castries, the capital (pop. 1901, 8,000), and Soufrière (pop. 2,300).

Port Castries, one of the finest in the W.I., is a coaling depôt. In 1907, 716 steamers (tonnage 1,305,957) entered Port Castries, and many British and foreign warships coaled.

Treasurer, H. A. Smallwood 500

ST. VINCENT.

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area of 140 sq. miles, and an estimated population (1908), including dependencies, of 51,779. In 1846 a large number of Portuguese labourers, amounting to 2,400, immigrated hither, and proved a valuable acquisition to the island. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are sugar, molasses, rum, arrowroot, cassava, cocoa, coffee, cotton (for which a factory has been built by the Government), and spices. The St. Vincent arrowroot has a specially good name in London, and its Sea-island cotton is of particularly fine quality. Its chief imports are linen, cotton and woollen manufactures, American flour, fish, &c. The price of Crown lands (which are mountain lands only) averages from £1 to £3 per acre, according to locality and terms of purchase; steps have also been taken to settle the labouring classes on lands specially acquired for the purpose. On May 7, 1902, there was an eruption of the volcano known as "La Soufrière," causing many deaths, and completely destroying all crops and the majority of the buildings in an area of (roughly) one-third of the island.

CAPITAL, Kingstown (pop., 1891, 4,547).

BARBADOS,

the most windward of the West India Islands, is situated in 13° 4′ N., and longitude 59° 37′ W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population in 1907 was estimated at 194,518, being about 1,200 to the square mile. The principal exports are sugar, molasses, rum and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal.

The deposits in the savings bank on March 31, 1908, were £195,745. Liberal provision is made for elementary education, and Harrison's College provides for higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of nine members appointed by the Sovereign, and a House of Assembly of twenty-four members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1906, about 27,000), on the shores of an open roadstead (Carlisle Bay).

Barbados, distant 3,635 miles; transit, 11 days.

TRINIDAD AND TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3′—10° 50′ N. lat. and 61° 39′—62° W. long., and is about 55 miles in length by 40 in breadth, with an area of 1,750 square miles (200,000 acres cultivated), and an estimated population (1906) of 320,000. The island was discovered by Columbus in 1498, was colonized in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 56,100), is one of the finest towns in the West Indies, with electric lighting, tram, and telephone services. Other towns of importance are San Fernando (pop. 7,610), about 30 miles south of the capital; Princestown (pop. 4,497), and Arima (pop. 4,076). A remarkable phenomenon is the pitch lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1907, 141,006 tons (£162,308) were exported. The soil is rich and productive, the most important products being sugar, cocoa, molasses, rum, and coco-nuts, and various kinds of timber and fruits. The chief exports (1907) were:—Sugar, 46,270 tons; rum, 785,483 gals.; molasses, 524,926 gals.; bitters, 34,866 gals.; and cocoa, 49,730,576 lb. Coal is found in Manzanilla, and is indicated in other parts of the island. There are 89 miles of railway open, and harbour improvements, waterworks and sewage operations are in course of construction. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. Thirty-eight steamers from Europe arrive every month, and six from the United States and Canada. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between 11° 9′ N. lat. and 60° 43′ W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with an estimated population (1907) of 19,200. It is one of the most healthy of the West Indies; the temperature varies from 81° to 88°.

There are two towns in the island, viz., Scarborough (pop. 1,370) and Plymouth.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Dutch East India Company took possession of the shores of Table Bay, established a fort, and occupied the lands adjacent, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

THE IMPERIAL GOVERNMENT.

High Commissioner for South Africa (£3,000) *and Governor of the Transvaal*, The Rt. Hon. the Earl of Selborne, G.C.M.G. (1905) £8,000
Imperial Secretary, C. H. Rodwell 1,200
Private Secretary, Dougal O. Malcolm 700
Actina Military Secretary, Major E. C. F. Garraway (S.A.C.) 750
Aide-de-Camp, Lt. E. C. Cameron (Lovat's Scouts) 300
General Officer Commanding, South Africa, General Lord Methuen, G.C.B.
Assistant Military Secretary, Major C. J. Fitzgerald (R.H.G.).
Major-General in Charge of Administration, Maj.-Gen. Sir Arthur R. F. Dorward, K.C.B., D.S.O.

The High Commission.—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner, and by a similar Commission, dated 15th March, 1905, in Lord Selborne, who is also Governor of the Transvaal. The High Commissioner is empowered to invite conferences of representatives of the South African Colonial Governments to meet for the discussion of matters of common interest and to transact business with the representatives of any foreign Power in South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate, and he exercises the control provided by Order in Council over the Administration of the British South Africa Company in Southern Rhodesia (*i.e.*, south of the Zambesi). The Southern Rhodesia Order in Council, 1898, provides for a control by the High Commissioner over legislation, important appointments, and Native affairs in Rhodesia, and for the appointment of a Resident Commissioner, who is paid from Imperial funds and acts as the local representative of the High Commissioner and the Imperial Government. The Administration of Barotziland (North-Western Rhodesia) is placed under the control of the High Commissioner by Order in Council. Since the beginning of 1907 the High Commissioner has also been responsible for the administration of Swaziland.

THE SOUTH AFRICAN CUSTOMS STATISTICAL BUREAU.

As a result of the conference of Customs Officers, held in March, 1904, the various Governments in the Customs Union agreed to the establishment as from July 1, 1905, of a South African Customs Statistical Bureau, whose headquarters are in Cape Town. This Bureau compiles all statistics relating to the imports into and exports from all the colonies and territories in the Customs Union, as well as those relating to inter-colonial trade. The Bureau is also charged with the apportionment of the Customs duties due to each colony or territory on imported goods entered for consumption therein. The Bureau is governed by a Board consisting of the principal officers of Customs of the colonies and territories comprising the South African Customs Union.

Principal, A. J. S. Lewis £950
Customs Union Clerk, N. Dallas Forbes ... 600
Clerk and Accountant, F. Fisher 475
Clerk & Examiner of Accounts, A. G. Ashley 425
Senior Statistical Clerk, J. G. Bam 450
69 clerks, £50 to £395.

CAPE COLONY.

The CAPE OF GOOD HOPE, strictly speaking, is a small promontory near the S.W. extremity of the continent of Africa; but the extensive colony of that name, in which are now included the Diamond Fields, the Transkei territories, Bechuanaland, and Pondoland, is washed by the Atlantic and Indian Oceans on the west and south and south-east, while upon the north and north-east it is bounded by the German Protectorate and each of the other colonies of South Africa. It reaches in S. lat. from 26° to 34° 50′, and in E. long. from 16° 25′ to 30°. Its extreme length from E. to W. is nearly 600 miles, and its breadth 450 miles, with a coast-line of nearly 1,200 miles, and an area of 276,995 square miles, or 177,376,660 acres, according to the latest estimate (1907), of which 43,568,697 acres were not disposed of in 1907. The territory of Walfish Bay, on the west coast, is also a portion of the Colony.

Cape Colony is divided, geographically, into two parts by the main range of mountains, which, as already mentioned, follows the line of the South African coast at a distance of 100 to 150 miles from the sea; and the southern portion is divided again by two other ranges which run across from W. to E., and are not quite so high as the first. Between the mountains and the sea, in the south-western portion of the Colony, are the chief grain and wine producing districts; in the south there are extensive forests; and along the south-eastern coast, where there are summer rains, tobacco and maize are successfully cultivated. Between the two upper ranges of mountains is an elevated tract known as the Great Karroo, which extends from W. to E. for 300 miles, and has a breadth of 70 miles. During a great portion of the year the Karroo is, as its name implies, a dry and barren district, but after rain it is covered with luxuriant vegetation, and supports countless flocks of sheep and many cattle and horses. It is here also that the important industry of ostrich-farming is carried on. The country to the north of the mountains is still more elevated, forming part of the great South African table-land. It supports, like the rest of the Colony, large numbers of sheep, and contains the chief mineral districts. The rivers of South Africa are numerous, but practically useless for either irrigation or navigation. Most of them flow in deep and precipitous ravines, and, except when swollen by the rains, are merely shallow torrents, even the largest having only sufficient water for the smallest craft, or bars at their mouths which render entrance both difficult and dangerous. The climate is healthy, and its peculiar dryness and the uniformity of the temperature cause it to be much favoured by Europeans suffering from pulmonary complaints. The vegetation of South Africa has a peculiar and distinctive character; flowers of great variety abound everywhere. The principal native flora are heaths, proteæ, and stapelias (or carrion flowers), and dense thorny thickets of what is called *bush*, in which are several species of aloe. The native animals are either disappearing altogether or retreating northward owing to the rapid spread of civilization. But elephants and buffaloes are still found on the south coast, and springbok abound.

The *Population* of the whole Colony numbered 2,409,804 when the census was taken on 17 April, 1904, inclusive of the native territories, Griqualand West and Pondoland, the European population then being 579,741 (318,544 males and 261,197 females). The births registered in the ten years 1898–1907 were 53,589, 54,548, 53,117, 53,468, 53,900, 56,278, 56,802, 53,028, 57,870, and 60,415; the deaths in the same period amounting to 40,996, 37,247, 47,604, 41,043, 41,207, 40,826, 40,695, 36,699, 35,609, and 35,491. The Dutch preponderate in the western and the English in the eastern districts.

Education.—The number of schools in operation (June 30, 1908) was 3,726, attended by 174,709 children. There are also five colleges, with 809 students, and a University (*Chancellor*, H.R.H. the Prince of Wales, K.G.), where 8,201 students have matriculated and 969 have taken direct degrees. The expenditure under the Education Vote in the year ended June 30, 1907, was £537,836.

Commerce and Industry.—The principal industries are the production of wool and wine, and the rearing of horses, cattle, and ostriches, but great attention is paid to the culture of wheat, barley, and oats. The principal imports (1907) were: manufactured articles, £10,676,865; foodstuffs, £3,512,017; unmanufactured and raw materials, £965,647. The principal exports (1907) were: diamonds, £8,973,148; gold, £28,249,302; and other produce, £7,282,000.

Minerals, &c.—There are important mines of copper in Namaqualand, the ores being of the richest kind, and yielding a percentage of from 32 to 36. Gold is found in the Knysna division, and manganese in the Paarl. Coal of considerable value is also raised, the output in 1907 being 144,040 tons. The value of diamonds found at Kimberley in 1907 was £5,955,208.

Railways.—The railways are mostly the property of the Government, which on Dec. 31, 1907, owned and worked 3,254 miles. There were also 608 miles of privately owned railways in Cape Colony, Bechuanaland Protectorate, and Rhodesia, worked by Government, and 351 miles privately owned and worked in Cape Colony. The *Cape to Cairo* Railway scheme places Capetown in communication with Bulawayo, the commercial centre of Rhodesia; Salisbury, the capital of Rhodesia; Beira, and the Victoria Falls. To the 31st Dec., 1907, the capital expended by Government was £31,919,340. The returns for 1907 show a profit of £2 16*s.* 11*d.* per cent. per annum on the capital expended.

Posts and Telegraphs.—There were (1907), 1,087 post offices open, and 67,396,463 letters, &c., were conveyed; money and postal orders issued, £1,702,490; savings bank deposits, £2,792,584; telegraph offices, 595, with 31,802 miles of wire; telephone wires, 5,813 miles, with 4,760 sets of instruments; postal revenue, £348,969; telegraph and telephone, £192,441. There is cable communication with Europe *vid* West Coast, *vit* St. Helena and overland, and a direct line to Australia *vid* Natal.

Defence.—The Colonial Forces in time of peace consist of Cape Mounted Riflemen (611 officers and men), and horse and foot volunteers (11,132 officers and men). There is also a body of Mounted Police, with about 1,265 officers and men. In cases of emergency every able-bodied man between 18 and 50 years of age may be called upon to defend the Colony, and there is an Imperial garrison stationed at Wynberg. For external purposes a Cape and West African Squadron is stationed in these waters, having a naval depôt in the Colony at Simon's Bay, where large naval works are being carried out.

Harbours.— Extensive harbour works have been constructed at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. The first three are under the direction of local boards composed of elective and nominee members, while the last named has a board nominated by Government.

At Table Bay (£4,174,016 expended up to 31 December, 1907) the docks consist of an outer basin, area 64 acres, and inner basin, area 8½ acres. Depth of water from 20 ft. to 35 ft. (L.W.O.S.T.). Length of berthage 2¼ miles, with good anchorage and graving dock. The works at Port Elizabeth consist of two jetties 1,160 ft. long, which cost £260,000, and a third jetty 1,460 ft. in length, which cost £185,000. In addition, there is a jetty, 1,380 ft. from the shore, with an aerial ropeway, used principally for explosives traffic.

At East London, situated on the Buffalo River, extensive harbour works have been carried out, costing, including interest on loans, to 31 December, 1907, £2,244,765, and the improvements are still proceeding. The dock area is 100 acres, and present length of quay space 5,601 ft. East London is connected by rail with all the railway systems of Cape Colony and other South African States, and is the shortest Cape Colonial route to the Transvaal Gold Fields.

Mossel Bay lies between Cape St. Blaize and the Great Brak River, and is about 6 miles wide with a harbour affording excellent shelter to vessels. Increased trade is anticipated by the opening of the Mossel Bay-George Railway Line, and the extension to Oudtshoorn, which will commence shortly. Mossel Bay is linked with the main line from Cape Town to the northern colonies.

There are electric tramways in Capetown, Port Elizabeth, East London, and Kimberley.

BASUTOLAND.

Basutoland is an inland colony, being completely hemmed in by the Cape Colony, the Orange River Colony and Natal. It lies between 28° 45′ and 30° 40′ South latitude and 27° and 29° 30′ East longitude, and has a computed area of 10,293 square miles. The census of 1904 showed 347,731 natives and 895 whites.

The territory is well watered, and enjoys a delicious climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basutos to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue arises from the Customs dues, the Post-office, native hut-tax, and the sale of licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Mohales' Hoek Quthing and Peka in connection with the Cape Colonial system. There are 241 schools, with 12,000 scholars, a large proportion being in the schools of the French Protestant Mission. Grants in aid of education to the extent of £12,000 were made in 1907–8. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware and groceries.

	1905-6.	1906-7.	1907-8.
Revenue	£98,515	£111,903	£116,529
Expenditure	93,333	108,832	126,603
		For year ending 31.12.07.

Prin. Med. Officer, Edward Charles Long 666

Maseru is distant from London 7,668 miles; transit, through the Cape, about 20 days.

THE BECHUANALAND PROTECTORATE.

The Protectorate is bounded on the south by Cape Colony, on the east by the Transvaal, on the north by Rhodesia and the Zambesi, and on the west by German South-West Africa. It is about 400 miles long and 450 miles broad; area about 275,000 square miles, and population about 130,000, of whom 1,000 are whites.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April, and there is a great scarcity of water, while much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakathla), of Sebele (Bakweni), of Bathoen (Bangwaketsi), of Baitlotle (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Colony through from Mafeking, *vid* Gaberones, and Francistown to Bulawayo and Salisbury. The chief European centres are Gaberones, Francistown, and Serowe, whither the Chief (Khama) and all his people moved a few years ago from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Colony.

	1905-6.	1906-7.	1907-8.

Assist. Commr. and Magistrate in Southern Protectorate, J. Ellenberger 750
Assist. Com. and Magistrate in Northern Protectorate, R. M. Daniel ..... £650 to £750

THE TRANSVAAL.

The Transvaal has a total area of 111,196 square miles (deducting the area of Vryheid and Utrecht, districts annexed to Natal), and consists of certain districts bounded on the east by Portuguese possessions, but touching Natal at the south-east corner; on the south by Natal and the Orange River Colony; on the west by Cape Colony and the Bechuanaland Protectorate; and on the north by Rhodesia; about 20,000 sq. miles lying within the tropics.

The larger portion lies to the west of the Drakensberg (Mt. Mauch, 8,725 feet) and slopes down to the Limpopo River and Bechuanaland; a smaller section lies to the east of that range towards the Indian Ocean, and along the greater part of its eastern frontier is closed in by Portuguese territory from having direct access to the sea.

Steppes and bush predominate and favour pastoral industries, whilst agriculture labours under many drawbacks. Gold, first discovered in 1871, constitutes the wealth of the country; diamonds, coal and silver are also found, whilst iron ores and other metals are known to exist. The Central South African Railways, which include the lines of the late Netherlands South African Railway, the late Orange Free State Government Railways, and the line known as the Pretoria-Pietersburg Railway, connect the colony with Delagoa Bay, Durban, and the Cape; the total length open for traffic at the end of 1907 was

2,469 miles, and 163 miles were under construction. Of the commerce about 70 per cent. was with Cape Colony up to 1899. In 1907 the imports were distributed thus: 35·55 per cent. from Cape Colony, 6·4 per cent. from Orange River Colony, 33·33 per cent. from Natal, 0·04 per cent. from Rhodesia, 0·14 per cent. from Basutoland, 0·04 per cent. from Bechuanaland, and 24·5 per cent. from Delagoa Bay.

The population according to the census of 1904 was 1,268,716, of whom 299,327 were whites, 945,498 aboriginal, and 23,891 other natives.

In 1882 the revenue only amounted to £177,407; in 1893 this had increased to £1,702,685, and in 1897 to £4,480,218, owing to the increased prosperity of the gold-bearing districts: the expenditure was £4,394,066 in 1897, and the debt £2,675,690 in 1898. At June 30, 1906, the public debt was £35,000,000; municipal borrowings at the same date amounted to £5,900,000 (approximately). The trade of the country amounted in 1897 to about £24,500,000, of which £13,563,827 represented the value of imports. The output of gold in the year 1897 was valued at £11,653,727; in 1901, 231,076 oz. (£981,549); 1902, 1,718,920 oz. (£7,301,501); 1903, 2,972,897 oz. (£12,628,057); 1904, 3,773,517 oz. (£16,028,883); 1905, 4,909,540 oz. (£20,854,440); 1906, 5,786,617 oz.; 1907, 6,450,740 oz. (£27,400,992). The total value of the diamonds produced in the Transvaal since the war is as follows:—1903, 174,976 carats (£239,782); 1904, 884,331 carats (£1,150,893); 1905, 802,174 carats (£922,330); 1906, 1,069,392 carats (£1,563,141); 1907, 2,062,855 carats (£2,268,075). The coal output was:—1898, 1,907,808 tons — of 2,000 lb. — (£668,346); 1900, 506,074 tons (£197,127); 1901, 797,144 tons (£329,113); 1902, 1,590,333 tons (£637,640); 1903, 2,253,677 tons (£877,976); 1904, 2,409,033 tons (£883,891); 1905, 2,606,799 tons (£846,272); 1906, 2,892,404 tons (£832,315); 1907, 2,883,423 tons (£773,649).

The new Constitution, which was provided for by Letters Patent issued on Dec. 6, 1906, consists of a Legislative Council of 15 members elected by the Governor, and a Legislative Assembly of 69 members elected by the registered voters of the Transvaal. The Legislature is elected for a term of five years but may be prorogued or dismissed by the Governor. The executive is vested in the Ministers, not more than six, who are appointed by the Governor. Municipalities have already been created in all the most important towns.

The Capital is PRETORIA, pop. 1904, 36,700 (21,161 whites), the principal town being JOHANNESBURG (the centre of the Witwatersrand goldfields), population in 1904, 158,580 (83,902 whites).

THE ORANGE RIVER COLONY.

The Orange River Colony is bounded on the east by Basutoland and Natal, on the north by the Transvaal Colony, and on the west and south by the Cape Colony. It was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854, to be lost when thrown into the cause of its Boer neighbour in the war of 1899–1902. The total area is 50,392 square miles, with a population at the census of 1904 of 387,315, of whom 142,679 were whites (males 81,571, females 61,108).

It is essentially a pastoral country, but the eastern part is also admirably adapted for the cultivation of grain. Diamonds, garnets, and other precious stones are found, and rich coal-mines exist, while there are indications of gold. The chief exports are wool, ostrich feathers, hides, diamonds, grain, &c.

BLOEMFONTEIN, the Capital and seat of Government, had a population of 13,512 whites, 3,487 troops, and 16,033 natives in 1905. A new

* Exclusive of allowances. † And quarters. ‡ Plus £150 personal allowance.

...ve age system and an additional water supply ...e in successful operation. Six new bridges of masonry, 85 ft. span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan., 1904.

Other towns are Kroonstad (2,454 whites and 3,343 natives), Ladybrand (2,333 whites and 1,515 natives), and Harrismith (2,238 whites and 3,068 natives).

Under the Constitution of 23rd June, 1902, the Government consisted of a Governor and a Lieutenant-Governor, assisted by an Executive and a Legislative Council. By Letters Patent, dated the 5th June, 1907, a Responsible Government has been constituted for the Colony, and was promulgated on the 1st July, 1907, on which date also the Lieutenant-Governorship was abolished and Sir Hamilton Goold-Adams, who had held that office, was appointed Governor. The new Constitution provides for a Legislative Council of 11 members and a Legislative Assembly of 38 members. The latter number has been increased by Act of 1908 to 39, by the division of one of the larger country constituencies into two constituencies. The first general election was held on Nov. 20, 1907, and resulted in the return of 29 members of the "Oranjia Unie" party, 5 of the Constitutional party, and 4 Independents.

	1905 6.	1906-7.	1907-8.

NATAL.

Natal derives its name from the fact of its discovery by the celebrated Portuguese navigator, Vasco da Gama, on Christmas Day, 1497. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony, and settled in the northern districts, where to this day the Boers preponderate, although the bulk of the whole white population of the colony is British. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government. It lies on the south-east coast of Africa, Durban or Port Natal being about 800 miles from Capetown. Speaking roughly, it is in 30° E. long. and 30° S. lat. It comprises an area of 35,371 square miles, with a seaboard of 376 miles. No less than 35 distinct rivers run through it into the Indian Ocean, but not one of them is navigable. On the N.W., Natal is bounded by the Transvaal Colony; and, as in the Cape Colony, the country rises from the sea to the mountains by a series of terraces.

Population.—The estimated population at the census of Dec. 31, 1907 (exclusive of military), was: Europeans or whites, 92,485; mixed and others, 6,894; Indians and Asiatics, 115,807; natives, 949,099—a total of 1,164,285.

Production, etc.—The coast region, extending about 15 miles inland, is highly fertile, and has a semi-tropical climate. Maize is the most generally cultivated crop throughout the colony, and sugar, coffee, arrowroot, ginger, tobacco, bananas, vegetables, and pepper thrive in the coast region, and the pineapple ripens in the open air. Tea is also grown, and its cultivation has become a thriving industry. The midland district is more adapted for cereals and other European crops. The upper district is chiefly grazing land, and sheep-farming is the principal occupation of the inhabitants; horses and cattle are also reared in large numbers. The coalfields of the colony are of large extent, and are connected by rail with the seaport of Durban; the output for 1906 was 1,238,713 tons, and for 1907 1,530,043 tons; there is a considerable export trade in coal, 666,830 tons being bunkered and 459,973 tons exported in 1907, in addition to 245,480 tons consumed by the railway department. Asbestos, copper, fireclay, gold, graphite, gypsum, iron, lead and silver, limestone and marble, manganese, molybdenum, nickel, nitre and tin are also found. Large forests of valuable timber abound in the kloofs, and many tracts along the coast are also well wooded. Cotton growing is being tried, and promises well. The chief exports are coal, wool, mohair, wattle bark, tea, sugar, tobacco, maize, fruit and preserves, hides and skins.

Education.—There are 2 Government high schools, at Pietermaritzburg and Durban: 34 primary schools, 2 art schools, 5 Indian schools, and 2 Government schools for coloured children; there are also 469 private Government-aided European, native, Indian and coloured schools.

Government Railways, Dec. 31, 1906.—There are 935 miles of railway open, all constructed and worked by the Government, with the exception of the North Coast Extension between Verulam and Tugela (50 miles), which was constructed by the Natal-Zululand Railway Company, and is worked by the Government on behalf of the constructors in accordance with working agreement. The main line extends from the Port of Durban to Pietermaritzburg (the capital of the Colony, 70 miles inland), and thence to Charlestown, on the border of the Transvaal (306 miles distant from the port), where it connects with the line to Johannesburg and Pretoria. Branch lines run from Thornville Junction (59¾ miles from the port) to Richmond (17 miles), and from Pietermaritzburg a branch connects Greytown with the city (64¼ miles); to Harrismith in the Orange River Colony, from the main line at the 190¼ mile-post, was opened on July 12, 1892, with a mileage of 59½ miles, 35¾ of which are in Natal, terminating at Van Reenen. This branch was extended to Bethlehem on May 1, 1905, a distance of 64¾ miles from Harrismith, and a further section of 88½ miles to Kroonstad in the Orange River Colony, which place is also served by the C.S.A.R. main line, was opened for traffic on June 21, 1906. The line from Van

Reenen to Bethlehem is owned by the C.S.A.R. Administration, and is worked by Natal on its behalf; from Glencoe Junction (231¼ miles from the port) to Vryheid, a distance of 59½ miles, northwards from Durban to Soukeele (167¼ miles) in the Province of Zululand; from South Coast Junction to North Shepstone (77¼ miles), and places in touch with the town of Durban a portion of the Colony which has large natural resources. This line is now being extended to Beach Terminus, on the south side of the Umzimkulu River, a distance of 5½ miles; from the South Coast branch at Alexandra Junction to Umzinto, 6½ miles distant, and serves an important sugar-growing area; connecting the main line with the Bluff side (Wests) goes out from Clairmont on the South Coast line, and is 6½ miles in length; from Pietermaritzburg (the Natal trunk line junction) to Creighton, a distance of 95 miles. The total cost of construction of the railways up to the end of 1906 was £13,892,969. The receipts for 1906 were £1,836,916, and the expenditure £1,774,548. The net receipts were equal to £4 8s. 8.32*d.* per cent. upon the capital expended on open lines.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the TugelaRiver; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vryheid districts of the Transvaal) and Swaziland. The Amaputaland Protectorate, created by proclamation of 22 Nov., 1897, was annexed to Zululand on 27 Dec., 1897, and now forms part of the Province. The Northern Districts, so-called, territory (consisting of the Magisterial Divisions of Vryheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on 27 January, 1903.

Defence.—On 31 Dec., 1907, the total defence force of Natal consisted of the Natal Police (mounted), 1,006 all ranks, exclusive of native and Indian constables, and an active militia force of about 2,739 (1,487 mounted and 419 artillery). The Militia Act, which came into force during 1904, remodelled the Volunteer Force, and changed the title to Militia, giving the government power to call out all males between 18 and 60. There were also, at the same date, 129 rifle associations, with a total strength of 6,567, excluding Natal Police and Militiamen; besides 344 senior cadets, and 3,143 school cadets.

The Government of the Colony consists of a Governor, a Legislative Council, and a Legislative Assembly. The former consists of 13 members, nominated by the Governor in Council, one half of whom retire every 5 years. The latter consists of 43 members, including 2 each for the new districts of Vryheid and Utrecht, elected by popular vote. There are 23,686 electors on the register, and there is a property qualification.

PIETERMARITZBURG, the capital and seat of government, is situated about 54 miles inland from Port Natal. Population, exclusive of military (1904 census), 31,199.

In Durban (pop. 68,359, including 29,802 Europeans, 2,088 mixed and others, 19,183 natives, and 17,256 Asiatics as estimated 31 Dec., 1907), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth on the bar for 1907 being 32 ft. 8 in.

Manager, H. Wilson Fox; *Secretary*, D. E. Brodie; *Assistant Secretary*, A. P. Millar, *Registrar*, R. C. Bolton.
Capetown Agency, W. Olivé.

NORTHERN RHODESIA.

This territory, first opened to British influence by Dr. Livingstone, is divided into North-Eastern and North-Western Rhodesia, which are still occupied by the native tribes living under their own chiefs. Extensive mineral deposits, copper in particular, have been discovered. Indigenous India-rubber is found in large areas. Timber, cattle, and all agricultural produce abound.

SOUTHERN RHODESIA.

Railways.—The main arterics of communication are the Mashonaland and the Rhodesia railways. The latter is a continuation of the line from Cape Town to Vryburg, *via* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line to connect Salisbury with Bulawayo (300 miles) was completed in Oct., 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and thence to the port of Beira (Portuguese), a distance of 375 miles. The section from Bulawayo *via* the Wankie coalfields to the Victoria Falls (281 miles) was completed in June, 1904. The line crosses the Zambesi at the Falls, and has been opened to Broken Hill in N.W. Rhodesia. A light railway (2 ft. gauge) has been completed between Salisbury and the Ayrshire Mine (84 miles), with a branch to the Eldorado Mine (12 miles). A line connects Gwelo with Selukwe (about 23 miles); a line from Bulawayo *via* Gwanda to West Nicholson (119 miles), opens up the gold and coal areas lying to the south-east; and a branch to the Matoppos, where the founder of Rhodesia is buried, was opened on Nov. 1, 1903.

The African Transcontinental Telegraph Line ("Cape to Cairo") has reached Ujiji in German East Africa, about 3,250 miles from the Cape.

The Natives, enumerated in December 1907, at 662,800, have now settled down, apparently content with their unwonted prosperity and immunity from tyranny and pillage.

Industrial Progress.—Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. Though the climate is sub-tropical, the average altitude makes it well suited to European fruit-trees, cereals, and vegetables, in addition to the indigenous products of the country—*e.g.*, tobacco, rubber, cotton, and all kinds of grain. The country is being re-stocked, and inoculation upon a large scale is stamping out various descriptions of veterinary disease.

The first regular crushing returns began in September, 1898, and the gold produced to the 30 September, 1908, has an estimated value of £11,212,075. The output for the year ended 31 December, 1907, was 612,052 oz., valued at £2,178,886, an increase of £193,784 in value over the returns for 1906. The gold output for the nine months ended 30 September, 1908, is valued at £1,906,557. Silver, copper, coal, diamonds, lead, chrome, iron, and other minerals have also been produced in considerable quantities.

Constitution.—Southern Rhodesia is administered by the Company under the Charter of 1889, as amended by the Orders in Council of 1894, 1898, and 1903. The Administrator is advised by an Executive Council of not less than four members, and there is a Legislative Council, consisting of the Administrator, the Resident Commissioner (*ex officio*), and 14 members, seven of whom are elected by the registered voters of Mashonaland and Matabeleland, and seven nominated by the Company with approval of Secretary of State.

The laws in force in the Cape Colony up to June 10th, 1891, have continued in force in Southern Rhodesia, so far as they are applicable: whilst from 1891 to 1899, when the Legislative Council was first convened, laws were amended or enacted by the ordinances of the Directors, the regulations of the Administrator in Council, and the proclamations of the High Commissioner. Municipal self-government has been established for Bulawayo and Salisbury. Rev., 1906-7, £544,937; exp., £501,473.

The total white population of Southern Rhodesia at the census of 1907 was 14,007.

The political capital is SALISBURY, 4,880 ft. above sea-level, the chief town of Mashonaland (white population in 1907, 1,684). BULAWAYO, 4,469 ft. above the sea-level, the chief town of Matabeleland, is the commercial centre, with a white population of 3,491 in 1907.

British West Africa.

The partition of West Africa among the various European Powers is now complete, and the British Dominions therein consist of the Colonies and Protectorates of the Gambia, Sierra Leone, the Gold Coast, and Southern Nigeria, which are all situated upon the coast of North-Western Africa, between the mouth of the river Senegal and the Cameroons, and of the Protectorate of Northern Nigeria. These Dominions were not originally colonies in the strict sense of the word, but merely trading settlements in which the products of the neighbouring countries were collected and exchanged for European goods with as little outlay as possible; but of late years a great part of the revenue has been expended on the development of the territories, the advancement of the education of the natives, and on the encouragement of the cultivation of natural produce. The climate is such that Europeans cannot live there permanently, and even the native inhabitants suffer from malarial fever. The West Coast of Africa has, however, been eagerly frequented by European traders since it was first explored by the Portuguese in the latter part of the 15th century, just before the discovery of America by Columbus. In the 17th century all the chief maritime nations of Europe, except the Spaniards, had forts or factories established on the coast, from which they used to supply slaves to their plantations in the West Indies and on the mainland of America. The importance of the coast was much diminished when these same nations agreed, at the commencement of the nineteenth century, to join in putting down the slave trade, and the Dutch and the Danes relinquished their possessions: but a healthier interest in the West Coast has since arisen in the development of a legitimate trade in tropical products, of which palm oil is the most important, to take the place of the trade in slaves. The Germans possess the territory of the Cameroons and Togoland, in the immediate neighbourhood of the British possessions; and, more to the south, the Congo Free State has been founded by the King of the Belgians. British authority has been extended, by means of the Colonies and Protectorates, and by the action of the Royal Niger Company, which exercised all the functions of government until the territories under its control were incorporated with Southern Nigeria in 1900.

GAMBIA.

The river Gambia was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the Treaty of Versailles, as British. It had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. The colony now consists of the Island of St. Mary, British Combo Albreda, the Ceded Mile, McCarthy's Island, and various other islands and territories on the banks of the river. The population (1 April, 1901) was 13,456 (excluding Protectorate, 140,000). The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is fairly healthy. The chief export is ground nuts, which form nearly nine-tenths of the total exports. They are sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil. Beeswax, rubber, and hides are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities for export. The chief imports are cotton goods, kola nuts, rice, and tobacco. A Company of the W.A.F.F. (3 officers and 120 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 72 men), which performs both civil and military duties. There is also a volunteer artillery corps consisting of 3 officers and 25 rank-and-file. The government, which is that of a Crown Colony, is now vested in a Governor, assisted by an Executive Council, consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 4 unofficial members, nominated by the Crown.

THE GOLD COAST COLONY.

This colony comprises the coast of the Gulf of Guinea from about 3° 7′ W. to 1° 14′ E. of Greenwich, with a protectorate extending inland to an average distance of 440 miles, or to the 11° of N. latitude, bounded on the west and north by the French colonies of the Ivory Coast and French Soudan, and on the east by the German colony of Togoland. The population of the colony is estimated at 895,350 (exclusive of Ashanti and the Northern Territories), of whom about 1,000 are Europeans. The natives are almost all Pagans, but the number of Mohammedans and Christians is steadily increasing. The Castle and settlement of Elmina was founded by the Portuguese and taken from them by the Dutch. In 1618, some English merchants built a fort at Kormantyne, and subsequently many forts and factories were established, not only by the English and Dutch, but also by the French, the Danes, and the Germans, for the purpose of supplying slaves to their West Indian and American possessions. The first English Company to trade with the Gold Coast was chartered in 1662. This was succeeded in 1672 by the Royal African Company, which enlarged and strengthened Cape Coast Castle until it was the best on the coast, and also built forts at Dixcove, Sekoudi, Kommenda, Anamabo, Winneba, and Accra. This was again succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 20° N. and 20° S. lat. The settlements were in 1821 transferred to the Crown, and placed under the government of Sierra Leone, from which they were finally separated in 1874 under the title of Gold Coast Colony. The Dutch and English forts were intermingled until 1857, when an exchange was effected which gave all those on the west of the Sweet River to Holland and those on the east to Great Britain. In 1872 the Dutch transferred all their forts to Great Britain, which had previously, in 1850, bought the Danish forts. It was out of this transfer that the Ashanti war of 1873–4 arose, as the King of Ashanti, who had always been on good terms with the Dutch, feared that he would be cut off from the sea. In this war, as in those of 1896 and 1900–1, the British arms were completely victorious, and the kingdom of Ashanti has now been added to the dominions of the British Crown.

The produce of the Gold Coast is chiefly sent to Great Britain. Gold is found in considerable quantities, and rubber, ivory, gum-copal, cocoa, cotton, lumber, Guinea grains, and oil are also exported to England. The principal exports in 1907 were: Gold £1,130,974, rubber £333,120, palm oil £119,468, palm kernels £101,822, and cocoa £515,089. The chief imports are textiles, alcohol, and hardware. The climate is damp, hot, malarious, and unhealthy. The Government assists the Roman Catholic, Wesleyan, and German missionaries in educational matters, and great efforts are being made to improve the sanitary condition of the coast towns. The Government has established schools of its own; the principal towns are lighted and policed, 1,129 miles of telegraphs have been established in the colony, of which 290 miles are in Ashanti and 135 miles in the Northern Territories. The Government railway from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi (168 miles), has been completed and opened for traffic.

The seat of government is Accra (population 17,892). The other principal towns are Cape Coast (28,948), Ada (13,240), Elmina (7,100), Sekondi (4,095), Kwitta (3,018), and Axim (2,189). The Legislative Council consists of 6 official and 4 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone (Lion Mountain) was ceded to Great Britain in 1787 by the native chiefs, to be used as an asylum for the many destitute negroes then in England; and great numbers of liberated Africans from North America and the West Indies, besides those taken in slavers on the coast, have from time to time been settled there. In this respect Sierra Leone is really a colony, while it is also of commercial importance. The extreme length is about 185 miles, with an estimated area of 4,000 sq. miles. The population in 1901 amounted to 76,655, of whom 493 were resident Europeans. Of the rest, more than half were liberated Africans and their descendants, while the remainder belonged to the neighbouring tribes. The liberated Africans were brought from all parts of Africa.

and as the result no less than 60 different languages are said to be spoken in Freetown. The exports are palm-oil, palm-kernels and kola nuts; but benni-seed, cocoa-nuts, ginger, ground nuts, india-rubber, gum-copal, hides, beeswax, and rice are also exported. The principal imports are cotton goods, coal, apparel, hardware, provisions and tobacco. A railway (227 miles) has been constructed from Freetown into the interior, with terminus at Baimea near the Liberian frontier.

A Protectorate was proclaimed on August 31, 1896, over territory between 7° and 10° N., and 11° and 13° W., being bounded on the N. and N.E. by French Guinea, and on the S. and S.E. by Liberia. It has an area of about 30,000 square miles and a population estimated at 1,000,000. For administrative purposes it is divided into 6 districts under District Commissioners; the principal peoples being the Limbas and Kurankos in the north, the Timinis in the centre, and the Mendis in the south. The principal products are rubber, gum, palm-oil and palm-kernels, benni-seed, rice, ground and kola nuts.

SOUTHERN NIGERIA.

The Colony and Protectorate of Southern Nigeria now includes the territories situated on the Bight of Benin, between Dahomey on the West to the Cameroons on the East, the amalgamation of the administrations of Lagos and of the Protectorate previously styled "Southern Nigeria" having been carried out on May 1, 1906. The whole territory is now divided into three Provinces, of which the Western coincides with the former Colony and Protectorate of Lagos, and the Central and Eastern with the former Protectorate of Southern Nigeria. The headquarters of the Government are at Lagos, and the area of the whole territory is 77,260 sq. miles.

Governor and Commander in Chief, Sir Walter Egerton, K.C.M.G. (and duty allowance £1,500) £3,500
Lieut. Gov. and Col. Sec., J. J. Thorburn, C.M.G. 1,500
Chief Assistant Col. Sec., Major H. C. Moorhouse, D.S.O. .....£700 to 900
Provincial Commissioners, W. Fosbery, C.M.G., F. S. James, C.M.G., each £1,200; H. Bedwell..... 1,000
Assistant Prov. Commrs., A. B. Harcourt W. E. B. Copland-Crawford .....£700 to £900 and £600 to 800
Senior District Commrs., W. G. Ambrose, F. P. Pinkett, C. H. Elgee, R. A. Roberts, H. M. Douglas, E. A. Simpson-Gray (*one vacancy*) .....£600 to 700
Financial Commr., C. E. Dale 1,100
Chief Justice (vacant) 1,500
Puisne Judges, J. Winkfield, W. H. Stoker, E. T. Packard 1,000
Attorney-General, A. R. Pennington 1,100
Solicitor-General, J. E. Green .....£700 to 900
Principal Medical Officer, H. Strachan, C.M.G. .....£1,000 to 1,200
Commandant of S. Nigeria Regt. West African Frontier Force, Lt.-Col. H. M. Trenchard, D.S.O. 900
Director of Public Works, C. V. Bellamy... 1,100
Do. Marine, Lt. H. A. Child, R.N. £800 to 1,000
Conservator of Forests, H. N. Thompson 1,000
Director of Agriculture (vacant) £600 to 800
Inspector-General of Police, C. E. Johnstone .....£600 to 800
Director of Education, E. G. Rowden £600 to 800

The chief industry is agriculture, and crops consist of maize, plantains, earth-nuts, yams and cassava, while cocoa, coffee, and cotton are also grown. The natural products exported are palm oil and kernels, ivory, gum copal and rubber, and the export of cotton and maize is steadily increasing. A railway has been constructed from Iddo Island to Ilorin in Northern Nigeria, a distance of 248 miles, and is now being extended to the Niger, at Jebba, whence it will run to a point near Zungeru in Northern Nigeria, there connecting with the railway from Baro to Kano in that Protectorate, which is now under construction. Centres of trade are Lagos, Calabar, Opobo, Bonny, New Calabar, Brass, Benin, Warri, Sapele, Akassa, and Forcados, the two last named being situated at the Forcados and Nun mouths of the Niger, which, with the rest of the territories south of Idah on the Niger, passed on January 1, 1900, from the administrative control of the Royal Niger Company to that of Southern Nigeria.

The principal imports are cotton goods, cooper's stores, hardware, cutlery, and spirits.

	1905.	1907.
Revenue	£1,088,717	£1,459,554
Expenditure	1,056,290	1,217,337

Total exports	3,151,417	4,202,704
Imports from U.K.	2,153,000	3,330,785
Exports to U.K.	1,677,000	2,039,821

Headquarters, Lagos. Transit, 16 days. Telegraph to Lagos, Warri, Bonny, and Calabar, with considerable extensions inland, connecting with Lagos.

NORTHERN NIGERIA.

Governor and Commander-in-Chief, Sir E. P. C. Girouard, R.E., K.C.M.G., C.B., D.S.O. £3,000
(and duty allowance £1,000)
Resident-General, Sir W. Wallace, K.C.M.G. £1,000 to 1,300
Residents, 1st Class, W. P. Hewby, C.M.G., Maj. J. A. Burdon, C.M.G., C. L. Temple, H. S. Goldsmith, Capt. C. W. J. Orr, Capt. F. H. Ruxton ..... £700 to 800
Residents, 2nd Class: Capt. W. S. Sharpe, C.M.G., P. M. Dwyer, Major H. D. Larymore, C.M.G., G. N. Barclay, Maj. J. E. C. Blakeney, Brev. Maj. A. M. McClintock, D.S.O., W. F. Gowers, Maj. A. Festing, C.M.G., D.S.O., Capt. E. H. Lewis, J. A. Ley Greaves, Capt. G. Anderson, F. B. Gall, E. C. Duff ... £550 to 650
Secretary to Administration, M. H. de la P. Beresford, I.S.O. ..... £600 to 700
Treasurer, J. H. Bratt ..... £600 to 700
Chief Justice, E. A. Speed ..... £1,000 to 1,200
Attorney-General, E. C. Watson ..... £550 to 650
Solicitor-General, E. V. Parodi ..... 450 to 550
Principal Medical Officer, S. W. Thompstone, C.M.G., F.R.C.S. ..... £1,000 to 1,200
Commandant of N. Nigeria Regt. W.A. Frontier Force, Bt. Lt.-Col. J. E. Hasler 1,000
Marine Supt., C. Elliott, R.N.R. ..... £550 to 650
Director of Public Works and Railways, J. E. Eaglesome, C.M.G. ..... £800 to £1,000

This Protectorate was established on January 1, 1900, and includes the northern portion of the territories formerly administered by the Royal Niger Company. It is bounded on the south by Southern Nigeria, to the west and north by the French possessions in the hinterland of Dahomey and the Soudan, and on the east by Lake Chad and the German territory of the Cameroons.

Since the occupation of Kano and Sokoto in February and March, 1903, steps have been taken for the establishment of administrative control over the whole of the Protectorate, of which the area is about 255,700 square miles. The population has been estimated at about 8,000,000. The centre of administration is Zungeru, near the Kaduna River, a tributary of the Niger, and the Protectorate is divided for administrative purposes into 12 Provinces. The frontiers to the North and East were delimited during 1903 by Anglo-French and Anglo-German Boundary Commissions, and a further Boundary Commission is at present engaged in delimiting the frontier in accordance with the Anglo-French Convention of May 29, 1906. The frontier with the German possessions is now settled, and demarcation is in progress. The imports are much the same as in Southern Nigeria, and the principal exports are shea butter and shea nuts. The importation of spirits is prohibited. There is telegraphic communication from Lagos to Jebba, Zungeru, and Lokoja, and the line has been continued along the Benue, as well as in other directions. The construction of a railway from Baro on the Niger to Kano, *viâ* Zaria, has been sanctioned and has been commenced. Steam communication with England *viâ* Forcados.

The grant-in-aid from Imperial funds to N. Nigeria amounted to £295,000 in 1907–8, and to £290,000 in 1908–9.

Trade and Products of the British Empire (1905).

THE following table shows the amount of certain raw materials produced within the British Empire. In addition to the articles given below, 398,184,000 lb. of *Tea* (India 221,488,120 lb., Ceylon 175,000,000 lb., and Natal 1,633,178 lb.), 41,994,000 lb. of *Coffee* (India 31,178,716 lb., Ceylon 1,008,000 lb., British Central Africa 635,600 lb., West Indies 6,046,464 lb.), and 9,253,000 lb. of rubber (mainly in West Africa) were produced in 1905. Where the production is estimated the figures are printed in *italics*. THE TOTAL TRADE OF THE EMPIRE in 1905 amounted to £1,366,708,000, of which £1,012,141,000 (74·1 per cent.) was Foreign, and £354,567,000 (25·9 per cent.) Inter-Imperial.

THERE are no British *Colonies* on the East Coast of Africa to the north of Natal (already treated of under the head of "South Africa"). But a large portion of the Continent, both on the coast and inland, is under British protection and is administered directly by the Imperial Government, through the Colonial Office, which took over the administration of the E. Africa, Uganda, and Somaliland Protectorates on April 1, 1905. British Central Africa, now styled Nyasaland, was similarly transferred on April 1, 1904. The only Protectorate in Africa now under the control of the Foreign Office is Zanzibar and Pemba. Just as on the West Coast, the rivalry of European Powers has resulted in the division of the territory on the East into "spheres of influence," the definition of whose boundaries has given rise to much diplomatic negotiation, and is not yet finally completed. From the boundary of Amatongaland northward to Cape Delgado is *Portuguese*: from Cape Delgado to the river Umba is *German East Africa*: the islands of Zanzibar and Pemba form a British Protectorate: and the East Africa Protectorate extends from the Umba to the river Juba, which forms the southern boundary of the *Italian Sphere* extending northward as far as the British Protectorate on the Somali Coast. It will be observed that on this portion of the African Continent the French have made no acquisitions, but their annexation of the great island of Madagascar places them in a position of importance on the East Coast, although their influence does not extend to the mainland. The history of the European occupation of East Africa may be briefly stated thus:—The Portuguese acquired their rights by discovery and conquest. The Germans obtained a footing on the mainland opposite Zanzibar between 1880 and 1885, at which latter date the Sultan of Zanzibar recognised their Protectorate over Usagara, and in the same year they declared a Protectorate over Witu. In 1888 the Imperial British East Africa Company received a Royal Charter, having been granted a few years previously by Seyyid Barghash, Sultan of Zanzibar, administrative rights over his mainland possessions. In 1890 the respective spheres of Great Britain and Germany were settled by agreement. Zanzibar became a British Protectorate, and Germany withdrew from her Protectorate over Witu in favour of Great Britain. The boundaries of the *Italian Sphere* were agreed upon in 1891. The Imperial British East Africa Company transferred the administration of their territories to the Imperial Government in 1895, having done much to promote the advance of civilisation in the large tract of country now known as the "East Africa Protectorate."

THE SOMALILAND PROTECTORATE.

In 1884 a Protectorate was declared over part of Somaliland, a country now subject (except where reserved by Great Britain and Italy) to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 68,000 sq. miles. The population, mainly consisting of Somalis, a Mohammedan tribe, is estimated at 300,000. The boundaries are defined by treaty with Abyssinia and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south.

The PRINCIPAL TOWNS are Berbera, Bulhar, and Zeyla.

The Protectorate was transferred in 1898 from the administration of the India Office to that of the Foreign Office, and on April 1, 1905, to that of the Colonial Office.

Commr. and Commander-in-Chief, Capt. H. E. S. Cordeaux, C.B., C.M.G. £1,000

Conservator of Forests, D. E. Hutchins ... 800
Director of Surveys, Major G. E. Smith, R.E. 800
Agent-General (Bombay), J. A. Simson ... 700

The Imperial British East Africa Company was incorporated by Royal Charter, dated September 3, 1888; and under the control of the Secretary of State for Foreign Affairs, exercised sovereign jurisdiction over the territories leased to it by the Sultan of Zanzibar, or acquired by treaties entered into with native Chiefs. A British Protectorate was announced over these territories on June 18, 1895, and the Company handed over the administration on July 1, 1895.

These territories are now comprised under the name of "The East Africa Protectorate," and include the whole of the coast from the Umba to the Juba River, granted on a 50 years' lease by the Sultan of Zanzibar, as also the vast territories

in the interior bounded in part by international conventional lines. The southern boundary was defined by the Anglo-German conventions of 1886, 1890, and 1893; that on the east (along the Juba) and north-east, by an agreement with Italy (1891). On the west the Protectorate adjoins that of Uganda. The administration of the Protectorate is carried on under the Colonial Office.

The title of "Commissioner" was changed to "Governor" in 1907, and Legislative and Executive Councils were instituted.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Protectorate is divided for administrative purposes into seven provinces, which are subdivided into districts and sub-districts: (1) Seyidie, (2) Ukamba, (3) Tanaland, (4) Jubaland, (5) Kenya, (6) Naivasha, (7) Kisumu, of which the centres of administration are respectively Mombasa, Nairobi, Lamu, Kismayu, Fort Hall, Naivasha, and Kisumu. Of the seven provinces Ukamba and Naivasha are best suitable to colonization by Europeans. There is also a considerable region within the boundaries of the Protectorate which is still undeveloped, and has not yet been included in any administrative district. The population of the Protectorate has been estimated lately at 4,000,000, but no census has ever been taken.

The East Africa Protectorate also includes the Witu Protectorate, a small tract of country at the mouth of the river Tana. The British Protectorate was proclaimed Nov. 19, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew on July 31, 1893. Witu is now regarded for administrative purposes as part of *Tanaland*.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population, about 30,000, of whom 200 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions to Kiambu, Nandi, Wadelai on the Nile, and Fort Hall. The Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,732 feet in length. Nairobi, the capital of the Protectorate, and central station of the Uganda Railway, has a population of about 13,500, of whom 579 are Europeans. There are also some 400 European farmers in the immediate neighbourhood of Nairobi.

The principal exports are ivory, grain, rubber, and copra; the principal imports are piecegoods, rice, grain and flour, building materials, European provisions, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

	1905–6.	1906–7.	1907–8.
Imports	£974,402	£765,407	£799,717
Exports	332,838	440,705	515,052

Shipping entered, 1907–8, 936,398 tons.

CAPITAL, Nairobi; transit, about 21 days.

THE UGANDA PROTECTORATE.

Governor and Commander-in-Chief, Sir H. Hesketh Bell, K.C.M.G.	£2,000
Deputy Commr., G. Wilson, C.B.	900
Sub-Commrs., S. C. Tomkins, C.M.G.; A. G. Boyle, C.M.G.; F. A. Knowles (*one vac.*)	600
Judges of the High Court, G. F. M. Ennis, W. M. Carter	£700 and 500
Crown Advocate, W. A. Russell	400
Principal Medical Officer, Lt.-Col. J. Will, R.A.M.C.	900
Secretary, J. F. Cunningham	650
Treasurer, G. D. Smith, C.M.G.	£550 to 700
Supt. of Marine, Comm. H. Hutchinson, R.N.R.	400
Director of Transport, D. J. Wilson	600
Chief Engineer, Capt. P. O. G. Usborne, R.E.	750
Commandant of 4th Bn. King's African Rifles, Lt.-Col. B. R. Graham	700

A British Protectorate over the territory of Uganda was proclaimed in the "London Gazette" of June 19, 1894, and included only the country subject to King Mwanga, known as Uganda proper, bounded by the territories known as Usoga, Unyoro, Ankole and Koki. This Protectorate has since been extended over Unyoro and Usoga (see notice in "London Gazette," July 3, 1896). *Uganda proper* lies on the N.W. shore of Lake Victoria, between 500 and 600 miles in a direct line from the nearest point on the East Coast of Africa. It is situated on and to the N. of the Equator. *Usoga* lies further to the East, on the N. shore of the Lake. *Unyoro* is to the N.W. of Uganda and extends to Lake Albert. *Koki* is to the S.W. of Uganda. The Protectorate is now divided into five provinces. The total population of the Protectorate may be roughly estimated at between 2 and 3 millions.

The capital town of Uganda is Kampala, but the centre of the Protectorate Administration is the neighbouring settlement of Entebbe. The population of the Uganda Protectorate is estimated at over 2,000,000. The principal exports are ivory, skins, and chillies. Some cotton and coffee is also exported. Principal imports are cotton cloths, prints, beads, &c. Uganda is connected by telegraph with Mombasa (E. Africa Protectorate), and there are three Government steamers on Lake Victoria, two of them of 600 and one of about 1,000 tons displacement. Another steamer is being constructed.

In July, 1897, Mwanga left Uganda and headed an insurrectionary movement in Buddu, which was suppressed. He then fled to the neighbouring German territory, and his infant son was declared King of Uganda, with a native council of regency. King Mwanga died in May, 1903. In Sept., 1897, a mutiny broke out among the Soudanese troops in the Protectorate, which was only suppressed after several months' fighting, in circumstances of great difficulty and danger, in which several British officers lost their lives (Parly. Paper, Africa, No. 10, 1898). The military forces have since been completely reorganised.

The Uganda Railway.—A survey of the route to be followed by a railway to connect Uganda with the coast at Mombasa was made in 1892. In 1895 H.M. Government decided to proceed with the construction of the railway, and in September of that year a Committee was formed, with the late Sir Percy Anderson, Assistant Under-Secretary of State for Foreign Affairs, as Chairman, to supervise the undertaking and organise details, under

the authority of the Secretary of State for Foreign Affairs. On the completion of the railway, its management was transferred from the Committee to the East Africa Protectorate Administration.

The gauge of the railway is one metre. The chief engineer, Sir G. Whitehouse, and staff arrived at Mombasa in December, 1895, and a large number of labourers were imported from India for the work of construction, in addition to such local labour as could be engaged. The rails were laid to the terminus on Victoria Nyanza (584 miles) on December 20, 1901, on which date the first locomotive completed the journey from the sea to the lake. A three-wire telegraph line has been erected along the railway, and there is also telegraphic communication from the terminus on the lake to Nimule, on the Nile (a distance of about 500 miles), and will shortly be extended to Gondokoro on the frontier of the Sudan. Messages are accepted for Nimule, and sent thence to stations further inland by post. A volunteer corps has been organised.

THE ZANZIBAR PROTECTORATE.

Sultan, H.H. Ali bin Hamud, *succeeded* his father, Hamud, July, 1902.
Agent & Consul-General, Basil S. Cave, C.B. £1,800
Judges of H.B.M. Court, Lindsey Smith, J. W. Murison ..... £600 to 1,000
H.B.M. Consul, J. H. Sinclair 600
Vice-Consuls, D. Young, R. M. Kohan £350 to 450
First Minister, Brigadier-General A. E. Raikes.
Financial Member of Council, Capt. F. R. Barton.
Legal Member of Council, Peter Grain.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north as Warsheikh; but since the cession of the coast-line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa, together with the port of Kismayu, with a radius of 10 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the East Africa Protectorate (see p. 587). Zanzibar has been a British Protectorate since November, 1890.

By a decree of Sultan Hamud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

The City of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar is about 200,000.

The principal imports are piece-goods, ivory, hides, rice, and coal; the exports are ivory, cloves, copra, rubber, gum-copal, and many minor articles. The largest proportion of imports (£490,892 in 1907) comes from British India, £193,242 from the United Kingdom, £128,127 from German East Africa, £47,983 from the United States, and £62,022 from Germany. The largest exports are made to British India, which in 1907 accounted for £179,941 the principal other participators being German East Africa (£171,941), France (£139,699); and the United Kingdom (£142,474). These figures refer to the port of Zanzibar, and not to the trade of the Zanzibar dominions. The large quantities of goods which pass through Zanzibar in mail and other steamers, and those which are transhipped to and from the coasting vessels in the harbour without being landed, are not included in the statistics from which the above figures are taken, which do not, therefore, give an adequate idea of the importance of the port of Zanzibar as the centre of trade in E. Africa. With the exception of a monthly cargo vessel from London, there is no direct steam communication with the United Kingdom, passengers, mails, and goods having to tranship at Aden, between which port and Zanzibar a regular monthly service is maintained by the British India Steam Navigation Company. There are through steamers to and from Europe of the Messageries Maritimes and the Deutsche Ost Africa Linie; and a three-weekly service to and from Bombay by the latter company.

The number of ocean-going steamers which entered the port in 1907 was—German 122, British 77, French 26, Austrian 3, and other nationalities 4, the total tonnage being 466,429. This does not include the coasting and dhow traffic, which is a very large one, extending to Bombay, Arabia, the Comoro Islands, and Madagascar.

	1906.	1907.
Imports	£888,871	£1,232,957
Exports	974,200	1,070,067

NYASALAND PROTECTORATE
(BRITISH CENTRAL AFRICA).

Governor and Commander-in-Chief, Sir Alfred Sharpe, K.C.M.G., C.B. £2,000
Deputy Governor, Maj. F. B. Pearce, C.M.G. 900
(personal allowance £100)
Assist. Dep. Governor, H. R. Wallis 700
Commandant of 1st Bn. King's African Rifles, Lt.-Col. H. A. Walker 700
Judge of High Court, C. J. Griffin ... £600 to 800
Chief Asst. Secretary, A. Jay Williams £450 to 600
Treasurer, W. Wheeler, C.M.G. ..... 450 to 700
Principal Med. Officer, Dr. H. Hearsey 450 to 600
Supt. of Native Affairs, J. C. Casson 450 to 600

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the eastern portion of British Central Africa, and the control of the administration was transferred from the Foreign Office to the Colonial Office on the 1st of April, 1904. The remainder of the territory is administered by the British South Africa Company.

The population of the Protectorate is estimated at 948,270, including 587 Europeans and 515 Asiatics.

The principal exports are coffee, cotton, chillies, and tobacco. The cultivation and export of cotton is considerable, and there are prospects of a steady development of this industry. Ivory, tea, ground nuts, and rubber are also exported. The principal imports are soft goods, provisions,

and hardware. On Lake Nyasa there are eight steamers. There are also twenty steamers on the Zambesi and Shiré rivers. At Chinde, situated in Portuguese territory at the mouth of the Zambesi, is a piece of land leased from the Portuguese Government, where goods intended for the Protectorate may be transhipped free of duty.

Chief towns:—Blantyre (population about 200 Europeans and 6,000 natives) and Zomba, the headquarters of the Government. Communication is maintained between Chiromo (at the junction of the rivers Ruo and Shiré), and Chinde by the African Lakes Company's steamers and the British Central Africa Co.

Between Chinde and Europe, the means of communication are Messrs. Rennie's line *vià* Natal, the British India Steam Navigation Co., and the German East Africa S.S. Co.

A railway, 113 miles in length, connecting Port Herald with Blantyre, is open for traffic, and will probably be extended to Lake Nyasa *vià* Zomba. The Protectorate is connected by telegraph overland with the Cape, *vià* Fort Salisbury; and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

	1906-7.	1907-8.
Imports (excluding transit)	£342,934	£169,541
Exports (excluding transit)	50,247	68,604

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 500 miles east of Madagascar, between 57° 18′—57° 49′ E. long. and S. lat. 19° 58′—20° 32′, and comprising an area of 705 square miles. The population at the census of 1901 was 375,385, of whom 261,191 were Indians (the majority originally Coolies imported for working the sugar estates), and the remainder mainly of French or mixed descent. The whole island is practically given up to producing sugar for export, and the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour and frozen meat from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

Mauritius was discovered about the year 1507 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 or 1712 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored. There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. In 1906 there were 131½ miles of railway (121½ of 4 ft. 8½ in. gauge and 10 of 2 ft. 6 in.), 60 post-offices, 57 telegraph and 9 telephone offices in the island, with 347 miles of telegraph and 31½ miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of 5 official and 2 elected members, and a Legislative Council of 27 members, 8 being ex-officio, 9 nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has 2 members, and each of the country districts 1.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College with its Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1907 amounted to Rs. 611,332. Of the pupils in the Government and aided schools, 64·91 per cent. are Roman Catholics, 2·76 per cent. Church of England, and 0·88 per cent. other Christian denominations; 9·23 per cent. being Mohammedans and 22·22 per cent. Hindoos and others to whom no assistance is given. The troops in the Colony on 31 December, 1907, numbered 1,009.

CAPITAL, Port Louis. Population (1901) 52,740.

DEPENDENCIES OF MAURITIUS.

(1.) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1901) 3,162. Area, between 80 and 90 square miles. Cattle, beans, salt fish and goats are the principal exports. The island is under the administration of a magistrate who takes his orders from the Governor of Mauritius.

Magistrate, E. Rouillard ..... Rs. 7,000

(2.) OTHER DEPENDENCIES. Most of the seat-

tered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to enquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is cocoa-nut oil. The most important is Diego Garcia (pop. 1901, 489), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1901) is 1,697.

Transit, Mauritius, 27 days.

THE SEYCHELLES ISLANDS.

By letters patent of Sept., 1903, these islands, which number altogether 89, were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 148½ square miles, of which, according to a recent survey, Mahé occupies nearly 56 square miles. The island of Coëtivy, formerly under Mauritius, was transferred to the Seychelles Government by Letters Patent in 1907. The seat of government is at Victoria, the capital, on the N.E. side of Mahé, which has an excellent harbour, and is constantly visited by men-of-war of all nations. The Admiralty have made Victoria a coaling station, and a depôt for patent fuel; quarantine regulations are on a reasonable footing, and the harbour dues light. The Seychelles Islands were originally discovered by the Portuguese, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1814. Although only 4° S. of the Equator, the islands are very healthy, the death-rate in 1907 being 14·32 per 1,000. The population of all the islands on May 31, 1901, was 19,237 (Mahé 15,166, Praslin 1,621, and La Digue 1,074), an increase since the census of 1891 of 2,526. The estimated population, December 31, 1907, was 21,502. There are 24 Roman Catholic and Church of England primary schools, and a grant-in-aid of Rs.10,000 was voted for 1907. In addition there is a Government school (the "Victoria School"), maintained at an annual cost of nearly Rs.14,000, where education of a higher class is provided.

The principal exports are vanilla, cocoa-nuts, cocoa-nut oil, tortoise-shell, cacao, soap, and guano. The export of vanilla in 1907 was 66,409 kilos, valued at Rs.966,917. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double cocoa-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. Mahé is in telegraphic communication with all important parts of the world *vid* Mauritius and Zanzibar. The Government, which is that of a Crown Colony, is vested in the Governor, assisted by an Executive Council composed of 3 *ex-officio* members, and by a Legislative Council consisting of 3 official and 3 unofficial members. The Governor is President of both Councils.

In the Southern Atlantic.

ASCENSION,

an isolated Island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55′ 55″ S. lat., and 14° 25′ 5″ W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with a circumference of 22 miles and an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it. It now possesses a steam factory, while there is also an excellent hospital and sanatorium. Partridges are being preserved for sporting purposes, and steps are being taken to exterminate the rabbits, which were formerly preserved and now prove a pest. The island is visited by the sea-turtle from January to May, which lay their eggs in the sand, 109 being "turned" during the season of 1908, their weight being from 500 to 800 lb. The sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month, their eggs being much appreciated by the inhabitants. In 1907 there were about 15 acres of ground under cultivation, producing vegetables and a small quantity of fruit, and there is also a small amount of

pasturage for sheep and cattle. The island is under the Board of Admiralty, by whom an officer is appointed as commandant. The inhabitants consist of officers and their families, seamen, marines, and Kroomen; a limited number of men also have their families with them, the full complement of the island being about 80 (exclusive of 15 members of the Eastern Telegraph Co.) with about 25 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. The island is fortified, and is connected by the Eastern Telegraph Co. with St. Vincent, St. Helena, and Sierra Leone.

Domestic imports from U.K.	1906. £5,344	1907. £4,980

Officer in Charge, Capt. J. W. Dunstan, R.M.L.I.
Staff Surgeon, H. J. Chater, R.N.

Transit, about 14 days.

TRISTAN D'ACUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6′ S. and long. 12° 2′ W., discovered in 1506 by a Portuguese admiral, after whom they are named. The population numbers about 100, and the inhabitants are said to be very long-lived.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15′—53° S. lat. and 57° 40′—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1907 of about 2,266. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1771, but not actually occupied. In 1820 the Republic of Buenos Aires established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonised, and from that time to the present have so continued, being, as a whole, the most southerly organised colony of the British Empire. The climate, though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved suitable for sheep; kitchen-gardens occupy the only cultivated part. The population is mainly British, and is principally engaged in sheep-farming and seafaring industries. The chief exports in 1907 were wool (£166,859), sheepskins, and tallow. The total tonnage of vessels entered and cleared in 1907 was 293,428. There are three places of worship (one Church of England, one Roman Catholic, and one Baptist). The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

There is a volunteer force of about 100 men.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is a dependency of the Falkland Islands. Among other dependencies are the South Shetlands, Graham's Land, the South Orkneys (on which the Argentine Government have, with the permission of H.M. Government, established a meteorological station), and the Sandwich Group.

CHIEF TOWN, Port Stanley.

Port Stanley is distant about 8,130 miles; transit, 27 days, monthly from Liverpool. Telegrams *sent by post* from Monte Video or Punta Arena.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the American Continent, and 1,800 from the coast of S. America, in 15° 55′ S. lat. and 5° 42′ W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population in 1907 of 3,485. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable. The thermometer goes up to 84° in the town at the sea-level; but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day: the lowest temperature in winter is 51°, and the total rainfall (1907) 44·045 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on 21 May, 1501 (St. Helena's Day), and remained unknown to other European nations until 1588, when it was visited by Captain Cavendish on his return from his voyage round the world. It remained uninhabited until the Dutch colonized it *circ.* 1645. The English East India Company

seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch by Capt. Munden, of the English Navy, and was held by the East India Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for Napoleon Bonaparte, who died there 5 May, 1821), when it was ceded by them to the Crown. In 1900 the island was used as a place of internment for prisoners of war from South Africa, the first detachment (consisting of General Cronje and 2,000 officers and men) arriving in April of that year. It was formerly an important station on the route to India, but its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by a few sailing ships homeward bound from the East Indies. The tonnage dues on calling ships were abolished in 1882, and the port is now free to all ships except when bringing or taking cargo to and from the port; the number which called in 1907 was 57. The phormium industry and lace-making, both under Government control, were established during 1907. It is of strategical importance as a coaling station, and has recently been fortified by the Imperial Government. St. James's Bay, on the north-west of the island, possesses a good anchorage. The garrison was withdrawn in October, 1906.

The government is administered by a Governor, with the aid of an Executive Council of 3 members, the Governor alone making all ordinances.

In the Mediterranean.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 30′ and 35° 41′, and E. long. 32° 15′ and 34° 35′. It is about 60 miles distant from the nearest point of Asia Minor; and 41 miles from Latakia on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is about 3,584 square miles. The population in 1901 numbered 237,022, of whom 21·64 per cent. were Mohammedans, and the remainder mostly members of the Orthodox Greek Church. Estimated population (1907) 249, 250. The principal productions are grain of various kinds, sesame, linseed, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, aniseed, sponges, sumac leaves, terra umbra, gypsum, and salt. The fertility of the soil has for centuries been proverbial. In 1907 the wine export was 962,672 gals., and that of spirits 49,882 gals., the bulk of wine going to Egypt and the spirits to Turkey. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus still forms part of the Ottoman Empire; but by virtue of a treaty made between England and the Porte, dated 4 June, 1878, the government is administered by England for so long a time as Batoum and Kars may be kept by Russia. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of eighteen members, six being official and twelve elected. The island is divided into three electoral districts, each returning one Mohammedan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English judge, who is assisted by two native judges, one being a Christian and the other a Mohammedan. There is also a Supreme Court for the whole island, consisting of two English judges.

The amount payable to the Sublime Porte yearly is £87,800 for revenue, £5,000 in compensation for State lands, and 4,166,220 okes of salt in kind (an oke=2·8 lb.). This sum is not actually paid to the Sultan, but is retained as part payment of the loss sustained by England and France in paying the deficiency on the Guaranteed Turkish Loan of 1855.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 14,752 in 1901; the other principal towns are Larnaca (population 7,964), Limassol (8,298), Famagusta (3,825), Kyrenia (1,336), and Papho (3,134).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and has been extended westwards to Morphou, a total of 60 miles. There is a regular service of steamers from Egypt, leaving Port Said every Wednesday

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24¾ square miles; Comino—the site of the *Sultana's* disaster in 1889 and now a sanitary station—and several islets. The civil population of the whole group, 1 April, 1908, was estimated at 209,974. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility consisting of 29 families. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. It was estimated that in 1907–8 the area under cultivation in Malta and Gozo was about 40,983 acres. On census day, 1901, 5,497 females were employed in making lace. The principal occupation of the people is in connection with shipping. In 1901 there were 30,768 persons living in Valletta, but the total population of the colony was 1,671 to the square mile. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet; and an additional graving dock was opened on Feb. 12, 1892. There is also a hydraulic dock, originally constructed by private enterprise, which has been taken over by the Admiralty. Two new dry docks and one arm of the breakwater at the mouth of the principal harbour have now been completed. The island is strongly fortified, and has a garrison which, on 31 March, 1908, consisted of 8,926 officers and men (including Militia, total strength 2,073). The military expenditure for 1907–8 amounted to £468,244, of which £5,000 was contributed by the colony. The climate, although not tropical, is very hot in summer. The mean temperature for the summer months (June, July, August and September) is 75·2°. In winter the range is from 51·3° to 58°. In 1907–8 the highest temperature in the shade was 94·1°, and the lowest 41·5°. Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 300, but its suburb, Rabato, had 7,194 inhabitants in 1901. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. Malta possesses a University and Lyceum; 99 elementary schools, 2 secondary schools, and 38 night schools, maintained at a total cost to the Government of £39,113; in addition to which there are garrison schools, a Dockyard school, and 119 private schools which receive no grants-in-aid from the Government.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814. The government is administered by a Governor, who is usually a distinguished General, assisted by an Executive Council consisting of 11 official members, and by a Legislative Council, called the Council of Government 10 official and 8 elected members. The Governor is President in both.

In 1907–8 the Port of Valletta was entered by 3,254 vessels (tonnage, 3,792,495).

Malta is 2,280 miles by sea, and *viâ* Naples about 1,995 ; transit, 4 days.

GIBRALTAR,

a rocky promontory, 3 miles in length and ¾ of a mile in breadth, and 1,439 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779–83, when General Elliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1907 3,732 vessels entered, with a total tonnage of 5,056,582. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, and beer. An enclosed harbour with three graving docks, capable of accommodating the largest battleships in the British Navy, has been completed. The civilian population (1901) was 20,355, and the actual strength of the troops 5,007.

The Governor is in command of the garrison, and exercises all the functions both of government and legislation ; there being no executive or legislative council.

Foreign Countries.

THE following articles provide, in a more or less permanent form, statistics concerning the Area, Population, Production, Finance, General Development and Commerce (stating the amount of Trade with the United Kingdom), with particulars of Government and Diplomatic and Consular Representation of the Principal Countries of the World.

Special Articles deal with *Armies*, pp. 666–667, *Education*, pp. 668–670 and *Exploration*, pp. 671–674.

Many of the following Articles have been revised under the direction of the various Governments. The Editor is also greatly indebted to His Majesty's representatives at Foreign Courts, to His Majesty's Consuls, and to several of the Foreign Ministers and Consuls in London. In statistics of trade the term "Domestic" Exports signifies the produce and manufactures of the country whence they come, and does not include articles re-exported after having been already received there from abroad.

POSTAGE, PARCEL and TELEGRAPH RATES will be found in the Postal Guide, pp. 361-365.

ABYSSINIA OR ETHIOPIA.

Emperor (*Negus Negusti* or *King of Kings*), Menelek of Shoa, G.C.B., G.C.M.G., *b.* 1843, *succ.* 12 March, 1889.

Damot, Ras Betwedet Mangasha Atikem
Equatorial Provinces, Fitaurari Habta Giorgis.
Bigimider, Ras Guksa.
Yeju, Ras Wolé.
Godjam, Dejazmach Siyoum.

Abyssinia proper consists of four provinces—Tiare, Amhara, Godjam, and Shoa. The total area of Abyssinia and its dependencies may be reckoned at 350,000 square miles, with a population of three or four millions of Abyssinians. The boundaries of the empire are defined on the W., N., and N.E., where they touch, in order, the Sudan; the Italian colony of Massowah (Eritrea), the French colony of Djibuti; and the British Somaliland Protectorate. Northwards the boundary is about 15° 30 N. lat., falling just south of Kassala. By the Treaty between the U.K. and Ethiopia of 15 May, 1902, the frontier between Ethiopia and the Sudan was fixed as a line drawn from Khor Um Hagar on the river Setit to Gallabat, thence to the Blue Nile, Baro, Pibor, and Akobo Rivers to Melile, and onwards to the intersection of the 6° N. lat. with 35° E. long. The southern frontier, bordering the British East Africa and Uganda Protectorates, was defined by Treaty of December 6, 1907, and the frontier bordering the Italian Colony of Benadir, by Convention of 16 May, 1908.

Abyssinia proper is volcanic and mountainous. It contains little mineral wealth, though iron and coal are not uncommon. Gold is washed in various streams, and salt, saltpetre, sulphur, copper, and silver are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered and have a genial climate. In the hotter regions, sugar-cane, cotton, coffee, indigo, banana, &c., flourish; in the middle zone the vine, palm, maize, wheat, barley, orange, peach, and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 9,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, camels, oxen, goats, and sheep form a large portion of the wealth of the people. The wild game consists of elephant, rhinoceros, hippopotamus, zebra, giraffe, antelope, ibex, buffalo, hyena, lynx, &c. To the north-east the people are more akin to the Caucasian and the Semitic, to the south-east more akin to the negro; on the west are the plain-dwellers who talk Amharic; on the east the mountaineers speaking Tigré, which is akin to ancient Arabic. The Abyssinians are Christian and their kings claim descent from Menelek, the son of Solomon by the Queen of Sheba. There is no popular literature, and no education. The Emperor's potential army probably numbers 200,000, armed with rifles. The principal pursuits are war, agriculture, cattle breeding and hunting; industry is looked down upon; the chief exports are coffee, honey, civet, wax, gums, spices, hides, ivory, and gold. The currency is the Maria Theresa (Austrian) dollar, but Indian rupees also find some circulation in Harrar, and a Menelik dollar (value 2*s.*) is in circulation. In 1905 a charter was obtained for a state bank, which was inaugurated at the end of that year. The import duty on all goods at Harrar is 8 per cent. *ad valorem*: in the interior the duty is variable. The imports were valued at about £350,000 for 1901, the exports being about £230,000. A railway is being built under French auspices from Jibuti to the capital, of which the first stage is completed and open for goods and passenger traffic to Dire-Dawa, about 185 miles from Jibuti and 25 miles from Harrar, to which place a carriage-road has been built. The posts and telegraphs are under French management, and Abyssinia has applied for admission to the Postal Union. A line of telegraph connects Jibuti and Harrar. Harrar and Adis Ababa are connected with the telegraph and telephone, and a new telegraph line was opened in 1904 between Adis Ababa and Massowah, the port of Eritrea. There is a telephone line from the capital to Goré. The principal towns of Abyssinia, besides Adis Ababa, are Adowa, the capital of Tigré, Gondar, Debra-Markos, Basso, Aksum, Antalo, Ankober, Gore, Dembecha, Ijubc, and Harrar, which is a dependency of Shoa. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor

Adis Ababa is 500 miles from Zaila, *viâ* Harrar; letters from London are from 22 to 23 days in transit if the mail connects with steamer service from Aden; caravans take from 35 to 45 days.

AFGHANISTAN. (*See* pp. 535-6.)

ALGERIA. (*See* "France.")

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 6,000: it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed in turn by France and the Bishop of Urgel.

ARGENTINE REPUBLIC.

President, Dr. José Figueroa Alcorta, *until* Oct. 12, 1910 ..... $36,000
Vice-Pres., Dr. Luis Guemes 18,000
Minister of the Interior, Dr. Marco Avellaneda.
Foreign Affairs, Dr. V. de la Plaza.
Finance, Dr. Manuel de Iriondo.
Justice and Public Instruction, Dr. R. S. Naon.
Agriculture, Señor Pedro Ezcarra.
Public Works, Señor E. Ramos Mexia.
War, General R. M. Aguirre.
Marine, Rear-Admiral Onofre Betbeder.

Minister in London, Florencio L. Dominguez, 2 Palace Gate, W.
1st Sec. of Legation, Vicente J. Dominguez.
2nd Secretary, Luis H. Dominguez.
Attaché, Carlos Dominguez.
Naval Attaché, Capt. V. E. Montes.
Consul-Gen., Dr. Sergio Garcia Uriburu, 3 Budge Row, Cannon Street, E.C.
Vice-Consul, Capt. Don Estevan de Loqui.

There are also Consulates at *Liverpool, Southampton, Cardiff, Manchester, Newport* and *Glasgow*.

The River Plate was discovered in 1517, and settled by the Spaniards in 1535. In 1810 connection with Spain was severed and independence proclaimed. The Republic is composed of 14 provinces and 9 territories, comprising in all about 1,212,000 square miles, with a population of over 6,000,000. The constitution is modelled on that of the U.S. of America. The government has enjoyed considerable stability since 1890. The principal productions are wheat, maize, linseed, sugar, wool, cattle, sheep and horses. The total head of cattle is estimated at 30,000,000, sheep at 120,000,000, and horses at 5,000,000. The wheat crop for 1907 exceeded 5,000,000 tons. The export of frozen meat to the United Kingdom is an important industry. There are seven factories in operation, of which three are English. The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, manganese, and wolfram. The imports from the United Kingdom are coal, machinery, linen and woollen goods. There are about 13,000 miles of railway open, and extensive construction is projected. The railways are almost entirely in the hands of British companies, and absorb about £134,500,000 of British capital. Telegraphs about 32,000 miles, mostly government lines. Immigration is encouraged and comes principally from Italy. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. 999 British ships (2,236,588 tons) entered Buenos Aires during 1907. Education (*see* p. 668).

Defence.—The navy comprises three ironclads, four armoured cruisers of 6,840 tons, about ten years old, three destroyers, and a considerable number of vessels of minor value, and torpedo craft, strength about 5,000 men. There is a naval port at Bahia Blanca. A naval construction scheme is projected. Army (*see* p. 666).

The climate is moderate and healthy. Spanish is in ordinary use.

AUSTRIA-HUNGARY.

I.—THE JOINT MONARCHY.

Reigning Sovereign, Francis Joseph I. Emperor of Austria, &c., and Apostolic King of Hungary, *born* 18 August, 1830; *succeeded* (as Emperor of Austria) 2 Dec., 1848; *crowned* King of Hungary at Ofen, June 8, 1867; *married* 24 April, 1854, Elizabeth, daughter of Maximilian Joseph, Duke in Bavaria (*born* 24 Dec., 1837, *assassinated* in Geneva 10 Sept., 1898), and has issue 2 daughters.

* These figures have all been reduced to their approximate values in £ sterling.
† Estimated.
‡ These figures are in reality very much larger, as probably 60 per cent. of the exports "for orders" amounting in 1907 to £19,247,000, go to the United Kingdom.
§ £22,362,233 fully secured by gold stored in the *Casa de Conversion*.

Heir Presumptive, his nephew (son of the late Archduke Charles Louis), Archduke Francis Ferdinand of Este, *born* 18 Dec., 1863.

Minister of Foreign Affairs and of the Imperial and Royal House, Baron Alois von Aehrenthal.
Minister of Finance, Baron Stephan Burián.
Minr. of War, Feldzeugmeister Franz Schönaich.
Navy (department of War Office), *Commander*, Admiral Count Montecuccoli.
Ambassador to Germany, L. de Szögyény-Marich; *Italy*, Count Lützow; *France*, Count Khevenhüller-Metsch; *Papal*, Count Széchen; *Russia*, Count Leopold Berchtold; *Spain*, Count Welsersheimb; *Turkey*, Markgraf von Pallavacini; *U.S.A.*, Ladislaus Baron Hengelmüller von Hengervár.

Ambassador in London, Count Albert Mensdorff-Pouilly-Dietrichstein. *Embassy*, 18 Belgrave Square, S.W.
Councillor and First Sec., Count L. Szechenyi.
Secretary, Baron Erich Zwiedineck.
Secretary, Prince Emil Fürstenberg.
Attachés, Prince Rudolf Esterházy; Count E. Pejacsevich.
Chancellor, Karl Pollak.
Military Attaché, Prince Frederich von und zu Liechtenstein.
Naval Attaché, Capt. Louis Napoleon von Wawel.
Director, Commercial Dept., M. von Maurig.
Consul-General, Baron Alfred de Rothschild; M. von Maurig.
Vice-Consuls, Conte Dandini, Theophil von Jaeger.
Office of Consulate, 22 and 23 Laurence Pountney Lane, E.C.

The largest Empire, next to Russia, on the continent of Europe, situated between 42° 15′—51° 3′ N. lat. and 9° 30′—26° 20′ E. long. It embraces an area of 675,887 sq. kilometers, and a population (1905) of nearly 49,425,000.

Austria-Hungary, or according to the official denomination, the Austro-Hungarian Monarchy, consists of two States, the Empire of Austria and the Kingdom of Hungary, and of the occupied provinces Bosnia and Herzegovina, which were annexed 6 Oct., 1908, by Imperial rescript addressed to the Premiers of the two States. Each of the States has its own Constitution and Parliament, and for most branches, of State affairs, its own Ministry and Administration, but they are closely bound together by the identity of the Ruler and by a permanent Constitutional Union, which, upon the common principle of possession and defence, was first proclaimed by the Pragmatic Sanction of 1723, and has since been regulated by the so-called "Compromise" (Ausgleich-Kiegyezés) of 1867. According to the Constitutional Union foreign affairs and the greater part of war affairs (Army and Navy), together with the finances concerning them, are dealt with by common ministries. The control of the official actions of these ministers and the voting of the common budget is exercised by two Delegations, each consisting of 60 members, of whom 20 are chosen from the Upper House of Austria (Herrenhaus) and of Hungary (Förendiház), and 40 from the Lower House of Austria (Abgeordnetenhaus) and of Hungary (Képviselohaz). In every other respect legislation concerning the common affairs belongs to the two Parliaments, and each State provides separately for its contribution to the common expenses. The proportion to be contributed by each State is fixed by mutual agreement, renewable every 10 years, and the last so made, which expired in 1897, was renewed in 1907. According to this agreement Austria contributes to the common expenses with 63·6 per cent., and Hungary with 36·4 per cent. From 1897 to 1907, no new proportion having been agreed, the quota was fixed by the Emperor-King's decision.

Common expenses were estimated (for the year 1909) at £17,764,262.

In connection with the "Ausgleich" the two States also entered into a commercial and customs union in 1867, by which the two States form one commercial and customs territory, and possess the same system of coinage, weights and measures, and a joint bank of issue. In the same way as the quota agreement, this union is renewable every ten years, and failing a renewal each State provides separately for these matters. The Union was so renewed in 1877, 1887 and 1907. In 1897, no agreement having been attained, the Union was provisorily maintained.

Defence (for Army, *see* p. 666).—The navy consists of 156 vessels, including 12 battle-ships, 11 cruisers, 13 torpedo-boat destroyers, and 71 torpedo boats, with 12 vessels on the Danube. Pola is the naval arsenal.

The principal articles exported from Austria-Hungary in 1905, 1906 and 1907 were:—

	1905.	1906.	1907.*
Cereals, &c. ...	£5,396,708	£5,017,292	£6,305,960
Eggs	4,048,958	4,639,458	5,148,625
Skinore	2,492,750	2,333,417	2,293,917
Sugar	7,884,250	8,223,875	8,255,083
Raw Material	37,982,417	36,091,708	35,681,542
Foodstuffs	27,371,292	24,377,000	23,901,917
Manufactures	41,639,583	44,430,333	44,154,958
Semi-manufactures ...	13,868,833	15,849,292	17,281,875

Commerce is carried on principally with Germany, Italy, Russia, France, and Switzerland, and through the ports of Trieste and Fiume, also direct with the transmarine world, including England. In 1905, 39,945 kilometres of railway were open for traffic, in addition to 2,872 kilometres for industrial purposes, and 1,323 kilometres in Bosnia-Herzegovina.

	1906.	1907.*
Total exports, A. & H.	£96,371,250	£97,118,361
Total imports, A. & H.	93,741,667	97,661,918
From U.K.	7,887,815	—
To U.K.	9,638,536	—

[In calculating the above amounts the *krone* is reckoned at the rate of 24 to the £.]

Occupied Provinces. Bosnia and Herzegovina are situated between 42° 40′ to 40° 15′ N. lat. and 33° 22′ to 38° 45′ E. long. and contain a total area of 51,028 sq. kilometres, and a population of 1,737,000 (1900). The seat of administration is Sarajevo. The local Revenue (1903: £1,921,825) suffices for the cost of administration (£1,893,721), but not for the maintenance of the army of occupation.

II.—AUSTRIA.

President of the Council, Dr. Rich. Freiherr von Bienerth.
Justice, Dr. Franz Klein.
Finance, Dr. Witold von Korytowski
Interior, Freiherr von Härdtl.
Agriculture, Dr. Albert Ebenhoch.
Commerce, Dr. Franz Fiedler.
Public Worship & Instruction, Dr. G. Marchet.
Railways, Dr. Julius Derschatta von Standhalt.
Works, Dr. Albert Gessmann.
Defence, Feldmarschalleutnant Friedrich von Georgi.
Without Portfolio, Freiherr von Dzieduozyski; Dr. Zacek; Herr Schreiner.

Austria contains an area of 300,008 sq. kilometres, and a population of 27,496,712 (1906). The Central Government of the Empire is conducted by the Reichsrath, consisting of an Upper (Herrenhaus) and Lower House (Abgeordnetenhaus). There are 17 provinces, viz.: Lower Austria, Upper Austria, Salzburg, Styria or Steiermark, Carinthia or Kärnten, Carniola or Krain, Coast Districts (Istria, Görtz and Gradisca, Trieste), Tyrol, Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukowina and Dalmatia, each possessing a separate Diet (Landtage) and also sending representatives to the Reichsrath. Of the inhabitants, there were in 1900, 9,171,614 Germans, 5,955,397 Bohemians and Moravians, 4,252,483 Poles, 3,381,570 Ruthenians, and 1,192,780 Slovenes. In addition to Vienna there are six cities with over 100,000 inhabitants and seven in addition with over 50,000. There are 23,797,000 Roman, Greek and Armenian Catholics, 607,000 Orthodox Greek, 494,062 Protestants and 1,225,000 Jews in the country.

The principal industry is agriculture, in which 13,700,000 were employed in 1900; trade and manufactures accounting for about 9,600,000, while mining occupied 538,819. The chief products are grain, cereals, wine (4,250,342 hectolitres in 1907), and minerals (coal, iron, lead, zinc, silver, quicksilver and copper); the manufactures being woollens, cottons and glass.

III.—HUNGARY.

President of the Ministry and Finance, Dr. Alexander Wekerle.
Minister a latere, Count Aladár Zichy.
Interior, Count Julius Andrássy.
Instruction and Religion, Count Ethelbert Apponyi.
Commerce, Francis de Kossuth.
Agriculture, Dr. Ignaz de Darányi.
Justice, Dr. Anthony Guenther.
National Defence, Lewis de Jekelfalussy.
Minister for Croatia, Géza de Josipovich.

Hungary, with its dependent states, has an area of 324,851 sq. kilometres, about 125,430 sq. miles, and is rather larger than the United Kingdom, with a population of 19,254,559 at the census of 1900: to this Croatia and Slavonia contribute 2,416,304. The country is divided into 71 counties with 474 districts for those of Hungary. Hungarian is the official language, except in Croatia and Slavonia, where Croatian is spoken. Croatia and Slavonia form an annexe of the Crown of Hungary, with autonomy in home affairs, justice and public instruction. At the head of the Croatian Government is the *Banus* (Lord-Lieutenant), Baron Paul Rauch, who is responsible to both the Diet of Croatia and to the Hungarian Prime Minister. The Croatian Diet sends 43 members to the Hungarian Parliament, and the Hungarian Ministry contains a Croatian member. Parliament consists of a Lower House of 453 members, elected for five years; of these Croatia sends 40, but they have no vote on matters connected with justice, education, and home affairs. There is also an Upper House, consisting of the male members of the dynasty, the *Barones regni*, prelates, such members of the magnate families who contribute more than 6,000 crowns to the land-tax, the *Banus*, with three members of Croatia sent by the Diet, and fifty members nominated by the Crown.

Of the inhabitants in 1900, 8,742,000 were Hungarians, 2,799,000 Roumanians, 2,135,000 Germans, 2,020,000 Slovaks, 1,682,000 Croatians and 1,049,000 Servians, the Hungarian-speaking population numbering 10,176,000. By religions (1900) there were 9,920,000 Roman Catholics, 1,854,000 Greek Catholics, 2,816,000 Orthodox Greeks, 1,289,000 Lutherans, 2,441,000 Calvinists, and 851,000 Jews. In addition to Budapest, which had, in 1900, 732,322 inhabitants, there are ten cities with over 50,000 inhabitants.

All the great plains produce grain of excellent quality. The returns for 1907 (including Croatia and Slavonia) give 46,450,412 hectolitres of wheat, 14,731,574 of rye, 21,608,807 of barley, 27,007,252 of oats, and 59,874,007 of Indian corn. The cattle number 6,738,000, sheep 8,123,000, horses 2,308,000, and swine 7,330,000. The exports are chiefly cereals, live stock, and raw materials. Wheat figures for £4,849,593, barley £2,446,876, rye £2,284,111, and wheaten flour £8,983,195. The imports are chiefly manufactured goods, textile fabrics alone being valued at £19,678,958. The chief mineral products are gold, silver, copper, lead, quicksilver, antimony, iron, coal, and sulphur.

The mines, however, are not well worked, and might be made a much greater source of income. Salt, which is a Government monopoly, was produced to the value of £1,350,000 in 1907.

Minister in London, Comte de Lalaing, 15 West Halkin Street, Belgrave Square, S.W.
Councillor, Mr. J. Mélot.
1st Secretary, Count H. Mouchet de Laubespin.
2nd Sec., Count Charles de Liedekerke.
Consul-Gen., François H. Lenders, 29 Great St. Helens, E.C.

A Kingdom of Central Europe, anciently inhabited by the Belgæ (a Celtic-speaking German tribe), and part of the *Gallia Belgica* of the Romans. In 1815 the country was joined to the Kingdom of the Netherlands, an arrangement which was upset by the Revolution of 1830. On Oct. 4, 1830, a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Saxe-Coburg was chosen hereditary King. In Sept., 1908, the Congo Free State was annexed by Belgium.

Belgium has a frontier of 831 miles, and is bounded on the north and east by the Netherlands (268 miles), on the south and west by France (381 miles), on the east by Germany (60 miles), and the Grand Duchy of Luxemburg (80 miles), with a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The total area is 11,373 square miles, about equal to the four counties of Hertford, Lancashire, York, and Lincoln; its great harbour and commercial *entrepôt* is Antwerp, a strongly fortified city on the Schelde. The other harbours are Ostend, Nieuport, Blankenberg, and Zeebrugge.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 63°, winter 37°).

The population was 7,238,622 on Dec. 31, 1906, or 636 to the square mile; it is consequently one of the most densely peopled countries of the world. The decennial increase is about 10 per cent., and since 1867 there has been an annual excess of immigrants over emigrants, the totals in 1906 being emigrants 32,858; immigrants, 37,382. There were (1904) 3,560,419 females to 3,514,491 males; and annually 27 births and 17 deaths to every 1,000 inhabitants. There are nine provinces: Antwerp, Brabant, Flanders (E. and W.), Hainaut, Liège, Limburg, Luxemburg, and Namur. BRUSSELS (with suburbs, 678,823 inhabitants) is the capital. Other towns with over 100,000 inhabitants are Antwerp, the chief port (304,032 exclusive of suburbs), Ghent (163,079), and Liège (172,039).

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders and Brabant, including Antwerp. In 1900, 42 per cent. spoke Flemish, 38 per cent. French, and 12 per cent. both tongues, the latter being a rapidly increasing class (423,752 in 1880 and 801,587 in 1900). Nearly all the inhabitants are at least nominally Roman Catholics, and in 1900 there existed 2,500 convents, inhabited by 6,237 monks and 31,668 nuns, this number being now increased owing to influx of monks and nuns from France.

Education (*see* p. 668).

Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The soil was divided (1895) among 829,625 proprietors. The mineral kingdom yields coal (1906, 23,569,860 tons), iron (1906, 232,570 tons), zinc, lead, and copper. The leading industries are collieries, quarries and metallurgic (Mons, Charleroi, Liège, Namur, Hainault, and Brabant), glass, textiles (Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c. The follow-

* Austria and Hungary have no common debt, but in the expenditure of the Kingdom of Hungary the sum of £2,525,916 is set aside annually as a contribution to the service of the General Debt of Austria contracted before 1867.

ing table shows the distribution of Belgian commerce in millions of francs, 1905 and 1906 :—

	Imports from		Exports to

Fish	245,208	,, Manufactrs.	639,581

Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1906) of 75 vessels (112,515 tons), in addition to which there were about 422 fishing boats. In 1905 a new port was inaugurated at Zeebrugge with a sea lock and inside dry dock. In 1906, 10,247 foreign vessels entered at Belgian ports (tonnage 12,945,568). In 1907 there were 4,574 kilometres (= 2,860 miles) of railway, (including branch lines and private lines rented by the State); the telegraphs had a length of 4,196 miles (1907), and the post-office carried 1,363,418,626 letters, post-cards, &c., in 1906. The navigable rivers and canals have a length of 1,357 miles (1907).

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 110 senators (with the exception of 27 elected by the provincial councils) and 166 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. And the united constituencies numbered 1,625,876 voters, with 2,564,717 votes, in 1907–8. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

Defence (for Army, *see* p. 676).

Antwerp is the principal fortress, and Liège and Namur are also fortified, forming "Têtes-de-pont" on the line of the Meuse against a violation of neutrality by either France or Germany. Belgium has no navy. (See above.)

The Congo.—The territory of the Congo includes the right bank of the Congo river from Manyanga to the sea, and 16 miles of sea-coast north of the estuary; the left bank from Noki (80 miles from the sea); and thenceforth both banks. It was formerly known as the Independent State of the Congo, and was annexed to Belgium in September, 1908.

The total area amounts to 802,000 square miles, with a native population estimated at 14,000,000 to 15,000,000. The total European population (Jan., 1903) was 2,365, of whom 121 were British, 41 Americans, 149 Italians, 108 Portuguese, 136 Swedes, 67 Germans, and 1,417 Belgians (mostly Government officials). The river is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 240 miles in length. There is also a second line, 60-centimetre gauge, from Boma to the Mayumbe country. The Great Lakes Railway is completed as far as Ponthierville, about 75½ miles (1906). A line of telegraph is open to Coquilhatville. There is telegraphic communication with Europe *viâ* Leopoldville and Brazzaville (a cable goes across the river between these two places)—by land lines from Brazzaville to Libreville, and thence by submarine cable to Europe. A terrible disease, called "Sleeping Sickness," for which no remedy has yet been discovered, has of late years made increasing ravages upon the native population, and threatens to depopulate large districts (especially in the Lower Congo) of a country in other respects capable of supporting with ease a large population. There are undoubtedly many fertile tracts, more especially along the rivers; but barren mountain-land shuts out the coast from the more productive interior. The exports consist mainly of rubber (three-fifths of the whole), palm-kernels, palm-oil, ivory, and a few minor articles. The coffee plant and cotton grow wild, and coffee, cocoa, and tobacco have been planted with success. Iron, copper, and other minerals have been found. There is a special import duty on spirits; 10 per cent. *ad valorem* is charged on salt, arms and all other goods.

In 1906 the revenue amounted to £1,178,200, and the expenditure to £1,371,050. The total imports were valued at £859,103 in 1906, the exports at £2,355,791 in 1907, of which the United Kingdom supplied about 10 per cent. of the imports and took about 2 per cent. of the exports.

The capital is Boma. Pop. 3,300 (of whom about 300 are Europeans and the remainder largely native soldiers with their families). Matadi has a population of about 4,000, of whom 250 are Europeans.

BOLIVIA, REPUBLIC OF.

President, Señor Montes, *born* 1860; *proclaimed* 6 Aug., 1904 (term extended for 1 year, 1908).
Foreign Affairs, Dr. Juan M. Saracho.
War (& Finance ad int.), José S. Quinteros.
Justice, Dr. Juan Saracho.
Interior, Señor Anibal Capriles.
Colonies & Agriculture, Señor Manuel Vicente Ballivian.

Envoy Extraordinary and Min. Plen. (vacant).
Offices of Legation, 74 Compayne Gardens, N.W.
Consul-General and Chargé d'Affaires, Col. Don Pedro Suarez, 12 Fenchurch Street, E.C.

This and Paraguay are the only States of South America without a seaboard. Antofagasta, its former port, having been ceded to Chile. It was formerly comprised in the Spanish Vice-royalty of Colombia under the name of "Alto Peru," and derives its present name from its great liberator, Simon Bolivar. It extends between lat. 8° and 23° S. and long. 57° 30′ and 73° W., and its area is said to be 570,000 square miles.

The estimated population in 1907 was 2,180,710. The peace army amounts to about 3,000 men, the war effective being about 90,000. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible; while gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes: tin, copper, lead, antimony, wolfram, bismuth, salt and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which with tin, gold, silver and copper are its principal exports; its chief imports being iron, cotton and woollen goods, hardware, and silks. There were (Oct. 1902) about 1,051 miles of railway and 4,565 miles of telegraph wire. The only seaport is on the coast strip seized by Chile after the war of 1879; in 1905 a treaty was concluded under which Chile retained the port in return for an indemnity of £300,000 and railway and tariff concessions. A railway connects Oruro with La Paz, and an extension of the Argentine Northern Central line through La Quiaca is being surveyed on Bolivian territory.

Military Attaché, Col. Gabriel de Souza Pereira Botafogo.
Consul in London, F. Alves Vieira, Coventry House, South Place, Finsbury, E.C.
Consul-Gen. in Liverpool, Capt. J. C. da F. Pereira Pinto.

The Republic of the United States of Brazil was founded on the 15th of November, 1889, by a bloodless revolution which drove Dom Pedro from the throne. On February 24, 1891, a new Constitution was voted by the Constituent

* As at 31 Dec., 1906.

Assembly by which the President's term of office was fixed at four years; Church and State were separated, civil marriages only made valid, and education secularised.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvarez Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, Guiana, and Venezuela; on the west by Ecuador, Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. This immense country extends between lat. 4° 22′ N. and 33° 45′ S. and long. 34° 40′ and 73° 15′ W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. It comprises an area of 3,218,166 square miles, and contains a population estimated at 20,000,000. There are about 1,000,000 "wild" Indians and other uncivilised tribes; 76,292 immigrants arrived in 1898. For *Army* see p. 667; the *Navy* (1906) consisted of 6 cruisers, 4 torpedo gunboats, and 8 torpedo boats. 3 first-class battle-ships and 4 cruisers are under construction. Brazil contains 20 states, 16 of which lie along the coast, and 4 in the interior. There are 42 ports along the coast, of which the principal is Rio, with a shore line of 123 miles. Brazil is unequalled for the number and extent of its rivers: the Amazon, the largest, though not the longest, in the world, with its immediate tributaries, and the Tocantins, San Francisco, and others. The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. Its forests are immense, abounding in the greatest variety of useful and beautiful woods adapted for dyeing, cabinet work, or ship-building; among these are mahogany, logwood, rosewood, brazilwood, &c. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the level of the sea, and in those regions European fruits and grain are reared in abundance, while the intermediate valleys are found extremely favourable for the raising of sugar, coffee, cotton, cocoa, india-rubber, tobacco, and tropical products. Its agricultural produce is abundant; maize, beans, cassava-root, and nuts are very generally cultivated; also, in some parts, wheat and other European cereals. Cotton also is being largely cultivated for export. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. India-rubber comes from the more northern provinces, especially Pará and Manáos; and coffee, though also grown in the north, comes chiefly from the central portions of the country, Rio de Janeiro, Minas, São Paulo, and Esperito Santo. Tobacco is grown largely, especially in Bahia. The exports consist solely of the raw produce of the soil, and owing to the vast extent of the country, and the consequent very different peculiarities of the soil and climate, their nature varies considerably. The imports consist of every description of manufactured articles, but there are 119 cotton-mills, giving employment to 41,300 hands, and representing an invested capital of 207,000 of contos of reis. The enormous protective duties were again increased in 1887, 1893, 1896 and 1906. In 1902 there were 9,370 miles of railway open, and about 3,000 miles in course of construction. Length of telegraph wires in 1897 about 11,376 miles; number of post offices, 2,862.

For *Education*, see p. 668.

Bulgaria was created by the Treaty of Berlin, 13th of July, 1878, and is governed by a Prince elected by the National Assembly or Sobranjé, with a popular legislature and constitutional government; in 1908 the country threw off its allegiance to Turkey, and is now independent.

Eastern Roumelia, likewise a creation of the Berlin Treaty of 1878, has an area of 13,862 square miles, and 998,431 inhabitants; it was intended to form an autonomous province, but since the successful revolution at Philippopolis of September 18th, 1885, it has been incorporated with Bulgaria, under the name of Southern Bulgaria, and the accomplished fact was recognised by the arrangement of April 5, 1886; it now forms an integral portion of Bulgaria, with the same ruler, laws, and mode of administration.

By modification of the Constitution, 1893, there is now one deputy to each 20,000 inhabitants, 115 for the northern, and 51 for the southern province.

Defence (for Army, *see* p. 666).—The navy consists of a torpedo gunboat and a few small steamers.

Education (*see* p. 668).

United Bulgaria is bounded on the north by Roumania, from which it is separated by the Danube; on the west by Servia and Macedonia; on the east by the Black Sea; and on the south by the Turkish province of Adrianople. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal. The principal towns, with their populations in 1905, are Sofia (82,000), Philippopolis (45,572), Varna (37,155), Rustchuk (33,552), Sliven (25,049), and Shumla (22,290). The great ports are Varna (2,338 vessels of 776,938 tons in 1906) and Bourgas (1,514 vessels of 552,324 tons). There are (1902) 1,020 miles of railway open; 3,270 miles of telegraph and 1,228 miles of telephone wires. North Bulgaria has an area of 24,237 square miles, and South Bulgaria an area of 12,706 square miles. Population according to language or nationality and religion (census of 1 January, 1900):—

CHILE, REPUBLIC OF.

President, Pedro Montt; *installed* 18 Sept., 1906 (for five years).
Premier and Interior (1908), Javier Figueroa.
Foreign Affairs, Rafael Balmaceda.
Justice and Public Instruction, Eduardo Suarez Mujica.
Finance, Pedro Montenegro.
War and Marine, Aníbal Rodriguez.
Industry & Public Works, Guillermo Echavarria.

Envoy Extr. and Min. Plen., Domingo Gana, 29 Queen's Gate Terrace, S.W.
1st Secretary, Victor Eastman.
2nd Secretary, Felipe Aninat.
Consul, Vicente Echeverria Larrain, 4 Lloyd's Avenue, E.C.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 18° 28′ and 56° 35′ S., and long. 66° 30′ and 75° 40′ W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 10,000 feet above the level of the sea; but numerous summits attain the height of 18,000 feet—the highest, Aconcagua, an extinct volcano, being 22,422 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 21 provinces and 3 territories, the aggregate area of which is estimated at 290,741 square miles, with a population (1900) of about 3,110,000, exclusive of Araucanians, Bolivian and American Indians, numbering about 50,000. The principal towns, with their estimated populations (1900), are:—Santiago (320,000), Valparaiso (143,000), Concepcion (55,400), Talca (43,000), Iquique (34,300), Chilian (34,000), and Antofagasta (20,000). The natural increase in the population is slow, but immigration, freely encouraged in 1907 by the grant of free passages, is redressing the balance, the majority of incomers hailing from Spain. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The chief feature of 1904 was the large number of native and foreign companies raised for sheep and cattle industries in the south, the climate and conditions for which are said to be unsurpassed. The mineral wealth is considerable, the country being

extremely rich in copper-ore, and some rich gold mines have been discovered. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, cloth, cheese, furniture, candle, and paper factories, breweries and distilleries, and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and six lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 40 days. There are (1902) about 3,000 miles of railway open, nearly 15,000 miles of telegraph, over 750 post-offices, and 5,800 miles of telephone, the last worked by an English company. In 1904 a contract was signed for the completion of the Chilian section of the trans-Andean line, which it is hoped to complete in 1910. The commercial marine numbers 191 vessels (40 steamers), of 90,738 tons. In 1902, vessels of a total tonnage of 3,721,161 entered, and vessels of a total tonnage of 3,310,551 cleared at Chilian ports. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, and guano. The imports include silks, woollens and other textiles, food, and machinery. About 40 per cent. of the foreign trade is carried on with England. The paper currency was worth about 12½*d.* in 1907, conversion to 18*d.* is stipulated by law to take place on Jan. 1, 1910.

Defence (for Army, *see* p. 666).—The navy consists of about 12 large and 10 small ships of war; an important naval programme was adopted in 1906, but is still under consideration.

Education (*see* p. 668).	1907.	1908.

Attachés, Whung Yung Liang; Liu Ti Tao; Tung Cheng Ling.
Commercial Attaché, Cheo Fong Kong.

China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,520 miles, and its population, according to the latest Chinese estimates, exceeds 400,000,000. On the north of the 18 provinces lie the vast regions of Mongolia and Manchuria, and on the west are Tibet and Turkestan, all of which are integral parts of the Chinese Empire; the area of these dependencies is over 2,500,000 square miles, with a scattered population of 19,000,000. The civil government of the 18 provinces is entrusted to viceroys and governors, and under them each province is subdivided into circuits superintended by taotais or intendants, and again into prefectures and districts. All the territorial officials are appointed by the Imperial Government, and the provincial viceroys and governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The administration of Mongolia and Turkestan is entrusted to Military Lieutenant Governors, who, with the Chinese officials in Tibet, are under the direction of the *Mongolian Superintendency*, or Colonial Office, in Peking.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant-adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence in the State, and had made many converts to Christianity; but their power aroused jealousy, and they were expelled from the country.

The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, which established "factories" at Canton.

When the Company's monopoly was withdrawn, in 1833, the position of British merchants

in Canton became a national question, and the restrictions placed in their way by the Chinese authorities, and the attitude of the Imperial Court at Peking in refusing to treat with Great Britain on terms of equality, all contributed towards the first war against China in 1840. A treaty was signed at Nanking, as the result of these operations, ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence; but the principle of extra-territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. For this reason, and for the general protection of their interests, consuls were appointed to reside in these "treaty ports" to watch over their national trade and interests.

The continued exclusiveness and conservatism of the Chinese Government led by a long chain of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. This war was closed by the ratification of the Treaty of Tientsin, which improved the commercial situation and opened more ports to foreign trade and residence, besides providing for the establishment of Legations in Peking. From this date the development of foreign trade began to be most important, and for many years Great Britain's share of it was greatly predominant.

Meanwhile, China has suffered largely for her own conservatism and ignorance. In 1885 the loss of her suzerainty over Upper Burma to Great Britain was followed by the cession of Tongking to France. In 1894 she fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Corea as an independent state. In 1897 Germany seized Kiaochou Bay as a reprisal for the murder of missionaries. Then Russia occupied Port Arthur as a naval station, and Great Britain leased Weihaiwei for the same purpose, besides improving her position at Hong Kong by occupying the mainland opposite, round the city of Kowloon. During the whole period, also, Russia had been extending her frontiers on the north.

An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners; and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1902. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ch'ing and the late Li Hung Chang. This provides for an indemnity of £65,000,000, to be paid within the next 39 years. Subsequent negotiations resulted in 3 new commercial treaties—(1) between the U.K. and China (5 Sept., 1902); (2) U.S. and China (8 Oct., 1903); and (3) Japan and China (9 Oct., 1903). Under the two last Mukden, Tatungkow, Chang-sha, and Antung in Manchuria, were made Treaty ports.

Initiatory measures have been taken by China, under the first of these Treaties, to introduce two important reforms—namely, the protection of trade-marks and the establishment of a uniform national coinage. As regards the former, provisional regulations have already been framed, and the latter was the subject of investigation by a joint American and Mexican Commission, which submitted a scheme to the Chinese Government for the adoption of a gold standard.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and the latter provides, *inter alia*, for the speedy opening by China of the following cities and towns in Manchuria as places of international residence and trade:—Feng-huang-ch'eng, Liao-yang, Hsinmintun, Tung-chiang-tzu (on the Liao River), and Fa-kumen in Fengtien Province; Ch'ang-ch'un, Kirin, Harbin, Ninguta, Hunch'un, and Sansing in the Kirin Province; and Tsitsihar, Hailar, Aihun, and Manchuli in the Heilungchiang Province.

Latest estimates of the foreign residents at the open ports of China are as follows:—British, 9,205; Japanese, 45,610; Americans, 2,862; Russians, 479; Germans, 3,553; French, 2,201; Portuguese, 3,118; Italian, 854; the total being 69,852. Out of a total of 2,595 foreign firms in China, 490 are British, 1,416 Japanese, 239 German, 115 American, 99 French, 57 Portuguese, and 70 Spanish.

Defence (for Army, *see* p. 676).—The navy has not recovered from the effects of the Chino-Japanese war, when more than ten important war vessels were sunk or captured. China now possesses 2 second-class cruisers (4,300 tons), and 11 third-class cruisers (875–2,500 tons); 3 torpedo gunboats (349–1,000 tons), 4 gunboats (215–411 tons), 32 first-class torpedo boats, and 12 second-class torpedo boats. Most of these were launched between 1885 and 1902. Of the torpedo boats about half only are fit for action. Four destroyers, built in 1898–9, were captured by the Allied Forces in 1900, and were appropriated by Great Britain, France, Germany and Russia respectively. Full complement of the navy is about 2,500.

SHIPPING.—The mercantile marine (1901) consisted of 46 steam vessels over 100 tons register, with a total net tonnage of 40,178 tons; in 1907 the total tonnage of vessels entered and cleared at the treaty ports was 80,109,424; of these 41 per cent. were British, 20 per cent. Chinese, 8 per cent. German, 19 per cent. Japanese, 6 per cent. French, 1 per cent. Norwegian, 1 per cent. American, and 4 per cent. other countries.

COMMERCE.—The total foreign trade of China in 1907 amounted to £110,627,086 (imports £67,665,223, exports £42,961,823), the highest total yet recorded; and an increase of £4,186,631 over the previous highest total (1906). It was shared by the nations of the world as under in 1907:—

British.	%	Foreign.	%
Great Britain	13	Japan	14
Hong Kong.....	37	U.S.A.	9
India.....	5	Europe (exc. Russia) ...	22
Other British Territories.....	2	Russia	3
		Other countries	5
% British	57	% Foreign	43

The principal exports to this country from China in 1907 were tea (£743,084), silk (£824,997), skins and furs of all kinds (£391,166), straw for plaiting purposes (£170,974), hair (£247,187), and bristles (£198,538); while the chief domestic

imports from the United Kingdom were cottons (£8,910,537), woollens and worsteds (£671,476), iron, wrought and unwrought (£1,019,359), machinery (£453,661), candles (£62,097), chemicals (£124,962), cotton yarn (£169,864), tobacco (£194,389), and soap (£119,299).

EDUCATION (*see* p. 568).

RAILWAYS.—About 3,900 miles were open (1908) inclusive of the Manchurian lines. The following are the lines completed and working:—*Manchurian Railways (Chinese Eastern Railway Co.)*—(*a*) Manchuria station *viâ* Harbin to Dalny and Port Arthur (1,200 miles), with 157 miles of branch lines. (*b*) Harbin to Pogranitchnaya on the East Manchurian frontier. *Imperial Railways of North China.*—Earnings of intra-mural section mortgaged to British bondholders. (*a*) Peking to Newchang (470 miles), with branch from Peking to Tungchow (12 miles). (*b*) Koupangtse to Mukden (102 miles), *viâ* Hsinmintun. (*c*) Chinchou-fu to the Nanp'iao coal mines (30 miles). (*d*) Kao-po-tien (on the Peihan line) to Hsiling Western Tombs, 30 miles. *Peihan Railway*, from Peking to Hankow (750 miles), with branches from Chingchou to Kiafeng Fu (35 miles), Kaifenfu to Honanfu (120 miles), and Chengtinfu to Taiyuanfu (150 miles). *Tsingtao-Chinanfu Railway* (250 miles). German direction. A branch line runs to Poshan (30 miles). *Taok'ou-Ch'inghua Railway* (Honan), 90 miles, crossing the Peihan line. *Shanghai-Nanking Railway* (200 miles). *Canton-Samshui Railway* (30 miles). *P'inghsiang to Liling* borders of Kiangsi-Hunan (56 miles). *Swatow-Chaochoufu Railway* (32 miles).

The following lines are under construction:—*Canton to Hankow* (650 miles). About 17 miles open from Canton to Kongtsun. *Laokai to Yunnan-Fu* (390 miles). Complete to Mengtze. *Peking to Kalgan* (125 miles). Open to Nankou (33 miles). *Kungyik (Kuangtung), viâ Sunning, to Samkahoi* (59 miles). 23 miles completed. *Wuhu to Kuangtechow* (90 miles). *Tientsin-Nanking Railway* (600 miles). Agreement signed in January, 1908. Work begun June, 1908. *Canton to Kowloon* (100 miles). British section approaching completion. *Shanghai to Kashing.* Rails about to be laid. *Hangchow to Shanghai.* 10 miles completed. *Amoy to Changchow* (30 miles). 5 miles built. Chinese capital and engineers.

The following lines are contemplated:—*British capital.*—Suchow to Ningpo, *viâ* Hangchow (170 miles). *German capital.*—Techow to Chengtingfu (100 miles); Yenchou to Kaifenfu (150 miles). *French capital.*—Longsan to Nanning, *viâ* Lungchow (150 miles). *Japanese capital.*—Amoy to Foochow (150 miles). There are also projects for lines from Hankow to Chengtu (Szechuan), *viâ* Wanhsien. Chinese engineers and construction; Canton to Amoy; Kalgan to Kuiun (Manchuria); Lanchoufu to Ili (Kansu); Kiukiang to Nanchang; Kuanchengtze to Kirin; Shihchiachuang (Chihli) to Tehchou (Shantung); Hsinmintun to Fakuman; and Loyang to Tungkuan (Honan).

TELEGRAPHS are being rapidly constructed by the Imperial Government, and Pekin is in communication overland with Europe. The total length of line in operation at end of 1905 was 11,379 miles.

CUSTOMS AND POSTS.—The Imperial Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of Sir Robert Hart, G.C.M.G. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. It is not yet exactly known how far this change will affect the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations; it also manages the Imperial Post Office, whose operations have been much developed in the last two years. Already letters can be sent all over the 18 provinces at a uniform rate of 2 cents (or less than one halfpenny) per half-ounce. The number of Chinese post offices is 2,803.

FINANCES.—Sir R. Hart, in 1901, estimated the annual revenue as follows: Land tax, 26,500,000 taels; provincial duties and receipts, 2,600,000 taels; grain commutation, 3,100,000 taels; salt gabelle, 13,500,000; likin, 16,000,000; customs (maritime), 23,800,000, (native) 2,700,000; total, 88,200,000 taels. The expenditure was estimated at 101,120,000 taels.

*Total debt (about)	£54,500,000
*Interest due (about)	2,500,000

COLOMBIA, REPUBLIC OF.

President, General Rafael Reyes, *elected* 7 August, 1904 (for 10 years).
Foreign Affairs, Dr. Urrutia.

Envoy Extraordinary and Minister Plenipotentiary in England, Dr. Ignacio Gutierrez-Ponce, 42 Holland Road, W.
Secretary of Legation, Pablo Lorenzana.
Consul-General, Francisco Becerra, Friar's House, New Broad Street, E.C.
Consul in Liverpool, Dr. Carlos Arturo Torres.
Consul at Southampton, Jaime Gutierrez.

Formerly New Granada—a Republic with Constitution, 5 August, 1886—consisting of the Capital District of Bogotá and 34 Departments created by a Law of 5 April, 1908. In the most North-West part of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40′ S. to 12° 25′ N. lat. and 68° to 79° W. long., comprising an area of 473,000 square miles, and possessing an estimated population (1895) of about 4,000,000, of whom more than one-half are whites and half-castes. It has been frequently subjected to revolutionary changes and civil wars, and in December, 1903, the Department of Panama proclaimed its independence and now exists as a separate republic. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. Its mineral productions are gold, silver, platinum, copper, iron, lead, coal, and emeralds. Its principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, and india-rubber. All religions are tolerated. The standing army consists of about 6,000 men; the navy has been abolished. Railroads are in their infancy, about 410 miles being open in 1907, with 8,680 (1907) miles of telegraph. The rate of exchange is about $100 paper=$1 gold; $500 paper=£1 (approximately).

COSTA RICA, REPUBLIC OF.

President, Cleto Gonzalez Viquez, *assumed office* 8 May, 1906, for 4 years.
Minister of Foreign Affaire, Alfredo Volio (*ad int.*).
Commerce & Finance, O. F. Rohrmoser.
Interior, Alfredo Volio.
War and Marine, Vidal Quiros.
Consul-Gen. for U.K., Wenceslao de la Guardia, 58 Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 27′ and 11° 10′ N. lat. and from 82° 30′ to 85° 45′ W. long., contains an area of about 23,000 English square miles, and a population (1907) of 351,176. The chief exports are coffee (281,137 bags, value £683,975, 1907), bananas (10,165,759 bunches in 1906, value £972,875), cacao, cedarwood, fustic, and hides. The imports are dry goods, hardware, provisions, railway material, machinery, paints, and general merchandise (in 1907, 44·99 per cent. from United States, 23·13 from United Kingdom, 10·86 from Germany, 5 from France, and 16·02 from other countries).

The chief ports are Limon, on the Atlantic coast, through which the whole of the important banana trade with the United States and England is done, as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast.

The Costa Rica Railway runs from Limon to the capital, San José (103 miles), and is continued 13 miles to Alajuela (Costa Rica branch lines 57 miles). The Northern Railway runs from Limon as terminus, and comprises 131 miles of main line and branches, running through the banana districts on the Atlantic coast; the services of the above two lines were amalgamated from 1 July, 1905. The Government own and operate the Pacific Railway, from San José to Santo Domingo (46 miles), and the coast section of the same, Esparta to Puntarenas (13 miles); the gap between these two sections (13 miles by cart road) will shortly be joined by the railway. The journey from Limon to the capital takes six hours, and from the capital to Puntarenas one day under ordinary circum-

stances. A considerable amount of English capital is embarked in the Republic.

	1905-6.	1906-7.

San José is 5,687 miles from London; transit direct, 17 days; *viâ* New York, 16 days.

CRETE (or CANDIA).

Suzerain, H.M. the Sultan of Turkey.

High Commissioner, M. Zaimis, *assumed office* 30 Sept., 1906.

Crete (or Candia) is an island in the Mediterranean, about 148 miles long and 7 to 30 miles in breadth, with an area of 2,950 square miles; the population is 303,543, of whom 269,319 are Christians, 33,496 Mussulmans, and 728 Jews. The island formed part of the early and later Roman Empires, and in 1669 was captured by the Turks.

The island now has impartial administration under the high suzerainty of Turkey, but independent of its suzerain under the High Commissioner appointed by the Powers. The climate is healthy, and a fine anchorage is presented by Suda Bay. The chief products are wheat and fruit; and wool, soap, olive oil, carobs, sallona, and cheese are the principal exports. The chief towns are Candia (pop. 22,332), Canea, the capital (pop. 20,972), and Retimo (pop. 9,308).

Imports from U.K. (1906-7)	87,592	27,565
Exports to U.K. (1906-7)	102,363	15,777

Canea—Consul-General, Arthur R. Peel ... £1,000

Vice-Consul, E. Wyldbore Smith ... £350 to 450

" " E. Cassimatis.

Candia—Vice-Consul, A. Calocherino.

Retimo—Vice-Consul, Teodoro A. Trifilli.

CUBA.

Provisional Governor of the Republic, Charles E. Magoon, *assumed office* Oct. 13, 1906.

Foreign Affairs, Justo G. Velez (*acting Head of Dept.*)

Justice, Manuel Landa (*acting Head of Dept.*); Lt.-Col. Crowder (*Supervisor*).

Finance, Gabriel G. Echarte (*acting Sec.*); Maj. J. D. Terrill (*Supervisor*).

Public Works, D. L. Clark (*acting Sec.*); Col. Black (*Supervisor*).

Interior, M. Sobrado (*acting Sec.*); Lt.-Col. E. St. J. Greble (*Supervisor*).

Armed Forces, Maj. H. J. Slocum (*Supervisor*).

Sanitary Dept., Maj. J. R. Kean (*Supervisor*).

Public Instruction, Lincoln de Zayas (*acting Sec.*), Lt.-Col. R. L. Bullard (*Supervisor*).

Agriculture, F. I. de Vildosola (*acting Sec.*).

Envoy Extraordinary and Min. Plenipotentiary, Rafael Montoro, 3 Grosvenor Mansions, Victoria Street, S.W.

Chargé d'Affaires, Gabriel Zendegui.

The island of Cuba lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of about 44,000 sq. miles and a population of 2,028,282 (1907). Cuba suffered many years of internal discord, from its discovery by Columbus until its liberation in 1898, having been a Spanish possession until the Spanish-American War, of which it was the main bone of contention. A Cuban constituent convention met at the end of 1900 and agreed upon a Constitution (1901), which was ratified on certain conditions by the U.S.A. in 1902. In 1906 disturbances broke out and resulted in the renewed occupation by American troops and the establishment of the present provisional administration.

The chief products of the island are tobacco and sugar; 1,580 miles of railway were open on June 30, 1907, and 5,065 miles of telegraph line. The imports from the United States for 1907 were £10,689,435, and the exports to the United States were £18,932,103.

CAPITAL, Havana (pop. about 275,000); other towns are Santiago (40,000), Matanzas (37,000), Cienfuegos (30,000), Cardenas (22,000), and Camaguey (20,000).

	1907-8.	1908-9.
Revenue	£5,093,262	£6,128,159
Expenditure	4,661,908	5,059,438
	1905.	1907.
Imports	£18,994,303	£21,920,459
Exports	22,033,497	24,290,134
Imports from U.K. (1906-7)	2,816,205	3,192,288
Exports to U.K. (1906-7)	1,446,622	938,846

British Minister Res. and Consul-General, Arthur C. Grant Duff ... £1,600

Vice-Consul, A. C. Charlton ... £300 to 500

Cardenas—Vice-Consul, A. FitzGibbon.

Cienfuegos—Vice-Consul, Geo. R. Fowler.

Guantanamo, Vice-Cons., Theodore Brooks.

Matanzas—Vice-Cons., Stewart Hamilton.

Santiago—Consul, William, Mason.

DENMARK.

King, Frederik VIII., *born* 3 June, 1843; *succ.* 29 Jan., 1906; *married*, 28 July, 1869, Louise, Princess of Sweden and Norway, *b.* 31 Oct., 1851.

Heir Apparent, Crown Prince Christian, *b.* 26 Sept., 1870, *m.*, 1898, Princess Alexandrine of Mecklenburg-Schwerin, and has issue 2 sons (*b.* 11 March, 1899, and 27 July, 1900).

Premier and Minister for War and Marine, M. Neergaard.

Interior, Klaus Berntsen.

Foreign Affairs, Count Ahlefeldt Laurvig.

Justice, Svend Högsbro.

Minister for Iceland, J. J. Hafstein.

Public Worship & Instruction, Enevold Sörensen.

Finance, M. Brun.

Public Works, Jensen Sönderup.

Agriculture, Anders Nielsen.

Commerce, Johan Hansen.

Envoy Extraordinary and Min. Plen. in London, C. Brun.

Secretary, M. H. Zahle, Braemar House, Cornwall Gardens, S.W.

Hon. Attaché, Count J. Wedell, 19 Wilton Street, S.W.

Consul-Gen. in London, J. W. Faber, 8 Byward Street, Great Tower Street, E.C.

Vice-Consul J. Sörensen.

Consul-General—Leith, W. O. Berry.

There are also Consuls at Hull, Liverpool, Manchester, Belfast, Falmouth, Guernsey and Newcastle-on-Tyne.

A Kingdom of Northern Europe, and the smallest of the Northern States, with a Constitution dated 28 July, 1865; consisting of the islands of Zeeland, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34′—57° 44′ *N.* lat. and 8° 5′—12° 40′ E. long.; its present contracted dimensions being the result of the Dano-German war of 1864, which stripped it of the Duchies of Schleswig-Holstein and Lauenburg. It comprises an area of 14,844 square miles (9,375,403 acres), with a population in 1906 of 2,588,919 (174 per square mile), nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade. The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1901, 2,866,899 acres were under corn crops and 3,106,228 permanent pasture. In 1903 the livestock numbered 486,935 horses, 1,840,466 cows, 876,830 sheep, 1,456,699 swine, and 38,984 goats. The corn crop in 1902 amounted to 97,844,429 bushels. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. The value of butter exported to the United Kingdom in 1907 was £9,755,555, eggs accounting for £1,550,000, and bacon £5,338,889; the principal imports from the U.K. being coal and fuel (£2,794,444). There is a mercantile marine of 4,178 vessels, with a tonnage of 517,201. There are (1903) 1,879 miles of railway and 3,817 miles of telegraph line (1902).

Defence (for Army, *see* p. 667). The navy consists of 37 steam vessels (including 4 ironclads), mounting 227 guns, with 1,270 officers and men.

Education (*see* p. 668).

Nyborg—Vice-Consul, August Birch.
Odense—Vice-Consul, Laurids B. Muus.
Randers—Vice-Consul, A. Kraunsöe.
Rönne (Bornholm)—Vice-Consul, C. P. Lund.
Svendborg—Vice-Consul, Ingvard A. Petersen.
Thisted—Vice-Consul, C. F. Bendixsen.
St. Thomas & Ste. Croix—Consul,
Chaplain, Rev. Eyre Hutson.
Bassin (Ste. Croix)—V.-Con., R. Armstrong.
Frederiksted—Vice-Consul, Robert L. Merwin.
Thorshavn (Faröe)—Consul, A. G. Coates, M.V.O. £600
Vice-Consul, Valdemar Lutzen.

The outlying possessions and colonies of Denmark have an area of 75,115 square miles, with 127,184 inhabitants. They include the FARÖE or Sheep Islands (515 sq. m., pop. 12,955); ICELAND (*see* p. 599); GREENLAND (34,000 sq. m., pop. 10,516), the trade of which is a government monopoly, and 3 islands in the West Indies—ST. CROIX, ST. THOMAS, and ST. JOHN (142 sq. m., pop. 32,786). These latter export sugar and rum.

Exports Danish Possessions to U.K., 1905 £190,743
Imports from United Kingdom, 1905 ... 212,790

Copenhagen, distant 728 miles; transit, 32 hours.

DOMINICAN REPUBLIC.

President, Ramon Caceres, *elected* (under the new constitution, June, 1908) for 6 years.
Foreign Affairs, José M. Cabral.
War and Marine, José M. Cespedes,
Finance, Frederico Velasquez.
Agriculture and Immigration, Emilio Tejera Bonetti.
Justice, Manuel Lamarche Garcia.
Posts and Telegraphs, F. Velasquez (*ad int.*).
Interior and Police, Miguel A. Roman Lijo.

Cons.-Gen., Miguel Ventura, 17 Coleman St., E.C.
Consul, Octavio Ventura.

Santo Domingo, formerly the Spanish portion of the island of Hayti, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus; it comprises an area of about 18,045 square miles, with an estimated population of nearly 600,000. Cocoa, is the most important crop, and sugar, coffee, and tobacco are grown in great quantities, the other products being mahogany, furniture woods, wax, honey, logwood, fustic, turtle-shell, hides, bananas, and divi-divi. Gold is found and copper mines of fair richness are reported as being worked in the vicinity of San Cristobal. Iron and coal are also found, and a petroleum well has been opened up. There are about 120 miles of railway, and telegraphic and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America. De Forest wireless telegraph installations have been erected at the capital and inland at Santiago de los Caballeros. The Customs are administered temporarily by officials appointed by the United States Government, under a Treaty by which the U.S. collects the Customs, assists the Government to maintain peace, and acts as intermediary between the Republic and its foreign creditors. Since April, 1905, 55 per cent. of the Revenues are being deposited in a New York Bank to the credit of the Foreign and Interior Debt. This fund now amounts to over £700,000.

British trade is hampered by the absence of direct maritime communication. The climate is excessively damp and hot throughout the year, and very trying to Europeans. Anæmia and paludism (malarial fever) are very prevalent, and leprosy and tetanus are very common, the latter necessitating anti-tetanic injections (hypodermic) on the slightest cut or injury.

CAPITAL, Santo Domingo. Population, 20,000.

	1907.	1908.
Revenue and Expenditure	$3,536,200	$3,984,300
	1906.	1907.

British Consul-General for Hayti and Dominican Republic, Alexander Murray £1,000
Santo Domingo—Vice-Consul, E. M. de Garston ..... £300 to £500
Puerto-Plata—Vice-Consul,

Santo Domingo is distant 4,600 miles; transit, 25 to 30 days.

ECUADOR, REPUBLIC OF.

President, Eloy Alfaro (1907, for 4 years). $24,000
Foreign Affairs, Dr. Alfredo Monge.
Interior, Amalio Puga.
Finance, Tomás Gagliardo.
Public Instruction, (vacant).
War and Marine, Gen. F. Hipolito Moucayo.

Chargé d'Affaires and Consul-General in London, Celso Nevares, 120 Bishopsgate Street Within, E.C.

A State of South America, on its western side, being that portion of the original Republic of Colombia which lies on each side of the Equator, extending from lat. 1° 38′ N. to 6° 26′ S. (according to the Ecuadorian geography, but there are boundary disputes with Peru and Colombia), and between 70° and 81° W. long., comprising an area of 120,000 English sq. miles. It has a population of about 1,270,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 21,525 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are—cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. Ecuador is divided into 15 provinces and one territory. A railway connecting Guayaquil and Quito was opened in 1908. An arrangement was recently made with the bondholders for the conversion of the Debt, but the Dictator, in 1895, suspended payment pending a further and less onerous arrangement; meanwhile a 10 per cent. surtax upon import dues is being collected and deposited in a Guayaquil bank. Guayaquil is the chief port; population, 1908, about 60,000; other chief towns being Quito, 55,000; Cuenca, 25,000; and Riobamba, 12,000. The currency is a gold condor (of 10 *sucres*) value £1.

The GALAPAGOS ISLANDS (2,400 square miles) belong to Ecuador; only about 200 miles are susceptible of cultivation.

	1905.	1907.

Director-General of Revenue, A. Chitty, C.M.G.
Director-General of Customs, A. King-Lewis.
Director-General of Ports and Lighthouses, Capt. H. R. Robinson, R.N.

A country in the north-east corner of the Continent of Africa; was made part of the Turkish Empire in the latter part of the 12th century. Its history became interwoven with that of Europe when the army of Napoleon the Great entered into possession in 1801. British successes drove out the invaders, and in 1803 the new-

comers also evacuated the country, which they endeavoured to restore to the control of the Sultan of Turkey; but after the abandonment by Great Britain a struggle arose between two Turkish parties, the Albanians and the Ghuzz, the former being completely victorious under their leader, *Mehemet Ali*, who, in 1811, in spite of the attempted intervention of Great Britain, obtained the supreme power and ruled the country, agreeing to pay an annual tribute to the Porte of £682,092. His successors were *Ibrahim* (1848), *Abbas* (1843–1854), *Said* (1854–1863), whose reign was marked by the Suez Canal concession, and *Ismail* (1863–1879), who by a firman of the Sultan (14 May, 1867) was granted the title of KHEDIV MISR, or Ruler of Egypt, the previous rulers having had the title of Vali, or Governor. In the early years of his reign the Egyptian dominions were very largely extended, until in 1875 its territories comprised an area of nearly 1,500,000 square miles, with a population of about 16,000,000. But on the heels of annexation and conquest followed misgovernment and financial embarrassment. At this point the Governments of France and Great Britain intervened, and forced Ismail to abdicate, appointing his son *Mohamed Tewfik* (1879–1892) to succeed him. By a decree of 10 Nov., 1879, a *Controller-General* was appointed by each Power. In 1882, however, their work of reform was interrupted by a military revolt, headed by an officer of the Egyptian army (Arabi Pasha), and, the French Government declining to co-operate, a British expedition was despatched to re-establish the authority of the Khedive. The Dual Control was abolished by a decree of the Khedive (18 Jan., 1883), and a British financial adviser appointed as a member of the Khedivial Government. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohamed Ahmed of Dongola, who proclaimed himself a Mahdi, or prophet, foretold by the Moslems. General Gordon, the hero of the Chinese rebellion, was despatched to Khartoum (Jan., 1884) as Governor-General of the Soudan, but this step was not followed by immediate movements of troops against the rebels, and in 1885 General Gordon fell at the capture of Khartoum (26 Jan.) before the Nile relief expedition reached him.

In 1883 the Khedive created a Legislative Council of 30 members, and a General Assembly, consisting of the Legislative Council, the seven Ministers of State, and 46 members elected by the people. These bodies, however, were, and still are, mainly consultative, the real legislative power resting with the Khedive and his Ministers. The command of the army is made by Khedivial decree with the consent of the British Government.

In 1892 (7 Jan.), the Khedive Mohamed Tewfik died, and was succeeded by his elder son *Abbas*, the present ruler.

For the purposes of local government the country is divided into governorships and provinces, the latter being sub-divided into districts. Justice is administered by (1) Religious Courts: (2) the Mixed Tribunals established in 1875, to deal with questions arising between foreign inhabitants of different nationality and civil suits between natives and foreign subjects; (3) the Consular Courts, by which criminal charges against foreign subjects are investigated; and (4) the Native Tribunals containing Egyptian and foreign judges, dealing with criminal charges against natives, and with civil cases in which both plaintiff and defendant are local subjects. A British Judicial Adviser to the Khedive watches the proceedings of the latter.

The population in 1882 was 6,814,000, including 90,886 European foreigners (37,301 Greeks, 18,665 Italians, 15,716 French, 8,022 Austrians, 6,118 English, &c.); and by the census of 1897, Egypt Proper contains 9,734,000 inhabitants (750·5 per square mile), of whom 112,500 were foreigners (38,000 Greeks, 24,500 Italians, 14,000 British subjects, 5,000 British army, 14,000 French subjects, 7,000 Austrians, 3,200 Russians, and 1,300 Germans).

The cultivated portion of Egypt is confined to the country annually inundated by the Nile, or capable of being irrigated by canals. The great irrigation works, to which Egypt may be said to owe its existence, are being further extended by elevating dams across the Nile at Assuan, Assiut, Zifta, and Esneh (completed and inaugurated in 1902) for raising the water.

Education (see p. 668).

Agriculture and Industry.—Its products consist of cotton, millet, maize, wheat, rice, melons, gourds, sugar, hemp, &c. No metals have been worked within recent times in any considerable quantity, but recently prospecting has been undertaken in the ancient mining districts for gold, copper, lead, sulphur, emeralds, &c., and several mines are being opened up. Salt is extracted in large quantities (110,000 tons in 1906). Nitre, marble, red granite, Oriental alabaster, and limestone are found, in addition to indications of petroleum and coal. Most of the turquoises of the world come from the mines in the Sinai peninsula.

Trade.—The chief imports are cotton stuffs, coals, provisions, woollens, coffee, tobacco, indigo, hardware, timber, wine and spirits, and machinery. The exports consist mainly of cotton and cotton-seed (88 per cent.), beans, wheat, sugar, maize, rice, gums, hides, wool, barley, cigarettes, ivory, and ostrich-feathers. Of the entire trade over 42 per cent. is British, 9 per cent. being carried on with France, 8 per cent. with Turkey, and 6 per cent. with Germany and Austria.

Communications.—There is a network of railways in the Delta, the principal lines radiating from Cairo to Alexandria, Damietta, Ismailia (continuing northwards to Port Said and southwards to Suez) and Shellal. There are also extensions from Wadi Halfa to Khartoum, and from Berber to Suakin. The total length of these lines (exclusive of the Wadi Halfa-Khartoum line) was 1,412 miles on 31 Dec., 1906, and 22,584,675 passengers and 3,981,652 tons of goods were carried in 1906, the net receipts being £E1,418,057. From the terminus to Luxor the standard gauge is used, but thence to Shellal the gauge is 3 ft. 6 in., as in the extensions from Wadi Halfa to Kerma and Wadi Halfa to Khartoum. There are (1906) 2,510 miles of telegraph, with 11,826 miles of wire, over which 2,293,000 messages were transmitted in 1906. The net postal revenue was £63,388 in 1907.

Defence.—The British army of occupation numbers about 4,880 men. The Egyptian forces on 31 Aug., 1908, numbered 19,010.

Finance.—The situation of the Debt on 31 July, 1907, was as follows:—

Guaranteed debt, 3%		£7,640,400
Privileged „ 3½%		31,127,780
Unified „ 4%		55,971,960
Domains „ 4¼%		829,560
		£95,569,700

By the agreement (8 April, 1904) between Great Britain and France, to which all the Powers subsequently adhered, the restrictions which, since 1876, have hampered the liberty of the Egyptian Government in financial matters were abolished. Though the *Caisse de la Dette* still exists, its duties are limited to receiving the revenues necessary for the interest and to the payment of the coupons.

Detailed accounts of the various administrative and financial reforms which have been carried out since 1882, and have entirely changed the state of the country, may be found in the annual reports addressed by Lord Cromer to the Foreign Office. In 1907 the Earl of Cromer, G.C.B., O.M., G.C.M.G., K.C.S.I., C.I.E., resigned the position he had held with such pre-eminent distinction, and was succeeded by Sir Eldon Gorst, K.C.B., the present Agent and Consul-General.

The Suez Canal.

The Suez Canal was opened in 1869, the British Government acquiring by purchase (25 Nov., 1875) shares to the amount of £4,000,000 (the value 31 March, 1908, being fully £31,000,000). The total length of the canal is 99 miles, with a width of 37 metres (121ft. 5in.), having cost £24,000,000 to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 8·53 metres (28 feet). By a convention, signed on 29 Oct., 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest). The British directors are Sir Henry Austin Lee, K.C.M.G., C.B., Henry Torrens Anstruther, and Sir W. E. Garstin, G.C.M.G., representing the Government; and R. Alexander, R. S. Donkin, F. Green, Sir J. L. Mackay, G.C.M.G., Lord Rathmore, J. W. Hughes, and Sir Thomas Sutherland, G.C.M.G., representing the shipping interest.

The transit receipts in 1869 were £2,178; in 1870, £206,273; in 1895, £3,124,148; in 1900, £3,624,944; in 1901, £4,015,456; in 1902, £4,148,800; in 1903, £4,144,812; in 1904, £4,616,034; in 1905, £4,554,672; in 1906, £4,326,476; and in 1907, £4,640,000.

The present rate of transit dues is 7fr. 75c. per ton.

The net dividends for the year 1907 amounted to 141fr. 71c. on the ordinary 500fr. shares, and 116fr. 71c. on the Actions de Jouissance.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal at certain dates since 1869, with the percentage of British vessels.

Year.	No. of Vessels.	Net Tons.	% British Tonnage.
1869	10	6,576	95·6
1870	486	436,609	66·4
1890	3,389	6,890,094	77·3
1895	3,434	8,448,383	71
1900	3,441	9,738,152	57·6
1905	4,116	13,134,105	63·6
1906	3,957	13,445,504	61·7
1907	4,267	14,728,434	64·5

Capital, Cairo. Population (1897). 570,000; Alexandria, chief port, pop. 320,000; other towns being Tantah, 57,000; Zagazig, 36,000; Mansurah, 36,000; Port Said, 42,000; Suez, 17,000; Ismailia, 7,000. In Upper Egypt Assiut has 42,000 inhabitants and Keneh 27,000.

Principal Vety. Officer, Capt. F. U. Carr.
Director of Customs, Maj. W. Hayes-Sadler.
Asst. do., Capt. C. McKey.
Supt. Game Preservation Dept., A. L. Butler.
Marine Biologist, C. Crossland.

Governors of Provinces:—

Bahr-el-Ghezal (Wau), Capt. R. V. Savile.
Berber (El Damer), Col. E. B. Wilkinson.
Blue Nile (Kamlin), Maj. E. A. Dickinson.
Dongola (Merowe), Col. H. W. Jackson, C.B.
Halfa (Halfa), Capt. E. D. Young.
Kassala (Kassala), Capt. A. Cameron.
Khartoum (Khartoum), Maj. C. E. Wilson.
Kordofan (El Obeid), Capt. H. D. Lloyd.
Mongalla (Mongalla), Capt. R. C. R. Owen, C.M.G.
Red Sea (Suakin), Graham C. Kerr.
Sennar (Wad Medani), Capt. G. S. Nickerseon.
Upper Nile (Kodok), Maj. G. E. Matthews.
White Nile (El Dueim), J. H. Butler Bey.

II. Egyptian Departments represented.

Inspector-General of Irrigation, C. E. Dupuis.
Chief Inspector, G. I. de B. Phelps.
Director of Repression of Slavery, Capt. A. McMurdo, D.S.O.
Assistant Director do., Maj. H. V. Ravenscroft.

The Sudan Provinces were recovered by Anglo-Egyptian expeditions, 1896–1899, and their extent is defined in a convention signed, on 19 Jan., 1899, by Viscount (now Earl of) Cromer and the Egyptian Minister for Foreign Affairs, laying down the principles of administration. The territories affected are all those lying south of the 22nd parallel of latitude, which have never been evacuated by Egyptian troops since 1882, and those which, if evacuated and temporarily lost, have since been, or shall henceforth be, reconquered by the two Governments acting in concert. The Government is to be administered by a Governor-General in supreme civil and military command, appointed and removable by Khedivial decree with the consent of the British Government. The Governor-General may legislate by proclamation with the consent of the Governments, and the territories do not fall under the jurisdiction of the Mixed Tribunals. The British and Egyptian flags together are used in the Sudan.

The seat of Government is Khartoum, where a palace for the Governor-General and Government offices and barracks have been built. The town has been lighted throughout by electricity and will shortly be provided with an efficient water supply, independent of the river. On 5 Jan., 1899, the foundation stone was laid of the Gordon Memorial College, for the establishment of which Viscount Kitchener obtained the necessary funds by public subscription. The College was formally opened by Visct. Kitchener on 8 Nov., 1902, and in 1906 the number of students amounted to about 500, the majority of whom pay small annual fees. There are also primary schools, where English is taught, at Omdurman (300 pupils in 1906), Halfa and Suakin, and small schools at Berber, Dongola, Wad Medani, Kassala, &c., also two industrial schools at Kassala and Wad Medani. One of the largest and finest of modern mosques has been built at Khartoum, as that city will be the centre of Mohammedan religion in the Egyptian Sudan. Two good hotels have been built at Khartoum, and *wagons-lits* run on the Sudan Railway. Tourists can now perform the journey from Cairo to Khartoum *viâ* Shellal and Halfa in 95 hours in trains and steamers replete with every comfort. An accelerated service has also been established *viâ* Suez and Port Sudan (Red Sea) by which passengers could travel between Cairo and Khartoum in 81 hours; and tourist steamers also run from Khartoum to Gondokoro (Uganda), *viâ* Kodok and the unique "sudd" region. The territories are divided into 13 provinces. The Sudan Railway reached Khartoum in 1899; a line from Atbara to the Red Sea at Port Sudan and Suakin, and a branch to the Halfa Khartoum line from Abu Hamed to Kareima to tap the Dongola Province were opened in 1906. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal and inland chiefly by camels and donkeys. Kassala, Gallabat (on Abyssinian frontier), Roseires, Taufikia (50 miles south of Kodok), and El Obeid are in telegraphic communication with Khartoum, also Bahr-el-Ghazal Province with the exception of that portion of the Bahr-el-Ghazal river between Taufikia and Meshra El Rek. The cost of military operations in the Sudan in the years 1883–86 amounted to £7,091,310, and on the expedition by which these territories were recovered the sum of £789,802 only was expended, excluding the sum of £251,000 provided in 1897–8 by the Egyptian Government. The territories are not expected to provide an income equivalent to their cost for some time; long periods of war, famine, and disease have caused great ravages amongst the population, and some years must elapse before a substantial revenue may be expected, the cost of administration being meanwhile partly borne by the Egyptian Government. The population of the territories at the present time is roughly estimated at 2,000,000.

CAPITAL, Khartoum. Population 14,872, consisting of merchants, workmen, &c., and the garrison; the population of Omdurman, with the garrison, is about 51,592, and Khartoum North contains 21,672, the suburbs (16,901) making a total of 105,037. Distance from London *viâ* Cairo, 4,196 miles.

Port Sudan. - *Vice-Consul*, B. W. Echlin.

FRANCE.

President of the Republic, Armand Fallières, *born* at Mézin (Lot-et-Garonne), 6 November, 1841; elected 17 January, 1906 (in place of Emile Loubet, retired). Formerly President of the Senate £24,000

Premier and Minister of the Interior, M. Clemenceau (23 Oct., 1906).
Minister of Foreign Affairs, M. Stephen Pichon.
Minister of Finance, M. Caillaux.
Minister of Justice and Public Worship, M. Aristide Briand.
Minister of Public Instruction, M. Doumergue.
Minister of War, General Picquart.
Minister of Marine, M. Alfred Picard.
Minister of Commerce, Industry, and Posts and Telegraphs, M. Cruppi.
Minister of Public Works, M. Barthou.
Minister of Colonies, M. Milliès-Lacroix.
Minister of Agriculture, M. Ruau.
Minister of Labour and Social Providence, M. Viviani.
Ambassador to Russia, Admiral Touchard; *Austria-Hungary*, M. Crozier; *Germany*, M. Jules Cambon; *Italy*, M. Barrère; *Turkey*, M. Constans; *U.S.A.*, M. Jusserand.

Ambassador in London, M. Paul Cambon, Albert Gate House, Hyde Park.
Minister Plenipotentiary, M. Daeschner.
1st Secretary, Comte de Manneville.
2nd Secretaries, M. A. de Fleurian; Marquis de la Bégassière.
3rd Secretaries, Comte de Lastours; Comte de Montholon.
Attachés, Comte de Saint Quentin; Ch. Bérard.
Military Attaché, Lt.-Col. Huguet.
Naval Attaché, Commandant Mercier de Lostende.
Commercial Attaché, M. Jean Périer.
Secretary Archiviste, M. Joseph Knecht.
Consulate General, 4, Christopher Street, Finsbury, E.C.
Consul-General, M. Pierre T. B. T. Auzépy.
Consul (vacant).
Chancelier, M. Doyen.

The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N. lat., and from 7° 45′ E. to 4° 45′ W. long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its present area at 207,218 square miles. The territory lost in 1871 amounted to 5,602 square miles. France is divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhône; the principal forests Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent (1,453,545,000 gallons of wine were produced in 1907), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1906 amounted to 477,716,448 gallons, but in 1907 the yield was poor, and amounted to only 104,261,740 gallons. The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot, for the manufacture of sugar, hops, &c. Its mineral resources are comparatively small. They include, however, coal (1907, 36,168,000 metric tons), pig iron (3,606,288 metric tons), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. The culture of oysters is an important industrial feature, and in the year 1905 952,121,735 oysters were produced, representing a value of £635,540. The increase of population is very slow, as will be seen from the following table:—

Year.	Population.	Year.	Population.
1700	19,660,320	1872	36,102,921
1801	27,349,003	1881	37,672,048
1821	30,461,873	1886	38,218,903
1831	32,569,223	1891	38,343,192
1841	34,230,178	1896	38,517,975
1851	35,939,364	1901	38,961,945
1861	37,067,064	1906	39,252,245

France has always been attractive to foreigners, of whom (1906) 1,009,415 were resident there, or 2·51 per cent. of the legal population; this number included 330,465 Italians, 323,390 Belgians, 89,772 Germans, 36,948 English, 13,236 of the latter residing in the Department of the Seine. 20 per cent. of the foreign population was born in France. There are about 517,000 Frenchmen in the Colonies and in various parts of the world, and a colonial population, estimated in 1906, of 33,804,370 souls. About 26,000 Frenchmen are stated to be resident in England. The comparatively small increase of the population is largely due to immigration from other countries. In 1907, however, there was a marked increase of deaths, and a noticeable lower birth-rate.

	Births.	Deaths.		Births.	Deaths.
1894	855,380	815,600	1901	857,274	784,876
1895	839,173	851,986	1902	838,378	761,434
1896	895,586	771,886	1903	826,712	753,606
1897	859,107	751,019	1904	828,229	761,203
1898	843,933	810,073	1905	807,292	770,171
1899	847,627	816,233	1906	806,847	780,196
1900	827,297	853,285	1907	773,969	793,889

Defence (for Army, *see* p. 666).

The Navy consisted in 1908 of 32 battleships (and 6 *building*), 7 armoured coast defence vessels, 18 armoured cruisers (and 4 *building*), 32 protected cruisers, 2 unprotected cruisers, 13 torpedo vessels, &c., 42 destroyers (also 23 *building* and 10 ordered), 286 torpedo boats, 43 submarine boats (and 29 *building*, 27 ordered), with 2,867 officers and 54,594 men.

Education (*see* pp. 668–9).

Communications.—The system of railways in France is very extensive; they are almost entirely *concédés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1907, was 25,100 miles, the total receipts from passenger and goods traffic, &c., being £67,136,799. The length of telegraph wires is 354,874 miles. At the 1st of January, 1907, the mercantile marine, comprising boats of 2 tons and upwards, amounted to 16,999 vessels of 1,390,542 net tons (of which 15,488 were sailing ships, representing 677,055 net tons). The sums voted by Parliament for construction and navigation Bounties to Shipping in 1908 amounted to £1,656,000, and £1,052,028 for Postal Service Subventions.

Commerce.—The principal imports in 1907 were wool, silk, cotton, coal, oleaginous fruits and seeds, cereals, machinery, timber, copper, raw skins, caoutchouc, wines, coffee, and minerals. The principal exports were silk tissues, cotton tissues, wool, woollen tissues, wines, smallwares, silks, millinery and artificial flowers, made-up garments, automobiles, chemical products, raw skins, tools and metal goods, prepared

skins, machinery, pottery and glass, paper, pig iron and iron and steel, leather goods, woollen yarns, cheese and butter.

The trade in 1907 was shared as under:—

Exports *to* (1907, £223,644,000)—

Great Britain	£54,752,000	U.S.A.	£15,820,000
Belgium	34,435,000	Russia	2,300,000
Germany	25,968,000	Holland	2,240,000

Imports *from* (1907, £248,920,000)—

Great Britain	£35,328,000	Belgium	£17,054,000
U.S.A.	26,835,000	Russia	10,196,000
Germany	25,528,000	Holland	4,736,000

The chief articles exported to the United Kingdom in 1907 were valued at:—

	Francs.		Francs.
Silk Tissues	166,133,000	Ornamental Feathers	14,046,000
Woollen Tissues	127,671,000	Potatoes	18,955,000
Millinery, &c.	135,946,000	Vegetables	11,197,000
Butter	34,193,000	Fruit (Table	23,219,000
Wines	38,020,000	Copper	12,473,000
Dressed Skins	28,317,000	Eggs of Poultry & Game	8,732,000
Automobiles	60,410,000	Poultry	5,376,000
Wool (waste)	28,524,000	Refined Sugar	9,248,000
Leather Goods	28,502,000	Raw Sugar	37,676,000
Parisian Articles	21,475,000	Clocks & Watches	4,189,000
Smallwares	34,193,000	Cereals & Flour	2,354,000
Timber	24,171,000	Preserved Fruits, Biscuits, &c.	3,423,000
Cotton Tissues	47,783,000		
Raw Hides, &c.	21,384,000		
Brandy and Liqueurs	23,299,000		

The chief articles imported from the United Kingdom in 1907 were valued at:—

	Francs.		Francs.
Coal	226,937,000	Leather Goods, &c.	8,831,000
Wool and Wool Waste	74,823,000	Linen Tissues	6,177,000
Machinery	60,239,000	Cast Iron, Iron and Steel	11,737,000
Ornamental Feathers	40,769,000	Ships of Iron or Steel	21,522,000
Woollen Goods	22,706,000	Cotton Yarn	20,372,000
Chemical products	20,017,000	Metal Goods	9,557,000
Prepared Skins	27,741,000	Copper, metal	10,233,000
India-rubber and Gutta-percha (raw & remelted)	24,970,000	Rags	4,926,000
Cotton Goods	20,077,000	Raw Tin	4,338,000
Raw Cotton	13,939,000	Sweets, Preserves & Biscuits	1,756,000
India-rubber, &c., Goods	15,703,000	Linen & made-up Garments	2,484,000
		Sowing Seeds	1,606,000

Shipping.—During the year 1906 the total number of French and foreign vessels entering French ports with cargo amounted to 26,985, representing a tonnage of 23,789,944 tons, of which only 24·44 per cent. was French, while the total clearings with cargo amounted to 21,163 ships of a tonnage of 17,889,380 tons, of which 36·25 per cent. was French. British tonnage entering amounted to 36·35 per cent. against 31·24 clearing.

Debt.—The National Debt is stupendous, the nominal capital of the Funded Debt amounting in 1907 to £1,160,819,876, and the Floating Debt to £73,160,488, the heaviest debt ever yet incurred by any nation in the world. The Public Debt of France in 1870 amounted to £511,840,000.

The total service of the Public Debt in 1907 and 1908 was as follows:—

	1907.	1908.
Perpetual 3 per Cents.	£26,552,643	£26,234,665
Redeemable 3 per Cents. and annuities	11,354,853	12,703,971
Other Credits	2,146,199	2,241,409
Total	£40,053,695	£41,180,045

	1907.	1908.
Revenue	£153,368,890	£156,423,347
Expenditure	153,353,013	156,411,334

	1906.	1907.
Imports	£225,090,040	£248,920,000
Exports	210,619,640	223,644,000
Imports from U.K.	30,020,000	35,328,000
Exports to U.K.	51,768,000	54,752,000

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 35′ W. to 6° 16′ E. longitude, 37° 6′ N. to an undetermined S. limit, about 30° N., covering an area estimated at about 184,898 square miles, with a population in 1906 of 5,231,850, of whom 789,960 were Europeans and 4,501,890 natives. The revenue in 1908 was estimated at £4,343,688, and the expenditure at £4,339,533; the imports in 1907 were valued at £18,377,000, and the exports at £16,126,133. The bulk of the trade is with France, and according to French statistics the imports into France amounted to £11,623,880, and the exports from France to £15,708,240; the trade with the U.K. in 1907 amounting in exports to £810,379, and in imports to £555,409. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. Iron, copper, quicksilver, zinc, and lead mines are being worked. The value of the exports of phosphates to foreign countries in 1907 amounted to £308,280, and to France £133,760. In 1908 there were about 2,013 miles of railway open for traffic, and in 1906 the number of ships entering and leaving Algerian ports was 8,915, of a tonnage of 8,194,907 tons. The principal town is Algiers, the capital (pop., 1906, 586,062), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemçen.

CAPITAL, Paris. Population (1906), 2,763,393.

Ambassador Extraordinary and Plenipotentiary, His Excellency Rt. Hon. Sir Francis L. Bertie, G.C.B., G.C.M.G., G.C.V.O. (1905) £11,500

Total	£2,834,530	£3,002,517

Geographically, the French Colonies are divisible into four main groups, according to their situation in *Asia*, *Africa*, *America*, *Oceania*.

I. Asiatic: *French India.*—The area of the French possessions in India is 200 square miles; pop. (1906), 277,723; (1891, 282,523). *Pondicherry* (area 115 sq. miles, pop. 1906, 176,671), the chief of these dependencies, is on the Coromandel coast, 85 miles S. by W. from Madras. The town of Pondicherry has 46,887 inhabitants. The fortifications were once strong, but in the war with England they were destroyed, and under the Treaty of Paris (1814) they must not be rebuilt, while the French garrison must be only sufficient for police purposes. Rice, oil-seeds, pulse, and cotton are cultivated. The chief industry is cotton spinning. There are five cotton-mills, employing about 7,500 hands. In 1907 the imports into French India were valued at £275,000, and the exports at £1,051,000. The chief exports are ground nuts, cotton goods, and oilcakes, the chief imports raw cotton, cotton goods, wood, seeds, and oils. There is no harbour, though the roadstead is good. The minor settlements are *Chandernagore*, on the Hooghly, 17 miles north of Calcutta (area 4 sq. ms., pop. 26,831); *Karikal*, in the Cauvery delta (area 53 sq. ms., pop. 56,595); *Yanaon*, in the Godavery delta (area 5 sq. ms., pop. 5,005); and *Mahé*, on the Malabar coast (area 26 sq. ms., pop. 10,298). There are 23 miles of railway, connecting Pondicherry and Karikal with the South Indian Railway. The revenue in 1904 amounted to £100,480, of which £4,716 was contributed by the Home Government, and the expenditure amounted to £95,908. *Governor*, M. Angoulvant.

French Indo-China.—These possessions have an area of about 310,000 square miles and a

* Exclusive of Algeria and Tunis.

population of about 18,000,000 (including 15,500 French). On the north and east they march with China. The river Mekong forms the western boundary. The coast-line on the south is about 1,560 miles long. French Indo-China comprises Cochin-China, and the four protectorates of Cambodia (enlarged in 1907 by the annexation of Siamese territory), Annam, Tonkin, and Laos. In 1898-9 Kwang-Chow-Wan (pop. 190,000), a free port on the Lien-Chow peninsula, was acquired on a lease of 99 years from China. French Indo-China has been rapidly developed since 1893 by the construction of public works, by the influx of capital and enterprise, and by the reorganisation of the finances. The financial and political unity of Indo-China was finally established in 1898. These reforms were chiefly the work of the late Governor-General, M. Paul Doumer. The revenue, about 51,850,000 piastres, is derived mainly from customs, excise, and other indirect taxes. The delta regions of Cochin-China and Tonkin are fertile. Annam, connecting them, is a long mountainous tract, with a narrow littoral, habitable and cultivable, on one side, and a wild, sparsely populated hill-tract stretching to the Mekong on the other. Laos, the largest of the five territories, is practically inaccessible except by this river. The chief rivers are the Mekong (1,900 miles long), which, notwithstanding obstructions, has been navigated as far as Chinese territory; the Songkoi or Red River, navigable by small steamers as far as Laokai in Yunnan; and the Black River. Rice is by far the most important crop, while silk, cotton, sugar, poppy, tea, seeds, tobacco and pepper are also produced. The chief mineral product is coal, which is mined at Hongay on the Tonkin coast. Other minerals are said to exist. Laos has large forests. Cotton yarn, cement, &c., are manufactured. The principal harbours are Saigon, Haiphong in Tonkin (48 hours by mail steamer from Hong Kong), and Tourane in Annam. The length of railways is about 1,000 miles, including lines from Haiphong to Hanoi, and thence to Langson (160 miles) on the border of Kwangsi, China, and to Laokai (240 miles) on the Yunnan frontier. The latter is being extended to Yunnan-fu (about 291 miles) by a subsidised company. It has reached La-ha-ti (45 miles). The foreign trade in merchandise in 1907 was valued at—Imports, £11,800,000; and Exports, £10,134,000. There is a considerable transit trade passing to and from the Yunnan treaty "port" of Mengtz through Tonkin. By far the largest export from French Indo-China is rice, 1,422,000 tons in 1907 (chiefly from Cochin-China), fish and pepper coming next. The chief imports are metal manufactures, cotton manufactures and yarns, jute bags, liquors, machinery, petroleum, paper, opium, &c. The yarns and jute bags are mainly Indian. The French customs tariff is in force, with some exceptions. The great bulk of the trade is with France, China, and India. The shipping is chiefly French, British, and German. The French army of occupation numbers about 12,000, in addition to 13,000 native troops. There is a French Bank of Indo-China. Exports from the United Kingdom in 1907, £92,563; imports into ditto, £419,060. Capital, Hanoi, in Tonkin. Pop., 100,000. *Gov.-Gen. of Indo-China*—M. Klobukowski. *Sec.-Gen.* M. Broni. *Resident*—Hoang-hao-Khai. *H.B.M.'s Consul*—T. F. Carlisle. Capital of Cochin-China, Saigon. Pop. 20,000. *Lieut.-Gov. of Cochin-China*—M. Rodier. *H.B.M.'s Vice-Consul*—J. L. O'Connell. Capital of Cambodia, Phom Penh. Pop. 40,000. *King*—H.M. Sisowath. *Résident-Supérieur*—M. Luce. Capital of Annam, Hué. Pop. 30,000. *King*—H. M. Duy-Tan, a minor (succ. in 1907). *Résident-Supérieur*—M. Levecque. Capital of Laos, Luang Prabang. *Résident-Supérieur*, Lt.-Col. Tournier.

II. African: The French African Empire consists of the colony of Algeria and the protectorate of Tunis in the north; in the north-west of an immense tract of country, in four main divisions, on the coast-line (Senegal, French Guinea, Ivory Coast, and Dahomey), penetrating inwards to meet the French possessions of Upper Senegal-Niger and Territory of Mauritania, which form a hinterland for all the colonies on the coast. In West Central Africa the French Congo joins, through protected territory, the French possessions which form the common hinterland of the north-western possessions. This common hinterland stretches northwards in the direction of Algeria and Tunis, so that the whole north-western portion of the vast continent, except where occupied by Morocco and Tripoli, and Spanish, Portuguese, British, and German possessions, is claimed by France. In the east France possesses a portion of Somaliland and the island of Madagascar in the Indian Ocean, with certain dependencies. Conventions have been signed by Great Britain and France delimitating the boundaries of co-terminous territories in the west, and, owing to the British advance in the Nile region, delimitating their respective spheres in East and Central Africa.

On the East Coast is JIBUTI, the port and seat of government of the French Somali coast protectorate. The coast-line of this territory extends for 60 miles; the inland frontier is fixed at a distance of about 57 miles. The total area is about 13,400 square miles. The population is about 208,000. A railway from Jibuti to Harrar and thence to Adis Ababa, the present capital of Abyssinia, is being constructed, and in 1904 was completed as far as Diré-Daouah (191 miles). At Jibuti a jetty, 800 metres in length, has been erected and is used principally by small craft, and a second one of 900 metres in length is being constructed for the requirements of large vessels. The imports (chiefly cotton goods) amounted to £477,197 in 1905, while the exports amounted to £728,760; the imports from France in 1905 amounting to £76,837, and the exports to France £50,888. There is an Anglo-French agreement defining the boundary of the French and English spheres of influence in the direction of Harrar, which place neither party is at liberty to annex.

Governor—M. Pascal; *Envoy to the Emperor Menelik of Ethiopia*, M. Brice.

Off the East coast, in the Indian Ocean, is the vast island of MADAGASCAR, the fourth largest island in the world, being 975 miles long and 350 miles broad at its greatest width. The total area is about 226,000 square miles, and the native population is estimated at 3,000,000 and from 5,000 to 6,000 French, the rest being chiefly British subjects, the Hova being the dominant tribe. Christian missions have been active in the island, and about 450,000 of the natives are Protestants, and about 50,000 Roman Catholics. A French colonial station was planted, under the protection of Richelieu, in 1662, since when the island has been almost continuously claimed by the French. Active steps were taken in 1885 to

make their influence felt, and in 1894–1895 a military expedition captured the capital and deposed the queen, the island being declared a French possession in 1896. A railway between Tamatave on the coast and the capital (Antananarivo or Tananarive) is in course of construction; 93 miles of which were open to traffic on 1st January, 1906.

In 1900 a loan of £2,400,000 was raised for the construction of railways, roads, telegraphs, &c. Fully 3,000 miles of telegraph lines have been constructed as well as two new telephone lines, one at Antananarivo of 27 miles, and the other at Tamatave of 10 miles. Gold reefs have been found in different parts of the island, and up to the end of 1904 there were 1,099 prospecting permits held by 317 different persons, 64 of which are British. Minerals are found in large quantities, and in the lowlands rice, manioc, arrowroot, sugar-cane, tobacco, hemp, cotton, vanilla, tea and coffee are successfully grown; caoutchouc and gum-copal are indigenous, and there is a wealth of timber. The revenue of the colony in 1904 amounted to £994,612, and the expenditure to £897,357. The principal exports in 1906 (£1,127,553) were gold (2,255 kilos, of the value of £270,613), rubber, hides, rafia-fibre, beeswax, bullocks, and straw hats; the imports, largely reduced since the high protective tariff of 1897, are mainly cotton goods, wine, spirits, metal manufactures, food-stuffs, and building material, and amounted to £1,461,105 in 1906, of which France supplied £1,307,621. The trade with the United Kingdom was valued at £19,265 for imports and at £63,740 for exports. The capital, Tananarive (called by the natives Antananarivo), had in 1901 55,579 inhabitants. Tamatave is the chief port, others being Majunga, Tolia, Farafofay, Mananjura, Mahanoro, and Vatomandry. Madagascar has immediate dependencies in the islands of NOSSI BÉ and SAINTE MARIE, while further east (450 miles from Madagascar) is the island of RÉUNION (capital St. Denis, area about 1,000 square miles, population estimated at 177,677); imports in 1905, £727,394; exports, £358,330; with the COMORO Islands, halfway between Madagascar and the coast, and the islands of ST. PAUL and AMSTERDAM and KERGUELEN to the south-east.

Gov.-Gen. of Madagascar, M. Augagneur.

West Africa.—The administration of the French possessions in North-West Africa (exclusive of the French Congo), which has been in process of reorganisation since 1895, was completed and consolidated by a Decree of 18 October, 1904. The territories of Senegambia and the Niger have been converted into a separate colony under the name of Upper Senegal-Niger, and a commissioner attached to the general government has been appointed for the administration of the civil territory of Mauritania, or vast regions on the right bank of the Senegal River, and which will probably be eventually extended to the French possessions in South Algeria. A general budget has been created, to be settled by the governor-general in council, to which are devoted the funds derived from the customs and navigation duties of all the constituent colonies, and which provides for all expenses which interest all the colonies generally. The several colonies, therefore, can only reckon on the funds arising from their internal resources, such as capitation tax, trading licences, &c., but they are at the same time relieved of many expenses which have been transferred to the general budget. Provision is also made in the general budget for subventions to those of the colonies requiring financial help. The colony of UPPER SENEGAL-NIGER may be said to comprise the whole of the hinterland of West Africa, and includes the great bend of the Niger and the territories enclosed within it, but it has no seaport. It is divided into a civil and a military territory, and is administered by a lieutenant-governor, resident at Bammako, under whom is a superior officer entrusted with the administration of the Niger military territory. SENEGAL is the oldest and most important of the French possessions in West Africa. It is situated to the north of the British colony of the Gambia, and has an area of about 806,000 square miles and a population estimated at 1,130,000, 200,000 of which are placed directly under the French administration; capital, St. Louis (local revenue in 1904, £280,918). The principal exports are gold, ground-nuts, gum, palm nuts and oil, and rubber. The exports from Senegal and Upper Senegal-Niger in 1905 were valued at £1,136,383, and the imports at £2,349,647; 546 ships (tonnage 707,603) entered, and 559 of a tonnage of 720,812 tons cleared at Senegalese ports in 1906. A railway has been constructed from Dakar to Rufisque, and thence north-west to St. Louis at the mouth of the Senegal River, a distance of 177 miles, and from Kayes, on the same river, a narrow-gauge line has been constructed to Koulikoro, on the Niger. Next in order to the south comes FRENCH GUINEA (local budget in 1903, £160,000; imports, 1905, £756,990, exports £654,845), comprising the settlements of RIVIÈRES DU SUD (capital, Konakri) and FUTA JALLON, and extending up the whole of the north-west coast (save where intercepted by Portuguese Guinea and the British colony of the Gambia) to join the colony of Senegal. Between the British colony of the Gold Coast and the Republic of Liberia is the FRENCH IVORY COAST (local revenue in 1904, £157,337; imports, 1905, £555,810, exports £305,429), comprising the settlements of GRAND BASSAM and ASSINIE and the KROO country with the hinterland. To the south is DAHOMEY, between the British colony of Lagos and German Togoland (local revenue in 1904, £219,998; imports, 1905, £429,299, exports £305,367); it consists of about 95 miles of the Benin coast, where are the settlements of KOTONOU and GRAND POPO with the hinterland. The ancient capital of the colony is Abomey, which has now been transferred to Porto Novo. The chief port is Kotonou. The FRENCH CONGO borders the Congo Free State on the south and east, and the German Cameroons on the north and west, but undefined to the north-east, comprises the colony of the Gaboon, the middle Congo, the territory of Ubangui-Shari, and the Lake Chad territory (local revenue in 1904, £255,620). The principal exports are ivory, india-rubber, cocoa, coffee, ebony and other wood, gum-copal, palm oil, and amounted in 1905 to £557,310. The imports, consisting chiefly of cotton goods, spirits, ammunition, tobacco, rice, and salt, were valued at £415,166; the chief town and trading station being Libreville, on the coast.

III. **American**: France possesses two small groups of islands off the south-east coast of Newfoundland, of which ST. PIERRE and MIQUELON are the largest respectively; their combined area is about 95 square miles, with a total population of about 4,815, and they form an excellent basis for

the French cod fishery. Local revenue in 1908, £19,112: importations in 1907, £201,277; exports, £256,643. In the *West Indies* two of the most fertile of the Lesser Antilles belong to France, viz., MARTINIQUE (capital Port de France), area about 380 square miles; population, 182,024; (local revenue in 1904, £206,184; total imports, 1905, £590,366, exports £722,766); and GUADALOUPE and BASSE TERRE (capital Pointe-à-Pitre), area about 700 square miles, population 182,238 in 1906 (local revenue in 1904, £242,022; total imports, 1905, £537,536, exports £625,498). They have six dependencies: MARIE GALANTE and ILE DES SAINTES to the south and south-east, and PETITE TERRE on the east (part of the administrative island), with ST. BARTHOLOMEW and the northern half of ST. MARTIN, about 150 miles north-west and almost due south of Anguilla (British). In *South America*, CAYENNE or FRENCH GUIANA has an area of about 34,500 square miles, and an estimated population of about 27,000 (town population 12,000). The local revenue of the colony in 1904 amounted to £237,216 (imports, 1905, £457,565, exports £397,580).

IV. In Oceania: France possesses the penal colony of NEW CALEDONIA (capital Noumea), a large island containing an area of 9,000 square miles (population, 1906, estimated at 53,000, of whom about 13,000 are of free and 11,000 of convict origin, whilst there is a native population of about 29,000), with its dependencies, Isle of Pines, Loyalty Islands, Huon Islands, Chesterfield Islands, and the Wallis Archipelago, annexed in 1853 (local revenue in 1904, £129,102; total imports into New Caledonia, 1907, £376,418, exports £340,165); and the SOCIETY ISLANDS, Tahiti, Moorea, &c. (local revenue in 1904, £77,257; imports into Tahiti, 1907, £133,272, exports £145,598), the LOW ARCHIPELAGO or Tuamotu, the MARQUESAS, and the AUSTRAL ISLES or Tubuai, and the GAMBIER ISLANDS, altogether amounting to about 1,400 square miles, with about 20,000 inhabitants. By a convention with Great Britain of 16 Nov., 1887, it was agreed that the protection of persons and property in the NEW HEBRIDES (5,106 square miles, population 70,000), should be secured by means of a mixed commission of naval officers belonging to the French and British naval stations in the Pacific. This arrangement has, however, been superseded by the conclusion of a convention signed on 20 Oct., 1906, by which the group of the New Hebrides, including the Banks and Torres Islands, shall form a region of joint influence under the administration of two High Commissioners appointed by Great Britain and France.

See also TUNIS, p. 654.

THE GERMAN EMPIRE.

Emperor, William II. (King of Prussia), son of the Emperor Frederick III. and the Empress Victoria, Princess Royal of Great Britain. *Born* 27 Jan., 1859; *succeeded* his father 15 June, 1888; *married*, 27 Feb., 1881, Princess Augusta Victoria of Schleswig-Holstein, *born* 22 Oct., 1858 (*issue*, 6 sons and a daughter).

Heir Apparent, H.I. & R.H. Crown Prince William, *born* 6 May, 1882; married (1905) H.R.H. Cecilie of Mecklenburg-Schwerin, and has issue, Prince Wilhelm, *b.* 4 July, 1906, and a second son, *b.* 9 Nov., 1907.

Imperial Chancellor and Prussian Premier, Prince von Bülow.

Interior, Herr von Bethmann-Hollweg.

Foreign Affairs, Herr von Schoen.

Colonies, Herr Dernburg.

Navy, Admiral von Tirpitz.

Justice, Herr Dr. Beseler.

Imperial Treasury, Herr Sydow.

Posts and Telegraphs, Herr Kraetke.

President, Imperial Railways Dept., Dr. Schulz.

German Ambassador to Austria, Herr von Tschirschky und Bögendorff; *Italy*, Count von Monts; *France*, Prince von Radolin; *Turkey*, Baron Marschall von Bieberstein; *U.S.A.* (Vacant); *Russia*, Count Pourtalès; *Japan*, Baron Mumm von Schwartzenstein.

Ambassador in London, Count Paul Wolff-Metternich, 9 Carlton House Terrace, S.W.

Councillor of Embassy, Herr Wilhelm von Stumm.

2nd Secretary, Councillor of Legation, H.S.H. Wilhelm, Prince zu Stolberg Wernigerode.

3rd Sec., Herr Dietrich von Bethmann-Hollweg.

Attachés, Herr von Goldschmidt-Rothschild; Baron von Wachendorf.

Military Attaché, Major Ostertag.

Naval Attaché, Commander Widenmann.

Director of the Chancery of the Embassy, Hofrath C. Lentze.

Chancellors, Hofrat F. R. Moebius, Herr Meinck, Herr Carow, and Herr Dörner.

Consul-Gen., Dr. Johannes, 49 Finsbury Square.

Consul, Herr Humbert.

Vice-Consuls, Herr Weidemann, Herr von Ranke.

The Empire, according to the Constitution of April 16, 1871, is a Confederate League, bearing the name German Empire, under the hereditary presidentship of the King of Prussia, who holds the title of German Emperor, and whose eldest son is styled His Imperial and Royal Highness. The Emperor as such represents the Empire in all matters affecting international law; in the name of the Empire he declares war and makes peace, concludes alliances and treaties with foreign States, and accredits and receives Ambassadors. Except to repel an attack on the territory or the coasts of the League, the Emperor cannot declare war in the name of the Empire without the consent of the Federal Council. The consent of the Federal Council and Reichstag is necessary in regard to certain specified treaties (cf. Art. 4 of the Constitution). The Emperor has the right to summon, open, adjourn, and close the Reichstag. The Federal Council and Reichstag must be summoned to meet every year; the Reichstag cannot be summoned without the adherence of the Federal Council. All bills are brought before the Reichstag in the name of the Emperor after acceptance by the Federal Council. Laws are promulgated by the Emperor in the name of the German Empire after acceptance by the Federal Council and the Reichstag. All edicts and orders of the Emperor made in the name of the Empire must be countersigned by the Chancellor, who is thereby responsible for them. The Emperor is the Bundesfeldherr, or Federal Commander-in-Chief of the whole German Army. In time of war he holds supreme command; in time of peace the Kings of Bavaria, Saxony, and Württemberg retain their sovereign rights as heads of their respective armies. In time of peace the Bavarian army administration is wholly independent of that of the rest of the German army, and only falls under the direct command of the Emperor when the army is mobilised for war. The rights of the Kings of Saxony and Württemberg in time of peace are not quite so extended as those of the King of

Bavaria; but their armies remain distinct and form separate army corps. The contingents of all the other Federal States are under the direct command of the King of Prussia, and under Prussian administration. The troops of all the Federal States swear loyalty to their respective sovereigns and obedience to the orders of the Emperor—in the case of Bavaria this obedience is limited to war-time. On the other hand, the German Navy is Imperial (Kaiserlich), and the Emperor as such is the supreme Admiral-in-Command of the Imperial German Navy in peace as well as war. The Reichstag, or Imperial Diet, consists of 397 Deputies; the original idea was that there should be one deputy to every 100,000 inhabitants of the Empire. The Reichstag sits for a period of five years, unless previously dissolved by the Emperor. Amongst the matters belonging to the jurisdiction of the Empire are all those that refer to the army and navy; the common, civil and penal law of the Empire; posts and telegraphs (not including the special rights reserved by Bavaria and Württemberg); the railways (subject to Bavaria's rights); inland navigation; the Customs of the Empire; weights and measures; coinage; banking; patents; foreign trade; the German mercantile marine; the Press; everything relating to the right of forming corporations; colonisation. A majority of the Federal Council and Reichstag is necessary, and also sufficient, for the validity of a law. The laws of the Empire take precedence of the laws of the Confederate States within the scope of the Constitution of the Empire; they are compulsory on all Governments of the Empire.

The German Empire consists of the following 26 States:—Prussia (including Lauenburg, and—since 1890—Heligoland); Bavaria; Saxony; Württemberg; Baden; Hesse; Mecklenburg-Schwerin; Saxe-Weimar; Mecklenburg-Strelitz; Oldenburg; Brunswick; Saxe-Meiningen; Saxe-Altenburg; Saxe-Coburg-Gotha; Anhalt; Schwarzburg-Sondershausen; Schwarzburg-Rudolstadt; Waldeck; Reuss (elder line); Reuss (younger line); Schaumburg-Lippe; Lippe; Reichsland; Lübeck; Bremen; Hamburg.

The census of 1905 shows a total population of 60,641,278, of whom 29,884,681 are males, and 30,756,597 females.

The religious confessions were divided in 1900 as follows:—35,231,104 Protestants (62·5 per cent.), 20,327,913 Roman Catholics (36·1 per cent.), 203,793 Christians of other categories, 586,833 Jews (1 per cent.), 17,535 adherents of other religions, or unknown.

There were in 1900 4,231,129 persons residing within the limits of the Empire who spoke a non-German language, viz.:—80,361 Dutch, 20,677 Frisians, 141,061 Danish (and Norwegians), 8,998 Swedish, 20,217 English, 211,679 French, 11,841 Walloons, 65,961 Italians, 2,059 Spanish, 479 Portuguese, 3,086,489 Poles, 142,049 Massurians, 100,213 Kassubians, 93,032 Wends, 64,382 Moravians, 43,016 Tzechs, 9,617 Russians, 106,305 Lithuanians, 8,158 Hungarians, 14,535 not above specified.

There are 41 large towns with over 100,000 inhabitants, and of these 28 are in Prussia, 4 in Saxony, 2 in Bavaria and Baden, and 1 each in Hamburg, Württemberg, Bremen, Reichsland, and Brunswick.

Education (*see* p. 669).

EMIGRATION.—At the commencement of the nineteenth century few Germans emigrated, but about fifty years afterwards there was a strong desire to leave the mother country. The figures are as follows:—

1831-41	...	152,000	1871-80	...	623,000
1841-50	...	435,000	1881-90	...	1,342,432
1851-60	...	952,000	1891-00	...	529,875
1861-70	...	822,000	1901-05	...	146,540

Out of thirty millions of emigrants from Europe in the nineteenth century Germany contributed about five millions—viz., ⅙ of the whole number.

In the eighties the average number per annum was over 100,000. In 1880 the number of emigrants was 117,097; in 1881 it rose to 220,902—the highest figure hitherto attained in one year. The statistics since 1880 are as follows:—

1881	...	220,902	1894	...	40,964
1882	...	203,585	1895	...	37,498
1883	...	173,616	1896	...	33,824
1884	...	149,065	1897	...	24,631
1885	...	110,119	1898	...	22,221
1886	...	83,225	1899	...	24,323
1887	...	104,787	1900	...	22,309
1888	...	103,951	1901	...	22,073
1889	...	96,070	1902	...	32,098
1890	...	77,103	1903	...	36,310
1891	...	120,089	1904	...	27,984
1892	...	116,339	1905	...	28,075
1893	...	87,677	1906	...	31,074

PRODUCTION AND INDUSTRY.—Germany is becoming more and more a manufacturing country. In 1895, 34·9 per cent. of the population were supported by agriculture, 3·6 per cent. by mining, 35·5 per cent. by industries, 11·6 per cent. by trade and traffic. Of the total area in 1900, 48·6 per cent. was under cultivation, 16 per cent. consisted of meadows and pastures, and 26 per cent. of forest land. Germany supports nine-tenths of her population by her own produce. The mineral produce was valued in 1905 at £69,496,030, and included 119,132,554 English tons of coal, 51,574,384 of lignite, 23,025,455 of iron ore, 4,953,437 of kali, kainit, and other kali salts. The total mineral produce amounted to 201,921,304 English tons, including, besides the above, rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uraniumore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore. Crefeld, Elberfeld-Barmen, Mühlhausen, Chemnitz, and the provinces of Westphalia and Silesia are the great centres of the textile industries.

The chief articles of export to the United Kingdom in the year 1905 were the following (£1 = Mks. 20.43):—

Sugar, refined and unrefined	£6,857,000
Woollen Unprinted Cloth Stuffs	1,972,000
Half-Silk Stuffs, Scarves, and Shawls	1,585,000
Coloured Prints, Engravings, &c.	1,218,000
Billot Iron, Pig Iron, Ingots	1,190,000
Women's Clothing of Cotton, Linen, Wool	1,190,000
Hides	1,135,000
Cotton Embroideries	1,112,000
Cotton Lace	1,081,000
Toys	988,700
Glove Leather, Manufactured Leather	905,500
Aniline and other Coal-Tar Stuffs	880,000
Machines and Parts of Machines, exclusive of Locomotives, sewing machines, &c.	820,300
Fine Iron Goods	773,300
Cotton Stockings	768,000
Common Iron Goods	660,800
Pianos	651,000
Cotton Gloves	587,300

The chief imports from the U.K. were :—

Coal	£5,310,000
Woollen Yarn	1,973,000
Cotton Yarn	2,770,000
Gold	2,251,000
Hides	2,163,000
India-rubber and Gutta-percha	1,840,000
Salted Herrings	1,160,000
Raw Silver	955,400
Combed Wool	895,700
Machines and Parts of Machines, exclusive of locomotives and sewing machines	822,230
Fresh Fish (of which Herrings £465,000)	572,700

MERCANTILE MARINE.—The Mercantile Marine consisted in 1906 of 1,560 steamers of 100 tons and upwards (3,109,966 tons gross register), and of 877 sailing vessels of 50 tons and upwards (471,824 tons net register). The gross tonnage of the British Mercantile Marine is about five times as great as that of the German Mercantile Marine.

The number of seamen in the German Mercantile Marine on January 1st, 1907, was 67,536 (January 1st, 1906, 64,037). Germany now ranks second in the list of the countries of the world that own shipping. In 1870 Germany's fleet of merchant steamers was only half as large as that of France; now it is twice as large. The year 1906 was, on the whole, satisfactory in the shipbuilding trade. There were built in 1906: 406 steamers, 664,176 tons gross (1905, 382 steamers, 667,808 tons gross), and 445 sailing vessels, 65,943 tons net (1905, 379 sailing vessels, 71,472 tons net).

COMMUNICATIONS.—The total length of the *Railways* in the Empire at the end of 1905 extended to 54,680 kilometres = 33,956 miles, of which about 92 per cent. belong to the State; the total cost of construction was £20,918 per mile; the expenses in 1905 were £75,539,215, and the receipts £119,460,800.

IMPERIAL POST (including Bavaria and Württemberg), 1905:—Length of telegraph lines, 88,244 miles (length of wires, 339,250 miles); telegrams handed in, 41,479,000; post offices, 39,052; telegraph offices, 32,312; telephone call-stations, 25,548; letters delivered, 4,422,700,000; cash on delivery orders, £39,186,274; money orders, £554,514,706; telegrams despatched, 41,479,000; telegrams received, 42,647,000. The number of employés in the service of posts and telegraphs was 278,061.

DEBT.—The National Debt amounted at the end of 1906 to £179,583,333, of which £78,431,373 bears interest at 3½ per cent., £87,426,470 at 3 per cent., £7,843,137 are Treasury Bonds, and £5,882,353 are Bank Notes. The debt of the former Norddeutscher Bund was cancelled by limitation at the end of 1902. (£1 = Mks. 20.43)

DEFENCE (for Army, *see* p. 666).—The *Imperial Navy* consisted at the end of 1907 of the following ships, built or building: 29 Battleships, 8 ironclad Coast Defence ships, *i.e.*, 37 Battleships (1st, and and 3rd class, according to British classification), 16 large Cruisers (10 armoured, 6 protected), 37 small Cruisers, 10 Gunboats, 71 large Torpedo Boats (mostly equal in size, but not in armament, to British Destroyers), 47 small Torpedo Boats, 27 antiquated—total, 145 —and 12 building; a number of special ships and gunboats of no great fighting value on the high seas. The personnel of the Imperial Navy consists of 1,786 officers, 295 engineer officers, 231 surgeons, 2,033 warrant officers, 9,579 petty officers, 31,320 seamen, 1,500 ships' boys—total, 46,747, including 378 midshipmen and 175 naval cadets, who hold rank between warrant officers and petty officers; entered separately are 199 paymasters.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread winners in the Empire a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. The National Insurance is based on mutual insurance and self-administration. The Infirmity Insurance Act came into force 1 January, 1900. In 1905, £5,602,316 were given as pensions to invalids (*i.e.*, persons unfit for work); £954,727 as old age pensions; £153,939 as sick pensions; £596,018 for medical assistance; £17,143 as home relief for infirm workmen; and £400,566 were refunded —total, £7,724,709. In 1904, the pensions to workmen unfit to work amounted to £5,164,028; old age pensions, £1,022,953; sick pensions, £129,151; medical assistance, £534,727; home relief for infirm workmen, £12,454; refunded, £385,204—a total outlay of £7,248,517, of which the State contributed £2,219,390. The insured are divided into five classes, according to the amount of their annual earnings, of £17 10s., £27 10s., £47 10s., £57 10s., and £100 respectively. Contributions are paid weekly, viz., 1½*d.*, 2*d.*, 2½*d.*, 3½*d.*, and 4½*d.* respectively—one half by the employer, the other by the employed: the State contributes a subsidy of £2 10s. to the pension. The *infirmity* pensions amount respectively (including the State subsidy) to £8 2s. £11 5s., £13 10s., £15 15s., and £18; the *old age* pensions to £5 10s., £7, £8 10s., £10, and £11 10s. respectively. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses in so far as the incomes do not exceed £100—including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work.

(£1 = Mks. 20.43.)	1906-7.	1907-8.
Revenue	£119,136,074	£127,087,175
Expenditure	118,717,117	127,087,175
of which Army	36,341,243	39,104,953
Navy	12,355,310	13,609,378
Imperial Debt	162,677,453	179,583,333

	1905.	1906.
Imports	£363,989,045	£392,652,961
from U.K.	38,389,623	40,352,422
Exports	285,942,241	311,257,954
to U.K.	51,776,800	52,236,906

The imports from the U.K. and the British Colonies formed 18·3 of Germany's total imports in 1906 (1905, 18·1); the exports to the U.K. and the British Colonies formed 20·6 of Germany's total exports for 1906 (1905, 21·8). The imports from the U.K. and the British Colonies to Germany were in 1906 £5,369,065 more than in 1905; whilst the exports from Germany to the U.K. and the British Colonies show an in-

crease in value of about £1,972,590 in 1906 as compared with 1905. The imports from Russia and the United States of America to Germany far exceeded those from the U.K. in 1906; whilst the exports to the U.K. further increased—the U.K. thus remaining by a long way Germany's best customer.

The Imperial War Treasure deposited in the Julius Tower at Spandau amounts to £5,873,715.

British Ambassador, His Excellency the Rt. Hon. Sir William Edward Goschen, G.C.V.O., K.C.M.G. £8,000

PRUSSIA.

King, William II., German Emperor (*q.v.*).
President of the Ministry and Minister for Foreign Affairs, Prince von Bülow.
Interior, Count Moltke.
Finance, Baron von Rheinbaben.
War, Lieut.-General von Einem.
Public Works, Herr Breitenbach.
Agric., Woods and Forests, Herr von Arnim-Kriewen.
Trade and Commerce, Herr Delbrück.
Instruction and Worship, Dr. Holle.
Minister of Justice, Dr. Beseler.

Prussia comprises the larger portion of Germany, and consists of 13 provinces, with area and population in 1905:—

Provinces.	Sq. miles, English.	Population.
1. East Prussia	14,266·38 ...	2,030,176
2. West Prussia	9,856·47 ...	1,641,746
3. Brandenburg	15,377·09 ...	3,531,906
City of Berlin.....	24·47 ...	2,040,148
4. Pomerania	11,626·51 ...	1,684,326
5. Posen	11,182·57 ...	1,986,637
6. Silesia	15,563·21 ...	4,942,611
7. Prov. Saxony	9,748·54 ...	2,979,221
8. Schleswig-Holstein & Heligoland.....	7,335·65 ...	1,504,248
9. Hanover	14,865·24 ...	2,759,544
10. Westphalia.....	7,801·29 ...	3,618,090
11. Hesse-Nassau.....	6,059·92 ...	2,070,052
12. Rhineland	10,420·07 ...	6,436,337
13. Hohenzollern.....	440·92 ...	68,282
Total	134,558·34	37,293,324

Of the total population 18,398,903 are males and 18,894,421 females. According to Religions, Evangelicals (*i.e.*, National Church) number 23,341,502; Roman Catholics 13,352,444; and Jews 409,501. There are 28 towns with over 100,000 inhabitants.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. Its principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of nearly 20,435,491 acres, chiefly consisting of fir. Minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic ores, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the principal industries. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated and are exported. Its manufactures consist chiefly of cotton goods, machines of all kinds. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, and working in metals. Brewing is a business of great importance. The principal imports comprise coffee, tea, cotton, and other produce of the colonies; wines, silk, fruit, manufactured goods, tin, furs, and dye-stuffs. The principal exports comprise linens, woollens, hardware, wool, timber, pitch, linseed, tobacco, mineral waters; to which may be added horses, horned cattle, hams, salt meat, and wine from the Rhenish provinces.

CAPITAL, Berlin. Population (1905), 2,040,148. Berlin to London, transit, 22 hours.

ALSACE-LORRAINE.

Statthalter, Count Carl von Wedel (1907).
Minister of State, Baron Zorn von Bulach.

The "Reichsland" of Alsace-Lorraine (Elsass-Lothringen), which was annexed by France from the old German Empire between 1648 and 1697, and restored to Germany in 1871, embraces the fertile plain between the Rhine and the Vosges, and stretches beyond these mountains as far as Luxemburg. Wine, tobacco, and hops, iron and coal are among its leading productions, and the cotton industry is most flourishing. There is an elective Provincial Committee of 58 members. The area is 5,591 square miles, divided for administrative purposes into three districts, Ober- and Unter-Elsass and Lothringen. The population in Dec., 1905, was 1,814,564, of whom 935,807 were males and 878,757 females. French was spoken by about 200,000 persons. Principal towns, Strassburg (pop. 167,678), Mülhausen, and Metz.

Revenue and Expenditure (1908–9) ... £3,171,804
Debt (1908).....(Rentes £43,500) ... 1,450,000

ANHALT, Duchy of.

Duke, Friedrich II., *born* 19 August, 1856; *succeeded* 24 Jan., 1904; *married*, 2 July, 1889, Princess Marie of Baden: *born* 26 July, 1865.
Heir Presumptive, Prince Edward, *born* 18 April, 1861; *married*, 6 Feb., 1885, Princess Louise of Saxe-Altenburg.
Prime Minister, Herr von Dallwitz.

A Duchy of Central Germany, in two principal portions, surrounded by Prussian Saxony, containing 906 square miles and a population of 328,029. Budget, 1908–9, £723,050.

Capital, Dessau. Population 55,134.

BADEN, Grand Duchy of.

Grand Duke, Frederick II., *born* 9 July, 1857; *m.* 20 Sept., 1885, Princess Hilda of Nassau, *born* 5 Nov., 1864; *Grand Duke*, 28 Sept., 1907.
Heir Apparent, Max, *b.* 10 July, 1867.
President of Ministry, Dr. Freiherr von Dusch.

A State of the German Empire, situate in the south-western part. The Rhine forms its southern and western boundary, separating it from Switzerland and Alsace. A great part of the surface is mountainous, and includes the Black Forest and Odenwald. It comprises an area of 5,888 square miles (3,268 cultivated—corn, wine, fruit, potatoes, tobacco, hemp, hops, and chicory being the chief produce—and 2,271 forests). The population in 1905 was 2,011,000, nearly two-thirds of whom were Catholics, more than one-third Protestants, and 25,893 Jews. Mannheim 164,000, Karlsruhe 118,000; Freiburg and Pforzheim have over 50,000 inhabitants. Principal industries are agriculture and manufactures (cigars, cotton and silk stuffs, straw hats, brushes, trinkets, clocks, chemicals, paper, and machinery). There are 1,236 miles of railway, of which 973 miles belong to the State, constructed at a total cost of £33,842,000.

Budget, 1908 (including railways).....£11,836,000
Debt, Jan. 1, 1907 (only railways)..... 23,317,000
CAPITAL, Karlsruhe. Population (1908), 128,000.
British Chargé d'Affaires, F. D. Harford, C.V.O. (Darmstadt).
Mannheim—Consul, Dr. Paul Ladenburg.

BAVARIA.

King, Otto, *born* 27 April, 1848; succeeded his late brother, Louis II., 13 June, 1886.
Regent and Heir Presumptive, Prince Luitpold, *born* 12 March, 1821, uncle of the late and present Kings; appointed Regent, 10 June, 1886; *mar.* 15 April, 1844, Archduchess Augusta of Austria-Tuscany, who *died* 26 April, 1864.
Ministers of State—President and Minister of Foreign Affairs, Dr. Baron von Podewils-Dürniz; *Justice*, von Miltner; *Interior*, Dr. von Brettreich; *Instruction*, Dr. von Wehner; *Finance*, von Pfaff; *Communications*, von Frauendorfer; *War*, Gen. Baron von Horn.

The second Kingdom in size and population of the German Empire. It is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16′—50° 34′ N. lat. and 9° 53′—13° 50′ E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 28,885 square miles, and a population (in 1905) of 6,524,372 (4,608,469 were Roman Catholics, 1,844,699 Protestants, and 55,341 Jews). The capital (538,983) and Nuremberg (294,426) are the largest towns. Bavaria contributes three *corps d'armée* to the forces of the German Empire; their strength is fixed at 68,426 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c.

Budget, 1908 and 1909 ..... £31,562,755
Public debt, 31 Aug. 1907 (including railway debt, £70,567,099)..... 96,507,316
CAPITAL, Munich. Population (1905), 538,983.

British Minister Res., F. Paget £1,500
Consul, Lucien Buchmann.....
Nuremberg—V.-Cons., S. Ehrenbacher...

BRUNSWICK, Duchy of.

Regent, H.H. Duke John Albrecht of Mecklenburg.

A State of Northern Germany, consisting chiefly of three detached parts, comprising an area of 1,418 English square miles, and a population (1905) of 485,958, of whom 455,680 were Protestants, 26,376 Roman Catholics, and 1,815 Jews. Budget, 1908–1909: Income, £715,300; Expenditure, £731,575; debt, £2,502,152.

Capital, Brunswick; population (1905), 136,397.

HESSE, Grand Duchy of.

Grand Duke, Ernest Louis, *born* 25 Nov., 1868; *suc.* 13 Mar., 1892; *m.* 2 Feb., 1905, Princess Eleanore zu Solms-Hohensolms-Lich, *b.* 17 Sept., 1871.
Heir Apparent, George, *b.* 8 Nov., 1906.
President of Ministry, K. Ewald.

A central State in the west of Germany, comprising two disconnected territories, nearly equal

in size, containing an area of 2,966 square miles, and a population (1908) of 1,255,768, of whom two-thirds were Protestants. The surface of the eastern portion of both parts is mountainous. The country is fertile, and agriculture is in a flourishing condition. Fruit is abundant, and the vine highly cultivated. Darmstadt, Mainz, and Offenbach have over 50,000 inhabitants.

Budget, 1908 ..... £4,097,875
Public debt, 1908 (mostly for railways) 20,728,567
CAPITAL, Darmstadt. Population (1908), 88,700.
British Chargé d'Affaires, F. D. Harford, C.V.O. (Darmstadt) £500
Consul-Gen., Sir Francis Oppenheimer (at Frankfort).

LIPPE, Principality of.

Prince, Leopold, *b.* 30 May, 1871.

Area, 470 sq. miles; population (1905), 145,577; rev. (1908–9), £113,657; exp., £116,068; debt, £67,039. Capital, Detmold; pop. (1905), 13,272.

MECKLENBURG-SCHWERIN, Grand Duchy of.

Grand Duke, Frederick Francis IV., *b.* 9 April, 1882; *suc.* 10 April, 1897; *mar.* 7 June, 1904, Princess Alexandra of Brunswick and Luneburg, *born* 29 Sept., 1882.
Minister of State, K. H. L. Graf von Bassewitz-Levetzow.

Comprises an area of 5,135 square miles on the Baltic, with a population of 625,045. The Legislative power is vested in representatives of the towns, and of the Knights' estates. Revenue (1907–8), £1,144,575; debt (1908), £6,481,568. Capital, Schwerin; pop. 41,628.

MECKLENBURG-STRELITZ, Grand Duchy of.

Grand Duke, Adolphus Friedrich, *b.* 22 July, 1848; *mar.* 17 April, 1877, the Princess Elizabeth of Anhalt, *born* 7 Sept., 1857.
Heir Apparent, Adolphus Friedrich, *born* 17 June, 1882.

Consists of two detached parts, separated by Mecklenburg-Schwerin. Area, 1,144 square miles; population, 103,451. No proper budget. Finances in good condition. Capital, Neu-Strelitz; pop. 11,658.

OLDENBURG, Grand Duchy of.

Grand Duke, Frederic Augustus, *b.* 16 Nov., 1852; *suc.* 13 June, 1900; *married* (1), Feb. 18, 1878, to the late Princess Elizabeth (second daughter of the late Prince Frederick Charles of Prussia), who *died* 28 August, 1895; and (2) to Princess Elizabeth of Mecklenburg-Schwerin, *born* 10 August, 1869.
Heir Apparent, Nicholas, *b.* 10 August, 1897.

Situate on the North Sea and the Weser. Area, 2,508 square miles; pop. 398,500; rev. (1900), £491,603; exp., £460,947; debt, £2,804,511. Capital, Oldenburg; pop. 26,000.

REUSS, Elder Line.

Prince, Henry XXIV., *born* 20 March, 1878; *suc.* 19 April, 1902.
Prince Regent, Henry XIV., *b.* 28 May, 1832.

Area, 120 square miles; population (1905), 70,603; revenue and expenditure (1907), £76,000. No debt. Capital, Greiz; pop. (1905), 23,118.

REUSS, Younger Line.

Reigning Prince, Henry XIV., *b.* 28 May, 1832; *suc.* 14 July, 1867; *mar.* Princess Agnes of Württemberg (*died* 10 July, 1886).
Heir Apparent and Regent, Henry XXVII.

Area, 320 sq. miles; pop. (1905), 144,584; rev. (1908–10), £131,030; exp. £128,787; debt (1908), £52,027. Capital, Gera; pop. (1905), 46,909.

SAXE-ALTENBURG, Duchy of.

Duke, Ernest, *b.* 31 Aug., 1871; *suc.* 7 Nov., 1908; *mar.* 17 Nov., 1898, Princess Adelheid of Schaumburg-Lippe, *b.* 22 Sept., 1875.
Heir Presumptive, Geo. Moritz, *b.* 13 May, 1900.

Area, 512 square miles; population (1905), 206,508, of whom over 200,500 are Protestants; revenue and expenditure (1905–7), £234,928; debt (1908), £44,372; reserve fund, £192,122. Capital, Altenburg; pop. (1905), 38,818.

SAXE-COBURG AND GOTHA, Duchies of.

Duke, Charles Edward (H.R.H. Duke of Albany), *born* 19 July, 1884; *suc.* 30 July, 1900; assumed government 19 July, 1905.
Heir Presumptive, H.R.H. Prince Johann Leopold, *born* 2 Aug., 1906.
Minister of State, Herr Dr. von Richter.

A State consisting of two principal and several smaller detached portions, with an area of 763 English sq. miles, and a population (1905) of 242,432, of whom 237,187 were Protestants. Capital, Gotha (pop. 36,947). Coburg (the other capital) has 22,488 inhabitants. The state revenue is set down at £116,000 for Gotha, and £56,600 for Coburg; the state and domain revenues at £180,000 for Gotha and £81,000 for Coburg. There are 181 miles of railway open (1902), and at Gotha there is an English church.

British Minister Resident (*see* Saxony).
Hon. Attaché, Edward Trench.
Consul-Gen., Baron von Tauchnitz (Leipzig).

SAXE-MEININGEN, Duchy of.

Duke, George II., *b.* 2 April, 1826; *suc.* 20 Sept., 1866; *mar.* (1) Princess Charlotte of Prussia (*d.* 30 March, 1855), (2) Princess Feodora of Hohenlohe-Langenburg (*d.* 10 Feb., 1872), (3) morganatically, Helene, Baroness of Heldburg.
Heir Apparent, Bernhard, *b.* 1 April, 1851.

Area, 945 sq. miles; pop. (1905), 268,916; rev. and exp. (1906-8), £436,310; debt (1906), 297,295. Capital, Meiningen; pop. (1905), 15,945.

SAXE-WEIMAR.

Grand Duke, William Ernest, *b.* 10 June, 1876; *suc.* 5 January, 1901.
Minister of State, Dr. Rothe.

Area, 1,397 sq. miles; pop. (1905), 388,095; rev. and exp. (1908-1910), £531,523. There is a British and American church at the capital. Capital, Weimar; pop. (1905), 31,117.

SAXONY.

King, Frederic Augustus III., *born* 25 May, 1865; *suc.* 15 Oct., 1904.
Heir Apparent, his son, Crown Prince George, *b.* 15 Jan., 1893.
Ministers of State, Dr. von Rüger, Dr. von Otto, Freiherr von Hausen, Dr. Count von Hohenthal and Bergen, Dr. Beck.

A Kingdom of Germany, the third in importance and population of the German Empire, comprising an area of 5,856 English square miles, with a population (1905) of 4,508,601, among whom 218,113 were Roman Catholics, and 14,699 Jews. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant

(coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden (pop. 516,996), Leipzig (pop. 503,672), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 4,341 matriculated students in 1907); Freiberg (pop. 30,860), in the mining district; Zwickau (pop. 68,502), and Chemnitz (pop. 244 927), the Manchester of Saxony.

Revenue and expenditure, 1906-1907 £16,000,000
Debt (railways), 1906 45,000,000

CAPITAL, Dresden. Pop. (1905), 516,996.

Brit. Minister Resident,
.....

Hon. Attaché, Edward Trench. £950
Consul, H. Palmié.
Vice-Consul—C. W. Palmié.
Leipzig — Cons. - Gen., Dr. Baron C. C. B. von Tauchnitz.
Vice-Consul, Dr. Curt Otto.
Chemnitz—Vice-Consul, F. H. Felkin.

SCHAUMBURG-LIPPE, Principality of.

Reigning Prince, George, *b.* 10 Oct., 1846; *succ.* 8 May, 1893; *mar.* Princess Marie Anna of Saxe-Altenburg.
Heir Apparent, Adolphus, *b.* 23 Feb., 1883.

Area, 130 sq. miles; pop. (1905), 44,992; rev. and exp. (1908-9), £47,781; debt (1908), £20,281. Capital, Buckeburg; pop. (1905), 5,683.

SCHWARZBURG-RUDOLSTADT, Principality of.

Prince, Gunther, *b.* 21 August, 1852; *succ.* 19 Jan., 1890; *mar.* Princess Anna Louise of Schönburg-Waldenburg.

Area, 360 sq. miles; pop. (1905), 96,835; rev. and exp. (1906-8), £131,745; debt, £218,358. Capital, Rudolstadt; pop. (1905), 12,495.

SCHWARZBURG-SONDERSHAUSEN, Principality of.

Prince, Charles Gunther, *b.* 7 August, 1830; *succ.* 17 July, 1880; *mar.* Princess Marie of Saxe-Altenburg.

Area, 333 sq. miles; pop. (1905), 85,152; rev. and exp. (1908), £164,440; debt (1908), £271,408. Capital, Sondershausen; pop. (1905), 7,383.

WALDECK.

Prince, Frederick, Prince of Waldeck-Pyrmont, Count of Rappolstein, Seigneur of Hohenack and Geroldseck, Wasziegen, &c., *born* 20 Jan., 1865; *succ.* 12 May, 1893; *mar.*, 9 Aug., 1895, Princess Bathildis of Schaumburg-Lippe, and has issue 4 children.
Heir-Apparent, Josias George William, *b.* 13 May, 1896.

Area, 438 sq. miles; pop. 59,127; income and exp. £67,872; debt, £83,820. Capital, Arolsen; pop. 3,000.

British Chargé d'Affaires,
(Dresden).

WÜRTTEMBERG.

King, William II., *born* 25 Feb., 1848; *succeeded* 6 Oct., 1891; *mar.* (1) Princess Marie of Waldeck (*died* 30 April, 1882); (2) Princess Charlotte of Schaumburg-Lippe.
President of Ministry, Dr. von Weizsäcker.

A Kingdom of South Germany, with an area of 7,534 English square miles, and a population (in 1905) of 2,302,179, of whom 30 per cent. are Roman Catholics. Württemberg furnishes the 13th Corps to the German Army, consisting of 24,121 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines: the forest, grain, and pasture-land being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, stays, beer, wine, &c.

Consul, James Hardwyn Harriss Gastrell.
Vice-Consul, B. Ehrenbacher.

THE FREIEN AND HANSE TOWNS.

The Free Hanse Towns comprise the three cities of Hamburg, Bremen, and Lübeck, each with a small rural territory, retaining their sovereignty and local self-government, like the other States of the Empire, and are situated in the North of Germany, on the Elbe, Weser, and Trave respectively. Hamburg is the great emporium of Germany, and is 65 miles from Cuxhaven, to which port it is connected by railway. Bremen is much smaller, but very prosperous, and only second in commercial importance to Hamburg. It is connected by railway with the outport of Bremerhaven, 35 miles distant, and carries on a very extensive American trade. Lübeck is situate near the Baltic, and is connected with the Elbe by the Elbe-Trave Canal; its commerce is principally with Denmark, Norway, Sweden, and Russia.

GERMAN COLONIES.

The German Colonies have a total area of 1,658,449 sq. kils. = 1,028,181 sq. miles, and had (1905) a population of about 12,500,000, of whom 12,440 were whites. Of these whites about 3,316 were Germans.

AFRICA.—*Togoland:* Area, 87,200 sq. kils.= 33,659 sq. miles; population about 1,500,000. Capital, Lome. Budget, 1907: Receipts, £103,650; expenditure, £103,650. 1905: Imports, £388,000; exports, £197,850.—*Cameroon:* Area, 495,000 sq. kils. = 191,074 sq. miles; population, 3,500,000. Capital, Duala. Budget for 1907: Receipts, £307,900, of which State aid, £145,200; expenditure, £307,900. 1905: Imports, £673,350; exports, £465,750.—*German South-West Africa:* Area, 835,100 sq. kils. = 322,348 sq. miles; population, 200,000 before the war. Capital, Windhoek. Budget, 1907: Receipts, £3,464,855; expenditure, £5,320,802. State aid, £3,185,000. 1905: Imports, no return; exports, no return.—*German East Africa:* Area, 995,000 sq. kils. = 384,079 sq. miles; population, 7,000,000. Capital, Dar-es-Salaam. Budget, 1907: Receipts, £566,000, of which State aid, £293,000; expenditure, £566,000. 1905: Imports, £882,750; exports, £497,500.—*German Australia*, under which name are now included New Guinea, Kaiser Wilhelm Land, Bismarck Archipelago, Solomon Islands, Marshall Islands, Caroline, Pelew, and Ladrone (Marianne Islands). Total area, 482,481 sq. kils. = 186,249 sq. miles; population, 656,000. Budget, 1907: Receipts, £100,600, including State aid, £74,700; expenditure, £99,350. 1905: Imports, £273,550; exports, £128,500.—*Samoa:* Area, 2,588 sq. kils. = 1,003 sq. miles; population, 33,000. Capital, Apia. Budget, 1907: Receipts, £36,800, of which £9,000 State aid; expenditure, £36,350. 1905: Imports, £169,350; exports, £101,450.—*Kiao-chao:* Leased for a period of 99 years from China in 1898. Area, 501 sq. kils. = 193 sq. miles; population (in leased territory), 33,000; in sphere of interest, 92,000. Chief seat of government, Tsingtau. Budget, 1907: Receipts, £663,700, of which State aid, £886,700; expenditure, £662,100.

The German garrison in Kiao-Chao consists of 102 officers, 3,401 German non-commissioned officers and men, and one battalion of the East Asiatic Garrison brigade. It was further agreed that within a 50 kils. zone (31 English miles) from all points of the leased territory the Chinese Government should no longer, for the space of 99 years, be entitled to take any steps without previous authorisation from the German Government. Germany also received mining and railway concessions in the province of Shan-Tung, which is called "the sphere of influence," area about 2,750 English sq. miles, population 84,000. The leased territory, as it is called, comprises the bay up to high-water mark, its islands, and the north and south tongues of land at the mouth of the harbour.

Germany's share in the trade with her colonies in 1905 was 33 per cent.

GREECE.

King of the Hellenes, George, second son of King Christian IX. of Denmark, *born* 24 Dec., 1845; *elected* 30 (18) March, 1863; *married* 27 Oct., 1867, Olga, eldest daughter of the Grand Duke Constantine of Russia, *born* 3 Sept., 1851 (*issue*, 5 sons and a daughter).
Heir Apparent, Prince Constantinos, Duke of Sparta, *born* 2 Aug., 1868; *married* 27 Oct., 1889, to the Princess Sophia, sister of the German Emperor, *born* 14 June, 1870.

Prime Minister and Minister for War (December, 1905), G. N. Theotokis.
Finance, D. Gounaris.
Foreign Affairs, G. Baltazi.
Interior, N. Levidis.
Marine, E. Embiricos.
Justice, D. Stephanou.
Education and Religion, S. Staïs.

Envoy Extraordinary and Minister Plenipotentiary in London, Athos Romanos, 18 Grosvenor Gardens, S.W.
1st Secretary, L. L. Caftanzogler.
Cons.-Gen., T. Stavridis, 40 Old Broad St., E.C.
Consul and Secretary, J. M. Joannides.

A maritime Kingdom in the south-east of Europe, situate in lat. 35° 40′—40° 10′ N. and long. 18° 20′—25° 50′ E. comprising an area of 24,977 square miles (inclusive of the territory lost by the rectification of the Thessalian frontier after the war with Turkey in 1897), with a population (in 1907) of 2,631,952. The country is composed of a continental portion, almost separated into two parts by the Gulfs of Patras and Lepanto on the west, and the Gulf of Ægina on the east, the Archipelago of the Ægean Sea and the Ionian Islands, and is divided into twenty-six provinces, called Nomarchies. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. Its exports consist of currants, figs, olive oil, wine, cognac, tobacco, hides, lead, magnesium, emery, marble, and sponges.

Defence (for Army, *see* p. 666). The navy consisted of 3 ironclads, 2 armoured vessels, 1 cruiser, 10 gunboats, 4 steam corvettes, 8

schooners, 7 torpedo boats, 3 transports, and 7 various vessels, mostly obsolete, in July, 1903.

Education (*see* p. 669).

Communications.—There are 830 miles of railway open for traffic. There is a ship canal cutting through the Isthmus of Corinth, but it is rarely used by foreign vessels. Telegraphs, 4,951 miles. The mercantile marine consists of 1,035 sailing vessels above 30 tons capacity, and 206 steamers (198,681 tons).

Finance.—On December 31, 1907, the public Gold Debt of Greece amounted to £28,703,300, involving an annual charge of £888,708, and the Interior Paper Debt to 166,891,073 drachmæ, with a charge of 7,559,794 drachmæ. In the Gold Debt is included the first portion (£880,000) of a 4 per cent. loan contracted in March, 1902, for the construction of a railway from the Piræus to Demerly in Thessaly. The second portion (£870,000) was issued in June, 1904, and a further instalment (£230,000) for the extension of the railway to Larissa was issued in Jan., 1905, and the final instalment of £270,000 in 1906. The service of the Debt was entrusted (1898) to an International Commission, sitting at Athens, consisting of representatives of the Governments of Great Britain, France, Germany, Russia, Austria-Hungary, and Italy. To them are assigned the revenues from (1) the State monopolies (salt, matches, petroleum, playing cards, cigarette paper, and emery), (2) the tobacco tax, and (3) the stamp duties, together with the revenue from the Piræus Custom-house as a supplementary guarantee. The gross receipts from the first three sources mentioned are estimated at 28,900,000 drachmæ, out of which a minimum interest of 43 per cent. of the original interest on the Monopoly Loan (1887), and 32 per cent. of the original interest on all other loans contracted previous to 1898, as well as the full interest of 2½ per cent. on the loan of 1898, is guaranteed. If the receipts exceed 28,900,000 drachmæ, the surplus, less 18 per cent. for expenses of administration, is divided between the Government and the bond-holders, in the following proportions: 30 per cent. for increase of interest, 30 per cent. for increase of sinking fund, and 40 per cent. to the Hellenic Government. Profit on exchange is distributed in the same proportions. If the receipts fall short of the estimate, the revenue from the custom-houses at Laurium, Patras, Volo, and Corfu are successively assigned to make good the deficit.

The trade of Greece is hampered by a forced circulation of about 150,000,000 drachmæ (nominally equal to the French franc) in a depreciated paper currency. The agio on gold has been steadily declining during the last few years, and the average exchange constantly improving.

GUATEMALA, REPUBLIC OF.

President, Manuel Estrada Cabrera, *elected* 2 Oct., 1898, and *re-elected* July, 1904, to serve from April, 1905, to April, 1911.
Min. of Foreign Affairs, Juan Barrios.
Consul-Gen., Señor F. de Arce, 31 Westminster Palace Gardens, Victoria Street, S.W.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 40′ to 17° 40′, and in W. Long. from 88° 15′ to 92° 30′, and comprises an area of 46,774 square miles, and a population in 1905 of 1,800,000. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. The Northern Railway connects P. Barrios (Atlantic) with the capital. The Central Railway connects the port of San José (Pacific) with the capital. About 490 miles were open for traffic in 1907. There were 3,790 kilometres of telegraph working in 1905. The chief ports are San José de Guatemala, Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, valued at £1,803,990 in 1907; the other articles are sugar, rubber, hides, bananas, and timber.

HAYTI, REPUBLIC OF.

President, General Nord Alexis, *born* 1821, *assumed office* as from 15 May, 1902, for seven years £4,800
Minister of Foreign Affairs & Public Instruction, Louis Borno.
War and Navy, General Cyriaque Celestin.
Interior and Police, Gen. Vilhardouin Leconte.
Finance and Commerce, F. Marcelin.
Justice and Worship, T. Laleau.
Public Works, Numa Laraque.

Minister in London, Dr. Viard, 75 Artillery Mansions, Victoria Street, S.W.
Consul, Maurice Erdmann, 32 Fenchurch Street.

The Republic of Hayti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the West India Islands. It contains 29,830 square miles, of which 10,242 square miles belong to Hayti. It lies in N. lat. between 17° 37′—20°, and in W. longitude between 68° 20′—74° 28′; and belongs to the group of the Greater Antilles. The portion belonging to Hayti contains a population of 1,500,000 (1907). The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany.

HONDURAS, REPUBLIC OF.

President, General Miguel R. Davila, *assumed office* 18 April, 1907.

Consul-General in London, M. J. Kelly, 8 Idol Lane, E.C.

The Middle State of Central America, stretching in N. lat. between 13° 10′ and 16°, and W. long. between 83° 10′ and 88° 40′; containing 42,658 English square miles, including a small portion of the Mosquito Territory, and the Bay Islands in the Gulf of Honduras. The population in 1902 was 774,900, mostly of aboriginal blood. It has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Cortez, Omoa, Roatan, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. The country is mountainous, being traversed by the Cordilleras. The products are mahogany, fruit, cattle, cotton, sugar, tobacco, coffee, indigo, sarsaparilla, hides and skins, india-rubber, cedar, fustic, rose, and Lima wool. Its mineral wealth is great. The only railway (42-inch gauge) runs from Puerto Cortez to Pimienta, 60 miles, which it is intended to develop into an inter-oceanic railway, connecting the Atlantic with the Pacific.

HUNGARY. (*See* pp. 599-600.)

ICELAND (*Danish Dependency*).

Minister for Iceland (Resident), H. Hafstein, *appd.* 2 Feb., 1904.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23′ to 66° 33′ N. lat., and from 13° 22′ to 24° 35′ W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was estimated in 1898 at 76,237.

The present constitution was granted in 1904, and the assembly (Al-thing) is more or less controlled by the Government at Copenhagen. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Iceland is now in direct telegraphic communication with this country.

	1904.	1905.	1906.

Archivist, Signor Catani.
Consul, Marchese Faa di Bruno.
Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands. It is situate between lat. 36° 38′ 30″—46° 40′ 30″ N. and long. 6° 30′—18° 30′ E., and comprises a total area of 110,623 square miles (91,277 mainland, 19,346 islands), with a population (1 Jan., 1906) of 33,441,484. Formerly it was composed of the various States of Sardinia, the Two Sicilies, the Pontifical States, the Lombardo-Venetian provinces of the Austrian Empire, the Grand Duchy of Tuscany, and the Duchies of Parma and Modena. In 1870 the unity of the country was finally effected, and Rome became again the capital of Italy, which is now divided for administration into 69 provinces. The coast-line of the mainland is estimated at 1,999 miles; of Sicily, Sardinia, and Elba at 1,389 miles; of the minor islands at 557 miles; in all 3,945 miles, having several large bays and gulfs. The peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. The principal towns are Naples (564,000), Rome (462,783), Milan (over 450,000), Turin, Palermo (over 300,000), Genoa, Florence (over 200,000), and Bologna, Venice, Messina, Catania, and Leghorn (over 100,000 inhabitants). Its wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; white fruit abounds and is largely exported. The cultivation of silk forms an important agricultural industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly, and 219,343 tons were produced in 1906. The mineral produce in 1906 included iron ore (£274,231), zinc ore (£806,511), and crude sulphur (£1,476,436). The railway system is making rapid progress throughout the kingdom; in 1901 there were 9,943 miles open for traffic, and 27,820 miles of telegraph line. The commercial marine (1902) consisted of 5,690 vessels (485 steamers), of 1,018,807 tons. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienne earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption. There is a large settled and floating population of English and Americans, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others. *Defence* (for Army, *see* p. 666). The navy in 1908 consisted of 14 first-class battleships (*and* 6 *building*), 6 third-class ditto, 5 armoured cruisers (*and* 1 *building*), 24 protected and 1 unprotected cruisers, 16 (10 *building*) torpedo vessels, 13 destroyers (*and* 4 *building*), and torpedo boats: divisional 7 (*and* 1 *building*), 2nd class 94. Spezia, the chief naval and military port of the kingdom is securely fortified. *Education* (*see* p. 669).

Foreign merchants vessels of 15,672,232 total tonnage entered and of 15,659,265 tons cleared at Italian ports in 1906. Italian vessels of 21,844,254 tons entered and of 21,806,238 tons cleared in 1906.

COLONIES. — Italy possesses the colony of Eritrea, and a protectorate over part of the Somali coast, extending from Cape Guardafui to the Juba river, on which they have a station; an annual rent is paid to the Sultan of Zanzibar for the Benadir ports leased by him to Italy. The colony of Eritrea includes also the Dahlar archipelago.

The protectorate includes Aussa and the Danakil country, the Somali countries of the Sultans of Miguertini and of Obbia, as well as the Benadir, which is now a colony. By new conventions signed with the Emperor Menelek 16 May, 1908, Italy obtains a slight extension of frontiers, and obtains the country between Dolo and Bardera. The commencement of Italian influence was made in 1880, when the district of Assab was transferred from a trading company to the Government. The tract of land now known as ERITREA ("Red Sea") consists of a triangular portion of barren and sandy lowland between 12° and 18° N., containing in all a coastline along the Red Sea of about 700 miles, with a total area of 85,000 to 90,000 square miles, and a population of about 300,000, of whom about 3,000 are Europeans. The capital is Asmara, Massowa being the chief port, where there is a good harbour, and the principal product, salt, of great value as being the monetary currency of Southern Abyssinia.

This ancient and extensive Empire, now in alliance with the United Kingdom, consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Hondō (the name of the Empire being Nihon), Shikoku, Kiu-shū, Hokkaidō or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Kiu-kiu) Islands under the name of "Prefecture of Okinawa." The empire comprises an area of 162,655 square miles, with a population of 47,215,630, according to the last census, there being 23,834,398 men and 23,381,237 women. In addition, the Russo-Japanese war gave to Japan

the southern portion of the island of Saghalin, (Japanese, Karafuto).

Japan is said to possess a written history extending over 2,500 years, and its sovereigns to have formed an unbroken dynasty since 660 B.C., the present Emperor being the 121st of his race; but the authentic history begins about 400 A.D. Within the last 40 years Japan has made unparalleled progress in civilisation and the adoption of Western manners and customs. The feudal system, under which the country was governed by numerous lords, has been abolished, and the Mikado is now absolutely the Sovereign of the State, which has since the revolution of 1868 shown a most remarkable power of adopting Western knowledge and experience. A wise and enlightened ruler is at the head of the nation, and the first national Parliament, the outcome of the constitution granted to the people by the Emperor, promulgated 11 Feb., 1889, met for the first time in November, 1890. The feudal lords, who have lost all their powers of government, still retain their high social positions, and a new aristocracy with these as its basis has been formed; it consists of five grades, corresponding to the European titles of Prince (not Imperial), Marquis, Count, Viscount, and Baron. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, and sulphur abound, whilst agate, cornelian, and rock crystal are also found. Gold was discovered in 1899 in considerable quantities in the northern island, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the Cryptomeria japonica, Pinus Massoniana, and Zelkowa Keaki; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit, for the most part of inferior quality, is abundant, and English fruits, such as cherries and gooseberries, are being produced in increasing quantities in Yezo; the quality is poor, but improving.

Commerce and Industry.—The chief manufactures are silk and cotton, cotton yarn, matches, paper, glass, lacquer ware, porcelain, and bronze, and shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from Europe and the U.S.A. Sugar is largely imported from Java, Philippines, Germany, Austria, Hong Kong, and Formosa; indigo from Germany, British India, and Java; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton yarns, rice, tea, fish copper, matches, coal, camphor, straw plaits, and marine products.

Communications.—There were 4,691 miles of private railway and 3,116 miles of Government lines open in 1907. A Japanese line has been built in Korea from Fusan to Seoul, while the South Manchurian Railway is also under Japanese control. The gross receipts for passenger and goods traffic on all the lines in Japan during 1906 was £7,581,000. The mercantile marine of registered ships above 20 tons consisted (1907) of 1,574 steamers of 1,109,443 tons gross and 4,210 sailing vessels of 357,275 tons gross. Of the 13,831 vessels (tonnage 20,336,695) that entered Japanese ports (1907) 2,273 were British (tonnage, 6,279,357).

Defence (for Army, *see* p. 666-7). The *Navy* as at 31 March, 1907, is given on p. 204; it was manned by about 34,000 officers and men.

Finance.—From Oct. 1, 1897, the currency was placed upon a gold basis, the unit being the gold yen of 8.333 gr. containing 75 grammes of fine gold; but there is no smaller gold coin than the 5-*yen* piece, and paper money is more generally used. The local exchange value of the *yen* is about 2*s.* 0½*d.*

Education (*see* p. 669).

Under treaties with Great Britain and several other Powers, Yedo (Tōkiō), Kanagawa (Yokohama), Hiogo (Kobe), and Osaka (on the Inland Sea), Nagasaki in Kiushu, Hakodate in the Hokkaido (Yezo), Niigata, and 28 additional ports are open to trade. The following table shows the distribution of the foreign trade in 1907 among the countries principally concerned:—

	Exports.	Imports.	Total.
British Empire	£7,289,005	£20,800,204	£28,389,209
United States	13,382,228	8,237,856	21,621,084
China	8,740,296	6,041,534	14,781,830
France	4,741,875	272,731	5,050,006
Germany	1,149,012	4,866,0 2	6,015,093

The principal articles exported to Japan from this country in 1907 were iron, wrought and unwrought (£2,017,000), machinery and mill work (£1,582 000), wool and woollens (£1,156,000), and cotton manufactures (£1,700,000 approx.). Japan sent to the U.K. silk manufactures (£774,370), unwrought copper (£462,000), and straw plaitings (£).

	1907-8.	1908-9.
Revenue (Budget)	£43,212,000*	48,565,000*
Expenditure (Budget)	42,087,000*	43,609,000*
Total debt	226,393,000	232,425,000
Imports (1906 & 1907)	42,751,000	50,477,000
Exports (do.)	43,258,000	44,142,000
Imports from U.K. (do.)	10,342,000	11,867,000
Exports to U.K. (do.)	2,302,000	2,291,000

Formosa.—The island of Formosa was ceded by China to Japan (2 June, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with about 3,000,000 inhabitants (1905).

KOREA.

Emperor, Chōk, *born* 1874, *acceded* 20 July, 1907.
Japanese Resident Gen., Prince Hirobumi Itō.
Chief Commissioner of Customs, T. Nagahama.

* Excludes extra-ordinary expenses, which in 1908-9 are estimated at £14,706,000 rev. and £19,662,000 exp.

Korea, the bone of contention in the war etween Japan and China (1894–5), and again in he Russo-Japanese war of 1904–5, is an Empire onsisting of a peninsula lying to the south-east f Manchuria, from which it is divided by the alu and Tiumen Rivers. The country is tuated between 124° and 128° E. long., and etween 34° and 43° N. lat., and the coast is inged with innumerable islands, of which the rgest is Quelpart. Total length, 600 miles from rth to south, and greatest breadth 135 miles om east to west, with an area of some 71,000 uare miles. Population estimated at about ,000,000; there are about 115,000 Japanese in he country. Since the conclusion of the Russo-apanese War in 1905 the administrative control Korea has gradually passed into Japanese ands. In November, 1905, a Convention was ncluded with Japan, under which the latter sumed a protectorate over the country; and he powers thus obtained were strengthened by he signature on July 31, 1907, of a second Con-ention, under which all administrative measures d all high official appointments became subject the approval of the Japanese Resident General. he Koreans are for the most part tall, robust, d good-looking; they belong to the Mongolian ock, the language of the country being of ranian origin, with a large admixture of linese words. Confucianism and a corrupt rm of Buddhism, mingled with spirit and cestor worship, may be said to be the religion the country; there are, however, a considerable mber of Christian converts. The soil is fertile, t mountainous except in the river valleys. bout 4,500,000 acres are under cultivation, the aple agricultural products being rice and other reals, beans, cotton, tobacco, and hemp; the her natural products are chiefly gold and hides. nseng, a medicinal root much affected by the inese, is largely grown under Government pervision in the province of Pyeng-An, and, ing a Government monopoly, forms a rich urce of revenue. Gold, copper, coal, iron, and her minerals are distributed throughout the untry, and foreign mining enterprise, while ll in its infancy, shows promise of considerable velopment. Manufactures are as yet in a imitive condition, the principal being hemp oth, brass ware, and an excellent quality of per resembling the Japanese article, but outer. The greater proportion of the trade of orea is in Japanese hands, but British imports, rect and indirect, form more than 25 per cent. the total.

Finances.—The finances of the country, which re formerly in a state of great disorder, have en placed on a sound basis. A reform has en effected in the currency, the debased nickel ins having been called in and replaced by a w currency after the Japanese model, consist-g of copper, nickel, and silver coins on a gold sis. Exhaustive investigations into the system taxation are in progress, which are expected result in a greatly increased revenue without ding to the burden of the people.

Commerce.—About 80 per cent. of the sea-borne ade is carried in Japanese bottoms, the total nnage in 1907 having been 2,943,184; in 1906 769,509. In 1907 the trade of Chemulpo mounted to £2,562,189, and that of the whole Korea to £5,908,172, exceeding the average the previous five years by £2,845,987. nsiderable progress is being made in the rection of the proper lighting of the coast. There is an agency of the Hong Kong and Shanghai Bank at Chemulpo, and branches of several Japanese banks both at Chemulpo and Seoul.

Communications.—The postal, telegraph, and telephone systems of Korea were placed under Japanese administration by an agreement signed in 1905, and the railways, two of which were Japanese companies and the third a Japanese military line, were transferred to the Japanese Government simultaneously with the nationalisation of the Japanese railways in 1906. The following main lines of railway are open:—The Seoul-Chemulpo line, length 26 miles 7 chains; the Seoul-Fusan line, length 286 miles; the Seoul-Wiju line, length 310 miles. The total railway mileage is 639 miles. The two latter lines, when connected with the Siberian system, will complete the great highway connecting the Atlantic and Pacific Oceans, across two continents.

	1906.	1907.
Imports	3,013,682	4,190,467
Exports (excl. specie) ...	828,946	1,727,705

JERUSALEM—PALESTINE.

Turkish Governor, Subhi Bey, appointed Sept., 1908.

Palestine, which occupies so prominent a place in the history of human kind, and in the affections of the Christian world, is a country capable of considerable development, and, although her ancient glories are departed, still produces wine and olives, corn and the most varied fruits. Its population is not far short of 700,000, of whom 100,000 to 150,000 are Jews. In and about Jerusalem, the Jews number from 60,000 to 65,000.

Geographically, Palestine consists of a maritime lowland, the mountain region of Judah, which forms its backbone, the remarkable depression through which the Jordan wends its course towards the Dead Sea, and the elevated region lying to the east of the Jordan. It is barren only during the dry season, when the grasses are dried up, and the herdsmen retire with their flocks of sheep and goats to the loftier mountains, but the alluvial lowland to the south of Mount Carmel is as fruitful as ever, and it only needs an honest and vigorous administration to restore Palestine to its former prosperous condition. The entire area is computed to be about 11,000 square miles.

Palestine comprises the independent mutessarifilik of Jerusalem (el Kuds), together with the mutessarifiliks of Acre and Nablus, the two last named belonging, for administrative purposes, to the vilayet (province) of Beirut. Since March, 1906, however, the kaza (district) of Nazareth, in the mutessarifilik of Acre, has been included in the mutessarifilik of Jerusalem. The stream of Auja, which enters the sea a few miles north of Jaffa, forms the boundary between the independent district of Jerusalem and the above-named vilayet, the country to the east of the Jordan and the Dead Sea being subordinate to the vilayet of Damascus. Arabic is the language commonly spoken, and 80 per cent. of the population are Mohammedans; in addition to Mohammedans and Jews there are many Orthodox Greeks and foreigners of all denominations. A railway was constructed connecting Jaffa (Joppa) and Jerusalem in 1892.

The principal ports of Palestine are Acre, Haifa, Jaffa, and Gaza, and their exports amount annually to over £600,000, consisting principally of sesame, oranges, fruits, barley, olive oil, maize, and articles of Christian veneration, these latter weighing 2,700 cwt. The imports are estimated at £800,000 annually. The U.K. and Austria-Hungary take the lead in this commerce.

Jerusalem—Consul, E. C. Blech £700
Jaffa—Vice-Consul, J. Falanga (acting) 300
Gaza—Cons. Agent, A. A. Knesevich ..... *vop.*

Distant by overland route, about 2,300 miles, by sea 3,700 miles; transit, 8 to 10 days.

LIBERIA.

President, A. Barclay, *born* 1854, *re-elected* May, 1907, until Jan., 1911.
Vice-President, J. J. Dossen.
Secretary of State, F. E. R. Johnson.
Treasury, D. E. Howard.
Attorney-General, C. D. B. King.
Postmaster-General, S. T. Prout.
Chief Inspector of Customs and Financial Adviser, William J. Lamont £1,000
Asst. do., J. M. Hamilton.
Commandant & Inspector-General Frontier Force, Maj. R. M. Cadell 600

Consul-General and Chargé d'Affaires in London, H. Hayman, 3 Coleman Street, E.C.
Acting Sec. of Legation, H. L. Hayman.
Consul, Sigismund Sinauer De Stein.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S.E., and Manna, N.W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 30', a distance of 250 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised by the United States and the European powers since 1847 as an independent State. The population numbers nearly 1,500,000. The principal exports are coffee, cocoa, palm-kernels, palm-oil, ivory, prassava, rubber, and camwood. The chief imports are cottons, haberdashery, salt, rice, provisions, arms and ammunition, tobacco, hardware, glass and earthenware, rum, gin, timber, and beads. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for four years, and the House of Representatives with fourteen members elected for two years. There is no regular army, but a frontier force under European officers is being raised. Foreigners are only allowed to trade at the ports of entry and frontiers, of which there are thirteen along the 350 miles of coast, viz.: Manna, Robertsport, Monrovia, Marshall, Grand Bassa, River Cess, Greensville, Nanna Kroo, Niffoo, Harper, Half Cavalla, Jenne, and Webo. In 1906, 358 vessels (710,762 net tons) called at Monrovia.

	1904.	1905.
Revenue	£60,229	£59,330
Expenditure	62,840	59,760
Internal bonded Debt	10,000	10,000
External Debt	95,000	95,000
Imports	106,912	134,213
Exports	110,105	98,762

CHIEF TOWN, Monrovia. Population, 6,000.

British Consul, Capt. C. B. Wallis £800
Vice-Cons., William A. Ring.

Monrovia, 3,650 miles distant; transit, English steamer *vid* Liverpool, 14 days; German steamer *vid* Southampton, 11 days.

LIECHTENSTEIN.

Prince, Johann II., *b* 5 Oct., 1840; *succ.* 12 Nov., 1858.

A Principality on the Upper Rhine, between the Austrian province of Vorarlberg and Switzerland; area 59·6 square miles, pop. (1906) 9,650. The main industries are agriculture (chief products being corn, wine and turf), textiles and embroidery. Revenue (1907), 542,870 K.; exp. 493,212 K.; no debt. CAPITAL, Vaduz.

LUXEMBURG.

Grand Duke, William Alexander, *b.* 22 April, 1852; *succ.* 17 Nov., 1905; *mar.* 21 June, 1893, Princess Maria Anna of Braganza (*Regent*).
Minister of State, M. Eyschen.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815–66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23rd, 1890, it passed to the Duke of Nassau. The area is 999 square miles; the population (1905) 246,455, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1906 was £625,436, expenditure £606,000; debt (Jan. 1, 1906) £432,342. There are 342 miles of railway. The army numbers about 325 men. The capital, Luxemburg (population 30,000), is a dismantled fortress.

British Envoy, Sir G. Buchanan, K.C.V.O., C.B. (The Hague).

MADAGASCAR.

(*French Possession*—*See* pp. 618-9.)

MEXICO, FEDERAL REPUBLIC OF.

President of the Republic. Porfirio Diaz, *born* 15 Sept., 1830, *acceded* 1 Dec., 1884 (*re-elected* 7th time 1904 *until* 1910).
Vice-President, Ramon Corral (1 Dec., 1904).
Minister of Foreign Affairs, Ignacio Mariscal.

Minister in England, Miguel Covarrubias, 87 Queen's Gate, S.W.
1st Secretary, Balbino Dávalos.
2nd Secretary, Luis S. Carniona.
Attaché, Benjamin Barrios.
Financial Agent, Luis Camacho, 85 Finsbury Pavement House, E.C.
Consul, Adolfo Bulle, Broad St. House, E.
Consul-Gen.—Liverpool, Emilio Aleman.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30′ N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 767,005 square miles, with an estimated population of (1900) 13,545,462, of whom "only about 3,500,000 are taxable." The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific; and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 13,780 miles of railway open on Sept. 16, 1908, and 90,007 miles of telegraph. The railways have been a large measure been built by American and English companies. The "Mexican Central" joins El Paso (Texas) with the city of Mexico, by which passengers can travel in five days from New York without change of carriage. The National Railway *vid* Laredo takes 4½ days to New York, and there is a third route *vid* Eagle Pass (International Railway). The principal crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent. consist of silver and gold; sizal hemp (henequen), coffee, hides and skins, timber, log-wood, vanilla, tobacco, dye-stuffs, sugar and drugs ranking next in importance.

The Navy is limited to 7 small vessels.

Education (*see* p. 669).

Finance, &c.—The following figures have been officially supplied, the value of the Mexican dollar being taken at 24*d.*:—

	1907-8.	1908-9.
Estimated revenue ...	$98,835,000	$103,385,000
Estimated expenditure	92,966,595	103,203,824
	1906-7.	1907-8.
Exports	$248,018,010	$242,738,906
Imports	233,363,388	221,535,993
Imports from U.K.	23,592,920	32,870,327
Exports to U.K.	31,874,020	26,256,848
External debt	£31,033,897	£31,051,558
Internal debt	13,089,210	13,329,001
Floating Debt	86,049	72,413

MONACO.

Sovereign Prince, Albert, *born* 13 Nov., 1848; *succ.* 10 Sept., 1889; *marr.* 1869, (1) Lady Mary Douglas-Hamilton, daughter of 11th Duke of Hamilton; (2) Oct., 1889, the Duchesse de Richelieu, *born* 10 February, 1858.
Heir, Prince Louis, *born* 12 July, 1870.
Governor-General, M. Roger.
Secretary-General, M. Roussel.

Consul-General in London, Theodore Lumley, 37 Conduit Street, Bond Street, W.
Vice-Consul, Paul Crémieu-Javal, J.P., 43 Hill Street, Berkeley Square, W.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the gambling establishment, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east; it is about 3 miles long and 1½ miles broad, with (1904) 16,000 inhabitants, and a yearly average of over 1,250,000 visitors. The whole

available ground is built over, so that there is no cultivation. There is an army of 126 men.

British Consul, Alex. McMillan (Nice).
British Vice-Consul, J. W. Keogh (Monaco).
English Chaplain (1895), Rev. F. Stewart.

MONTENEGRO.

Prince, Nicholas, *born* 7 (20) October, 1841; *succ.* his uncle, Prince Danilo, 14 Aug., 1860; *m.* 1860, Milena, daughter of Voyevod Peter Vukotich, *b.* 4 May, 1847; issue 3 sons, 6 daughters.
Heir Apparent, Danilo Alexander, *born* 29 June 1871; *m.* 1899, Princess Jutta of Mecklenburg-Strelitz.
Pres. of State Council and Minister for Foreign Affairs, Dr. Tomanovic.
Consul-General Col. Sir J. Roper Parkington, J.P., D.L., 24, Crutched Friars, E.C.

A small Principality, which has always claimed to be independent, and recognised to be so by the Treaty of Berlin. It has an area of 3,486 square miles, and a population diminished by emigration to about 225,000, of whom 13,000 are Mussulmans, 14,000 Roman Catholics, and the remainder Orthodox Slavs. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, cattle, castradina (smoked mutton), hides, and tobacco, which has been created a monopoly, and conceded for 25 years to an Italian company. The only manufactures are coarse woollens. Agriculture is the principal occupation. The imports are estimated at £150,000 from Austria, £58,000 from Turkey, £2,500 from United Kingdom, and £5,000 from Italy (1905). The ports are Antivari and Dulcigno. A representative parliament was granted 5 November, 1905.

	1905	1906.
Revenue (estimated)	£124,000	£116,000
Public Debt ,,	70,000	70,000
Total Imports ,,	194,000	240,000
Total Exports ,,	71,000	81,000

CAPITAL, Cettinje. Population (1907) 5,000 (exclusive of permanent garrison of 600 men).
British Chargé d'Affaires, Wm. E. O'Reilly.

Distant about 1,100 miles; transit, average 5 days.

MOROCCO, EMPIRE OF.

Sultan, Muley Hafid, *b.* 1873, assumed power Aug. 1908.
Grand Vizier and Minister of Foreign Affairs, Sid Abdul Karim Ben Sliman.
Minister of War, Sid Mohammed Gabbas.
Commissioner for Foreign Affairs at Tangier, Sid Hadji Mohammed Torres.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°—36° N. lat. and 1°—11° 40′ W. long. The Empire, which is an absolute monarchy, consists of the Kingdom of Fez and Morocco, to the north of the Atlas, and the territories of Sus, Drâ, Wadi Tafilet, Tuat, and others to the south, which are again subdivided into 23 districts, each under the superintendence of a "Kaid"; but the semi-independent tribes are ruled by their own chiefs, and scarcely acknowledge the authority of the Sultan. Morocco contains about 214,000 square miles, of which the "Tell," or fertile regions of the mountains and coast, contain 76,000, the steppe-land 26,000, and the Sahara 217,000, with a population variously estimated at from 4,500,000 to 8,000,000. The Jews number about 300,000, chiefly in the cities. Among the chief products of the country are wheat, barley, maize, beans, peas, oil, esparto and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures; antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. The chief ports are Tetuan, Tangier (where the Representatives of fourteen nations reside), El Araish (Larache), Rabat, Casa Blanca (or Dar-al-baida), Mazagan, Saffi, and Mogador. There are no railways, and telegraphic communication from Tangier is by submarine cable of Eastern Telegraph Company to Gibraltar, by Spanish Government telegraph to Tarifa, and by French cable to Oran (Algeria). The principal exports (1906) were hides (£123,988), wool (£272,045), eggs (£108,198), skins (£507,280), almonds (£59,280), live cattle (£180,811); and the imports are cottons (£818,600), flour, &c. (£317,975), sugar (£449,922), tea (£209,097), linen, muslin and woollen goods, coffee, candles, cloth, silk, iron, brass, hardware, &c. The army consists of between 15,000 and 20,000, one-half of whom are negroes, Sultan's bodyguard, and a sort of militia, of various arms, amounting to 80,000 men. An English newspaper, *Al Moghreb-al-Aksa*, a French paper, *La Dépêche Marocaine*, and three newspapers in Spanish are published at Tangier. There are three capitals, of which Fez, population 120,000, is the seat of government, and Morocco (Marrakesh), 50,000, is the capital of the Moorish Empire; and Mequinez, 56,000.

	1905.	1906.
Imports	£2,741,574	£2,976,900
Exports	1,690,323	1,756,109

MUSCAT. (*See Oman.*)

NEPAL. (*See p. 535.*)

NETHERLANDS (OR HOLLAND, KINGDOM OF).

Queen, Wilhelmina Helena Paulina Maria, *born* 31st August, 1880, *succeeded* her late father, King William III., 23 Nov., 1890; *mar.* 7 Feb., 1901, H.R.H. Prince Henry, Prince of the Netherlands and Duke of Mecklenburg.

Queen-Mother, Emma, Princess of Waldeck and Pyrmont, *born* 2 August, 1858; *married* the late King, 7 Jan., 1879, who died 23 November, 1890; acted as Regent 1890–1898.

Minister of Interior, Dr. Th. Heemskerk.

Foreign Affairs, Jhr. Dr. R. de Marees van Swinderen.

Finance, Dr. M. J. C. M. Kolkman.

Colonies, A. W. F. Idenburg.

Justice, Dr. A. P. L. Nelissen.

War, F. H. A. Sabron.

Marine, J. Wentholt.

Waterways, Dr. J. G. S. Bevers.

Agriculture, Industry & Commerce, A. S. Talma.

Minister in London, Baron Gericke van Herwijnen, 8 Grosvenor Gardens, S.W.

Councillor of Legation, Jonkheer A. van der Goes, 12 Montagu Place, Bryanston Sq., W.

Chancellor, H. N. Brouwer.

Consul-Gen., H. S. J. Maas, 12 Blomfield St., E.C.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46′—53° 34′ N. and long. 3° 22′—7° 14′ E., consisting of 11 provinces, and containing a total area of 12,582 square miles, with a population, on Jan. 31, 1905, of 5,591,701. The majority, about three-fifths, belong to the several Reformed Churches; and the remainder are Roman Catholics, with a small number of Jews, mainly in large towns such as Amsterdam, where there are about 70,000. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seeds, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, chemical and pharmaceutical products, sugar, printing, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, oils, beer, "geneva" and other liqueurs. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—There are 3,125 kilometres of railway open (31 Dec., 1907), and 34,369 kilometres of telegraph. The mercantile marine, on the 31st Dec., 1905, consisted of 271 steamers, tonnage 1,009,746 cubic metres, and 479 sailing vessels (170,524 cubic metres), employing 10,198 men on 31 Dec., 1905.

Defence (for Army, *see* p. 667). The royal navy consisted, on July 1, 1908, of 109 vessels (8 of them ironclads, 7 protected cruisers, 15 coast and harbour defence vessels, 3 river gunboats, 45 torpedo-boats (9 for the colonies), 20 special service vessels and 11 for special service in the colonies).

Education (*see* p. 669).

Trade and Commerce.—Holland figures largely in the trade returns of this country, a quarter of the value of which is represented by agricultural produce, but much of the merchandise sent to Holland was for distribution in Germany and other parts. The following are the *Board of Trade* figures for imports from the United Kingdom in the year 1907:—

	£		£
Caoutchouc	157,071	Leather	190,483
Chemical products	247,042	Machinery	591,451
Coal, coke, & fuel	2,124,116	Metals	2,880,403

DEPENDENCIES.—The Dutch possessions in the EAST INDIES are very considerable, comprising the whole of the SUNDA ISLANDS, with the exception of a small portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA, with an area of 738,000 square miles, and a population (1905) of 37,815,400, of whom as many as 30,098,000 live in the islands of Java and Madura. JAVA and MADURA (customs receipts, 1908, £1,676,916) produce a sufficient supply of food for a dense population, besides furnishing sugar, tobacco, tea, coffee and other products for exportation to Europe. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Dutch Resident. There is a colonial army of 1,396 officers and 35,183 men. The colonial revenue for 1908 was estimated at £14,595,199, and was largely derived from the sale of coffee, salt, bark, and tin; whilst the estimated expenditure was £15,145,501. The exports, in addition to the above, include also tobacco, indigo, gums, and spices, and amounted in 1906, for Java, Madura, and the other outlying islands, to £26,223,279, while the imports for the same year amounted to £18,652,255.

In South America the colony of SURINAME, or Dutch Guiana (imports, 1906, £522,765; exports, £395,797), embraces 46,072 square miles and contains 81,273 inhabitants; and in the West Indies, CURAÇAO (imports, £262,715; exports, £41,092; population 30,401) and five other small islands belong to Holland, having an area of 436 square miles, with a population of 22,975.

	1906.	1907.
Exports to U.K.	£898,121	£2,081,918
Imports from U.K.	2,794,514	4,011,602

NICARAGUA, REPUBLIC OF.

President, José Santos Zelaya, *born* 1852, *first elected* June, 1893; *re-elected* 1906 for 4 years.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45′—15° N. lat. and 83° 40′—87° 38′ W. long., containing an area of 51,660 English square miles, including a large portion of the Mosquito Territory, and a population of about 600,000 (1906), of whom about three-quarters are mixed blood and the rest Indians, besides the Mosquitos, who are mostly in a savage state. There are 172 miles of railway open, and about 250 miles under contemplation, with 1,591 miles of telegraph, connected with the Pacific cable from Mexico to Peru. A ship canal to connect the Pacific with the Atlantic was commenced in Oct., 1890, but the company collapsed in 1899; in 1899 a new company obtained the concession, but failed to comply with the terms obtained, and the concession was revoked in August, 1900. The canal, which had been begun in 1890, is now almost entirely filled up, the machinery lying scattered about in all directions.

The interest on the foreign (English) loan has been reduced to 4 per cent.

The Nicaraguan Government supply the following figures:—

	1906.
Public revenue	£1,335,000
Public expenditure	1,337,000
Public debt, external to G. Britain 4 p.c.	245,000
Do. to U.S.A. 6 p.c.	200,000
Do. to various	18,000
Internal Debt	800,000
Exports	846,000
Imports	700,000
Exports to U.K.	90,400
Imports from U.K.	155,000

CHIEF TOWN, Managua. Population, 36,000; Leon, about 60,000; Granada, 17,000; Rivas, 8,000; Multagalpa, 8,000.

Defence, Col. H. D. Lowzow.

State Secretary, N. Hesselberg.

Minister in London, Johannes Irgens.

Offices of Legation, 30 The Grove, Boltons, S.W.

Secretary of Legation, E. Huitfeldt, 25 Harrington Gardens, S.W.

Consul-General, P. M. R. Ottesen, 22 Great St. Helen's, E.C.

Vice-Consul, H. L. Bråkstad.

Norway, an independent kingdom, founded in 872 (fundamental law of 17 May, 1814), was united with Sweden under the same King from 4 Nov., 1814, to 7 June, 1905, when the union was dissolved. The Parliament of 123 members is called the "Storthing," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or amts, and comprises an area of 124,130 sq. miles with a population (1907) of 2,330,364. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or unin-

bitable mountains. Agriculture, though pur-ed with some vigour of late, is unable to nish sufficient produce for home consumption; nce it has been necessary to import consider-e quantities of corn, meat, and pork. The neries give employment to a large part of the pulation throughout the year. The most im-rtant are cod and herring; the exports of se with other sea-products and fish-oil were ued at 63,963,000 kroner* in 1907. The neral products are of late increasing. Timber-ssing, mechanical engineering, textile manu-tures, ship-building, and pulp-making are principal departments of Norwegian in-stry. The exports of produce of the forests re valued at 82,753,000 kroner in 1907, the value wood-pulp alone being 34,719,000 kroner. The ports consist chiefly of the necessary articles consumption. The chief exports consist of ber, matches, fish, oil, and other products of fisheries, pulp, paper, skins and furs, nails, erals, stone, ice, calcium carbide, condensed k, butter, margarine, tinned goods, &c. The ncipal domestic exports from Norway to the ited Kingdom in 1907 were paper and paper-king materials, timber, fish, and condensed k; and the principal domestic imports from United Kingdom in 1907 were coal, steam-ps, Manchester goods, metals, and woollens.

Defence (for Army, *see* p. 667). The Navy sists of 4 ironclads, 2 coast defence monitors, torpedo vessels, 11 gunboats, and a few aller vessels.

Education (*see* p. 669).

Communications.—The total length of railways n in 1908 was 1,605 miles, of which 251 miles e private lines. The length of telegraphs and phones belonging to the State in March, 1908, 9,984 miles. The mercantile marine, 31 Dec., 5, consisted of 7,611 vessels, of 1,547,884 tons.

OMĀN.

Sultan, or Sovereign, Seyyīd Feysal bin Turki, G.C.I.E., *born* 1864, *succ.* 4 June, 1888.

Omān (area 81,000 sq. miles, pop. 400,000) is a Mohammedan State in N.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omān, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdar an elevation of 10,000 feet. The rainfall averages only about 5 inches annually. Among the Bedouins the authority of the Sultan is nominally recognised, but in the interior his authority is slight, and trade is hampered by tribal warfare and robbery. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his court. A joint Anglo-French declaration of 1862 guarantees his independence. Since 1798 the relations between Muscat and England have been friendly, and nine treaties and conventions have been made. British warships have upheld the Sultan's authority against rebellious tribesmen. The Sultan is pledged not to cede territory to any Power but the British Government. Omān has no independent coinage except copper pice; the Indian rupee is the chief currency at Muscat and the Maria Theresa dollar in the interior. Muscat, the capital, with its commercial suburb of Muttra (pop. 30,000), possesses the only good harbour, and has a considerable trade, amounting in 1907–8 to £939,500. About 76 per cent. of the foreign trade is with England and India, and 86 per cent. of the shipping is British. Indians (who numbered 1,300 in 1903) do most of the business, Bombay serving as an *entrepôt*. Dates, the staple food product, are the chief export, and rice, arms, sugar, petroleum, coffee, cotton and silk goods the chief imports. The imports from the United Kingdom were about £103,000 in 1907–8. An import duty of 5 per cent. is levied. There are four British steamship lines and a weekly mail service to Karachi and Bombay, and there are also German and Russian steamship services with Europe. There is a cable to India *via* Jask.

British Consul and Political Agent, Capt. F. McConaghey, I.A.

Transit, 18 to 20 days.

PANAMA, REPUBLIC OF.

President, José Domingo de Obaldia, *born* 1845, *assumed office* Oct. 1, 1908, for four years.

Vice-President, José Agustin Arango.

* 8 kroner = 1 £.
† Including loans, &c.

Public Instruction, Eusebio A. Morales.
Public Works, José E. Lefevre.
Minister in London, Ricardo M. Arango.
Consul General, C. E. Zachrisson, 35 Chapel Walk, Liverpool. (*Vice-Cons.*, J. B. Chevalier.)
Consul at Manchester, F. A. Cortez-Leigh.

One of the nine Departments of Colombia revolted in Nov. 1903, and established a separate Government. A treaty was concluded with the United States which guarantees the independence of the Republic, and also paid ten millions of dollars, in return for which Panama grants to the United States, in perpetuity, a zone of land for the construction and operation of a canal, of the width of ten miles, extending to the distance of five miles on each side, with sovereign rights within the strip. A new port has been established at Cristobal, in the Atlantic, and Port Ancon, on the Pacific, is also administered by American officials and laws. The area of the Republic is 31,890 square miles, the population (1904) about 330,000. There are 165 primary schools, at which 9,181 children attend; the present system of public instruction is to be thoroughly reorganised and reformed. The once famous pearl-fisheries in the Gulf of Panama yield now but little, but other beds are being worked along the North coast. The prosperity of the State depends upon its favourable geographical position, which facilitates transit from the Atlantic to the Pacific. The distance from Limon Bay to Panama on the latter is only 35 miles, and the highest elevation of the watershed does not exceed 278 feet. Until 1896 Panama and Colon were free ports. A general import duty is now levied at the rate of 10 per cent. gold on the value of all imports, except liquors, which are provided for separately. A special agreement between the U.S. and Panama was signed in December, 1904, establishing free trade between the Republic and the Canal Zone. Merchandise entering the zone for consumption pays import dues to the Panama Government identical with those levied on the importations into the Republic. All supplies imported for account of the Isthmian Canal Commission are exempted from all taxation. A railway 47 miles in length (fare, first class $2.40, second class $1.50) (luggage 2 cents a lb.) (U.S. gold) joins the two oceans. The imports in 1906 were valued at £1,470,619 (from U.S., £729,684, exclusive of canal materials; from U.K., £387,114; from Germany, £152,966), and consisted chiefly of manufactured goods and foodstuffs. The exports (principally gold dust and bars, hides, rubber, mother-of-pearl shells, cabinet woods, bananas, and medicinal plants) at £200,000.

The Panama Canal.—A ship canal was commenced in 1879 by Ferdinand de Lesseps, the diggings being begun in 1881, but in March, 1889, work ceased owing to lack of funds. A French syndicate then assumed charge of the property and continued the works at the Culebra cut until the sale of the property to the U.S. for forty millions of dollars in 1904. A lock canal has been definitely decided upon, in 85 ft. level, with 6 locks; 3 will be located at Gatun, 1 at Pedro Miguel, and 2 at Miraflores, all in duplicate. With the work already done it is estimated it can be completed by 1915. Total length will be about 46 miles, and at surface of water 150 ft.; depth, 30 ft.

Panama—Min. Resident and Con. Gen., Claude C. Mallet, C.M.G. (also to Costa Rica) £800
Vice-Consul, Francis W. Manners...£300 to 500
Bocas del Toro—Cons. Agent, C. H. Engelke.
Colon—Vice-Cons., H. O. Chalkley £300 to 500
Pedregal—Cons. Agent, T. C. S. Preedy.

Panama, 5,466 miles; transit from Liverpool direct every ten days, 17 days, or from Southampton fortnightly, 18 days; *vid* New York 14 days.

PARAGUAY, REPUBLIC OF.

President, Emiliano Gonzalez Navero, *assumed office* 5 July 1908 (for 4 years) £1,900
Foreign Secretary, Eusebio Ayala.
Minister Plenipotentiary to London and Paris, Señor Eusebio Machain.
Consul-General in London, Alfred James, 18, Eldon Street, E.C.
Consul in London, A. F. Baillie.

An inland State of South America, situate between 22° 4′—27° 30′ S. lat and 54° 32′—62° 20′ W. long. Its area is computed at 145,400 square miles, enclosed within the rivers Parana and Paraguay; and contains a population (1900) of about 635,600. The chief crops are maize, rice, coffee, manioc, tobacco, sugar-cane, and oranges. Among its principal trees are several species of dye-wood, and many yielding juices or gums, as the caoutchouc or india-rubber; the Quebracho, used for tanning, and the "Yerba Maté," or Paraguay tea-plant; there are also hardwood and other timber trees and medicinal plants. Stock-raising is the chief industry. The chief articles of export are oranges, hides, tobacco, yerba maté, and timber. The army numbers about 50,000 men; there is no navy. There were revolutions of several months' duration in 1904 and 1908. A railway, 155 miles in length, belongs to an English company.

Persia—called by the natives Irán—comprises 630,000 square miles. The population, widely scattered, is estimated at 10,000,000. By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W.

rsia respectively in which each had, for geo-
phical and economic reasons, special interests.
ssia engaged not to seek political or commercial
ncessions (for railways, mines, &c.) beyond a
e running from the Afghan frontier *viâ* Gazik,
jand, and Kerman to Bunder Abbas, while
eat Britain made a like engagement as regards
ine running from Kasr-i-Shirin *viâ* Ispahan,
zd, and Kakhk to a point on the frontier at
intersection of the Russian and Afghan
ntiers. Russia did not deny the special
erests of England in the Persian Gulf, the
ult of British action in those waters for over
years. The ill-defined western frontier of
rsia marches with Turkey, with which there
ve been serious boundary disputes during 1906
1908.

Persia is mostly a bare and arid table-land,
ircled, except on the east, by mountains,
se in the north rising to 18,700 ft. The
tral and eastern portion is a vast salt desert.
e only navigable river is the Karun, which
s opened to foreign navigation from Moha-
rah to Ahwaz in 1888. Messrs. Lynch Bros.,
ed by a British-Indian subsidy, run a fort-
htly steamer to Ahwaz, whence there is a
v road to Ispahan made by British capital.
e Upper Karun, navigable as far as Shuster, is
erved to the Persian flag. There is one
lgian) railway of eight miles running south
m Tehran. Most of the telegraphs are managed
the Indo-European Telegraph Department of
Government of India. The main telegraph is
m Julfa, on the Russian frontier, to Bushire,
ence there is a cable to Bombay. The con-
tion for this telegraph lasts till 1925. A new
d telegraph has been constructed by British
ncy from Karachi (India) *viâ* Quetta, Robat,
zd, and Kerman, to Tehran. It is leased to the
rsian Government, but maintained by British
ectors and staff. The chief routes to Persia are
se *viâ* Batoum-Tiflis-Tabriz and Baku-Resht,
structed and controlled by Russians, and
sed to non-Russian merchandise, except tea;
Trebizond-Tabriz route, long and costly; the
nder Abbas route to Kerman, Yezd, and Seistan,
ble to robbery; the Bushire-Shiraz-Ispahan
te, long and difficult; the Bussorah-Baghdad-
rmanshah route, suited for bulky or heavy
ds; and the increasingly popular Moham-
rah-Ahwaz-Ispahan route, shorter, cheaper,
d better than the Bushire route. Several good
t-roads have been made or are in progress.
e Kazwin-Hamadan and Julfa-Tabriz roads
ssian) were completed in 1905 and 1906.
veiling is mostly by caravans, and transport
pack-animals. The cost of carriage is, there-
e, very heavy. The chief products are cereals,
ton, gums, dried fruits, silk, tobacco, and
um. The minerals (little worked) are salt,
a, coal, copper, lead, sulphur, &c., with
quoises. Oilfields in Southern Persia have
n successfully worked by an English com-
ny since 1902. The only important manu-
ture is that of woollen carpets (mostly a
mestic industry), but shawls, silks, and cotton
rics are also produced. There are extensive
sts in the north and west. Sheep and goats
numerous, and good wool is produced.
e principal towns are Tehran (pop. 210,000),
briz (180,000), Ispahan (60,000). Meshed (80,000),
rman (50,000), Yezd (60,000), and Shiraz (60,000).
e Persians are mostly Shiah Muhammadans;
ere are many adherents of Babism and Ar-
nian Christians. The laws and popular educa-
tion are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors or Governors-General. Owing to increasing popular misery and to discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, admitting the need for reforms, granted a Constitution. The *Mejliss* (National Council or Consultative Assembly) consists of 162 representatives of the princes (kajars), clergy, nobles, landowners and agriculturists, merchants and tradesmen, who are elected by their peers. The peasant and working classes are not represented. The Council may deliberate on all important State affairs, and have a right to free expression of opinion on reforms. The first elections were held in Oct., 1906. During 1907 and 1908 there has been much internal disorder from political causes. On 31 Aug., 1907, the Persian Premier was assassinated. A new Cabinet of eight responsible Ministers was formed in Sept., 1907. In Oct., 1907, the Shah signed a new constitution, limiting the sovereign prerogatives and ecclesiastical authority, and granting liberty of conscience, of the person, of education, of the press, of association, and of speech. But he broke his pledges and violently dissolved the *Mejliss*. As a result there has been serious political unrest, especially at Tabriz. The revenue, estimated at £7,000,000 for 1907–8, is derived from land tax, Crown lands, customs, and lease of monopolies. Foreign trade is developing. The total imports of merchandise into Persia in 1906–7 were £8,621,000, and the exports £7,068,000. Russia had about 51 per cent. of the imports and 64 per cent. of the exports; the British Empire 31 per cent. of the imports and 10 per cent. of the exports. Turkey and France were the other chief participators. Proximity to the best cultivated and most populous provinces, railways in Transcaspia, bounties on sugar, &c., a preferential tariff, and new roads from the frontier, have extended Russia's trade and influence. Persia's trade with Russia is chiefly through ports on the Caspian (on which only Russian vessels are allowed) or by the Trans-Caspian Railway, and with England and British India by way of the Persian Gulf. The sea-borne trade of Persia passes chiefly through the ports of Bushire and Bunder Abbas, and *viâ* Baghdad. There are several English firms at Bushire, the chief port on the Gulf and an *entrepôt* for trade with Shiraz, Ispahan, and Tehran, and many European business houses at Tehran, now the central exchange and money market, and at Tabriz, the *entrepôt* for European goods coming *viâ* Trebizond. The shipping of the Persian Gulf is almost wholly British. A subsidised Russian line runs four steamers a year from Odessa, and a German line has been inaugurated. Persia's chief imports are cotton piece-goods (mainly from England, India, and Russia) and sugar (from Russia and France), with woollen goods, silk goods, cotton yarn, tea, metal wares, gold and silver, petroleum, and indigo. The principal exports are dried fruits, raw cotton, pearls, opium, rice, wool, fish, carpets, and silk cocoons. A new specific tariff on imports and exports was introduced in 1903, when vexatious internal dues were abolished. The customs (as also the post-office) have, since 1900, been managed by European officials. Native dealers are reputed to be dishonest, and legal redress is hard to obtain. The

(English) Imperial Bank of Persia has its head office at Tehran, with branches in the chief cities, and issues notes. There are also one Russian and two native banks. A concession for a German bank was granted in 1907. A national bank is to be established. The foreign debt of Persia is about £3,400,000, at 6 per cent., borrowed in 1900 and 1902 from the Russian Banque d'Escompte for 75 years, and irredeemable for 10 years. It is guaranteed by the Russian Government, and secured on the customs.

Exports from United Kingdom, 1907 ... £698,010
Imports into ditto, 1907 390,555

Chargé d'Affaires and Consul-Gen., Don Eduardo Lembcke, 104 Victoria Street, S.W.
Consul at Liverpool, Don M. D. Derteano.
Do., Southampton, Carlos G. Estenos.

Peru is a maritime Republic of South America, situated between 1° 31′ 29″ and 19° 13′ S. latitude and between 68° 6′ and 81° 20′ 45″ W. The territory between 17° 47′ S. and 19° 13′ S. is still occupied by Chili. The question of the provinces of Tacna and Arica is due to be settled by a *plebiscite*, which will determine to which of the two countries these territories are to belong, but it has not yet been possible to arrive at an arrangement for carrying out the stipulations of the Treaty of Ancon concerning these two provinces. Peru has a coast line of about 1,300 miles. It is bounded on the north by the republics of Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by the Brazils and Bolivia, and on the south by Chile and Bolivia. Peru has boundary questions with all the neighbouring republics. It is customary to estimate the area of Peru at about 500,000 square miles, but if the extreme claims of Peru be taken into consideration, the area is, of course, infinitely larger. The population is estimated at 4,000,000 by the Lima Geographical Society, but no census has been taken since 1876. The country is traversed throughout its length by the Andes, running parallel to the Pacific coast. The coast region is sandy desert, except where watered by transverse mountain streams, but capable of cultivation in the highest degree by irrigation. The valleys running to the coast are very fertile, and the mountains are rich in minerals, among which silver, quicksilver, copper and coal (of inferior quality) are conspicuous; while in the department of Tumbes, along the coast, there are important beds of petroleum. Gold is found in many districts, but especially in the province of Carabaya, where mining on an important scale is carried on. An American syndicate has bought four-fifths of the whole mineral zone of Cerro de Pasco, and many others in neighbouring mining districts, and has constructed a railway from Oroya to Cerro de Pasco. The eastern provinces are of vast extent and fertility, with a tropical climate. The medicinal productions of that region are of great value, comprising cinchona (or Peruvian bark (of which little is now exported), sarsaparilla, copaiba, &c. India-rubber is an important product of the country. Coca, cocoa, and coffee are grown on a small scale. Sugar is the staple agricultural article of the country. The Lobos and other islands on the Pacific coast provide the guano.

The total length of the railways open (1907) was 1,471 miles. A railway from Guaqui, on the Bolivian side of Lake Titicaca, to La Paz, has been completed, and extensions are contemplated on other lines, from Sicuani to Cuzco and from Oroya to Juaja. There is also steam navigation on that lake and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft.

The Navy consists of six vessels, all in good condition, including two swift cruisers built at Barrow. The principal imports are coal, cotton, woollen, linen, and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are sugar, copper and other ores, guano, gold, silver, cotton, llama and alpaca wool, rubber, and cocaine. A small quantity of coffee is also exported.

For *Education*, see pp. 669-70.

Peru has no foreign debt. An arrangement

ras concluded in January, 1890, by the Peruvian overument for the cancelling of the external ebt (which amounted, with arrears of interest, o over £50,000,000), under which the State ailways, the guano up to 2,000,000 tons, certain ights in the Cerro de Pasco district, and vast racts of land are vested in the Peruvian Corporation. The disputes between the Government nd the Corporation were settled in June, 1907. loan of £600,000 has been concluded with the erman Bank, guaranteed by the salt tax.

The total amount of the capital of the interest-earing funded debt is £2,660,645, bearing nterest at the rate of 1 per cent. Claims of very kind upon the Government are being conerted into a non-interest bearing funded debt alled *Deuda de Amortizacion*), redeemed at a ow rate, which fluctuates. On 30 June, 1907, the apital of this debt was £2,171,165.

Peru has now a gold standard. Exchange uctuates at about 24*d.* to the $.

The most westerly Kingdom of Europe, and a part of the great Iberian Peninsula; it lies in 37° —42° 8′ N. lat. and 6° 15′—9° 30′ W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 34,254 square miles, with a population in 1900 of 5,016,267, exclusive of the colonies. The Azores and Madeira (1,237 square miles, pop. 406 865) form part of the kingdom, which thus has a population of 5,423,132. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1906) numbered 630 steam and sailing vessels, of which only 17 steam and 5 sailing vessels exceeded 500 gross tonnage. Railways 1,504 miles in extent were open for traffic in 1906, and there are 5,301 miles of telegraph wire in 1902. For many years the national income has been considerably less than the expenditure; this deficiency has added to the national debt.

Defence (for Army, *see* p. 667). The Navy consists of 39 steamers and 16 sailing vessels, many scarcely seaworthy, and about 4,898 sailors.

Education (*see* p. 670).

Lisbon, distance 1,110 miles; transit, 50 hours.

COLONIES AND DEPENDENCIES.

MADEIRA (imports, 1906, £454,506; exports, £232,840) and the AZORES are an integral part of Portugal proper; the CAPE VERDE ISLANDS, off the Cape of that name in Senegambia, consist of St. Antonio, St. Nicolas, Fogo, Santiago, Boavista, Sal, and some smaller islands, having a total area of 1,490 square miles, and a population of about 150,000; the capital is St. Vincent. In West Africa a portion of the GUINEA COAST, with the BISSAGOS ISLANDS, was acquired in 1885; the capital is Cacheo, and the territory has an area of 14,370 square miles with about 1,500,000 inhabitants. In the Gulf of Guinea the two islands of ST. THOMAS (direct and transit trade with mother country, 1904, £1,715,000; principal export, cocoa) and PRINCIPE were obtained in 1879; area 420 square miles (population about 40,000). Between the French Congo and the Free State are the territories of LANDANA and CABENDA, area about 2,030 square miles (population 30,000); and extending from the left bank of the Congo river to the right bank of the Cumene river is the vast province of ANGOLA, *Gov.-Gen.*, Maj. H. de Paiva Conceiro (direct and transit trade with mother country, 1904, £2,163,000; principal export, rubber), with about 1,350 miles of coast-line and an area of 510,670 square miles (population about 4,000,000). The capital of Angola is St. Paul de Loanda; railways, 300 miles open, and about 250 miles of telegraph wires. LORENZO MARQUES and MOZAMBIQUE together constitute PORTUGUESE EAST AFRICA, *Gov.-Gen.*, Col. Freire d'Andrade; area about 297,750 square miles, population 2,000,000. In the southern province are the ports of Lorenzo Marques (Delagoa Bay) and Beira, and in the northern, Quilimane, Mozambique, and Ibo: the exports of Portuguese East Africa amounting to £1,500,000 in 1903, and the imports to £750,000. Parts of Mozambique are leased to the Mozambique Company and to the Nyassa Company; Railways—Delagoa Bay Railway from Lorenzo Marques north-west to join the Transvaal system on the frontier, about 90 miles, and the Beira Railway, from Beira to Umtali on the borders of Rhodesia, about 200 miles. PORTUGUESE INDIA.—The territory of GOA contains an area of 1,301 sq. miles, and a population of 475,513 (1901). The city of NOVA GOA (New Goa or Panjim), capital of that territory, and of all the Portuguese possessions east of the Cape of Good Hope, is situated on the Malabar Coast, about 265 miles S.S.E. of Bombay. Old Goa, five or six miles inland, has fallen into decay, but is still remarkable for its cathedral and ancient buildings. The Portuguese West of India Railway (51 miles) connects the harbour of Mormugao with the Madras and Southern Mahratta Railway in British India. The chief products are rice, coco-nuts, and salt. The direct foreign trade is small, but there is a large transit trade with British India. Commerce is chiefly in the hands of natives of British India. The principal imports are cotton piece-goods, rice, kerosene, sugar, tobacco, &c.; the principal exports are coco-nuts, salt, fish, betel-nuts, &c. The other Portuguese possessions in India are DAMAUN (area 149 sq. miles, pop. 41,671), to the north of Bombay; and DIU, a town and fort on an island off the Gujarat coast (pop. 14,614, area 20 sq. miles). Of the total population (531,798) of Portuguese India, 262,648 are Catholics, 260,144 Hindus, and 8,431 Mohammedans. The revenue of the Portuguese possessions amounts to about £155,000.

Governor-General, H.E. Señor Horta e Costa.

Portugal also possesses rather more than half the island of TIMOR in the East Indian Archipelago and MACAO, an island near the mouth of the Canton river.

	1905.	1906.
Imports from U.K.....	£3,518,548	£3,893,046
Exports to U.K.	341,208	394,777

RUMANIA.

King, Charles, second son of Prince Charles Antoine of Hohenzollern-Sigmaringen, *born* 20 April, 1839 (O.S.); *elected Hereditary Prince* 26 Mar., 1866; *confirmed* 24 Oct., 1866; *proclaimed* King by vote of both Chambers, 26 March; *crowned* 22 May, 1881; *mar.* 15 Nov., 1869, Elizabeth (Carmen-Sylva), daughter of the late Prince Hermann von Wied, *born* 29 Dec., 1843.

Heir Presumptive (Nephew), Prince Ferdinand von Hohenzollern, *born* 24 August, 1865; proclaimed Heir Presumptive 26 March, 1889; *mar.* 10 January, 1893, to Princess Marie of Edinburgh, and has *issue* Carol, *b.* 15 (28) October, 1893, Elizabeth, *b.* 1894, Marie, *b.* 1900, and Nicolas, *b.* 5 (18) August, 1903.

Envoy Extraordinary and Minister Plenipotent., Al. Catargi, 4 Cromwell Place, S.W.
1st Secretary of Legation, Prince Antoine Bibesco, 12 Half Moon St., W.

nsul-General, Alfred Stead, 49, Parliament Street, S.W.

The Kingdom of Rumania consists of the oldo-Wallachian provinces formerly belonging Turkey, but which by the Treaty of Berlin, 13 ly, 1878, were recognised as an independent ate, and the territory of the Dobruja added to em. On the 26th March, 1881, Rumania was ised to a Kingdom. The entire area is 50,702 uare miles, with a population of about 50,000. The dominating religion is that of e Greek Church (5,200,000); Roman Catholics, 4,200; Protestants, 13,800; Jews, 400,000. The il is among the richest in Europe, and, but for e fearful summer droughts, would be also the ost productive. The climate is extreme, for mmer heats and winter colds are intense. The ricultural produce consists of wheat, maize, illet, barley, rye, beans, and peas. Vines and uits are abundant. The forests are of great tent and importance, but the riches of the untry consist mainly in its cattle and sheep. inerals and precious metals are said to be undant, but only salt and petroleum are obined. The imports are chiefly the manufactured ods of Western Europe; the exports consist incipally of wheat, barley, maize, petroleum ver £1,000,000 in 1906), rock-salt, spirits, hides, ood and cattle. The total length of railways 2,295 miles (1904), and there are 223 telegraph fices with 9,925 miles of wire.

An International Commission, created by the reaty of Paris, 1856, and whose powers were alarged by the Treaty of Berlin, 1878, has its at at Galatz, and exercises sovereign powers er the navigation of the Danube; the British presentative is Hamilton E. Browne, Consul-eneral. Its income, principally derived from ipping dues, amounts to about £60,000 r annum. On November 10, 1892, a large ock was opened at Ibraila, and in 1896 a nal through the "Iron Gates" rendered that therto dangerous part perfectly navigable.

Defence (for Army, *see* p. 667). There is a all navy of 45 vessels.

Education (*see* p. 670).

Ambassador in London, Count Benckendorff, Chesham House, S.W.

Councillor, M. S. Poklewski-Koziell.

1st Secretary, M. Sevastopoulo.

2nd Secretaries, Prince Sviatopolk-Mirski, M. B. de Siebert.

Attaché, Baron Meyendorff.

Military Attaché, General Yermoloff.

Naval Attaché, Capt. Behr.

Agent of Ministry of Finances, M. Rutkowski.

Consul-General Baron A. de Heyking.

An Empire comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominion under British rule. In addition to Russia in Europe (exclusive of the Caucasus), situate between lat. 44° 28′—76° 33′ N. and 17° 40′—64° 33′ E. long., and embracing more than half of that continent, it comprehends one-third of Asia, and until 1867 included also a large section of North America. The empire comprises:

	English Sq. Miles.	Population 1/14 Jan. 1907.*
European Russia:		
Russia Proper (50 Provs.)	1,859,195	111,279,500
Poland (10 Provs.)	49,084	12,138,700
Finland (Grand Duchy)	144,211	2,925,300
Asiatic Russia:		
Caucasia (11 Provs.)	181,550	10,653,900
Siberia (8 Provs. and Regions)	4,817,687	6,893,900
Central Asia (10 Provs. and Regions)	1,327,317	9,118,000
	8,379,044	152,009,300

Of the total population 75,970,700 were men and 76,038,600 women, and the population is 61·1 per

* Figures taken from the Annual (Official) Publication of Statistics, issued by the Central Statistical Committee of the Ministry of the Interior for the year 1907, and published June, 1908 (St. Petersburg).

sq. mile in European Russia, 60·2 in Caucasia, and 18·3 for the whole Empire.*

In the European parts of Russia alone the population increases annually at the rate of nearly a million and a half. The largest towns are St. Petersburg (1,678,000), Moscow (1,173,427), Warsaw (756,426), Odessa (449,673), Lodz (351,570), Kieff (329,000), Riga (256,197), Kharkoff (197,405), Vilna (162,633), Saratov (143,431), Kazan (143,707), Ekaterinoslav (135,552), Rostoff (119,880), Astrakhan (121,580), Tula (109,279), and Kishineff (125,787); whilst Nijni Novgorod, Nikolaieff, Samara and Minsk have populations between 90,000 and 95,000. In Asiatic Russia the Caucasus contains two towns with over 100,000 inhabitants, Baku (179,133) and Tiflis (160,645); Turkestan contains five large towns, Tashkend (156,000), Namangan, Samarkand and Andijan; in Siberia Tomsk, Irkutsk, and Ekaterinburg have each about 50,000 inhabitants. Nijni Novgorod, though small, is a station on the Trans-Siberian Railway, and has annually the largest fair in the world.

Nationalities (1905)*.—The various nationalities were represented about as follows: —Russ, two-thirds of the whole population, or 65·5%; Poles, 6·2%; Lithuanians, 2·4%; Germans, 1·6%; Armenians, 0·9%; Jews, 3·9%; Caucasians, 0·9%; Finns, 4·5%; Turco-Tartars, 10·6%; Mongols, 0·4%; various, 2·0%.

Religions (1905)*.—The established religion of the empire is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there were:—Orthodox, 69·9%; Mussulman, 10·83%; Roman Catholics, 8·91%; Protestants, 4·85%; Jews, 4·05%; other Christian beliefs, 0·96%; other non-Christian beliefs, 0·50%.

European Russia consists mainly of an immense plain; the Valdai hills in the west rise only to about 1,000 ft., and the Lublin hills in the south-west to about 1,500 ft. On the right bank of Lake Imandra, in the Kola peninsula, is an elevation of 3,300 ft. The Timanski range, in the province of Archangel, rises to about 3,000 ft., and Mount Lujaur-Ort in Finland to about 3,400 ft. In the Crimea and Caucasus various heights are over 4,500 ft., and the Obdorsk and Ural Mountains, which form the borderland between Europe and Asia, rise in many places to between 4,000 and 5,000 ft. In Siberia the principal ranges are the Altai, Sayansk, Baikal, Yablonoi and Verkhoiansk mountains, with a volcanic chain in Kamtchatka. In Russian Turkestan are portions of the Thian Shan range, and in Bokhara are the Pamirs, the "Roof of the World," and in all these ranges are heights of over 5,000 ft. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Duna, and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries. The river Amur, dividing Manchuria from Eastern Siberia, is navigable from its mouth to Chita, in the Trans-Baikal province, by shallow draught steamers, and is of importance, together with the Trans-Siberian Railway, in spreading Russian influence in the outlying portions of the Chinese Empire.

Agriculture.—A great portion of Russia is unfit for cultivation; in the north the *tundras* are almost constantly frozen, but in a short summer provide good pasture and certain berries fit for human food; in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst some of the interior provinces (to the extent of about 460,000,000 acres) and nearly the whole of Siberia are clothed with forests, in which the fir, pine, birch, oak, lime, maple and ash predominate. The country between the Baltic and Black Sea, however, is eminently fertile, producing abundance of grain. †The chief cereals raised in 1907 were rye (winter-sown, 19,699,200 tons; spring-sown, 573,000 tons), wheat (winter, 4,343,387 tons; spring, 9,341,450 tons), barley (7,577,250 tons), oats (4,881,390 tons in 1907, against 13,416,130 tons in 1906), millet (2,260,800 tons), maize (1,273,220 tons), buckwheat (1,003,320 tons); making a total, with other crops, of about 50,000,000 tons. Hemp and flax are extensively cultivated, and of late years potatoes (28,169,370 tons in 1907) and tobacco (100,000 tons).

Minerals.—The Obdorsk and Ural Mountains contain very great mineral riches, and, with the Altai range, are the principal seat of mining and metallic industry, producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities from the mines in the Altai Mountains. Russia is now the largest producer of petroleum in the world, the output amounting to 410,000,000 poods (of 36 lbs.) in 1905. An immense bed of coal, both steam and anthracite, and apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper). †The coal output for the whole of Russia in 1906 was 21,000,000 tons; other mineral products in 1907 were pig iron (4,227,419 tons); gold, 1904 (1,193,936 oz.); platinum (306 poods = 6 tons, being 95 per cent. of the world's output), steel and rails (1906. 2,000,000 tons), copper (14,401,000 pounds in 1907), and quicksilver (325 tons in 1904). Russia is still suffering from the late war with Japan and from internal unrest, and the mining and metallic industry shows in many instances a reduced output in 1906 and 1907.

Ports.—The principal ports are Petersburg, the naval depot and fortress Kronstadt, Narva, Riga, Libau, Pernau and Vindau (Baltic), Hango (Gulf of Bothnia), Revel, Helsingfors and Wiborg (Gulf of Finland), Archangel and Ekaterinsk (Arctic and White Seas), Odessa, Nicolaieff, Sevastopol, Nova-Rossiisk, Berdiansk, and Batoum, Taganrog, Mariupol, Rostoff and Kertch (Black Sea and Sea of Azov), Astrakhan, Derbent and Baku (Caspian Sea), and Nicolaieffsk, Vladivostok, and Petropaulovsk in Kamtchatka (Pacific).

Trade and Commerce.—Exports in 1907 were of smaller value than in 1906, but the imports show a considerable increase. The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables, oil, &c. The chief exports are grain (56 per cent.), raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow and bristles. †The trade of Russia in 1907 was divided among the principal commercial nations as follows (in millions of £ sterling):

Imports from:—

	1906.	1907.
Germany	28·1	32·7
U.K.	11·2	12·6
U.S.	4·7	5·6
France	1·3	3·0

Defence (for Army, *see* p. 667). The Navy or which £9,117,000 was allowed in 1908) onsisted of the Baltic Fleet, the Caspian flotilla, nd the Black Sea Fleet, there being 17 battleships (of which 4 building), 16 cruisers (2 building), 3 "squadron" and 81 "numbered" torpedo oats, and other craft. Of these, 10 battleships, 5 cruisers, and 119 torpedo boats were in the altic; 12 battleships, 2 cruisers, and 35 torpedo oats in the Black Sea; and 1 transport and 5 steamers in the Caspian. The Navy was anned by 2,442 officers and 52,901 men.

Education (*see* p. 670).

†*Communications.*—The total length of lines pen for traffic in 1907 was over 41,371 miles 38,029 Government, and 13,343 private lines), xclusive of 2,069 miles in Finland, and 1,071 iles of the Eastern China Railway. The outhern portion of the Manchurian Railway is o longer under Russian control. In 1907 the oss revenue amounted to £51,121,730, as ompared with £49,549,120 in 1906. The number passengers carried was 95,800,353, and goods raffic amounted to 102,802,935 tons.

*There were (1906) 14,340 post-offices, carrying 528,574,412 letters, &c. Of telegraphs there ere (1906) 7,153 offices, with 300,000 miles of line. The sea-going commercial marine consisted in 907 of 687 steamers, with a total tonnage of 10,198, and 672 sailing vessels of 217,713 gross ons; the ocean shipping of the Russian Empire comparatively insignificant, but the internal ake and river) shipping is considerable.

Finance.—The main source of revenue is the quor traffic. The revenue (1907) from the overnment spirits monopoly (which has now een introduced practically throughout the Empire) was, gross revenue £71,000,000, and net £51,000,000.

Budget Revenue—	1906.	1908.
Ordinary.....	£214,000,000	£238,600,000
Extraordinary	210,000	19,500,000
Expenditure—		
Ordinary.....	£214,000,000	£231,200,000
Extraordinary	52,000,000	27,000,000

National Debt.—The National Debt amounted in January, 1907, to £861,000,000. The total of gold in the State Bank at the close of 1907 was £99,400,000, being an increase of £6 200,000 as compared with 1906. On the other hand, the gold deposited by the Bank abroad fell from £31,100,000 at the close of 1906 to £27 400,000 at the close of 1907. In the course of the year (1907) the value of the bank notes in circulation was reduced from £125,700,000 to £121,500,000.

THE GRAND DUCHY OF FINLAND.

Grand Duke, The Emperor of Russia.
Governor-General, General Beckman.
Adjoint, General Seyn.

A Grand Duchy on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and finally annexed in 1808. The area is 144,254 square miles, with a population of about 3,000,000 in 1907, of whom about 2,600,000 are Finns, 400,000 Swedes, 19,000 Russians, 3,000 Germans and 2,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at Helsingfors, with 2,512 students, of whom 518 are women. The leading crops are rye, barley, oats, potatoes. Saw mills and paper manufacture provide the chief industry, and the forests are a great source of wealth, immense quantities of timber being prepared for export; dairy produce is also exported. There are 2,532 miles of railway; and a merchant fleet of 2,962 vessels (mostly small), of which 379 are steamers.

The country was formerly governed by the Imperial Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people. This form of government gave way on Jan. 1, 1907, to a new Constitution involving a single Chamber elected by universal suffrage of both sexes. Women are likewise eligible for election to the Chamber. Finland is thus the first country to concede woman suffrage and representation, and it is noteworthy that it has been gained without agitation. The Finnish troops only exist in name, the Diet having voted £400,000 per annum to the Russian Treasury in lieu of furnishing Finnish recruits to the army or navy, and Finland has been made part of the Petersburg Military District. The revenue in 1907 was £5,375,290, and the expenditure £5,213,607; the debt amounts to £5,556,410. The imports in 1907 were £15,132,000 (of which 60 per cent. was timber), and the exports £10,608,000. The capital is Helsingfors; population, 160,000 (including Russian garrison).

Education, see p. 670.

CAPITAL OF THE RUSSIAN EMPIRE, St. Petersburg. Population (1903), 1,534,000.

SALVADOR (REPUBLIC OF).

President, General Fernando Figueroa, *b.* 4 March, 1849; installed 1 March, 1907, for four years.
Foreign Affairs, Dr. Salvador Rodriguez.
Public Instruction and Interior, Dr. Tomas G. Palomo.
War and Marine, The President.
Finance, Lopez Mencia.

Consul-General, M. J. Kelly, 8 Idol Lane, E.C.

Salvador extends along the Pacific coast for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 7,230 square miles, with a population estimated at 1,000,000. It is divided into 14 departments, and has four ports, Acajutla, La Libertad, La Union, and El Triunfo. The principal exports are coffee, indigo, tobacco, sugar, silver, balsam (known as balsam of Peru), rice, hides, cedar, and fustic. *A railway nearly 100 miles in length connects Acajutla with the capital and Santa Ana, the coffee centre. Earthquakes are frequent, and the capital (now rebuilt) was entirely destroyed by one in 1873; but the country has of late years suffered comparative immunity. There are 85 post-offices and 168 telegraph offices, with 2,800 miles of wire.

	1904.	1905.	1906.

SAMOS.

Prince Governor, A. Kopassy Bey.
Senators, Th. Anezirinis, M. Carathanassis, T. Levendis, and S. Chastas.

A principality of the Ottoman Empire, more or less independent under the guarantee of Great Britain, France and Russia (1832), is one of the Anatolian Islands, with an area of 180 square miles and about 50,000 inhabitants, the capital (Vathy) having a good harbour. The whole island is fertile, and wine, raisins, olive-oil, and tobacco are produced and exported. The imports are valued at about £200,000 (of which about 25 per cent. are British), and the exports at the same figure, principally wine, and including cigarettes and tobaccos. The revenue for 1906–7 was £25,500, and expenditure £25,000. Antimony, silver-lead, manganese, emery, and copper are known to exist in the island.

CAPITAL, Vathy. Pop. *circ.* 25,000.
British Vice-Consul, Gregory D. L. Marc.

SAN MARINO.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60 (20 nobles, 20 townsmen, and 20 peasants), of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 33 square miles, the population 11,000. There is an army of about 100. The village of San Marino (pop. 1,500) occupies the slope of Mount Titan, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. Agriculture and viticulture flourish. By a treaty concluded in 1872 the Republic has placed itself under the protection of Italy.

British Consul, Maj. W. P. Chapman (Florence).

---

* The external debt was extinguished in 1899 by a Financial Syndicate, who also purchased the railway and obtained a concession to complete it as far as the capital.

Consul-General for Great Britain, Commendatore Arthur Serena, J.P., F.R.G.S., 34 Leadenhall Street, E.C.
Consul, Commendatore William Le Queux, Minories Chambers, Birmingham, and Villa Renata, Florence, Italy.
Vice-Consul, Birmingham, E. Clutterbuck.

SERVIA.

King Peter I. (Karageorgevitch), *b.* 1844, elected 15 June, 1903, *married*, 1883, Princess Zorka of Montenegro (who *died* 1890), and has issue Princes George (below) and Alexander, *b.* 1888, and Princess Helène, *b.* 1884.
Heir Apparent, Prince George, *b.* 1887.
Premier, Petar Velimirovitch.
Interior, Svetozar Milosavlievitch.
Foreign Affairs, Milovan Milovanovitch.
War, General Stepan Stepanovitch.
Justice, Kosta Timotievitch.
Public Instruction, Andra Nikolitch.
Commerce and Agriculture, Kosta Glavinitch.
Finance, Michael Popovitch.
Public Works, Milosh Savtchitch.

Minister in London, (vacant), 40 Pont Street, S.W.
Chargé d'Affaires, Slavko Y. Grouitch.
Consul-General in London, Alexander Tucker, 17 Seymour House, Waterloo Place, S.W.

A Kingdom of Eastern Europe, separated from Hungary by the Danube and Save. By the constitution of 1889 a "Skupstchina," a parliament elected by ballot, represented the people; this constitution was re-established by the present king. By the Berlin Treaty, 1878, it received large accession of territory, and now has an area estimated at 18,757 square miles, with a population in 1901 of 2,500,000. The surface of the country is mountainous, containing the remains of formerly extensive forests and uncultivated heaths. Agriculture is carried on in a somewhat primitive fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, and silk-culture is carried on to a limited extent. The imports consist mainly of cottons, sugar, and colonial goods, hardware, woollens, &c.; the export, of dried prunes (16 per cent.), pigs, and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. There were (1902) 369 kilometres of railway, and, in 1894, 3,174 kilometres of telegraph, with 111 post-offices and 92 kilometres of telephone.

SIAM.

King, Somdeth Phra Paramindra Maha Chulalonkorn, *b.* 21 Sept., 1853; *succeeded* 1 Oct., 1868.
Crown Prince, Prince Somdetch Chowfa Maha Vajiravudh, *b.* 1880; *procl.* 17 Jan. 1895.
Foreign Minister, H.R.H. Krom Luang Dewawongse.

Envoy Extr. and Min. Plen. in London, Phya Visutr Kosa, 23 Ashburn Place, S.W.
Consul-General (vacant).
Financial Agent, C. J. Rivett-Carnac.

The Kingdom of Siam, or Muong T'ai, (area 220,000 square miles; pop. in 1905, 6,686,000), is a buffer State between British Burma and French Indo-China. The boundary of Burma and N.W. Siam was demarcated in 1891. By the Anglo-French agreement of May, 1896, the main central part of Siam, including the basins of the rivers Menam, Petchaburi, and Petriu, was neutralised, the two Governments agreeing not to send troops or obtain any exclusive advantages in it, while retaining freedom of action in the regions west and east of the neutralised zone. The western portion, adjoining British territory, includes the Malay States dependent on Siam. The eastern portion, the Mekong Valley, including Battambang and Angkor, adjoined Cambodia and the territories acquired by France under the treaty with Siam in 1893. By the Anglo-French Agreement of April, 1904, both Powers disclaimed any intention of annexing the Siamese territory in their respective spheres of influence. By an arrangement with Siam France abandoned Chantabun and the 25-kilometre neutral zone of the 1893 treaty; but the port of Krat became French, thus giving Cambodia access to the sea, while France received trading concessions on the right bank of the Mekong and power to make railways where navigation of the river is impossible. The provinces of Melupre and Bassac were recognised as French. By a further treaty in 1907, the territories of Battambang, Siem-reap, and Angkor (total area 20,000 sq. kils., pop. 200,000), on the frontier of Cambodia, were ceded by Siam to France, which, in return, gave back to Siam the district of Krat, and made slight concessions in Dansai (Laos), at the same time concluding an arrangement for the gradual abandonment of the ex-territorial privileges hitherto enjoyed by French Asiatic subjects and protégés in Siam. The upper part of Siam is mountainous, the lower flat. Siam contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,200 Europeans. The principal religion is Buddhism, and education is mostly conducted by the Buddhist monks. Bangkok is the only much-frequented port. Over 80 per cent. of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping now largely exceeds British through the purchase of certain British steamship lines. Norwegian shipping also exceeds British. The chief products of Siam are rice and teak. The area under rice is being much enlarged by irrigation. There are about 60 rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in

English hands. In 1906 rice constituted 78 per cent. and teak 12 per cent. of the exports; while pepper, hides, and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metal wares, machinery, &c. The general tariff rate is 3 per cent. *ad valorem*. In 1906 the total imports by sea were £4,866,809, and the exports £7,082,087 (rice £5,546,926, and teak £819,647). Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, rubies and sapphires, there are no important mineral products. The King is an absolute monarch. He appoints his successor. There is an Executive Council of Ministers with a general European adviser, and, since 1895, a Legislative Council of State, consisting of the Ministers, six royal princes, and from ten to twenty members appointed by the King, who has an absolute power of veto. A number of English, Germans, Italians, Danes, and Japanese are employed as departmental advisers. The administration of the revenue and of justice and the police has been improved. The revenue (about 50,000,000 ticals) is derived from opium and spirit monopolies, land and capitation taxes, customs, &c. Gambling monopolies have been abolished, and increased land and fishery taxes and customs duties substituted. The first Siamese loan was raised in 1904 at 95, £1,000,000 being required for railways. A second loan of £3,000,000 was raised in 1907 at 93¼. Siam has an army of about 26,000 men, and a few small gunboats. Over 600 miles of railways (mostly State-owned) are now open for traffic. Bangkok is connected by rail with Petchaburi (95 miles), and with Korat (165 miles). A State line that is being constructed to Chiengmai (pop. 50,000), the second town in size, and near the Burma-Siam frontier, has reached Utaradit. A line to Tachin was opened in 1905; and lines from Bangkok to Patriew and Chantabun are under construction. Good roads are few. There are 3,000 miles of telegraph lines.

The currency is the tical; the introduction of a gold standard is contemplated whereby the value of the tical will be fixed. The Mint was closed to the free coinage of silver in Nov., 1902. In N.W. Siam the Indian rupee is current. The Government issues notes.

Minister, and Councillor of Embassy, Marquis of Villalobar, K.C.V.O.
2nd Secretary, Don Antonio Plá.
Attachés, E. Martinez, E. Peña.
Military Attaché, Major Julio Vicens.
Consul-Gen., J. M. Torroja, 40 Trinity Square, E.C.
Vice-Consul, Alfredo Amigo.

A Kingdom situate in the south-west of Europe, between 36°—43° 45′ N. lat. and 4° 25′ E.—9° 20′ W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic. It was formerly divided into 14 kingdoms (now forming 49 provinces); the ancient Provinces still best understood are New Castile, La Mancha, Old Castile, Leon, Asturias, Galicia, Estremadura, Andalusia, Murcia, Valencia, Aragon, Catalonia, Basque Provinces, with the Canary Isles and the Balearic Isles (Majorca and Minorca), comprising a total area of 196,173 English square miles, and a population (at the census of 1900) of 18,618,086. The principal towns are Madrid (pop., 540,000), Barcelona (533,000), Valencia (214,000), Seville (150,000), Malaga (130,000), Murcia (112,000), and Saragossa (100,000); and there are also twelve other towns with over 50,000 inhabitants. The Constitution upon which the present government is formed is dated 30 June, 1876. The interior of the peninsula consists of an elevated tableland, surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquiver, the Ebro, and the Minho. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton,

spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, cattle, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany and the United States are now competing for a share. Home manufacture is rigidly protected by high customs duties.

The mercantile marine in 1905 consisted of 257 sailing vessels over 100 tons, and 515 steam vessels of a total tonnage of 711,509; during 1906 vessels of 17,344,980 tons entered, and of 17,965,581 tons cleared at Spanish ports; 4,367,559 tons of cargo were landed, and 13,678,707 tons were shipped.

Nearly all the 49 Provinces are now connected by railways, of which about 11,268 miles of normal gauge were open in 1906; there are 18,000 miles of telegraph.

The principal exports to the United Kingdom in 1907 were:—

Copper	£1,809,721	Raisins	£413,335
Cork	262,779	Pyrites	1,002,791
Fruit, Preserved	230,585	Quicksilver	247 800
Grapes, Raw	606,617	Esparto, &c.	212,018
Oranges	1,994,339	Onions	528,425
Iron Ore	5,338,326	Silver Ore	182,512
Lead	1,985,162	Wine	464,848
Nuts (inc. Almonds)	459,057		

And the chief domestic imports from the United Kingdom in 1907 were:—

Chemicals	£271,614	Manure	£644,106
Coal and Coke	1,438,234	Metals, all sorts	550,672
Cotton Manufacts.	264,266	Wool, &c.	283,982
Machinery, all sorts	516,062	Yarn, Jute & Linen	159,777

Defence (for Army, *see* p. 667).

The Navy was almost entirely destroyed during the war of 1897 with the U.S.A., and there now remain one second-class battleship of 10,000 tons, the *Pelayo* (1886); a cruiser of 10,122 tons, the *Carlos V.* (1895), and three of 7,000 tons, the *Cardinal Cisneros* (1897), *Cataluña* (1900), *Princesa de Asturias* (1896); two old armoured coast defence ships of 7,300 tons, *Numancia* (1863) and *Vitoria* (1865); the royal yacht *Giralda*, 2,057 tons; four cruisers of over 1,000 tons, four destroyers, three training ships, and small craft.

Education (*see* p. 670).

Finance.—By Law of 28 Nov., 1899, the financial year was fixed to begin on 1 Jan., ending on 31 Dec.

SPANISH OVER-SEA POSSESSIONS.

The over-sea possessions are regarded as an integral part of Spain, the head-quarters of the local administration being Teneriffe, in the

* Budget estimates converted at 27½ *pesetas* = £1.

Canary Islands. In the Gulf of Guinea, the island of FERNANDO PO, and ANNOBOM, CORISO and ELOBY islands off the coast of French Congo. On the mainland CAPE SAN JUAN and the right of navigation over the rivers Benito and Muni, with the district bounded on the north by the German Cameroons, on the east by the 9th meridian E. of Paris, and on the south by the Muni river, while the district between Capes Bojador and Blanco is under protection. To the north-west are the CANARY ISLES (area about 3,000 square miles, population 334,521), the capital being Santa Cruz (Tenerife). In Morocco are several "Presidios": *IFNI, near Cape Non, TETUAN and CEUTA (30 square miles, population 16,000), opposite Gibraltar, and the coast towns of Gomera, Alhucemas, Melilla, and the Zaffarin Islands. The total area of these possessions is about 244,000 square miles, with a population of about 135,000.

SWEDEN, KINGDOM OF.

King of Sweden of the Goths and the Vandals, Gustaf V., *born* 16 June, 1858; *suc.* 8 December, 1907; *marr.* 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, *born* 7 August, 1862 (and has issue 3 sons).

Heir Apparent, Gustaf Adolf, Duke of Skane, Crown Prince, *born* 11 Nov., 1882; *married* 15 June, 1905, Margaret, daughter of H.R.H. the Duke of Connaught, *born* 15 January, 1882.

Naval Attaché, Lieut.-Comm. J. C. Schneidler.

Chancellor of Legation, J. G. Kihlman.

Consul-General, D. Danielsson, 10 Lloyds Avenue, E.C.

Vice-Consul, C. W. Espersson.

The Kingdoms of Sweden and Norway were united under one sovereign from 1814 until the dissolution of the union in 1905.

Sweden comprises the eastern half of the Scandinavian peninsula, and, except the capital, is divided into 24 governments, "Lan," with an area of 172,876 square miles, and a population, 31 Dec., 1907, of 5,377,713, nearly all Protestant. Nearly 51 per cent. of the population are devoted to agriculture, about 299,000 being owners and 53,000 tenants of the land they cultivate. The country for the most part is flat, with pleasant undulations, rising in the north-west to the Kolen Mountains, which separate Sweden from Norway; and may be divided into three separate districts—the northern, forest; central, mining; the southern, agricultural. The lakes cover about one-twelfth of the surface. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes. The forests are very extensive, covering one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and also the chief fuel. The mineral products are extremely rich; iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luien on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Scania. The chief imports are coffee, wine, tobacco, and other ordinary colonial produce, coal, cloth, yarn, wool, cotton, hides, manure, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c. The chief domestic exports to Great Britain in 1906 were butter, iron, paper and paper-making materials, and timber; and the chief domestic imports from Great Britain in 1906 were coal, machinery, metals, wool and woollen manufactures.

Commercial travellers in Sweden are compelled to take out a licence, costing 100 crowns a month, or they incur the risk of being fined.

Railways 8,218 miles in length of which 2,693 are the property of the State) were open at the end of 1907; and 18,910 miles of telegraph wires (exclusive of 14,431 railway telegraph wires), 178 stations, and 1,598 railway and 743 other telegraph stations (1906). There were at the same date about 168,000 miles of telephone wires.

Defence (for Army, *see* p. 667). The Navy consists of 92 fighting vessels (493 guns), 24 being ironclads, with submarines, submersibles and some training ships, &c.

Education (*see* p. 670).

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 5° 50′—47° 48′ N. lat. and 5° 58′—10° 30′ E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,469 square miles, with a population of about 3,313,000 in 1901, who are divided between Roman Catholics, 40 per cent., and Protestants, 59 per cent., Jews numbering 7,400 and others 11,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romanshe (in the Grisons), 1½ per cent. The most important cities are Zürich, pop. (1901) 150,000, Geneva 105,000, Basle 113,000, Berne 64,000, and Lausanne 56,000. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior ; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-sixth of the whole surface. The manufactures consist chiefly of silks, cottons, linen, lace, thread, woollens, &c. ; clocks and watches have long been the staple products of Geneva and Neufchâtel, while leather, gloves, pottery, tobacco and snuff, cheese, &c., are made. Being an inland country, the direct trade with the United Kingdom is comparatively small. In 1899 there were 2,396 miles of railway in working order, and 4,384 miles of telegraph.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 147 members, and a Council of States of 44 members ; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of £720 ; the Vice-President and other members of the Federal Council £480 each. The members of the Federal Council are elected for three years ; each year the Federal Assembly elects from this council the President and the Vice-President ; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council. (For *Defence*, see p. 667 ; for *Education*, see p. 670.)

TRIPOLI.

Governor-General, Field-Marshal Rejeb Pasha, *appointed* August, 1904.

A Vilayet, or Province of the Ottoman Empire, on the northern coast of Africa, and the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. Formerly (1713–1835) it was under a native (Karamanly) dynasty, and passed under direct Turkish control in 1835. It comprises the four sub-provinces or Mutessarificks of Tripoli, Khoms, Jabel-el-Gharb and Fezzan, and also of Benghazi or Cyrenaica, the latter being under the direct government of Constantinople since 1875. It has an area of 410,000 square miles, and a population of over 1,000,000 in Tripoli proper and Cyrenaica. There are no rivers in the country, and, the rainfall being precarious, a good harvest can only be reckoned on every four or five years. The military force of the country now numbers 10,000 men. The revenue is chiefly raised by a poll-tax, regulated according to the wealth of each individual, and by tithes, but steps are being taken to co-ordinate the incidence of taxation with that obtaining in other parts of Turkey. Barley, dates, olives, oranges, lemons and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli; but the caravan trade, once the mainstay of the country, has seriously diminished of late years. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, cattle and horses. The ancient ruins in Cyrenaica, *i.e.*, at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli; agricultural colonies of Cretan Moslem refugees are being formed in the neighbourhood of Cyrene and Apollonia (Marsa Susa). The town of Benghazi has a population of about 21,000, consisting of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests.

	1904.	1905.	1906.
Total imports	£361,000	£443,600	£429,800
Total exports	386,500	377,400	370,100

TUNIS.

(*French Protectorate.*)

Bey, Mohamed en-Nasir Bey; *born* 1855; *succ.* 12 May, 1906.
Heir Apparent, Mohamed Ben Mahmoun Bey.
French Resident-General, Gabriel Alapetite (7 Feb., 1907).

The Regency of Tunis—the ancient Lybia—was occupied (it is believed) by the Phoenicians so far back as the 14th century B.C.; by the Romans in 146 B.C.; by the Vandals in 439 A.D.; and by the Arabs in 698 A.D. This latter period witnessed a succession of powers—Berber (1048), Spanish (1535), Turkish (1573), and Husseinite (1705). Finally, by the Treaty of "The Bardo" (12 May, 1881), the Regency passed into the hands of France, and is under the control of a French Resident General. By its terms the occupation is to terminate when both French and Tunisian authorities mutually recognise that the local Government is capable of maintaining order. By a convention of 18 Sept., 1897, all previously executed treaties and conventions between the U.K. and France were extended to Tunisia, and Article 2 of this convention, dealing with British cotton goods, remains in force up to the end of 1912. By convention of 10 July, 1882, the Bey is granted a civil list of £37,500, and the Beylical princes £30,000. The Regency of Tunis lies almost midway on the Mediterranean coast of North Africa. Area, 44,920 square miles. Population, 1,800,000. *Exports:* Barley, beans, blankets, bran, carpets, cork, dates, esparto grass, Fez caps, goats, hides, lead, oats, olive oil, phosphates, sheep, silk goods, tan bark, tunny fish, wheat, wine, wool, zinc, &c. *Imports:* Alcohol, boots and shoes, building material, clocks and watches, coal, cotton goods, cars and carriages, flour, glassware, hardware, milk (condensed), motors, rail and tram cars, wrought iron, and steel.

The chief town, Tunis (pop. 227,519 composed of—Moslems 100,000, Jews 50,000, French 18,626 Italians 52,076, Maltese 6,174), is an inland port, with a basin of 1,800 square mètres with 21½ feet of water, 1,875 feet of quays, cranes up to 20 tons, connected with the sea by a canal 10 kilometres long, 98 feet wide, and dredged to 21½ feet. Port dues 1 fr. per ton (phosphates 50 c.), harbour dues 30 c., sanitary dues 18 c. N.E. of Tunis is the site of ancient Carthage (15 kilometres). There are 713 miles of railroad and 3,906 of telegraph.

Consul-General, Refet Bey, 140, Leadenhall Street Place, E.C.

Area.—The Ottoman Empire comprises an area of about 66,500 square miles in South Eastern Europe, about 680,000 square miles in Asia, and about 399,000 square miles in Africa, containing altogether about 25,000,000 inhabitants. The Sultan is also suzerain of Crete, Cyprus, Samos, and Egypt; and until the annexation of Bosnia and Herzegovina by Austria-Hungary, and the declaration of independence by Bulgaria in 1908, of those territories also.

Government.—A form of constitution modelled on that of Western European countries was suggested by various reformers from 1856–1878, but until 1908 the rule of the Sultan was based on the precepts of the Koran. On 24 July, 1908 an Imperial Iradé promulgated a constitution which embraced an elective legislature.

I. TURKEY IN EUROPE, formerly very extensive, is now reduced to 66,500 square miles, with a population (1901) of about 6,000,000, including about 700,000 Turks, 1,500,000 Albanians, and 1,300,000 Greeks, Bulgarians, and Wallachians. About 2,500,000 are Mohammedans. European Turkey comprises the vilayets of Adrianople, Salonika, Monastir, Kossovo, Scutari, and Janina, together with the administrative district of Constantinople and the separate sanjak of Chatalja. The principal towns are Constantinople, the capital (pop. 1,100,000), Salonika (120,000), and Adrianople (80,000). A great part of the surface is covered with mountains of moderate elevation. The principal rivers are the Vardar, the Struma, and the Maritza. The soil is for the most part fertile, but owing to various causes little progress has been made in agriculture. The cultivated products are maize, rice, barley, millet, sesame and other oil seeds and tobacco; the natural products are the pine, beech, Valonia oak, oak, lime, and ash, with the palm, maple, sycamore, walnut, chestnut, carob, box, myrtle, laurel, &c., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum, and fruit trees in Albania. The breeding of sheep is carried on extensively, and wool constitutes an important article of trade. The mineral products are iron in large quantity, lead blended with silver, copper, sulphur, salt, alum, and coal. Its manufactures are almost entirely domestic, such as woollen and cotton stuffs, carpets, shawls, leather, firearms, with dyeing and printing works. About 1,200 miles of railway were open in 1901.

II. TURKEY IN ASIA, the larger of the two divisions, has a total area of 680,000 square miles, and an estimated population of nearly 17,000,000 inhabitants. *Asia Minor* (pop. about 9,400,000) comprises the following vilayets: Broussa, Smyrna, Castamouni, Angora, Konia, Adana, Sivas, Trebizond, the islands of the Archipelago, and the Mutessarifats of Ismid and Bigha; in *Armenia* (pop. about 2,500,000) the vilayets of Erzeroum, Mamouret-ul-aziz (Kharput) Diarbekir, Bitlis and Van; in *Arabia* (pop. about 2,500,000) Mossul, Baghdad, Basra, Hedjaz and Yemen; in *Syria* (pop. about 3,250,000) Aleppo, Zor, Syria and Beyrout, with Jerusalem (*see* pp. 603-4) and Lebanon. The principal towns are Smyrna (200,000), Baghdad (145,000), Damascus (200,000), Aleppo (125,000), and Beyrut (120,000). Not far from Baghdad is Kerbela, the most sacred centre of pilgrimage for the Shia (Persian) Mohammedans. The trade of the Shat-el-Arab and its branches is considerable; much of it is carried by the vessels of the (British) Euphrates and Tigris Steam Navigation Company. The foreign trade, which passes chiefly through Bussorah, is mainly in the hands of the British India Steam Navigation Company. Beyond the Arabian desert, and lying along the N.E. coast of the Red Sea are the Turkish vilayets of the *Hejaz* and *Yemen*. The *Hejaz* includes the sacred cities of Mecca and Medina, the home of Mohammed, with the port of Jeddah (pop. 40,000), the mainstay of which is the pilgrim traffic. In *Yemen* are the towns of Sanaa, Assir, and Taiz. For some years past Yemen has been the scene of a serious rebellion. Hodeida (pop. 33,000), is its chief port. The Damascus-Mecca railway was opened for traffic as far as Medina in Sept., 1908. The Sinai peninsula belongs politically to Egypt.

In AFRICA, Turkey rules Tripoli and Barka (*see* p. 654).

Commerce.—The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil-seeds, valonia, carpets, &c., and are largely derived from the Asiatic provinces. Recently large quantities of wine and of raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank. Since the establishment of the Anatolian railway by German enterprise, the export of cereals, chiefly malting barley, has largely increased. The British Chamber of Commerce was established at Stamboul, Constantinople, in 1887, with branches at Smyrna and Salonica, and in the North of England (Manchester); *Pres.*, Sir Adam Block, K.C.M.G.; *Sec.*, H. E. Mountain. The commercial marine of Turkey consisted in 1901 of about

180 steamers, 60,000 tons, and 200 sea-going sailing vessels, 50,000 tons.

There are British Post-offices at Constantinople, Salonica, Smyrna, Beyrut, and Baghdad.

The principal domestic exports to the United Kingdom are corn, fruit, wool, and mohairs; the chief domestic imports from the United Kingdom are coal, Manchester goods, metals, and woolleus.

Defence (for Army, *see* p. 667). In 1906 the Navy consisted of 50 ships (including 16 armoured vessels) and 40 torpedo craft; of which only 5 armoured and 2 unarmoured vessels, with 20 torpedo craft, are fairly modern and fit for service. It has a total peace force of about 15,000 men. Besides this, there is the Makhsussa Fleet of about 75 steamers of various sorts, worked by the Government and available as transports, storeships, and coastguard cruisers.

Education (*see* p. 670).

Finance.—The Budget of the Turkish Empire is not published officially, but the revenue for the year 1906–7 is estimated at about £18,680,000. The external debt of Turkey in September, 1907, amounted to £79,306,624, necessitating an annuity of £3,455,618 for the service of interest and sinking fund. The floating debt is unknown, but it is estimated at about £13,000,000. The Russian war indemnity continues to be paid off at the rate of £318,181 per annum, the amount still outstanding being £21,520,000.

Turkish Debt (Loans)	£79,306,624
Floating Debt	13,000,000
Indemnities owed	21,520,000
Total Imports, 1900	21,050,000
Total Exports, 1900	14,030,000
Total Imports from U.K., 1906	8,009,000
Total Exports to U.K., 1905	5,948,000

CAPITAL, Constantinople. Estimated population (1904), *circ.* 1,100,000.

British Ambassador, His Excellency The Rt. Hon. Sir Gerard Augustus Lowther, K.C.M.G., C.B. £8,000

Despatch Agent, R. Newton Crane, 4 Trafalgar Square, S.W.

A Federal Republic, consisting of 45 partially independent States, 5 organized and 2 unorganized Territories, occupies the central portion of North America, between the Atlantic and Pacific Oceans, in lat. 25°—49° N. and long. 67°—124° 30' W., and also the territory of Alaska and the island of Hawaii. The area is estimated at 3,622,933 square miles, of which rivers and lakes cover 55,562 square miles, excluding the water area of Alaska and Hawaii. This area includes the vast district of Alaska, in the extreme northwest of the continent, purchased from Russia 18 October, 1867, comprising 590,884 square miles. About one-third of the country is estimated to be in a state of cultivation. The population of the whole of the States and Territories, according to the Census of 1900, was 76,356,000. In 1890 the Indians on reservation numbered 133,417; off reservation, 115,836 (including 58,806 civilised Indians); Chinese, 107,475; Japanese, 2,039; and Alaska, 32,052 (23,531 Indians). The increase in the ten years, 1880–1890, was 12,466,467, and 1890–1900, 13,018,609, exclusive of certain districts above alluded to.

Its coast-line on both oceans is reckoned to have a length of about 13,200 miles, besides 3,620 miles on the great lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico; with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance copper, iron, coal, lime, salt and lead, which in Missouri, Colorado, and Idaho appears inexhaustible; there are also rich lead-mines in Illinois and Wisconsin. California produces silver, copper, and lead, and gold in large quantities.

Finance.—The financial condition of the United States of America exerts a great influence on that of other nations. The following is a statement of the debt on 1 Oct., 1907 and 1908:—

	1907.	1908.
2 % bonds	$676,250,150	$700,882,130
3 % bonds	63,945,460	77,881,960
4 % bonds and certificates	118,489,900	118,489,900
On which interest has ceased	8,272,545	3,823,195
Bearing no interest	400,592,067	356,239,038
Certificates & Treasury notes offset by cash	1,200,319,869	1,335,020,869
Total debt	$2,467,869,991	$2,632,337,092
Less cash and reserve in Treasury	1,589,871,183	1,664,073,442
Actual indebtedness	$877,998,808	$968,263,650

* *President-Elect* (assuming office 4 March, 1909). William Howard Taft, *born* 15 Sept., 1857, *elected* 3 Nov. 1908.

The total decrease in the debt since 31 August, 1865, when, after deducting the cash in the Treasury, it amounted to $2,756,431,571, to 1 Oct., 1908, has been $1,788,167,921.

Balance Sheet for Years ending 30 June, 1907 and 1908.

RECEIPTS:—	1907.	1908.
Customs	$332,233,363	$286,113,130

Enlisted men, October 13, 1908 (active list), 42,200; commissioned officers (active list), 2,062; warrant officers, &c. (active list), 603.

Marine Corps: Commiss. officers, October 21, 1908 (active list), 268; privates and non-com. officers (do.), 9,293.

Army (see p. 667).—*Education* (see p. 670).

Constitution and Government.—The government of the United States is, by the Constitution, entrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on a day appointed, and there vote for a President by ballot. The ballots are then sent to Washington, and opened by the President of the Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex-officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, and others, so that the State can never be without a Head or Ruler.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. Two Senators from each State are elected by the Legislature thereof for the term of six years; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 173,901. The Senate consists of 90 members, and the House of Representatives of 357 representatives and territorial delegates.

The supreme judicial authority is vested in a Chief Justice and eight Justices, who are appointed by the President, by and with the advice and consent of the Senate, to hold their offices during good behaviour.

TRADE WITH UNITED KINGDOM.

The imports from, and domestic exports to, the U.K. are given below (merchandise only):—

	Imports.	Dom. Exports.	Total.
1865	$ 83,240,527	$ 93,626,922	$176,867,449
1875	142,445,648	271,101,911	413,547,559
1885	114,686,954	332,274,029	446,860,983
1895	134,577,520	341,339,703	475,917,223
1900	133,256,394	461,062,414	594,318,808
1905	147,259,920	485,418,985	632,678,905
1906	174,928,658	535,160,199	710,088,857

1906	1,743,864,500	1,226,562,446	2,970,426,946
1907	1,880,851,078	1,434,421,425	3,315,272,503
1908	1,860,773,346	1,194,341,792	3,055,115,138

The total domestic exports for the last four fiscal years ending June 30 have been: 1904, $1,435,179,017; 1905, $1,491,744,641; 1906, $1,717,953,382; 1907, $1,853,718,034; 1908, $1,834,786,357.

RAILWAYS.—For the year ending June 30, 1907, the length of single track mileage was 229,951 miles, an increase of 5,588 since 1906. The mileage of tracks of all kinds for which operations were reported (including 227,455 miles of single track) was 327,975, increase 10,892 miles, and the gross earnings $2,589,105,578; the number of railway employees was 1,672,074.

POSTAL.—The number of Post Offices in the United States, June 30, 1907, was 62,659. The postal revenue (1904) was $143,582,624. The number of inland money orders issued was 50,712,168, and the amount $383,452,373. Of international money orders the number issued was 388,730, value $37,876,265; postal expenditure, $2,362,116.

PRECIOUS METALS.—The Director of the U.S. Mint estimates the (1907) production of gold at 4,874,827 fine oz. (£90,435,700), silver 56,514,700 fine oz. ($37,299,700 commercial value), the total value therefore being $127,734,400.

TERRITORIAL EXPANSION.

In the year 1898 the U.S.A. became involved in war with Spain on account of the unsettled state of affairs in the neighbouring island of Cuba. The result of the war was the freedom of that island from Spanish control and the cession of the Philippine Islands and the Island of Guam, the Island of Puerto Rico, which was captured during the war, being retained; these conditions were confirmed by a Treaty of Peace signed at Paris (10 Dec., 1898). During the year the independent islands of the Hawaiian group were annexed by a resolution of Congress, and in 1899, under the provisions of the Samoan Convention, those islands of the Samoan Archipelago not annexed by Germany fell to the share of the U.S.A.

In a few months, therefore, the U.S.A. assumed the responsibility of a vast over-sea dominion, with between 9,000,000 and 10,000,000 inhabitants.

Hawaii is a group of islands in the N. Pacific in lat. 19° to 22° 15′ N., and long. 154° 48′ to 160° 20′ W., with a total area of about 6,449 sq. miles, and a population of about 170,000 (Orientals 95,000, Latins 27,000, Teutons 13,000, Hawaiians 35,000). The capital is Honolulu in Oaku, pop. about 39,300.

The Samoan Islands.—By the Anglo-German agreement of 14 Nov., 1899, the island of Tutuila and all other islands in the Archipelago east of 171° E. long. were reserved to the U.S.A.

In the West Indies: The Island of PUERTO RICO, captured during the war, has an area of about 3,600 square miles, and 953,243 inhabitants; the capital, San Juan, has a population of 32,048, Ponce (27,952) and Mayaguez (15,187) being also towns of importance. The products are sugar, coffee, and tobacco.

In the East Indies: The PHILIPPINE ISLANDS have an area of about 121,395 square miles, with a population (1903) of 7,635,426 (civilised, or partly so, 6,987,686; wild and uncivilised 647,740). The capital is Manila, in the island of Luzon (population 219,928), other large towns being Laoag (34,459), Lipa (37,943), Bauan (39,094), Batangas (33,131). The principal products are hemp, sugar, coffee, indigo, and copra, in addition to the tobacco plant, which is extensively grown in the island of Luzon. The total trade in 1907 was $30,453,810 for imports, and $33,097,867 for exports.

Guam, the largest island of the Ladrone (or Marianne) group, is situated in 145° E. and 14° N., and has an area of about 150 square miles, with about 11,490 inhabitants. The capital is Agana.

FEDERAL CAPITAL, Washington (3,850 miles from London). Pop. 1900, including the District of Columbia), 278,718.

A Republic in South America, on the east coast the Rio de la Plata, situate in lat. 30° – 35° S. d long. 53° 25′ – 57° 42′ W., containing an area 72,172 square miles, and an estimated popula- on of 950,000 (1907); was formerly a dependency Spain. United to the Argentine Confederation rly in the present century, it was afterwards nexed by Portugal, and became later a pro- ince of Brazil; but through the bravery of the triotic "thirty-three" it succeeded in throwing the Brazilian yoke and declared its independ- ce 25 August, 1825. A war in consequence suing between Brazil and the Argentine Con- deration, both the Powers agreed, through the ediation of Great Britain, to recognise Uruguay a sovereign and independent State. The im- rts from the U.K. are numerous, the principal ng woollen and cotton goods, hardware, and ils. The chief exports are wool, hides, horn, r, tallow, and jerked beef. Wheat, barley, and ize are cultivated, but the wealth of the country obtained from its pasturage, which supports ge herds of horned cattle (7,000,000 in 1906) d sheep (20,000,000 in 1906), the wool of which f excellent quality. Gold mines exist at Cuña- ú. The principal river is the Uruguay and its uents, of which the Rio Negro is the chief. ere are 1,220 miles of railway open (1907), all British hands, and the prolongation of the atral Railway eastern extension from Nico- ez to Artigas on the Brazilian frontier is now mpleted, and 4,945 miles of telegraph in 1907. ere are about 300 kilometers of electric tram s in Monte Video.

Minister to Great Britain (vacant).
Consulate-General, , 31 King William Street, E.C.
Vice-Consul, (vacant)
Consul at Southampton, Leopoldo Laudaeta.

The most northerly Confederation of South America, situated approximately between 1° 40′ S. lat. and 12° 26′ N. lat. and 59° 54′—73° 15′ W. long. It consists of 14 States and 5 territories. The area, according to the latest official statistics, is 599,358 square miles, but no account appears to have been taken of the territories recently adjudged by arbitration to form part of British Guiana and Colombia respectively. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1891 gave the population as 2,323,527; it was estimated to be 2,646,835 in 1907. The total value of imports for the fiscal year ended 30 June, 1907, was £1,987,657 (U.K., £755,275; U.S., £505,090; Germany, £394,683; Netherlands, £183,560). The principal imports were cotton prints, £133,019; and cotton drill, £162,041. The total value of the exports was £3,116,149, U.S., £1,142,782; France, £783,345; Netherlands, £370,280; U.K., £269,764; and Germany, £192,572. The principal articles of export were, coffee, £1,460,245; cacao, £551,008; balata gum, £228,941; cattle, £214,217; and hides, £209,776.

The prevailing religion of the country is Roman Catholic, there being but few of the Protestant faith. Education, which is in a very backward condition, is nominally free. The State provides schools for primary instruction; there are also some secondary schools and two universities. The Army has a nominal strength of nearly 9,000 men, and service in the national militia is compulsory. The Navy is composed of 8 vessels (3 gun-boats, 1 tug, 2 transports, 1 torpedo boat destroyer, and 1 torpedo boat). Owing to recent decrees of President Castro the formerly flourishing trade with Trinidad and Curaçao is now considerably reduced. The length of railways opened and under construction is 526 miles. The following figures are estimated, congress meets only once every two years:—

	1907.
Revenue	£2,115,385
Expenditure	2,115,385
Debt, 31 Dec., Interior	2,429,685
,, ,, Exterior	5,744,605
Imports from U.K. (1906-7)	755,275
Exports to U.K. (1906-7)	269,764

THE following are the values, according to the British standard, of the commoner measures of length, surface, capacity (dry and liquid), and weight in use in foreign countries. Those measures which appear in italics may be regarded as obsolete. The chief authorities which have been consulted are Siegfried's "Müuz-, Maass-, und Gewichts-Tabelle" (Leipzig), and Dr. W. A. Browne's "Merchants' Handbook" (Stanford, London). To the latter, inquirers may be referred for fuller information.

The Metric System is fully given on p. 428.

Annam (Cochin China).

1 Tak	=	1·92 inches.
1 Thuok	=	19·2 inches.
1 Truon (2 Ngu)	=	16·0 feet.
1 Saö	=	24·0 feet.
1 Maö	=	240·0 feet.
1 Li, or Mile	=	486·0 yards.
1 Dam	=	972·0 yards.
1 square Saö	=	64·0 sq. yards.
1 Haö	=	6·222 gallons.
1 Shita, or Taö	=	12·444 gallons.
1 Fan (10 Li)	=	6·015 Tr. grains.
1 Luong (10 Dong)	=	601·562 Tr. grains.

1 Alqueira (Bahia)	=	·825 bushel.
1 Alqueira (Rio)	=	1·1004 bushels.
1 Fanga	=	1·523 bushels.
1 Quartilho	=	·614 pint.
1 Canada (Rio)	=	2·44 quarts.
1 Almuda	=	3·684 gallons.
1 Oitavo	=	55·335 Tr. grains.
1 Onca	=	442·687 Tr. grains.
1 Arratel	=	1·0118 lb. av.
1 Arroba	=	32·379 lb. av.
1 Quintal (100 Arratel)	=	101·186 lb. av.

And the Metrical System.

Bulgaria, As Turkish (*q.v.*).

The Metric System is also used.

Burmah.

As Indian (*q.v.*); and,

1 Pulgat	=	1·0 inch.
1 Taim, or Maik (8 Thit)	=	5·5 inches.
1 Toung or Saading (4 Taim)	=	22·0 inches.
1 Lan (4 Toung)	=	88·0 inches.
1 Tha (7 Toung)	=	154·0 inches.
1 Okethapah	=	85·56 yards.
1 Tain	=	1069·44 yards.
1 Dain (4 Tain)	=	2·430 miles.
1 Uzena	=	15·555 miles.
1 Lamyet	=	1·0 gill.
1 Salay	=	1·0 pint.
1 Sah	=	1·0 gallon.
1 Saik	=	1·0 peck.
1 Teng	=	1·0 bushel.
1 Coyan (100 Teng)	=	12·5 quarters.
1 Large Ruay	=	3·937 Tr. gr.
1 Bai, or Anna	=	15·75 Tr. gr.
1 Moo	=	31·5 Tr. gr.
1 Mat	=	63·0 Tr. gr.
1 Tikal, or Kyat	=	252·0 Tr. gr.
1 Viss, or Piakthah	=	3·6 lb. av.

Chile.

The Metric System, and,

1 Vara (3 Pie)	=	33·367 inches.
1 Cuadra	=	3·9 acres.
1 Arroba (wine)	=	7·749 gallons.
1 Quintal (100 Libra)	=	101·42 lb. av.

Also as old Spanish (*q.v.*).

China.

Ts'un (10 Fan)	=	1·41 inches.
Ch'ih (10 Ts'un)	=	14·1 inches.
Chang (10 Ch'ih)	=	141·0 inches.
Yin (10 Chang)	=	117·5 feet.
Ch'ih	=	1·0 Kung.
Kung	=	1·0 Chang.
sq. Chang (1 Ching)	=	121·0 sq. feet.
Ching (1 Chüo)	=	1815·0 sq. feet.
Chüo (1 Mou)	=	7260·0 sq. feet.
10 Mou (1 Ch'ing)	=	72600·0 sq. feet.
Ho	=	2·0 pints.
Shêng (10 Ha)	=	*circ.* 20 pints.
Tou (10 Shêng)	=	*circ.* 100 pints.
Tael, or Liang	=	1·333 oz. av.
Chin, or Chitty (16 Tael)	=	1·333 lb. av.
Picul, or Tan (100 Chin)	=	133·333 lb. av.

British weights and measures also are used at ong Kong and other Treaty Ports.

Colombia.

The Metric System since 1857. Previously, d still occasionally, the old Spanish.

Denmark.

1 Tomme (12 Linie)	=	1·029 inches.
1 Fod (12 Tomme)	=	1·029 feet.
1 Alen (2 Fod)	=	2·059 feet.
1 Favn (3 Alen)	=	6·178 feet.
1 Rode (2 Favn)	=	12·356 feet.
1 Mil (2000 Rode)	=	4·680 miles.
1 square Fod	=	1·060 sq. feet.
1 square Rode	=	16·965 sq. yards.
1 Tönde	=	1·363 acres.
1 Pægle	=	·4247 pint.
1 Flaske (3 Pægle)	=	1·2743 pints.
1 Pot (3 Pægle)	=	1·6991 pints.
1 Kande	=	3·398 pints.
1 Viertel (4 Kande)	=	1·6991 gallons.
1 Anker	=	8·0709 gallons.
1 Tonde (136 Pot)	=	28·885 gallons.
1 Oxehoved	=	48·425 gallons.
1 Fad	=	193·702 gallons.
1 Skeppe	=	·4778 bushel.
1 Fjerdingkar	=	·9557 bushel.
1 Tönde	=	3 823 bushels.
1 Læst	=	45·876 bushels.
Liespfund	=	17·63 lb. av.
1 Pfund	=	1·00 Tr. oz.
1 Centner	=	100·21 lb. av.

Dutch Indies.—*Java.*

1 Duim	=	1·3 inches.
1 Voet	=	12·36 inches.
1 Ell	=	27·082 inches.
1 Djong (4 Bahu)	=	7·0149 acres.
1 Sack	=	61·034 lb. av.
1 Pecul (2 Sack)	=	122·068 lb. av.
1 Timbang (5 Pecul)	=	610·340 lb. av.
1 Coyan (30 Pecul)	=	3662·042 lb. av.
1 Kan	=	·328 gallon.
1 Leager	=	127·337 gallons.
1 Tael	=	·0848 lb. av.
1 Catty (16 Tael)	=	1·356 lb. av.
1 Pecul (weight)	=	135·631 lb. av.
1 Large Bahar	=	1831·021 lb. av.
1 ommercial Pound	=	7576 Tr. grains.

Sumatra.

1 empo	= 4·5 in.	1 Hailoh	= 1·0 yard.
1 ukal	= 9·0 in.	1 Tung	= 4·0 yards.
1 tto	= 18·0 in.	And as in Netherlands.	

Ecuador.

Metric since 1857, and as old Spanish (*q.v.*).

Egypt.

1 Kirat	=	1·125 inches.
1 Rub (6 Kirat)	=	6·75 inches.
1 Draâ, or Pike	=	27·0 inches.
1 Draâ Istambuli	=	26·654 inches.
1 Draâ Belendi	=	22·736 inches.
1 Endasch	=	25·134 inches.
1 Pike Nili	=	21·287 inches.
1 Nubian Draâ	=	26·654 inches.
1 Gasab	=	3·0 yards.
1 Feddan (400 sq. Gasab)	=	1·1019 acres.
1 Ardeb (Alexandria)	=	7·4457 bushels.
1 Ardeb (Cairo)	=	4·9246 bushels.
1 Ardeb (Rosetta)	=	7·8131 bushels.
1 Ardeb (Nubia)	=	5 0069 bushels.
1 Mörrhi (12 Maud)	=	7·703 bushels.
1 Dirhem	=	47·661 Tr. gr.
1 Uckieh (12 Dirhem)	=	571·938 Tr. gr.
1 Rottolo (12 Uckieh)	=	·9804 lb. av.
1 Cantar (100 Rottoli)	=	98·046 lb. av.
1 Oka (400 Dirhem)	=	2·723 lb. av.
1 Trade Oka (420 Dirhem)	=	2·859 lb. av.
1 Kirat (jewels)	=	2·9788 Tr. gr.
1 Metikal	=	71·492 Tr. gr.

France.

Metric System, and old "Système Usuel."

1 *Pied* (10 *Pouce*)	=	11·8112 inches.
1 *Aune* (4 *Pied*)	=	3·937 feet.
1 *Toise* (6 *Pied*)	=	70·864 inches.
1 *Perche* (10 *Pied*)	=	118·1123 inches.
1 *Pot*	=	·8809 pint.
1 *Brande*	=	22·048 pints.
1 *Maid*	=	88·097 pints.
1 *Livre*	=	1·1023 lb. av.
1 *Quintal*	=	110·231 lb. av.
1 Barrique (Bordeaux)	=	401·28 pints.
1 Barrique (Marseilles)	=	394·24 pints.
1 Millerole	=	112·64 pints.
1 Pièce (Bordeaux)	=	668·8 pints.
1 Pipe	=	1091·2 pints.
1 Tonneau	=	2204·6 lb. av.

Germany.

The Metric System was legalized throughout the Empire, Jan. 1, 1872, but French nomenclature is as far as possible avoided. The millimètre is also called Strich; the centimètre, Neu Zoll; the mètre, Stab; the décamètre, Kette; the litre, Kanne; the half-litre, Schoppen; the hectolitre, Fass; the décagramme, Neu Loth; the half-kilogramme, Pfund. The Centner is 50, and the Tonne is 1,000 kilogrammes. The chief obsolete measures are:—

Prussian *Fuss* (12 *Zoll*)	=	1·0297 feet.	
,, *Elle*	=	2·1881 feet.	
,, *Ruthe*	=	4·7188 yards.	
,, *Meile*	=	4·6805 miles.	
,, *Morgen*	=	2·5207 roods.	
,, *Hufe* (30 *Morgen*)	=	18·929 acres.	
,, *Metze*	=	3·024 quarts.	
,, *Scheffel* (4 *Viertel*)	=	1·512 bushels.	
,, *Tonne*	=	·756 qr.	
,, *Last* (60 *Scheffel*)	=	11·340 qr.	
,, *Oassel*	=	1·007 pints.	
,, *Anker* (60 *Oassel*)	=	7·559 gallons.	
,, *Ohm* (2 *Eimer*)	=	30·237 gallons.	
,, *Fuder*	=	181·422 gallons.	
,, *Zollpfund* (30 *Loth*)	=	1·1023 lb. av.	

Germany—*continued.*

Prussian Old *Pfund*	=	7217·886 Tr. gr.
Saxon *Fuss*	=	11·1464 inches.
,, *Stab*	=	44·5976 inches.
,, *Scheffel*	=	2·892 bushels.
,, *Kanne*	=	1·647 pints.
,, *Fass* (2 *Oxhoft*)	=	88·937 gallons.
Hanoverian *Fuss*	=	11·5 inches.
,, *Last*	=	10·284 qr.
,, *Anker* (4 *Viertel*)	=	8·570 gallons.
Brunswick *Fuss*	=	11·235 inches.
,, *Anker* (10 *Stubschen*)	=	8·24 gallons.
Oldenburg *Fuss*	=	11·649 inches.
,, *Anker* (26 *Kanne*)	=	7·860 gallons.
Baden *Fuss*	=	11·811 inches.
,, *Maass*	=	1·320 quarts.
,, *Pfund*	=	1·1023 lb. av.
Würtemburg *Fuss*	=	·9399 foot.
,, *Pfund* (32 *Loth*)	=	1·0311 lb. av.
Hamburg *Fuss*	=	11·2825 inches.
,, *Anker*	=	7·9735 gal.
,, New *Pfund*	=	1·1023 lb. av.
Bremen *Fuss*	=	11·3919 inches.
,, *Anker*	=	7·8 gallons.
Lubeck *Fuss*	=	11·323 inches.
,, *Anker*	=	8·006 gallons.
,, *Pfund* (32 *Loth*)	=	1·0725 lb. av.

Greece.

The Metric System was introduced by an ordinance of Oct. 26, 1832. In Greece, gramme = millimeter ; daktylos = centimeter ; palame = decimeter ; pecheus = meter ; stadion = kilometer ; skionis = myriameter ; stremma = are ; kybos = milliliter ; mystron = centiliter ; kotyle = deciliter ; litra = liter ; koilon = hectoliter ; kokkos=centigram ; obolos=decigram ; drachme = gram ; mna = 1½ kilogram.

Hayti, as in France.

India.—*Bengal.*

Under "The Indian Weights and Measures Act, 1870," the standard of weight is the Ser (Kilogramme) = 2·20462 lb. av. ; the standard of length is the mètre = 3·280899 feet ; and the standard of capacity is the Ser (litre) = 1·760773 pints, or 61·027046 cubic inches.

1 Moot (4 Ungulee)	=	3 inches.
1 Hâth (21 Unguilee)	=	18 inches.
1 Hyderabad Bath	=	35·334 inches.
1 Güz	=	1 yard.
1 Coss	=	2000 yards.
1 Jojun	=	8000 yards.
1 Beegah	=	1600 sq. yards.
1 Beegah (N.W. Provs.)	=	3025 sq. yards.
1 Ser	=	2·20462 lb. av.
1 Ser	=	1·76195 pints.
1 *Tola*	=	180 Tr. grains.
1 *Seer* (16 *Chittaks*)	=	2·059 lb. av.
1 *Factory Maund*	=	74·66 lb. av.
1 *Bazaar Maund*	=	72·33 lb. av.
1 *Imperial Maund*	=	82·287 lb. av.
1 *Masha* (8 *Ruttee*)	=	15·0 Tr. grains.
1 *Seer* (4 *Powah*)	=	1·961 pints.
1 *Maund* (40 *Seer*)	=	9·8098 gallons.

Bombay.

1 Guz (24 Tusson)	=	27 inches.
1 Beegah (20 Pund)	=	3927 sq. yards.
1 Seer (72 Tank)	=	7 lb. av.
1 Maund	=	28 lb. av.
1 Candy	=	560 lb. av.
1 Sattara Candy	=	3055 lb. av.

Madras.

English Measures, and,

1 Kole or Guz	=	33 inches.
1 Moolum	=	19½ inches.
1 Puddee	=	2·8852 pints.
1 Mercal	=	2·8852 gallons.
1 Parah	=	14·4261 gallons.
1 *Tola*	=	180 Tr. grains.
1 *Cutcha Seer*	=	4320 Tr. grains.
1 *Viss*	=	3·0857 lb. av.
1 *Maund*	=	24·6857 lb. av.
1 *Candy*	=	493·7142 lb. av.

Italy.

The Metric System.

1 Roman *Miglio* (1000 *Passo*)	=	1627·783 yards.
1 Roman *Scorzo*	=	1381·648 sq.yd.
1 Roman *Quaterello*	=	1·012 bushels.
1 Roman *Foglietta*	=	·8015 pint.
1 Roman *Boccale*	=	3·2101 pints.
1 Roman *Denaro*	=	18·2 Tr. gr.
1 Roman *Oncia* (24 *Denaro*)	=	436·2 Tr. gr.
1 Roman *Libbra* (12 *Oncia*)	=	·7477 lb. av.
1 Naples *Miglio*	=	1·1507 miles.
1 Naples *Oncia*	=	412·512 Tr. gr.
1 Sicilian *Miglio*	=	1625·793 yards.
1 Tuscan *Miglio*	=	1·0275 miles.
1 Lombard *Miglio*	=	1093·63 yards.

Japan.

1 Bu (10 Ring)	=	·1193 inch.
1 Sun (10 Bu)	=	1·1931 inches.
1 Shaku (10 Sun)	=	11·931 inches.
1 Ken (6 Shaku)	=	5·965 feet.
1 Jo (10 Shaku)	=	3·314 yards.
1 Cho (60 Ken)	=	119·305 yards.
1 Ri (36 Cho)	=	2·44034 miles.
1 Kujirad Shaku	=	14·913 inches.
1 Cho	=	2·4507204 acres.
1 Tan	=	32·211526 sq. poles.
1 Se	=	118·61486 sq. yd.
1 Tsubo	=	3·9538289 sq. yd.
1 Shaku	=	·98845723 sq. ft.
1 Sai (10 Sat)	=	·003176 pint.
1 Shaku (10 Sun)	=	·03176271 pint.
1 Gō (10 Shaku)	=	·3176271 pint.
1 Shō (10 Gō)	=	3·176271 pints.
1 To (10 Shō)	=	3·703389 gallons.
1 Koku (10 To)	=	4·9629237 bushels.
1 Fun (10 Rin)	=	5·797 Tr. grains.
1 Momme (10 Fun)	=	57·97 Tr. grains.
1 Rin (10 Mo)	=	0·5797 Tr. grains.

Malta.

1 Piede	=	11·166 inches.
1 Palmo	=	10·2757 inches.
1 Misura	=	41·103 inches.
1 Canna	=	2·283 yards.
1 Salma (16 Tumulo)	=	4·964 acres.
1 Salma	=	7·9372 bushels.
1 Pint	=	·8331 pint.
1 Barrile (wine)	=	9·35 gallons.
1 Libbra (12 Oncia)	=	4886 Tr. grains.
1 Rotolo	=	1·745 lb. av.

Mexico.

As old Spanish (*q.v.*).

Netherlands.

Since 1820 the Metric System. Streep = millimeter ; Duim = centimeter ; Palm = decimeter ; El = meter ; Roede = decameter ; Mijle = kilometer ; Wisse = Stere ; Vingerhoed = centiliter ; Maatje = deciliter ; Kan = liter ; Vat = hectoliter ; Korrel = decigram ; Wigtje = gram ; Lood = decagram ; Onze = hectogram ; Pond = kilogram.

Norway.

The Metric System since 1878.

Persia.

1 Zer (16 Gereh)	=	38 inches.
1 Fersakh (*Parasang*)	=	4·5 miles.
1 Chenica.....	=	·289 gallon.
1 Capicha...	=	·578 gallon.
1 Collothum	=	1·809 gallons.
1 Artata	=	1·809 bushels.
1 Seer (16 Miscal).....	=	284 Tr. grains.
1 Ratel.....	=	1·014 lb. av.
1 Batman, or Maund.	=	6·491 lb. av.
1 Karwar.....	=	649·142 lb. av.
1 Batman Rei	=	27 lb. av.

Peru.

Metric, old Spanish, and British; but Vara (3 pie) = 2·780 feet: Fanega (wheat) = 135 or 140 libra; Carga = 150 libra.

Philippine Islands.

1 Pulgada (12 Linea)...	=	·927 inch.
1 Pie	=	11·125 inches.
1 Vara	=	33·375 inches.
1 Gantah	=	·8796 gallon.
1 Caban	=	21·991 gallons.
1 Libra (16 Onzo)	=	1·0144 lb. av.
1 Arroba	=	25·360 lb. av.
1 Catty (16 Tael)	=	1·394 lb. av.
1 Pecul (100 Catty) ...	=	139·482 lb. av.

Poland.

As in Russia, and.

1 *Cwiere* (6 *Cal*) = 5·606 in.	1 *Sznurow* = 47·245 yds.	
1 *Stopa* .....=11·212 in.	1 *Mila*..... = 5·304 mls.	
1 *Loziec*.....=22·425 in.	1 *Morgow*. = 1·382 acs.	

Portugal, Rumania, and San Domingo.

The Metric System.

Russia.

1 Stopa (8 Vershok)	=	14 inches.
1 Arschine (16 Vershok).	=	28 inches.
1 Saschen (3 Arschine) ...	=	7 feet.
1 Verst (500 Saschen) ...	=	1166·66 yards.
1 Desatine	=	13066⅔ sq. yards.
1 Vedro (100 Tscharkey).	=	2·704 gallons.
1 Anker.....	=	8·114 gallons.
1 Chetvert.....	=	46·2 gallons.
1 Sarokowaja	=	108·196 gallons.
1 Tschetwerik.....	=	2·885 pecks.
1 Pajak	=	1·442 bushels.
1 Last	=	11·540 quarters.
1 Zolotnick (96 Doli).....	=	65·830 Tr. gr.
1 Funt (12 Lani).....	=	·9028 lb. av.
1 Pood (40 Funt).....	=	36·1127 lb. av.
1 Berkowitz	=	361·273 lb. av.
1 Packen	=	1083·382 lb. av.

Servia.

The Metric and Turkish Systems.

Siam.

1 Niw	=	·83 inch.
1 Kü'p (12 Niws)	=	10 inches.
1 Sawk (2 Kü'ps)	=	19½ inches.
1 Wah (4 Sok)	=	80 inches.
1 Sen (20 Wahs).....	=	44·4 yards.
1 Yot (400 Sens)	=	9⅞ miles.
1 Rôeneng	=	2·525 miles.
1 Thang	=	3·75 gallons.
1 Coyan	=	375 gallons.
1 Tael (4 Bat).....	=	936·25 Tr. grains.
1 Chang, or Catty.....	=	2·675 lb. av.
1 Hap, or Pecul.....	=	133·75 lb. av.
1 Keean (20 Piculs) ...	=	1675 lb. av.

Spain.

The Metric System was made compulsory on July 1, 1868. In many countries that were colonized by Spain some of the old Spanish measures are still used, *e.g.*:—

1 Pulgada (12 Linea)	=	·927 inch.
1 Sesma (6 Pulgada)	=	5·564 inches.
1 Vara (6 Sesma)	=	2·782 feet.
1 Estado (2 Vara).....	=	5·564 feet.
1 Legua (of Castile).....	=	4636·66 yards.
1 Fanegada.....	=	1·6374 acres.
1 Cuartillo (4 Capo).....	=	·1109 gal.
1 Cuartilla (2 Azumbre).....	=	·8879 gal.
1 Arroba Mayor (or Cantara)	=	3·5517 gal.
1 Mayor (16 Cantara)	=	56·276 gal.
1 Medio (2 Quartillo)	=	·0621 bushl.
1 Almude (2 Medio).....	=	·1256 bushl.
1 Fanega	=	1·5076 bushl.
1 Cahiz.....	=	18·0919 bushl.
1 Tomin (12 Grano).....	=	·02113 oz. av
1 Onza	=	·0634 lb. av.
1 Libra (of Castile)	=	1·014 lb. av.
1 Quintal.....	=	101·442 lb. av.
1 Tonelada.....	=	1014·42 lb. av.

Sweden.

The Metric System since 1875.

1 *Fot* (10 *Tum*).....	=	11·689 inches.
1 *Mil* (360 *Ref*).....	=	6·6416 miles.
1 *Kanna*	=	4·608 pints.
1 *Skoalpund* (100 *Ort*).....	=	·937 lb. av.

Switzerland.

The Metric System since Jan. 1st, 1873.

1 *Fuss* (10 *Zoll*)	=	11·8112 inches.
1 *Stunde* (1600 *Ruthe*).....	=	2·9826 miles.
1 *Malter* (10 *Viertel*)	=	4·126 bushels.
1 *Maass* (4 *Schoppen*).....	=	2·641 pints.
1 *Pfund* (16 *Unze*)	=	1·1023 lb. av.

Tripoli.

1 Pike	=	26·416 inches.
1 Draa.....	=	19·13 inches.
1 Orbah	=	1·476 gallons.
1 Hueba (4 Temen).....	=	2·552 bushels.
1 Necchie (4 Bozze).....	=	2·361 gallons.
1 Oka (40 Uckieh)	=	2·69 lb. av.
1 Centner (100 Rottoli)...	=	107·66 lb. av.

Turkey.

1 Pike or Arshen.....	=	27¼ inches.
1 Pike or Arshen (land)..	=	29⅝ inches.
1 Halebi or Archim	=	27·9 inches.
1 Endazzeh (Silk)	=	25¼ inches.
1 Agatsch (3 Berri).....	=	3·1159 miles.
1 Jubbeh (12 Rottol).....	=	·4851 bushel.
1 Fortin (4 Killow).....	=	3·8809 bushels.
1 Rottol (12 Okiejeh	=	2·513 pints.
1 Almud (8 Oka)	=	1·1519 gallons.
1 Cantar (100 Rottol) ...	=	31·417 gallons.
1 Cantar (dry)	=	124·08 av.
1 Okiejeh (100 Dirhem)...	=	·70854 lb. av.
1 Kélé or Oke (4 Okiejeh)	=	2·1975 lb. av.
1 Batman (dry)	=	16·92 av.

United States.

The Metric System, authorized 1866; also weight, length, and surface measures as in England, and old Winchester measure.

1 Pint (dry)	=	·9694 pint.
1 Gallon (dry)	=	·9694 gallon.
1 Bushel	=	·9694 bushel.
1 Quarter	=	·9694 quarter.
1 Pint (wine or spirit) ...	=	·8331 pint.
1 Gallon (wine or spirit)	=	·8331 gallon.
1 Pint (beer).....	=	1·2017 pints.
1 Quintal or Centner.....	=	100 lb. : v
1 Barrel (of flour)	=	196 lb. av.
1 Barrel (of beef)	=	200 lb. av.

Uruguay.

Metric System, introduced 1864; also as in Argentine Republic. Venezuela, the Metrical System, since 1857; and old Spanish.

Military Systems of the World.

BELOW will be found reproduced, in a succinct form, the detailed account of the military systems of foreign countries originally given in the ALMANACK for 1906.

Whilst the figures given may be accepted as substantially accurate, they cannot be used to determine by simple division the cost per head of the soldier, inasmuch as some States, for example Belgium, rely and expend relatively a great deal more than others, for example Japan, upon fixed defences and fortifications. The system of accounting, too, varies, some States providing for pensions and other non-effective services in separate Budgets, some charging their Army estimates with items reckoned by others in Naval votes.

The essential difference between "universal service" and "conscription" requires emphasis. The former involves the liability of *all* able-bodied males, and (where thoroughly administered) confines exemption to individual cases, *e.g.*, only sons of widows, young men entering upon a learned profession, clergy, &c.

The latter involves the *choosing by lot* of a regulated annual conscript contingent from amongst a considerably larger number of young men of military age, and the possibility of exemption on payment, or on finding a substitute.

This latter system has been almost universally abandoned.

In "Militia" armies and forces the training is *intermittent* only, and, as it is now recognised that troops thus maintained lack the solidity and *moral* essential for great or long-sustained operations in general, and for *offensive* warfare in particular, this system is relied upon only by States whose exterior policy is avowedly neutral, or by those whose neutrality is safeguarded by their more powerful neighbours.

Explanations.—Where two periods of service in an active army are mentioned, the shorter is that of the dismounted, the longer that of the mounted branches, the relative lengths being usually reversed during reserve service. A.A. = Active Army. A.R. = Reserve of Active Army. T.A. = Territorial Army. N.G. = National Guard. Trg. = Training. P.E. = Peace Establishment. W.E. = War Establishment. Formations legally available for interior defensive action only are enclosed in *square brackets*.

The Budgets are stated for 1908.

N.B.—Special attention is invited to the fact that, with the exception of Great Britain and the United States, no country recruits *ad hoc* for its Territorial or Home Defence Force.

(1). *Countries that have adopted Universal Service*:—

Argentina.—National Militia; A.A., 10 yrs.; Initial trg. 3–12 mos., a subseq. trgs. each 1 mo.; *then*, N.G. 10 yrs., 4 trgs. each 15 dys., and [T.G., 5 yrs. no trg.]. *P.E.*, 1,560 offrs., 16,000 others. *W.E.*, 125,000 (excl. N. & T. Gs.). £1,695,209.

Austria-Hungary.—(i.). A.A., 3 yrs. (2 yrs. projected); A.R., 7 yrs., 3 trgs. each 1 mo.; Res. of Landwehr, 2 yrs., 1 trg. of 1 mo. *Or*, (ii.) direct to Landwehr, 2 yrs., max. trg. in Austria 20 wks., in Hungary 25 wks.; *then* Land. Res. 10 yrs., 1 trg. of 1 mo. *Or* (iii.) to Ersatz Res., trg. 2 mos.; *then* to age 42 in [Landsturm 1st Ban and do. 2nd Ban]. *P.E. Common Army*, 16,800 offrs., 293,000 others. £13,658,300. *Bosnian Contingent*, 400 offrs., 6,750 others. £325,000. *Austrian Landwehr*, 3,960 offrs., 34,450 others. £2,273,600. *Hungarian do.*, 3,700 offrs., 28,300 others. £2,019,000. *W.E.* Mobilised Field Army, 890,000. Other formations abt. 1,000,000.

Bulgaria.—A.A., 2 or 3 yrs.; A.R., 18 or 16 yrs.; [T.A., 1st Ban, to age 44, T.A. 2nd Ban, to age 46]. *P.E.*, 3,417 offrs., 50,614 others. *W.E.* Orgd. formations only, 375,000. *Ord.* £1,203,450. *Extry.* £1,000,000.

Chile.—National Militia; A.A., Initial trg. 6 mos.; A.R., 9 yrs. [2nd Res. to age 45]. *P.E.*, 850 offrs., 10,800 others. *W.E.* 95,000. £1,220,000.

Denmark.—National Militia; A.A., 8 yrs. Initial trgs. 6½–19 mos.; *then*, [T.A., 8 yrs., 2 trgs. each 25 dys.]. *P.E.*, 14,000. *W.E.*, 75,000. £732,600.

France.—A.A., 2 yrs. (rigorously enforced, no exemption save for physical unfitness). A.R., 11 yrs. 2 trgs. each 1 mo.; *then*, [T.A., 6 yrs., 1 trg. 2 wks., and T.A. Res. 6 yrs. no trg.]. *P.E.* (not legally limited as in Germany), and excl. officers, &c. A.A., in France, 501,000; In Algeria, 56,000; in Tunis, 20,000 (one-third natives). "Colonial Army" (in France), 27,580. *W.E.*, excl. "Col. Army" and Algeria and Tunis, also excl. some 30,000 gendarmerie, &c. *Mobilised Field Army*, 725,000; *1st Res.*, 475,000; *Depôts*, 625,000. [*Organised T.A.*, 550,000; *unorgd. do.*, 700,000.] *Oversea Garrisons*, Indo-China, 14,000 Europs., 18,000 natives; Madagascar, 4,000 Europs., 8,000 natives. Minor forces in W. Africa, etc. *Home*, £25,939,000; *Colonial*, £1,494,000; *Algeria-Tunis*, £3,081,000: *Supplty.*, £2,758,000.

Germany.—(1.) A.A., 2 or 3 yrs.; A.R., 5 or 4 yrs., 2 trgs. each 2 mos.; *then*, Landwehr 1st Ban, 5 or 3 yrs., 2 trgs. each 14 dys. for dismtd. branches only; 2nd Ban to age 40, no trg.; *then*, [Landsturm, 2nd Ban to age 45]. *Or*, (ii.) to Ersatz Res., 3 trgs. of 10, 6, and 4 wks.; *then* to Landsturm. *Or*, (iii.) to [Landsturm 1st Ban to age 39, 2nd Ban, to age 45; 1st Ban incl. all able-bodied males age 17-39 not otherwise serving]. "One-year volunteers" accepted, pay all expenses. *P.E.*, 25,465 offrs., 587,156 combt. N.C.O.'s and men, 6,391 noncombts., 11,000 1-yr. vols. *W.E., Mobilised Field Army*, 1,165,000; *Orgd. Landwehr*, 600,000; Ersatz and [Landsturm] abt. 2,000,000. *Permanent charges*, £33,521,486; *Non-recurrent*, £6,361,796; *Extry.*, £2,831,215. *Oversea garrisons*, Kiau-Chau, 2,700; S.W. Africa, 4,600; Minor Colonies, 425 Europs., 3,800 natives.

Greece.—(i.) A.A., 2 yrs.; A.R., 10 yrs. [T.A., 8 yrs.; T.A. Res., 10 yrs.]. *Or*, (ii.) Ersatz, at present untrained. *P.E.*, 27,000. *W.E.*, orgd., 50,000; unorgd. 70,000. £734,000.

Italy.—(i.) A.A., 2 or 3 yrs. (frequently curtailed); "on leave" (A.R.) 7 or 6 yrs., 1 trg. of 2 wks.; Mobile Militia (Landwehr), 3 or 4 yrs.; and [T.A., 7 yrs., or to age 39]. *Or*, (ii.) Complementary Res., 8 or 9 yrs., 2 to 6 mos. trg.; *then*, to Militia, &c., as above. *Or*, (iii.) to [T.A.] direct, no trg. *P.E.*, 13,750 offrs., 271,000 others. *W.E.*, Mobilised Field Army, 400,000. 1st Res., 350,000. Militia, 250,000. [T.A., unorgd. and partly-trained, abt. 2,000,000]. *Ord.* £11,085,400. *Extry.* £700,000.

Japan.—(i.) A.A., 2 or 3 yrs.; A.R., 5½ or 4½ yrs., 2 trgs. each 60 dys.; *then*, Kobi (Landwehr) 10 yrs., 2 trgs. each 60 days; *then*, [Kokumin or T.A. 1st Ban, 2½ yrs., no trg.]. *Or*, (ii.) Hoju (Ersatz), 7½ yrs., 3 trgs. of 90, 60, and 60 dys.; *then*, to Kobi, &c., as above. *Or*, to [Kokumin 1st Ban direct]. One-year vols. as in Germany. *P.E.*, A.A., 225,000. *W.E.*, (a) fully trained, *Mobilised A.A.*, 550,000: *Depôts*, 150,000; *Kobi*

375,000 : [*Overseas garrisons*, 34,000] ; [*Kokumin* 1st Ban 115,000]. (*b*) Partly trained, *Hoju*, 375,000 ; *Kobi*, 400,000 ; [Kokumin 1st Ban, 55,000. (*c*) Untrained, [Kokumin 2nd Ban, abt. 3,000,000]. *Ord.*, £7,020,900. *Extry.* £3,880,600.

Norway.—National Militia. A.A., 6 yrs.; initial trg. 48–102 drs.; 3 subseq. trgs. each of 24 dys. ; *then*, [Landvärn. 6 yrs.; 2 trgs. each 24 dys.; and Landstorm, 4 yrs., no trg.]. *P.E.*, 18,000 ; *W.E.*, all branches, 165,000. £744,530.

Rumania.—Re-org. in progress. A.A., 2 or 3 yrs. "On leave" 5 or 4 yrs. ; *Res.* 5 yrs. ; *then*, Militia 3 yrs.; and [T.A., unorganised, 4 yrs.]. Intermittent serv. in Calarashi cavalry only, initial trg. 60 dys., subsequently periodic. *P.E. (Old org.)* 70,000. *W.E.* [excl. T.A.] abt. 175,000. £1,950,760.

Russia.—(i.) *European Army*, A.A., 3 or 4 yrs. ; A.R., 14 yrs., 2 trgs. each 6 weeks ; *then*, [T.A., 5 yrs.]. *Caucasian Army*, A.A., 3 yrs.; A.R., 15 yrs., [T.A. to age 44]. *Asiatic Army*, A.A., 4 yrs. ; A.R., 13 yrs. ; [T.A., to age 44]. *Or.* (ii.) to T.A. direct. *Cossack services*, prelim. trg. 3 yrs. ; embodied serv. 4 yrs. ; "on leave" 4 yrs.; Res. 4 yrs. ; Details of org. are too elaborate for inclusion. *Approx. W.E.*, European and Caucasian Armies, 1,500,000. Central Asiatic and W. Siberian Armies, 250,000. East Siberian Army, 250 000. [Orgd. T.A.'s Europe, 700,000. Remdr. ?]. *Ord.* £44,940,993. *Extry.* £5,400,000. *Manchurian War a/c* £4,800,000.

Servia.—A.A., 1½ or 2 yrs. ; A.R., 9 yrs. ; *then*, Landwehr 5 yrs. ; and [T.A., 7 yrs.]. *P.E.*, 35,000. *W.E.*, Field Army 100,000, others imperfectly orgd. abt. 150.000. £820,000.

Switzerland.—National Militia. Prelim. trg. in schools. *A.A. (Elite)* age 20–32. Initial trg. 65–90 dys. Annual courses 11–14 dys., and musketry. *Landwehr*, age 33 40. 1 trg. of 11 dys. disintd. branches only. *Landsturm*, age 41 48, no trg. *P. and W.E., Elite*, 138,252. *Landwehr*, 66,317. *Do. Sedentary*, 20,000. *Landsturm*, combt., 54,450. Non-combt., 249,978.

Turkey.—Christians excluded, but pay milly. tax in lieu. Partial exemp. purchasable. (*i.*) A.A. (Nizam), 3 or 4 yrs.. A.R., 6 or 5 yrs., 1 trg. of 6 wks. ; *then*, Redif (Landwehr) 9 yrs., 2 trgs., each 1 mo., and [Mustafiz Landsturm), 2 yrs., no trg.], *or* (ii.) to Redif and Ban direct (Inf. only). Irreg. Hamidieh (tribal) Cav. in Anatolia. *P.E.*, Europ. and Anatolian Ordus, 320 000. Hamidieh Cav., 16.000. Arabia, 30,000. Tripoli (Militia), 10,000. *W.E.*, Field Army Europe and Anatolia, 375,000. Redif 2nd Ban, 375,000. [Mustafiz unorgd., 90,000.] £4,500,000.

(2). *Countries relying upon voluntary enlistment, supplemented by conscription* :—

Belgium. Recruiting highly unsatisfactory. Nominal periods, A.A., 8 yrs. ; A.R., 5 yrs. Actually, vol. enl. for 5, 4, or 3 yrs. Conscript trg., 20 36 mos. *P.E.*, 45,744 (abt. one third vols.). *W.E., Field Army*, 100,000, *Sedentary*, 75,000. £2,283,900.

Brazil.—A.A., 2 yrs. ; A.R., 7 yrs., 1 trg. of 1 mo. 2nd Res. : 1st Ban, 3 yrs., 1 trg. of 1 mo. ; 2nd Ban., 4 yrs., no trg. N.G., 4 yrs. [Res. of N.G., 4 yrs.]. *P.E.*, 25,000 ; *W.E.*, 45,000, excl. N.G. £3,125,707.

Netherlands.—National Militia : A.A., 8 yrs. ; initial conscript trg. 4–24 mos. ; 3 subseq. trgs. of 8–12 wks. [Landweer, 7 yrs., disintd. branches only, 2 trgs. each 1 wk.] *P.E.*, 542 offrs., 20,645 others. *W.E.*, 175,000. £2,313,200.

Dutch E. Indies.—Vol. eng. : Europs. 12,200, Natives (in the same units) 25,000. £2,732,000.

Sweden.—National Militia. Universal liability being gradually introduced. A.A., 8 yrs., initial trg. 150–280 days. : 3 or 2 subseq. trgs. of 1 mo. ; A.R., 4 yrs. [Landstorm, 8 yrs.].

(3) *Countries relying upon conscription* :—

Portugal.—A.A., 3 yrs. ; A.R., 5 yrs. ; 2 trgs. each 20 dys. 2nd Res., 7 yrs., 2 trgs. or more. [T.A. to age 40]. *P.E.*, 30,000. *W.E.*, 150,000, excl. unorg. T.A. *Colonial Army*, 3,400 Europs., 9,000 natives. *Ord.*, £1,776,800 ; *Extry.*, £166,000.

Spain.—A.A., nominally 3 yrs., actually 2 ; A.R., 3 or 4 yrs., annual trg., 1 mo. ; 2nd Res., 6 yrs., no trg. No T.A. *P.E.*, Peninsula and Islands, 100,000. N. Africa, 6,000. *W.E.*, Field Army. 200,000 ; Res. formations, 100,000. £5,303,130.

(4). *Countries relying upon voluntary enlistment* :—

China.—Former Banner Troops and Provincial Militias being replaced by modern forces, but organization is defective and results are unequal. A.A., 3 yrs. ; A.R., 3 yrs. ; T.A., 4 yrs. *P.E.*, new formations, abt. 45,000. *W.E.*, 85,000, *excl.* Provl. Militias of dubious value.

U.S.A.—Recruiting highly unsatisfactory and desertions frequent. Reg. Army, 3 yrs. No Reserves. State Militias, of varying efficiency, are, since May 1908, available for exterior war. Serv. in [Unorganized Militia] is legally comp. for all able-bodied males aged 18–45. *P. & W.E. Reg. Army*, U.S. and Alaska, combts. 2,677 offrs., 31,607 others. Non-combts., 3,223. Philippines, combts., 688 offrs., 12,091 others. Non-combts., 805. Porto Rico, &c., 3 offrs., 29 others. *Colonial Troops* (native). Philippines, 116 offrs., 4,346 others ; Porto Rico, 24 offrs., 572 others. Cuba, 276 offrs., 4,437 others. Hawaii, 12 offrs., 209 others. *State Militias* (in process of reorg.), abt. 100.000. Reg. Army, £25,015,665, excl. exp. on State Mil. and Pensions of about £28.000.000.

Great Britain.—*See* "Analysis of Army Estimates," pp. 675–678.

P. R. COLES.

Coal Exports 1906.

IN 1906 55,599,771 tons of coal were exported from the U.K. at prices varying from below 5s. to above 16s. per ton. The prices are given at the time of shipment and are exclusive of the duty. 954,638 tons did not exceed 5s. per ton : 4,969,422 between 5s. and 6s. ; 603,729 between 6s. and 7s. 5 808,425 between 7s. and 8s. : 10,211,584 between 8s. and 9s. : 8,969,926 between 9s. and 10s. : 4,614,958 between 10s. and 11s. ; 4,853,484 between 11s. and 12s. : 7,861,297 between 12s. and 13s. 3,632,560 between 13s. and 14s. : 1,936,704 between 14s. and 15s. : 591,808 between 15s. and 16s. ; and 591,236 exceeding 16s per ton ; total 55,599,771 tons. The export duty of 1s. per ton was imposed by the Budget of 1901-2 and repealed by the Budget of 1907-8. It produced £1,494,577 in the financial year 1906–7 ; £2,183,973 in 1905 6 : £2,052,774 in 1904-5 ; £2,051,652 in 1903 4 ; £1,991,764 in 1902-3 and £1,311,706 in 1901-2 ; a total of £11,086,649 in six years.

THE following summaries present in as brief a form as possible the various educational systems of the countries of the world.

Argentina.—(i.) *Primary:* Age 6–14; *Secular, free, and nominally comp.* (but only some 45 p.c. attend). Schools maintained by provincial taxation and controlled by provincial boards (in capital by National Council) with grants from Central Govt. (ii.) *Secondary:* Control by Central Govt.; lyceums, and normal schools. Average attendance, over 6,000. (iii) *Special Govt. Schools:* 1 naval, 1 military, 1 mining, 1 agricultural. (iv.) *Universities: National*, Buenos Aires, Cordoba; *Provincial*, La Plata, Santa Fé, Parana.

Austria.—(i) *Primary:* Age 6-12, 13, or 14; *free and comp.* (91 p.c. attend). Schools maintained by local taxation, State grants exceptional. (ii.) *Secondary:* Controlled by Central Govt., including private schools; Gymnasia (8-yrs. course) and realschulen (7-yrs. course) prepare for the Universities and Govt. technical high schools. Attendance, over 129,000. Pupils attaining a prescribed standard qualify for military service as 1-yr. volunteers. (iii) *Special:* 8 Govt. engineering, 1 Govt. agricultural, 2 higher, 7 lower mining, numerous technical institutes, commercial, art, music, and industrial schools. (iv.) *Universities: State-maintained*, Cracow, Czernowitz, Graz, Innsbruck, Lemberg, Prague (2), and Vienna.

Hungary.—*Primary: free and comp.* Maintained by local taxation. *Infant Schools* (numerous), with nursing staffs; ages 3–6. *Lower Elementary*, 6–12; repetition courses, 12–15. *Higher do.* (sexes separate) with 3 yrs. course for boys, 2 yrs. for girls; *City High Schools*, 6 yrs. course for boys, 4 yrs. for girls; average attendance, over 77 p.c. (ii) *Secondary Schools* not State-maintained are State-aided; their 8-yrs. course prepares for University and Budapest Polytechnic. (iii.) *Special Schools* are less numerous than in Austria, but well attended. (iv.) *State Universities:* Budapest, Kolozsvar, Zagrab. Both in Austria and Hungary there is an extraordinary diversity of language—in the former German, Czech, and Slav dialects predominate, in the latter Magyar.

Belgium.—(i.) *Primary: comp. and free;* schools maintained by communal taxation with provincial and State grants; in addition, many are under ecclesiastical control, Roman Catholic predominating. (ii.) *Secondary:* 128 State high schools (40 for girls), and numerous private institutions. (iii.) *Special schools*, communal and private, abound; music and fine arts schools a special feature; 35 Royal Athenæums. (iv.) *Universities: State*, Ghent and Liège; *free*, Brussels and Louvain.

Brazil.—(i.) *Primary: Secular and free*, but not *comp.* Greater portion of population is illiterate. (ii.) *Secondary:* Controlled by Central Govt.; national gymnasium. (iii.) *Special:* 1 naval, 1 military, 1 mining, 1 polytechnic, 4 law, 2 medicine. (iv.) No universities.

Bulgaria.—(i.) *Primary:* Age 8-12, *free and nominally comp.*, fees in higher grades only. State bears two-thirds, local taxation one-third cost. Attendance good. (ii.) *Secondary:* State bears one-half cost. Foreign schools numerous. (iii.) Very few special or technical schools. (iv.) *University:* Sofia. The recent formal separation from Turkey will doubtless give a stimulus to education.

Chile.—(i.) *Primary: Free*, but not *comp.* A large proportion of the population is yet illiterate. Nevertheless, existing schools have a good attendance. (ii.) *Secondary:* State lyceums (sexes separate) in provincial capitals. (iii.) Numerous special and technical schools. (iv.) *Universities: State*, Santiago; one private do.

China.—Persistent missionary zeal and imperative necessity of military re-organisation must share the credit of substituting occidental learning for the time-honoured study of Chinese classics, which, until the Imperial Edict of 1905, formed the only passport to State employment. Chinese Imperial Edicts, however, even if strongly worded, often fail to produce a full measure of results. Schools, nevertheless, spring up daily, the study of Japanese and European languages naturally assuming a peculiar importance in view of the lack of scientific textbooks in the vernacular. Japanese influence is strong, particularly in the now numerous military institutions, whilst there are many medical schools.

Denmark.—(i.) *Primary: free and comp.* Age 7–14. Schools maintained by local taxation. (ii.) *Secondary:* Schools that are not State-maintained are State-aided. (iii.) *Special* schools are numerous, horticulture and agriculture predominating. (iv.) *University*, Copenhagen.

Egypt.—Of the ancient village schools, those proving most progressive are State-aided, and primary education is being greatly developed. (i.) *Govt. Primary Schools* (34 in 1907) with 4-yrs. course, prepare for admission to minor Govt. posts, the secondary schools, the agricultural college, &c. English predominates, and is ousting French. Majority of pupils pay small fees. (ii.) *Govt. Secondary Schools:* also a 4-yrs. course, admit to intermediate Govt. posts, or the three Cairo Colleges of Law, Medicine, and Engineering. Staff usually English. (iii.) *Special schools* are numerous, keeping pace with the rapid development of the country. Private enterprise and benevolence does much, and foreign schools abound.

France.—Education system highly developed. *Central Administration* comprises (*a*) Ministry of Public Instruction; (*b*) Superior Educational Council, charged with the actual administration; (*c*) Consultative Committee (advisory); (*d*) Educational Bureaux, and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (*a*) Territorial Academies, with inspecting staffs for all grades, and (*b*) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary: Secular, comp.* and *free.* Age 6–13. Schools include (*a*) infants; (*b*) lower primary; (*c*) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary:* State lycées, communal colleges, and many private establishments, 7-yrs. course, either (*a*) purely classical; (*b*) purely modern; (*c*) Latin and sciences; or (*d*) Latin and modern

languages. Degree of Bachelor conferred on completion. For females, a similar organization, course 5-6 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities:* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education) Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpelier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse.

Germany.—Educational system is remarkable for the ease with which it meets the requirements of every social class. Its efficiency is best exemplified by the annual military recruiting statistics, which in 1906 disclosed only 92 illiterate recruits in a total of 261,893, and of these 32 were returned as born abroad. It is, moreover, practically homogeneous in all branches throughout the empire. The Prussian administration may be cited as typical, comprising (i.) a general control by the Minister of Public Instruction over all educational establishments, public or private, save those special Schools dependent on other ministries, (ii.) a provincial organisation charged with management of public elementary schools, and (iii.) Special Provincial Boards charged with the management of Secondary and Normal Schools, their curricula, appointment of teachers, and leaving examinations. (i.) *Primary: comp.* and *free*, age 6–14. Average attendance, 94 p.c. Maintained by local taxation, with State grants. (ii.) *Secondary:* Evening continuation schools for children of working classes; city intermediate schools in two grades; gymnasia (some State-maintained) preparing for university and learned professions with a 9-yrs. course. The standard to qualify for military service as a 1-yr. volunteer is that for advancement from the lower to the upper second class of a State gymnasium; progymnasia, similar, but lacking the highest class of the gymnasia; Real gymnasia confining classical instruction to Latin; real progymnasia similar, but lacking higher classes of the foregoing; Oberrealschulen and Realschulen making a special feature of modern languages; Lehrer-Seminarien and Fachschulen supplying specialised instruction. Private institutions are comparatively few. For girls, special tochterschulen (high schools). Here private establishments predominate. (iii.) *Special Schools* are very numerous throughout the empire, special attention being devoted to agriculture, commerce, mining, forestry and music. *Secondary Education* generally is neither free nor comp., but abatement or remission of charges is discretionary. (iv.) *Universities*, State-maintained and administered, are: Berlin, Bonn, Breslau, Erlangen, Freiburg, Giessen, Gottingen, Greifswald, Halle, Heidelberg, Jena, Kiel, Leipzig, Marburg, München, Münster, Rostock, Strassburg, Tubingen, and Würtzburg.

Greece.—(i.) *Primary: free and nominally comp.*: age 5–12. Maintained by local taxation, with State grants. (ii.) *Secondary:* State-controlled, backward, especially in country districts. (iii.) *Special:* ill-attended. Private Trade and Industrial Academy at Athens instructs in local agricultural and commercial pursuits. (iv.) *University*, Athens, largely attended by Turkish subjects.

Italy.—The law of July, 1904, imposing special disabilities on the illiterate, has afforded a needed stimulus. Prior to that date 49 per cent. of the population over age 20 were thus classed. (i.) *Primary: secular, free and comp.* in the lower of two grades (age 6–9), where only lower grade schools exist, but comp. also in the higher grade (age 9–12) where schools have been provided. Evening continuation courses are compulsory for military recruits drafted to Territorial Army (see *Military Systems*), and illiterate recruits of the Acting Army are instructed in their corps. Maintained by local taxation, with State grants. Private establishments must conform to State curriculum. (ii.) *Secondary:* lyceums and gymnasia supply classical education and prepare for university, mainly State-maintained. (iii) *Special Schools*, State-maintained or State-aided, are increasing in numbers and attendance. (iv.) *Universities, State:* Bologna, Cagliari, Catania, Genoa, Macerata, Messina, Modena, Naples, Padua, Palermo, Parma, Pavia, Pisa, Rome, Sassari, Siena, and Turin. Many of these are of very ancient foundation (*e.g.*, Bologna, A.D. 1200). *Free:* Camerino, Ferrara, Perugia, Urbino.

Japan.—*Primary: Lower grade, comp., and free.* Age 6–10. Kindergarten and Schools numerous and well attended (82 p.c.). Some 55 p.c. complete the higher primary course, age 10–14, for which a small monthly fee of 30–60 sen (9*d.*–1*s.* 2*d.*) is required. (ii.) *Secondary:* State-aided public intermediate schools, 5-yrs. course. High schools prepare for the Universities with a 3-yrs. course, largely devoted to study of European languages. For girls, high schools, course 4–5 yrs., with extensions of 2–3 yrs. for special subjects. (iii.) *Special Schools* of industries, commerce, and technics are well attended. (iv.) *Universities: State*, Tokio and Kyoto.

Mexico.—Large numbers of the partially civilised native Indian races and many half-castes are entirely illiterate, and these categories comprise some 80 p.c. of the total population. (i.) *Primary: Free and nominally comp.*: maintained by local taxation, with Federal grants. Many private schools, mostly under clerical control. (ii.) *Secondary Schools* are not numerous, and attendance is not high. (iii.) *Special Schools* are better attended. (iv.) No University.

Netherlands.—System peculiar, in that private State-aided primary instruction is encouraged rather than public, though latter is provided by local taxation where private institutions are lacking. (i.) *Primary:* Age 7–13, *comp., and free* in public schools, maintained jointly by State and communes. Average attendance, 95 per cent. Disciplinary schools for neglected children. (ii.) *Secondary: not free*, numerous adult schools for working classes, others not numerous, but well-equipped and attended. (iii.) *Special Schools* make a feature of agriculture and horticulture. (iv.) *Universities:* Amsterdam, Groningen, Leiden, Utrecht, and a small private university.

Norway.—(i.) *Primary: comp. and free*, age 6–7 (town) or 7 (country) to 14. Schools maintained by local taxation, with State grants. (ii.) *Secondary* schools are State, local, or private; latter mainly for girls, many of the others are mixed. A complete and practical reformatory system, age 6–18 or 12–21, is State-aided. (iii.) *Special Schools:* chiefly industrial and technical institutes. (iv.) *University:* Christiania.

Peru.—(i.) *Primary: only nominally comp.*,

free in towns. Average attendance scarcely 30 per cent. (ii.) *Secondary:* Govt. high schools in provincial capitals, charging small fees. A few private schools controlled by foreigners. (iii.) *Special Schools:* confined to Lima School of Mines and Engineering. (iv.) *University:* St. Mark's (Lima).

Portugal.—(i.) *Primary: nominally comp. and free,* but over 70 per cent. of population over 6 yrs. of age remains illiterate. (ii.) *Secondary:* a State lyceum in each of the provinces, and a few municipal schools, also a good many private institutions. (iii.) *Special:* fairly numerous, but attendance small. (iv.) *University:* Coimbra.

Rumania.—(i.) *Primary: free and nominally comp.*, but number of schools is quite inadequate. Nearly 80 per cent. of population over 7 yrs. of age remains illiterate. (ii.) *Secondary:* considerable number of high schools tolerably well attended. (iii.) *Special Schools:* mainly of agriculture. (iv.) *Universities:* Bucharest, Jassy.

Russia.—(i.) *Primary:* very backward, especially in country districts. Probably not more than 8 per cent. of total population have received instruction of any kind. Control and maintenance of primary schools divided nearly equally between Ministry of Public Instruction and the Holy Synod (governing body of Græco-Roman Church). To the latter is allotted a large proportion of the sum annually voted for education by the Central Govt. In many of the remoter district schools are said to exist only on paper, and the qualifications of teachers are frequently *nil*. However, a distinct advance is perceptible. (ii.) *Secondary Institutions* comprise gymnasia and progymnasia and realschools (main features similar to Germany, *q.v.*), both for girls and boys, but numbers and attendance are alike small considering the enormous territorial area and population. The foundations of the Empress Marie (mother of the Tsar Nicholas I.) are administered by a private Imperial cabinet, providing gymnasia and institutes. The Holy Synod has numerous seminaries and intermediate schools for both sexes, and there are a few private schools. The Cossack *voiskos* (districts) maintain their own gymnasia and progymnasia. A bill will shortly be laid before the Duma which should materially assist the progress of both elementary and secondary education. (iii.) *Special Schools* are few, and confined to the principal cities of European Russia. (iv.) *Universities:* Kazan, Kiev, Kharkov, Moscow, Odessa, St. Petersburg, Tomsk, Yuriev, and Warsaw.

Finland.—(i.) *Primary: comp.*; age 7–15 yrs.; well-attended. (ii.) *Secondary:* lyceums (half being State-maintained); realschools and country high schools for both sexes, also well attended. (iii.) *Special Schools* make a feature of cattle-farming, dairy and agricultural instruction. (iv.) *University:* Helsingfors (admits women).

Servia.—(i.) *Primary: Free and nominally comp.*, but attendance does not exceed 25 p.c. State-aided. (ii.) *Secondary:* gymnasia and progymnasia, and girls' high schools, State-maintained. (iii.) *Special:* Schools are few. (iv.) *University:* Belgrade.

Spain.—(i.) *Primary: Nominally comp. and mainly free,* public schools maintained by local taxation. Many private schools are under clerical control, and recent legislation provides for closer supervision of their curricula, condition, and staffs. (ii.) *Secondary:* A high school in each province, curriculum defective. (iii.) *Special:* Schools few. (iv.) *Universities:* Barcelona, Granada, Madrid, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

Sweden.—(i.) *Primary: Comp. and free.* Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics and navigation. (iv.) *Universities:* Lund, Upsala, and a few private faculties.

Switzerland.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary: Free and nominally comp.*, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary:* Age 12–15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and the Neuchâtel Academy.

Turkey.—(i.) *Primary education (nominally comp.)* takes the form of instruction by Mahommedan priesthood attached to principal mosques, and is consequently deficient. (ii.) *Secondary:* Schools far from numerous; in a few, French or English is taught. (iii.) *Special Schools* scarcely exist. (iv.) The University of Constantinople, supposed to have been founded in 1900, has not yet materialized. Under the new *régime* conditions may improve.

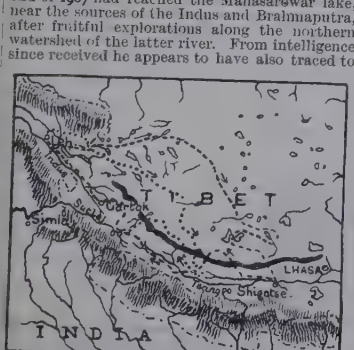
United States of America.—System of public instruction extends from the kindergarten to the university. Control is vested in the State and local authorities, the only Central Organisation being the Bureau of the Educational Commission, charged with statistical and advisory functions only. The number of illiterates is swollen by immigrants, and by the fact that some 44 p.c. of the coloured population receive no instruction. It is said that no home is beyond reach of a school, whilst in some cases pupils are conveyed to and fro at public expense. (i.) *Primary:* Age 8–14 yrs., *free and comp.* in majority of States, though in *all* the machinery is fully maintained. Eight grades of public primary schools, numerous kindergartens, and evening continuation classes in towns. Very many and well-equipped private institutions. Public schools are maintained by local taxation, Federal subsidies taking the form of income derived from grants of land. (ii.) *Secondary:* Numerous high schools, both public and private, including many so-called "colleges" and "universities," whose curriculum corresponds rather to that of a German gymnasium, or an English public school. A salient feature of the American system is *co-education* of the sexes throughout, there being comparatively few institutions where the tuition is not dual. The advantages of this have recently been strenuously disputed. Powerful aid is afforded by private and philanthropic initiative. (iii.) *Special Schools and Professional Establishments* are too numerous to mention, well-equipped and well-attended. (iv.) *Universities:* Those corresponding most closely to the British definition are California, the Catholic University of America, Chicago, Clark, Columbia, Harvard, the Johns Hopkins, Michigan, Pennsylvania, Princetown, Stanford, Wisconsin, and Yale.

P. R. COLES.

Europe.—Mention was made in this column a year ago of a disaster to an expedition to Iceland under Prof. von Knebel, who, with a companion, was thought to have been drowned in the lake of the Askja volcano. Some doubts having arisen as to the correctness of the first accounts, the *fiancée* of the missing explorer, Fräulein von Grumbkow, has in 1908 undertaken an expedition to the scene of the disaster, accompanied by a geologist, it being proposed to carry out geological research on the route across the island from the south coast. Accounts of the progress of the expedition have not yet been received, but meanwhile another traveller, Herr Erkes, has visited the Askja lake without finding any distinct clue to the fate of the travellers, though there is unfortunately no doubt that they have perished.

Political events in the Balkan peninsula during the autumn of 1908 seem likely to result in a permanent reconstruction of the map of this part of Europe, but matters are still so far from settled as to render any definite statement useless.

Asia.—The expedition which has attracted most attention during 1908, through the publicity given to it by journalistic enterprise, is that of Dr. Sven Hedin, who when heard of about the end of 1907 had reached the Manasarowar lake, near the sources of the Indus and Brahmaputra, after fruitful explorations along the northern watershed of the latter river. From intelligence since received he appears to have also traced to



ROUTES OF DR SVEN HEDIN
1906 ----- 1907 .....

their ultimate sources in the Himalayan glaciers some of the streamlets which feed the headstreams of those rivers. At the end of 1907 he set out on a new expedition in N.W. Tibet. Turning sharply east from the northern route to Khotan, and passing through an area previously explored by Capts. Deasy and Rawlings, he made his way south-east across a tract that had previously been quite unknown, suffering many hardships from the severity of the weather. Having assumed the disguise of a servant of his caravan-leader, he succeeded for some time, though with difficulty, in eluding the suspicions of the Tibetans; but after reaching the Brahmaputra valley in about 85° E., his disguise was penetrated by the authorities, and he was compelled to turn his steps homewards. On the return journey, as on the outward route, he considerably enlarged his acquaintance with the great range bounding the Brahmaputra valley on the north, known but vaguely prior to his journey to the same region in 1907. It was crossed in all some ten times by passes reaching to altitudes of 18,000 and 19,000 feet. Dr. Hedin was back at Simla in September.

Another meritorious traveller whose work was referred to in last year's summary, Dr. M. A. Stein, completed his journey in 1908, having gained equally valuable results in its later as in its earlier stages. As the traveller is a trained archæologist, they are of special interest from the light which they throw on the early history of the region. Leaving Aushi, on the southern border of the Gobi desert, he made for the snowy ranges of the Nanshan, discovering the ruins of an ancient town, and proving that the Great Wall of China had in the 2nd century B.C. a considerably greater extension west than has been supposed. With the help of his Indian surveyor, Ram Singh, he explored in detail a considerable part of the central Nanshan, which has peaks of 18,000 to 19,000 feet. Crossing the Gobi to Hami and Turfan, he continued his archæological work in Eastern Turkestan, both on its northern and southern borders, bringing to light many hitherto unknown antiquities, while the native surveyor, Lal Singh, who had now replaced Dr. Stein's former companion, did some valuable work in the Kuruk Tag and elsewhere. The expedition made a venturesome journey across the arid sand-dunes of the Takla-Makan desert to the termination of the Keriya river, which proved to have shifted its course within recent years.

Another of the great ranges of Central Asia, the Tian Shan, has been explored by Dr. Merzbacher, who had left Europe in company with the late Prince Arnulf of Bavaria in April, 1907. Before the severe winter of 1907–8 set in he had traced to their sources the principal rivers of the north-central parts of the range, bringing to light a number of glaciers and investigating the geology. Farther east the Russian explorer Kozloff started early in 1908 on a new expedition across the Gobi to N.E. Tibet, and reached the Kuku-nor region in June, having done good work *en route*. His intention was to continue his explorations in the difficult mountain region between Tibet and N.W. China. This same region was traversed during the year by the French traveller, Capt. D'Ollone, who, starting from Tong-king, had made his way north through some of the least-known parts of Western China, including the country of the independent Lolos, an interesting aboriginal tribe. Other French travellers who have been at work in western China are M. Bacot, who entered the south-eastern borderlands of Tibet; Dr. Legendre, who went south from Chengtu into south-western Sechuan; and M. Bons d'Anty, consul at Chengtu, whose itinerary extended also into Hunan. M. Bacot has given a useful account of recent political events on the western Chinese frontier, where the Chinese authorities seem to have thoroughly crushed the power of the Tibetan lamas. In the island of Hainan, the French traveller, M. Madrolle, has shed new light on the interior mountains and their primitive inhabitants.

An interesting journey, made in Burma in 1905 by Messrs. Litton and Forrest up the little-known middle course of the Salwin, has only recently been described in detail. During the summer of 1908 the American alpinists, Dr. and Mrs. Workman, carried out further explorations in the Himalayas, visiting, *inter alia*, the Hispar glacier in the extreme north-west of the range. Mention should be made of the publication by the Indian Survey Department of an important monograph on the Himalayas and neighbouring parts of Central Asia, and of investigations by the Geological Survey of India into the glaciers of the same range.

In western Asia, a journey on the northern border of the desert of Arabia has been carried out by Capt. S. S. Butler, and one which has as its object more extended topographical and antiquarian research in the same region has been begun by the Austrian savant, Prof. Musil. The arrival of the Turkish Hejaz railway at the holy city of Medina in the summer of 1908 was an important event for this part of the world, while an arrangement for the continuation of the Anatolian railway across the Taurus and Upper Euphrates to northern Mesopotamia was arrived at early in June.

Africa.—The most important expedition of the year in Central Africa was that of the Duke of Mecklenburg-Schwerin, who had started in 1907 on a journey across the continent from East to West, accompanied by a large staff of scientific experts. Important results—topographical, geological, botanical, and zoological—have been obtained from the region between the Victoria Nyanza and the eastern borders of the Congo basin, especially in the region of Lake Kivu and the great volcanoes to the north of it. Several of these were ascended and light thrown on their topography and geological history, while much was done to elucidate the distribution of plants and animals in this interesting borderland between the East and West African subregions. The zoological collections in the great equatorial forest through which the journey was continued to the Congo and West Coast were also of much interest.

No other very important expedition has been on foot during the year, though painstaking work has been done in various quarters. The German scientific expedition to the Kamerun, under Professors Hassert and Thorbecke has gained new insight into the physical geography of the Kamerun mountain and the tract extending north-east into the interior. An interesting journey has also been made by Baron von Stein in the central parts of the territory in and to the north of the basin of the Sanaga. In Nigeria steady progress has been made with the extension of British control over outlying portions, as well as with railway construction. A French expedition under Lieut. Ayasse (1907) to the oases north of Lake Chad has yielded some useful results from the point of view of geology, etc., while Lieut. Cortier has started south from Algeria on a new expedition for the astronomical determination of positions in the south-central and western Sahara.

In British East Africa journeys have been made by Mr. Darley in the region west of Lake Rudolf, and by Capt. Aylmer in the tract between the Athi and Tana rivers, in each case through districts that had previously been little known. The result of further levelling operations between the Victoria and Albert Nyanzas have been published, and have given an altitude for the latter which must be correct within very narrow limits. Explorations by Lieut. Comyn in the Sobat basin in 1904, and in the desert west of Wadi Halfa in 1906, have only lately been described.

Precise surveys in connection with various international boundaries have been actively proceeded with, *e.g.*, on the disputed frontier between British East Africa and the Congo; along both the northern and south-east frontiers of Nigeria; between Dahome and Togo, Liberia and the neighbouring French territories, and between German and Portuguese East Africa.

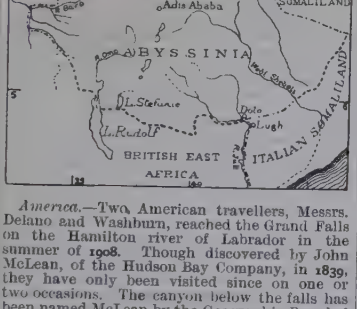
In political geography the most important event of the year has been the taking over of the Congo Independent State as a Belgian colony, after long and heated debates in the Belgian Chamber. The territory must henceforth be known as the Belgian Congo. By an agreement signed at Berlin on April 18, 1908, the eastern frontier of the Kamerun, with the neighbouring territory of French Congo, has at last been

THE NEW FRONTIER OF THE KAMERUN.

definitely settled, the line provisionally adopted some years ago having been considerably modified. Its new course, as laid down on the basis of recent precise surveys, is shown on the accompanying sketch. The southern frontier of Abyssinia was settled by agreements with Great Britain in January, and with Italy in May, 1908, and is also shown by a sketch map (p. 648). It will be seen that Italy has secured the important commercial centre of Lugh on the Jub river, which had been in the hands of Abyssinia for the past few years. East of the Webi Shebeli, the line is drawn at a distance of about 180 miles from the coast. The frontier of the Italian colony of Eritrea with Abyssinia in the Danakil country was also fixed as a line running at a distance of 60 kilometres from the coast.

Of the islands in the Indian Ocean the Komoro group was attached to the Government of Madagascar by a decree of April 9, 1908, while the small

British island of Coetivy was transferred from Mauritius to the Seychelles by Letters Patent dated January 13.



America.—Two American travellers, Messrs. Delano and Washburn, reached the Grand Falls on the Hamilton river of Labrador in the summer of 1908. Though discovered by John McLean, of the Hudson Bay Company, in 1839, they have only been visited since on one or two occasions. The canyon below the falls has been named McLean by the Geographic Board of Canada. A surveying journey, made in 1907, by Messrs. Bruce, Mostyn and Johnson in connection with a proposed railway across the northern half of Newfoundland, has been described in the *Geographical Journal*. In regard to recent changes in the region of the Lower Colorado, referred to in former issues of this Almanack, the formation of a new main mouth of the river on the east side of the head of the Gulf of California has been reported. An unusual rise in the level of the Great Salt Lake was also reported early in 1908, and seems to negative the current idea that the lake is drying up. Further progress has been made with the demarcation of the boundary between Canada and Alaska, both along the 141st meridian and in the more southern section defined by the arbitration of 1903. The exact determination and marking of the whole southern frontier of Canada with the United States was provided for by a treaty signed at Washington on April 11, 1908, and ratified on June 4. No definite alterations of the existing frontier are contemplated, but where the boundary is formed by branching watercourses established usage is to determine the exact course of the line, even though it may be at variance with the letter of previous treaties. The execution of the work is placed in the hands of Commissioners, and provision is made for arbitration if need arise. In South America, an interesting journey was made in 1907 by Prof. Hiram Bingham, accompanied by Dr. Hamilton Rice, along the route covered by the army of President Bolivar in 1819, through the interior parts of Venezuela and Colombia. Dr. Rice has since made further explorations in the extreme south-east of Colombia about the little-known headwaters of the Rio Negro. In Dutch Guiana the systematic exploration which has been in progress for some years under the auspices of the Dutch Geographical Society and other bodies has been continued in 1907 and 1908 by expeditions under Mr. de Goeje and Lieut. de Haan respectively. In south central Brazil additions to knowledge have resulted from the operations of Major Rondon for the construction of a telegraph line through the west of Mato Grosso, some of the routes having interseeted the headstreams of the Tapajos tributary of the Amazon. On the headwaters of the Madeira investigations, mainly anthropological, have been carried out by an expedition under Dr. Farabee (supported by the Peabody Museum at Boston), who is still in the field. An expedition to neighbouring parts of Peru and Bolivia has been undertaken by Dr. R. Schuller, also an anthropologist; while a German scientist, Prof. Knocke, has started for the Andean tableland for the purpose of physical research.

Further south the puzzling hydrography of the Pilcomayo (the main western tributary of the Parana), which has been the subject of many explorations during the past 25 years, has been further elucidated by the journey of two young Swiss-Argentines, the brothers Smied, who claim to have discovered the true course of the river (which forms the mutual frontier of Argentina and Paraguay), through the swamps between 22° and 24° S. Lastly, the Swedish expedition of Mr. Skottsberg to the extreme south of the continent has done some excellent work (geological, botanical, etc.) in the Falkland Islands, Tierra del Fuego, and south-west Patagonia.

Something has been done during 1908 towards a decision of pending boundary questions in South America. A treaty between Brazil and Colombia, signed in 1907, ratified April 20, 1908, fixed the mutual frontier between the Rio Negro and the Yapura, but a final settlement is delayed by the claims of Ecuador and Peru to territory south of the Yapura. Negotiations have also been in progress between Brazil and Peru respecting the disputed territory between 8° and 11° S. lat., and it has been agreed that a settlement is to be arrived at not later than May 31, 1909. The question in dispute between Peru and Bolivia, which was submitted to the arbitration of Argentina by the treaty of 1902, is still under consideration, the point at issue being the ownership of the territory immediately east of the Andes and south of 11° S. The two countries have, however, presented their arguments and replies, and a decision is expected shortly. The question of the ownership of the Chaco, which was assigned to Paraguay (as against Argentina) by the award of the President of the United States in 1878, but has since been claimed by Bolivia, has also been submitted to the arbitration of the President of the Argentine Republic, a protocol laying down the basis of a settlement having been agreed upon by the two countries concerned. A noteworthy event of the year has been the completion of the railway from Guayaquil to Quito, the capital of Ecuador being thus for the first time brought within easy reach of the ocean.

Australasia and Pacific.—A few areas in the Southern Alps of New Zealand remain imperfectly known, but this reproach seems in a way to be shortly removed. The great Douglas glacier, in Westland, situated in one of the most inaccessible parts of the range, was the goal of an expedition carried out in 1907 by Dr. J. M. Bell, Director of the Geological Survey of New Zealand, who described his explorations before the Royal Geographical Society in November of the same year. The glacier is noteworthy for the stupendous cliff—4,000 feet of ice and rock—separating the gathering ground from the main trunk. Other explorations, by Messrs. Grave, Marshall and others, in the difficult region between Milford Sound and Lake Te Anau, were

carried out in 1906 and previous years, though only lately brought within general knowledge. In Tasmania a more precise knowledge of the Ben Lomond range has resulted from the work Col. Legge and Messrs. Giblin and Piesse. In New Guinea—now one of the last remaining regions of promise for the explorer—an important expedition was carried out in 1907 by Mr. C. A. W. Monckton, who ascended the almost unknown Waria river near the Anglo-German frontier on the north-east coast, and crossed the island by a new route behind Mount Yule and down the valley of the Lakekamu river. At the opposite end of the island the Dutch have shown much exploring activity during recent years. The expedition of Mr. Lorenz, which started in the autumn of 1907 from Oost Bay on the south coast with a view to reaching the snowy range in the interior, was forced to turn back after penetrating to a point over 7,000 feet in height, whence a peak with an estimated altitude of 16,400 feet was seen, the same height being assigned to the snowy range further west.

Various German expeditions have been organised for ethnological research in the Western Pacific. The leader of one of these, Dr. Stephan, a young scientist of promise, died in May, 1908, and has been succeeded by Dr. Krämer, well known for previous work in the same field. The well-known writer, Mr. Louis Becke, has started on an expedition to the little-known island of Bougainville, in the Solomon group, the interior of which he hopes to explore. Scientific research of all kinds in the Pacific has been taken in hand by an organisation formed at Honolulu and known as the Pacific Scientific Institution. The magnetic survey of the same ocean has been completed by the United States ship *Galilee*, and it is understood that a special vessel is being built for the prosecution of similar work in the Atlantic and Indian Oceans. A German expedition for investigations into the phenomena of evaporation over the ocean has been undertaken by Dr. R. Lutgens.

Polar Regions.—Several expeditions have been in the field during 1908, but most of these have not yet reached a stage at which an appreciation of results is possible. Commander Peary has once more set out on his persevering quest of the North Pole, having sailed from Sydney, Cape Breton, on July 17. His safe arrival in northern Greenland has since been announced. As before, he intends to establish a base on the northern shore of Grant Land, but hopes to transport sufficient stores over the ice to enable him to start on the final dash with fully-laden sledges. Dr. F. A. Cook, who, as announced a year ago, started in 1907 on an expedition towards the Pole by a route to the west of Ellesmere Land, had not been heard of at his base down to August, 1908. In the same quarter the Dane, Knud Rasmussen, made a sledge expedition across Smith Sound to Ellesmere Land in 1907, with a view to studying the possibilities of a more extended expedition through the Arctic Archipelago to the west. He returned to Denmark in 1908, and is understood to be planning a new expedition. The Danish expedition to East Greenland, under Rasmussen's former chief, Mylius Erichsen, has experienced disaster in the loss of the leader and two companions, though the rest of the party have reached home in safety. Various sledge parties had made their way in 1907 to the north-east coast of Greenland, and that under Erichsen himself perished in a vain attempt to return, its fate not being ascertained until the next spring. Researches were meanwhile carried out by the other members of the expedition, both on the east coast and on the inland ice.

During the summer of 1908 a Swedish expedition, under Prof. de Geer, carried out surveys and observations in the neighbourhood of Ice Fiord, Spitsbergen; while a French expedition, under Capt. Bénard, sailed early in the year with a view to research in the fields of oceanography, marine biology and meteorology on the coasts of Novaya Zemlya and the Kara Sea. Its vessel, built specially for the purpose, is named the *Jacques Cartier*.

Of prospective expeditions, the most important is that of the Norwegian, Capt Roald Amundsen, of North-West Passage fame, who proposes to drift across the North Polar basin by a route starting from the vicinity of Bering Strait.

The British Antarctic Expedition, under Mr. E. H. Shackleton, sailed from Lyttelton, New Zealand, on Jan. 1, 1908, its vessel, the *Nimrod*, being towed as far as the ice by the *Koonya*, belonging to the Union Steamship Co. of New Zealand. The *Nimrod* returned in March, reporting that the explorers, 15 in all, had landed at winter quarters near Mount Erebus, Mr. Shackleton's intention of using King Edward VII. Land as a base having been frustrated by the heavy ice and severe weather encountered. It was hoped to make a bold push towards the Pole from the winter quarters. The *Nimrod* sailed again in the autumn to re-open communications with the wintering party, of whom news may be expected next spring. A second Antarctic Expedition, that of the French savant Dr. Charcot, is also in the field. A new ship, the *Pourquoi pas?*, was built for the purpose and left Havre on August 15. The field of work, as on Dr. Charcot's former expedition, is the region south of Cape Horn, and the explorer expects to be absent two years.

General.—An encouraging sign of geographical progress in this country is the general movement lately manifested for the establishment of Chairs of Geography at the Universities. Early in 1908 Mr. G. G. Chisholm was appointed to the newly-created Professorship of Geography at Edinburgh University, while a similar appointment is expected to be made before long at Glasgow. At Sheffield Mr. R. N. Rudmose Brown, a member of the recent Scottish Antarctic Expedition, has been appointed Lecturer in Geography. The teaching of geography at Cambridge has been reorganised and additional lecturers appointed. A new British Geographical Society has been formed at Leeds, and was inaugurated by an address from Sir Clements Markham on October 2.

Literature.—Among the narratives of travel published during the past year are: Capt. Amundsen's "North-West Passage;" Mr. A. H. Harrison's "In search of a Polar Continent;" Lieut. Boyd Alexander's "From the Niger to the Nile;" Dr. and Mrs. Workman's "Ice-bound Heights of the Mustagh;" Count de Lesdain's "From Pekin to Sikkim;" Mr. R. F. Johnston's "From Peking to Mandalay;" and Dr. F. A. Cook's "To the Top of the Continent" (Mt. McKinley, Alaska). Other important works are Lord Cromer's "Modern Egypt," and Sir H. Johnston's "Richard Bentley and the Congo."

EDWARD HEAWOOD.

An Analysis of the Army Estimates, 1908–1909.

ARMY Estimates may be investigated from many standpoints and on many widely divergent lines, according to the predilections of the critic and the nature of the statistical information he desires to extract.

One of these standpoints, however, and one of these lines of investigation, though by no means the most frequently selected, stand out from all the others as being of pre-eminent importance.

The military potential of the State is to be measured primarily by the numerical strength and technical efficiency of its matured, fully-trained, and fully available combatant elements.

It is of particular moment that this line of investigation should be inculcated to-day, when a tendency is becoming increasingly apparent to substitute for an erstwhile dangerous reliance on "fortifications" and fixed defences an equally fallacious reliance on organisations whose *personnel* is, by reason of the limitations imposed upon it by legal constitution and terms of enlistment, but partially trained, whilst available only for the internal defence of the United Kingdom, i.e., *strategically immobile*.

In other words, whilst it seems highly improbable that the recently constituted Territorial Army can ever approach very closely to its nominal establishment on a basis of voluntary engagement, it is to be feared that the efforts made to accomplish this end may bring about, in the uninstructed popular estimation, an overshadowing of the more vital needs of the Regular Army in general and of the Regular *Field* Army in particular.

There is evidently grave danger of both money and attention being diverted from their proper destination in the Regular Active Army and its Reserves to strategically immobile formations, and the inevitable weakening of our military position, already sufficiently precarious.

It cannot be urged too emphatically that the predominant strategic need of the British Empire is the availability for prompt transport (*wherever required*) of the largest and most efficient Field Army that can be maintained in these islands with due regard to population, economy in finance, and continued assurance of that maritime superiority upon which our existence and any oversea operations must ever depend.

When a considerable Field Army has been despatched oversea, to act in close concert with the Fleet, the local security of the British Islands will be best assured by the presence therein, not of large forces available for that purpose alone, but of forces which, whilst *disposed* so as to repel raids, and *numerically formidable* enough to render prospects of invasion prohibitively unattractive, are yet (at least as regards the major portion) so trained and organised as to be available on demand both for the maintenance and

NOTE.—In Oct., 1908, the Territorial Army, organised from the former Yeomanry and Volunteers, showed a deficit of 123,418 on its nominal establishment of 302,199.

the expansion of the Active Army in its theatre of operations.

The new *Special Reserve*, which has superseded the Militia, is available for these purposes, but is recruited with difficulty. The new *Territorial Army*, with an exaggerated establishment, is not so available (special engagements of individuals or voluntary offers of units of course excepted), and, whilst clearly an advance upon the former ill-organised Volunteer Force, experiences similar difficulties in regard to enlistment and training.

The next logical step in development, already contemplated in many circles, involves cessation of direct recruiting for the Territorial Army, and the application of legal universal liability to service either in the Fleet or in the Home Army, the latter forming a reservoir at once larger and more efficient than the present *ensemble* of Home Regulars, Special Reserve, and Territorials, from which the peace garrisons of our dependencies would continue, as heretofore, to be recruited by voluntary engagement.

The Territorial Army would then be constituted by the entire classes of men who had been trained in the Active Army and completed their periods of service in its Reserves.

Such a development would bring our military system into line with that universally adopted—in many cases as the result of disastrous experience—by all the other military Powers, and would meet all possible contingencies.

Meantime, the nominal "order of battle" of the Expeditionary Force, which must be regarded as the *maximum* of our present aspirations in the way of a Field Army, stands as follows:—

(*a*) 1 *Cavalry Division*, comprising HQ., 4 cav. bdes. (each of 3 rgts.); hq. and 2 bdes. R.H.A. (each of 2 btys.); hq., 4 field troops and 1 wireless tel. coy. R.E.; T. and S. column A.S.C.; 4 field ambulances R.A.M.C.

(*b*) 6 *Divisions*, each comprising HQ., 3 inf. bdes. (each of 4 bns.); 2 coys. mtd. inf.; hq., 3 bdes. (each of 3 btys.), and 1 howitzer bde. (of 2 btys.) R.F.A.; 1 heavy bty. and A.C., R.G.A.; divl. A.C.; hq., 2 field coys. and 1 divl. tel. coy. R.E.; T. and S. column A.S.C.; T. and S. park; 3 field ambulances R.A.M.C.

(*c*) *Army Troops*, comprising Army HQ., 2 *mtd. bdes.* (each hq. and 1 rgt. cav., 1 bty. R.H.A., and A.C., 2 bns. mtd. inf., T. and S. column, 1 field amb.); 2 sqq. yeomanry; 1 bn. inf.; 1 wireless, 2 cable tel. coys., 3 balloon coys., and 2 bridging trains R.E.; T. and S. column, 2 field ambulances, R.A.M.C.

Total strength.—Combatants, 121,974; non-combatants, 12,099; staffs, &c., 1,275.

In addition, a considerable but quite indeterminate force would be required for duty on the lines of communication of the Field Army.

The *personnel* of the above must be found from the Regular Active Army at home, its Reserve, and a small proportion of the Special Reserve

(whose principal function is that of replacing wastage).

In the tables the term "sedentary" is used to describe troops whose *rôle* is passive; the term "non-mobile" to distinguish formations that are legally available for Home Defence only.

From these tables it will be evident that mobilisation of the Expeditionary Force *alone* (excluding Troops for Communications) would absorb 14 cav. rgts. out of 16, *all* service batteries R.F.A., and 73 inf. bns. out of 78. This exhaustion of constituted Regular *units* is no less serious than exhaustion of Reserve *personnel*. Further, some 15–20 per cent. of the Regular Peace Effective is immature, as also is a high proportion of the Special Reserve. On the other hand, the provision of *training units* seems adequate, always provided they remain free to play that *rôle*.

A reduction of establishment in S. Africa is contemplated, but these peace garrisons might, not improbably, require reinforcing (and would in any case require drafts for maintenance), apart from the Expeditionary Force, its mobilisation, and its wastage.

Under the head of Finance, Table B, shows a digest of the Army Estimates arranged to make clear the unduly large expenditure on sedentary and non-mobile formations, and the relatively small proportion borne by the cost of fully-trained mobile elements in the United Kingdom, to the aggregate outlay.

It must be remembered, moreover, that this disproportion must *increase* in the future, since the Regular Army Reserve will rapidly diminish in response to the longer periods of colour service now obtaining, whilst the Territorial Army may be expected to approach somewhat more closely to its nominal establishment, and there are already indications of a demand for its better training—*i.e.*, for more money.

The remainder of the Regular Army is accounted for as follows:—

P. R. COLES.

THE FIRST ATLANTIC CABLE.

AUGUST 5th of last year was the fiftieth anniversary of the Atlantic Cable, that being the day of the month in 1858 on which—contrary to authoritative opinion—the engineer of one of the greatest achievements of the nineteenth century completed the laying of the submarine line between Ireland and Newfoundland, the length being over two thousand miles, and the depth nearly three miles for the greater part of the distance. The projectors were Mr. John Watkins Brett, Mr. (afterwards Sir Charles) Bright, and Mr. Cyrus West Field. Mr. Bright was also the engineer-in-chief of the undertaking, and he received the honour of knighthood in recognition of his services to the country in connection therewith, at the unprecedented age of 26.

Electrical theories were, however, mistaken at that time, and the electricians applied far too much power for the transmission of signals; the result being that the insulation suffered by degrees, until after three months' useful work the cable gradually succumbed.

After a number of cables had been laid by Sir Charles Bright, Mr. H. C. Forde, Sir William Siemens and others to India, Gibraltar, Alexandria, &c., another Atlantic Cable expedition started in 1865. This was the first line that was laid by the manufacturers of the cable, these contractors being the Telegraph Construction and Maintenance Company, with Mr. (afterwards Sir Samuel) Canning for their chief engineer, whilst Sir Charles Bright and Mr. Latimer Clark acted as consulting engineers to the proprietors.* Notwithstanding the extra knowledge and experience gained in regard to the subject generally, this expedition met with as many mishaps as the first expedition of 1857; but in 1866—as in 1858—the same arrangements ultimately achieved success, since which the construction, laying, and working of submarine telegraphs has passed from the pioneer stage to that of ordinary routine.

The engineering methods were similar to those adopted eight years previously; but the line proved a lasting success, owing to the advances made in electrical science and in the practical working of cables. On the electrical side, in addition to the late Lord Kelvin, the names of Varley and Willoughby Smith must always be honourably associated with the subject, and the late Sir John Pender did more than any man for the commercial development of submarine telegraphy.

* "Submarine Telegraphs: Their History, Construction and Working," by Charles Bright, F.R.S.E., M.I.E.E. (London: Crosby Lockwood & Son.)

THE arguments for and against the high-speed, all-big-gun capital ship have at last been set at rest—for some years, at all events—by the adoption of the type in all the important navies of the world, with the single exception of the French. In its main characteristics, more especially with regard to its single-calibre armament, the Dreadnought type, as it has come to be called, is not so great a "revolution" as is generally imagined. The previous *Dreadnought* borne on the Navy List, which was launched in 1875, had an all-big-gun armament, though her comparatively small displacement did not permit of more than four 12-in. weapons being carried. From this point of view, therefore, the present *Dreadnought* is simply a reversion to an earlier type, but from another, and perhaps a more rational one, she is the logical outcome of continuous progress. When the battleships of the Royal Sovereign type were designed in 1889, they were given an armament of four 13·5-in. and ten 6-in. guns. In the succeeding Majestic type (1893) the calibre of the main armament was reduced to 12 inches, and the number of guns in the secondary battery increased to twelve. From 1893 to 1901, six classes of battleships were designed for the Navy, namely, *Majestic* (1893, 14,900 tons, nine ships); *Albion* (1896, 12,950 tons, six ships); *Formidable* (1897, 15,000 tons, three ships); *London* (1898, 15,000 tons, three ships); *Albemarle* (1899, 14,000 tons, six ships); and *Queen* (1901, 15,000 tons, two ships). In each of these succeeding classes the armament remained unchanged—four 12-in. and twelve 6-in.—although, of course, improvements in the manufacture of ordnance have made the *Queen's* armament much more powerful than the *Majestic's*. With the class of battleship provided for in the Estimates of 1901–2, however, the first step towards the all-big-gun armament was taken. Owing to improvements in the manufacture and distribution of armour it was thought advisable to reinforce the main battery of the new ships with something more powerful than the 6-in. gun, which fires a shell of only 100 lb., and is quite ineffective against even 6 inches of Krupp armour at 3,000 yards. Consequently, the eight ships of the King Edward class (1902, 16,350 tons) were given, in addition to four 12-in. guns, four weapons of 9·2-in. calibre, firing a 380 lb. shell, the number of 6-in. guns being reduced to ten. The United States Navy Department, whose designs generally followed British practice, took an equally progressive step, arming the *Louisiana* and *Connecticut* (1902, 16,000 tons) with four 12-in., eight 8-in., and twelve 7-in., while the Japanese gave the *Kashima* and *Katori* (1903, 16,400 tons) four 12-in., four 10-in., and twelve 6-in. Experience with the ships of the King Edward class showed that very serious difficulties attended the practical working of a three-calibre armament such as was mounted in them. Not only was considerable confusion caused by the storage of so many different sizes of ammunition and its service to the guns in action, but in the system of fire-control which had been evolved out of the new spirit of gunnery efficiency which began to animate the whole of the Navy about the beginning of this century, it was found that the multiple-calibre armament presented insuperable obstacles to good shooting, owing to the inability of the control officers to distinguish between the splashes made by the various sizes of shells. Further, armour improvements were throwing the 6-in. gun still further into the background. The cumulative effect of these considerations was seen in the design of our next new battleships (*Lord Nelson* and *Agamemnon*), which, on a displacement of 16,500 tons, were given an armament of four 12-in. and ten 9·2-in. guns, while, in anticipation of the effect of this move on foreign Powers, the main armour belt was increased from 9 inches, which up to then had been the standard, to 12 inches.

The type of battleship represented by the *Lord Nelson* is regarded in many quarters as at least equally as effective as the *Dreadnought*, all things considered, save for the fact that owing to the unsatisfactory arrangement of the anti-torpedo battery of 12-pounder guns, they present an undesirably large target. It was the question of fire control almost alone which dictated the final introduction of the all-big-gun type, which, it will be seen, was not a revolution in design, but an evolution brought about by the continually increasing power of the secondary armament. This is not the place to enter upon a discussion of the comparative merits, strategical and tactical, of the two types—single and mixed calibres. The British official view of the *Dreadnought* is obtainable, and the U.S. Navy Department has also issued a memorandum on the tactical qualities of the type. Its comparison with the *Lord Nelson*, which may be taken to represent a typical mixed calibre ship (save in speed, which could be improved by the replacement of the reciprocating engines by turbines), is as follows:—

	Dreadnought.	Lord Nelson.
Displacement (nominal)	17,900 tons	16,500 tons
Horse-power	23,000 (turbine)	16,750
Speed (trial)	21 knots	19 knots
Armour:		
Main belt	11 in.	12 in.
Upper belt	11-8 in.	8 in.
Gun barbettes	11 in.	14 in.
,, turrets	8 in.	8 in. (12-in. guns) 7 in. (9·2-in. guns)
Cost	£1,797,497	£1,500,000
Weight of broadside	6,800 lb.	5,300 lb.

As five rounds can be fired in two minutes from the 9·2-in. to two rounds from the 12-in., the weight of the broadside fire would soon turn in the *Lord Nelson's* favour.

There never has been, is not now, and probably never will be unanimity in battleship design amongst naval Powers. Not only has each nation to deal with a different set of conditions, but each may have different information at its disposal, to say nothing of different methods of interpreting it. The result is that although the principle of the *Dreadnought* has been accepted in every country, with the exception of France, no two designs are alike. The *Dreadnought* and the first batch of ships which followed her in the British Estimates for 1906·7 (*Bellerophon*, *Temeraire* and *Superb*, 18,600 tons) are practically identical. Three of the five two-gun turrets are placed on the centre-line, one forward of the superstructure and two aft, the latter being on the same level and therefore unable to concentrate their fire astern. The remaining turrets are placed on the beams, well forward. The result is that these four ships are able to bring six guns to bear ahead or astern, and eight on

the broadside. In the second batch (*St. Vincent*, *Collingwood* and *Vanguard*, 19,250 tons) provided for in the 1907–8 Estimates, the level of the inner of the two after-turrets is believed to be raised so as to enable its guns to fire over the end turret, thus increasing the astern fire to eight guns. This arrangement will stand, it is understood, for the battleship which is to be built at Portsmouth under the 1908–9 Estimates.

The most notable improvement in the design of British Dreadnoughts so far has been in the anti-torpedo-boat armament. In the *Dreadnought*, twenty-seven 12-pounders were mounted for this purpose, but the size of torpedo craft had been increasing so rapidly that this was everywhere denounced as a grave error. No alteration has yet been made in the light armament of the *Dreadnought*, but in the later battleships twenty 4-in. guns, firing a shell of 25 lb., are installed for repelling torpedo attack.

The *United States* was the first foreign nation to follow the British lead in the construction of all-big-gun battleships, but their first efforts cannot be regarded as Dreadnoughts in the sense of the word as now accepted. The *South Carolina* and *Michigan* were laid down in July, 1906, and are to be completed in June, 1909. They are of 16,000 tons displacement, and are armed with eight 12-in. guns paired in turrets on the centre-line, two forward and two aft. The guns of the inner turrets—those nearer the centre of the ship—fire over the outer turrets. It will be seen that the broadside fire of these ships is eight 12-in.—the same as the *Dreadnought*—but only four can be fired ahead or astern. The armour of the American ships is very deficient, the main belt being only 8 ft. wide and covering only 300 *ft.* out of a total length of 450 ft. The battleships provided for in the Appropriations for 1907 (*Delaware* and *North Dakota*) and 1908 (*Florida* and *Utah*) are much more powerful ships. Their displacement is 20,000 tons, and the armament has been strengthened by the addition of a fifth two-gun turret, placed, as it were, astern of the aftermost turret in the *Michigan*, on the centre-line. The broadside fire of these ships is thus ten 12-in., with four ahead or astern. The protection, too, is much more efficient, the main belt having a width of 15 ft. 8 in., and a thickness of 12–10 in.

Like our own Admiralty, the United States Navy Department has found it necessary to modify the anti-torpedo-boat armament of her Dreadnoughts. In the *South Carolina* and *Michigan* this consists of twenty-two 14-pounders, but in the vessels of the 1907 and 1908 programmes fourteen 5-in. (70-pounders) have been mounted, and are arranged in a 5-in. non-cemented steel battery amidships. A curious feature about the latest United States ships is the disposition of the masts. In the *South Carolina* one is placed on either beam, beside the funnels, while in their successors one is placed on either beam, between the funnels, a flying bridge connecting the two at a height of about 70 ft. above the water-line. The fire-control platforms are not, as in British ships, placed on the masts, but on two separate towers, one before the fore-funnel and one behind the after. These towers are constructed of latticed steel tubes of about 2-in. diameter, the towers being 25 ft. in diameter at the base and 10 ft. at the top. The design was found eminently satisfactory in the experiments which were carried out in 1908 against the monitor *Florida* (now renamed *Tallahassee*). The engines of the *South Carolina* and *Michigan* are of the reciprocating type, developing 16,500 h.p. for 18·5 knots. The *Delaware* also has reciprocating engines, but the *North Dakota* is to be equipped with Curtis turbines, the h.p. in both cases being 25,000, and the speed 21 knots. The 1908 ships will both have Curtis turbines, and will develop the same speed.

In *Germany* the Dreadnought type of battleship was adopted with considerable reluctance, and only after an exhaustive, but unsuccessful, search for a type which, while capable of meeting a Dreadnought in single combat, should enable the concurrent expenses necessarily attached to the adoption of an 18,000-ton standard to be avoided. Even in producing the 13,200-ton ships, which were the German standard up to 1905, a great outlay for the building of docks and the dredging of harbours had had to be met, and it was realised that this would have to be repeated should it be essential after all to lay down 18,000-ton ships. Eighteen months of inactivity and empty slips, however, occupied with a vain search for an alternative, ended in July, 1907, with the commencement of two ships which, under the 1900 Navy Act, should have been laid down in 1906. At the same time—a fact eloquent of the expenditure which this decision rendered necessary in other directions—it was decided to enlarge the Kiel Canal to allow of the passage of the new ships, at a cost of ten millions sterling. The two battleships, named *Nassau* and *Westphalen*, are to be of 17,760 tons, while their speed, with reciprocating engines, will be 19 knots with 20,000 h.p. The 11-in. gun, which has been mounted as the main armament of all German battleships laid down since 1901, when it replaced the 9·4-in., is retained in these ships, and no fewer than twelve will be mounted. The disposition of the armament will be the same as in the United States ship *Michigan*, with the addition of two 2-gun turrets placed *en échelon* amidships. It is uncertain yet whether the four 'midship guns will be able to be concentrated on either broadside. If they can the broadside fire will be twelve 11-in. guns; if not, ten 11-in. The ahead and astern fire in either case will be eight guns. The 11-in. weapon, it should be noted, fires a shot of 760 lb., to the 850 lb. of the British 12-in.; but its muzzle velocity is 3,250 ft.-secs., to the British gun's 2,900 ft.-secs.; and this, coupled with its smaller weight (49 tons to 58) and the smaller weight of the mountings required, is held to make it at least as efficient a weapon as the heavier type. The German ships also have a secondary armament—which is also, apparently, the anti-torpedo-boat armament—of twelve 6·7-in. guns, firing a shell of 132 lb. and capable of penetrating 5 in. of Krupp steel at 5,000 yds.

The details of these ships, as well as those of their successors, have been carefully guarded by the German Admiralty, and with such success that the particulars of the 1907 and 1908 ships are still doubtful. It is believed, however, that the *Rheinland* and *Ersatz Baden*, of the 1907 programme, will displace 17,960 tons and steam 20 knots with engines of 22,000 h.p.; and that the *Ersatz Oldenburg*, *Ersatz Beowulf*, and *Ersatz Siegfried*, of the 1908 programme, will also be of 17,960 tons, but will carry 12-in. guns instead of 11-in. as their main armament. Preparations have

been made for the commencement early in 1909 of the *Ersatz Frithjof*, *Ersatz Heimdall*, and *Ersatz Hildebrand*.

Italy may be regarded as the birthplace of the Dreadnought, for it was Colonel Cuniberti, the gifted Italian naval constructor, who, in "Fighting Ships" for 1903, first outlined an "Ideal Battleship for the British Fleet," armed with twelve 12-in. guns and steaming 24 knots. In his own country the type is represented by one ship now under construction, which will approach more nearly to the original "ideal" than any yet designed. The vessel, which is as yet unnamed, will be of 19,000 tons displacement, and its armament will consist of twelve 12-in. guns, with eighteen 4·7-in. (45-pounders) for repelling torpedo attack. The speed will be 24 knots with engines of 30,000 h.p. According to *Die Flotte* the heavy guns will be mounted in threes, the four turrets being so arranged as to allow of all guns training on either broadside. Three others of the class are projected. It is interesting to note that after the Russo-Japanese war, Col. Cuniberti declared that the 12-in. gun was no longer sufficiently powerful for the main armament of battleships, and that a calibre of 16 inches was desirable, while 13·5 inches might be accepted as a temporary compromise. It is stated that the Italian Government is still considering the advisability of altering the armament of this new battleship to eight 13·5's.

The doings of *Japan* have naturally been watched with considerable interest, in consequence of the experience which that Power is able to bring to bear on all questions connected with naval warfare. Prior to 1905 all Japanese armoured ships were designed and built outside the country—chiefly in England; but by 1905 the native dockyards had been so enlarged and equipped as to enable them to undertake the construction of the largest armoured ships. In 1905–6 the battleships *Satsuma* (19,350 tons) and *Aki* (19,800 tons) were laid down. They are copies, with considerable improvements, of the British *Lord Nelson* type, each having an armament of four 12-in. and twelve 10-in. guns (500 lb. shell), with twelve 4·7-in. in the case of the *Satsuma* and eight 6-in. in the case of the *Aki*. The former has reciprocating engines of 17,500 h.p., and the latter Curtis turbines (built in the United States) of 22,000 h.p., the respective speeds being 20 and 20·5 knots.

Following upon these ships, and still pursuing their policy of "after but before" Great Britain as regards date and power respectively, the Japanese naval authorities adopted the all-big-gun type. Two such battleships are now under construction in the Imperial yards at Kure and Yokosuka, their displacement being 20,800 tons. The design, which, however, is liable to alteration, allows for the mounting of no fewer than fourteen 12-in. guns. Two turrets are on the centre-line, one forward and one aft, and in each of these are mounted three 12-in. guns, the remainder being paired in turrets at the four corners of the superstructure. In the secondary battery there will be ten 6-in. and twelve 4·7 in. guns. Details of the protection are not available, but the speed will be 20 knots with Curtis turbines of 25,000 h.p. The broadside fire will be the same as in the U.S. *Delaware* class (with only ten guns all told), and the head and astern fire less by one gun than the German *Nassau* with twelve). Two more of the class are about to be laid down.

The *Russian* Government decided in 1906 to build two battleships of 20,000 tons and 21 knots, but no progress seems to have been made with them, although the official (British) Dilke Return represents one as building. Their armament is to be ten 12-in. and twenty 4·7-in. guns, with a main belt 11 inches thick.

Three battleships are under construction in this country for *Brazil*. Their names are *Minas Geraes*, *Sao Paolo*, and *Rio de Janeiro*, and they will be of 19,250 tons displacement with a speed of 21 knots. Their armament comprises twelve 12-in. guns (ten on the broadside) and twenty-two 4·7-in., but their protection is defective, consisting of a belt only 9 inches thick. In spite of rumour to the contrary these ships are intended for the Brazilian Navy and will not be sold.

France is the only naval Power which has not yet shown any signs of adopting the Dreadnought type. When the designs of the battleships provided for in the 1906 Budget were under discussion in the Superior Council of the Marine, many divergent proposals were put forward, from a single-calibre armament of 9·4-in. guns to a mixture of 12-in., 9·4-in., and 7·6-in. The final choice was in favour of four 12-in. and twelve 9·4-in.—that is to say, a copy of the *Lord Nelson*, with the addition of two 9·4-in. guns. There is nothing noteworthy about these ships except the large area covered by armour. Their displacement is 18,400 tons, and their speed, with Parsons turbines, 19·25 knots. It is interesting to note that the ships laid down for the French Navy in 1901–2 (*République* and *Patrie*) carry four 12-in. and eighteen 6·4-in.; in 1903 the *Democratie*, *Justice*, *Liberté*, and *Vérité* were given ten 7·6-in., in place of the 6·4's; while the newest (*Danton*, *Mirabeau*, *Diderot*, *Condorcet*, *Voltaire*, and *Vergniaud*) have twelve 9·4's in the place of the 7·6's in the secondary battery. There is, therefore, precisely the same tendency at work in France as that which in England produced the all-big-gun ship, and there is little doubt that the next batch of ships will follow foreign practice.

The above review includes all battleships designed since 1904, of 16,000 tons or over.

Dreadnought Cruisers.

The direction taken by the development of the armoured cruiser is due chiefly to the change in its designed *rôle* in naval war. Its *raison d'être* was at first taken to be scouting in advance of the main body of the fleet, with power to push the reconnaissance home if necessary or advisable, and the attack or defence of ocean commerce. Now, however, the view of its *rôle* is quite different. Modern vessels of this class are no longer, save in official phaseology, "armoured cruisers," but "cruiser-battleships" or "cruiser-Dreadnoughts," terms which indicate accurately their position in a war fleet. They are fast battleships, designed to act as the "fast wing" of a battle squadron, but still capable of discharging the purely cruiser duties of scouting and attacking or defending commerce should occasion arise. Their first requisite is therefore, under all heads, speed; and the designed speed of armoured cruisers has increased from 21 to 25 knots in seven years. At the same time it was necessary, in view of the battle side of their new *rôle*, to increase their offensive powers; and it is interesting to notice that this was effected up to a certain

point in the same way as with battleships—by the gradual increase of the calibre of the secondary armament. Our first modern armoured cruisers (Cressy class) carried two 9·2-in. and twelve 6-in. guns; then, after other classes with practically the same armament, came the *Black Prince*, with six 9·2-in. and ten 6-in., followed first by the *Warrior*, with six 9·2-in. and four 7·5-in., and later by the *Defence*, with four 9·2-in. and ten 7·5-in.

The "cruiser-battleship" designation, however, postulates ability to lie in the line with battleships; consequently it was essential that the armament of the cruisers should be brought into line with that of the heavier ships, for otherwise it would be of no use at ranges at which the battleship is designed to fight. In the Invincible class (*Invincible*, *Inflexible* and *Indomitable*, 17,250 tons) laid down in 1906, eight 12-in. guns were therefore mounted, two turrets being on the centre-line, forward and aft, and two *en échelon* amidships, thus allowing of a broadside fire of eight guns and an ahead and astern fire of six. The anti-torpedo-boat guns are sixteen 4-in., and the engines are Parsons turbines of 41,000 h.p., which in each case gave a speed of over 27 knots on trial, 25 being designed. The main armour belt is Krupp, 7 inches thick, and although this is small compared with the *Dreadnought's* 11 inches, it is better than the 6 inches Harvey nickel of the Canopus class, or the 9 inches Harveyed steel of the Majesties, and equal to the 7 inches Krupp of the Russells, all of which are battleships. The cost of these ships is, however, enormous —the Invincibles average £1,725,000 each—and as they are what may be called "luxuries" whose full value can only be extracted by a Power with a great battleship superiority, it is not surprising that they are not being copied to anything like the extent that the *Dreadnought* is. British programmes even have only provided for one since 1905—in the 1908–9 Estimates —and particulars of the ship are being kept secret. She will probably resemble the Invincibles very closely, so as to complete a homogeneous Dreadnought squadron of eight battleships and four cruisers. She is to be laid down at Devonport early in 1909.

The only foreign Power which has so far followed our lead is *Germany*. The *Blucher*, which was commenced in 1906, is a small edition of the type, but is, nevertheless, a formidable vessel, against which none of our pre-Dreadnought armoured cruisers could stand. She is of 14,760 tons and is armed with twelve 8·2-in. and eight 5·8-in. guns, the arrangement of the main armament being the same as in the Nassau class of battleships. Her speed is to be 22·5 knots, obtained with reciprocating engines of 35,000 h.p. Her estimated cost is £1,375,000.

The comparatively small speed and displacement of the *Blucher* are believed to have been due to a misconception in Germany of the size and speed of the British Invincibles. When details of the latter became known, Germany laid down (in 1907) a vessel known at present as the "F," of 18,700 tons and a speed of 25 knots, to be obtained with turbine engines of 45,000 h.p. This vessel will be even more truly a battleship-cruiser than our Invincibles, for her main armament is to be the same as that of the *Nassau*—twelve 11-in. The secondary battery of 6·7-in. guns will, however, be sacrificed, and only 24-pounders mounted for defence against torpedo attack. Protection will be afforded by an 8-in. belt, 6 inches thick at the bow and 4 at the stern, the corresponding figures for the Invincibles being 7, 4, and 3 inches, and for the *Blucher* 8, 4, and 3 inches. The "F" is therefore superior to the British ships, both in armament and protection, and equal in speed. A third German cruiser-Dreadnought—"G"—is building, and a fourth is to be laid down early in 1909, but details are lacking.

For the *United States* Navy no armoured cruisers have been laid down or provided for since 1905, when four ships of the Washington class were commenced. They are by no means as powerful as the *Invincible*, being of 14,500 tons and 22 knots, and armed with four 10-in. and sixteen 6-in. guns.

The newest *Japanese* armoured cruisers are formidable vessels, but the all-big-gun principle has not been adopted, at least in vessels actually under construction. Four ships have been built in native yards since 1905. The *Tsukuba* and *Ikoma* (13,750 tons) were laid down in that year, their armament comprising four 12-in., twelve 6-in., and twelve 4·7-in. guns—the same as British battleships up to 1901 with the 4·7-in. weapons added—and their speed is 21 knots. In 1905–6 the *Kurama* and *Ibuki* were laid down. They are of 14,600 tons displacement, and are armed with four 12-in., eight 8-in., and fourteen 4·7-in. guns, the speed being 21·25 knots in the *Kurama* (reciprocating engines of 22,500 h.p.) and 22·5 knots in the *Ibuki* (Curtis turbines, 24,000 h.p.). Two other cruisers are believed to have been commenced for the Japanese Navy in 1907, but no official information is obtainable. Their reported details are: displacement, 18,450 tons; armament, four 12-in., eight 10-in., eight 6-in., and ten 4·7-in.; speed, 25 knots with Curtis turbines of 44,000 h.p. The armament, it will be seen, is the very antithesis of a single-calibre one. Possibly these ships, which were undoubtedly projected, have been abandoned in consequence of the shortage of the Imperial finances.

Russia has commenced two classes of armoured cruisers since the war with Japan. The first was the Admiral Makaroff type, practically copies of the *Bayan*, which was captured by the Japanese and is now serving under the Rising Sun ensign as the *Aso*. Details: displacement, 7,880 tons; armament, two 8-in. and eight 6-in.; speed, 21 knots with reciprocating engines of 16,500 h.p. Following this, the Russian Government ordered the *Rurik* from Messrs. Vickers, Sons and Maxim, likely to be the last vessel built for the Russian Navy outside Russia. This vessel is of 15,170 tons displacement, and is powerfully armed with four 10-in., eight 8-in., and twenty 4·7-in. guns. The contract speed, which was easily obtained on trial, was 21 knots with 75 per cent. of the boiler power.

The newest *French* armoured cruisers are the *Edgar Quinet* and *Waldeck-Rousseau*, laid down in 1905 and 1906 respectively. Their displacement is 13,780 tons, and they have a single-calibre armament of 7·6-in. guns, fourteen in number. They are well protected, and their speed is 23 knots with reciprocating engines of 36,000 h.p.

Italy is building a class of five cruisers which, although not comparable with the *Invincible*, are admirably suited to her particular needs. They are of 9,680 tons, and are armed with four 10-in. and eight 7·5-in. guns, and are efficiently

protected by a belt 8–7 inches thick amidships. The *Pisa*, *Amalfi* and *San Giorgio* have reciprocating engines of 18,000 h.p., and the *San Marco* Parsons turbines of 20,000 h.p., the designed speed being 22·5 knots. The fifth vessel, as yet unnamed, has only recently been laid down.

In the foregoing are included all armoured cruisers laid down since 1905—the year in which the designs for the British Dreadnought cruisers were produced.

Dreadnoughts of the Principal Powers.

(Qualifications:—Minimum displacement, 17,000 tons; minimum armament, ten big guns.)

Completed by end of:—

1909.	1910.	1911.
Great Britain:—		
Dreadnought	*St. Vincent*	*Foudroyant*
Bellerophon	*Collingwood*	—
Temeraire	*Vanguard*	—
Superb	—	—
Germany:—		
Nassau	*Rheinland*	*Ers. Oldenburg*
Westphalen	*Ers. Baden*	*Ers. Siegfried*
—	—	*Ers. Beowulf*
—	—	*Ers. Heimdall*
—	—	*Ers. Hildebrand*
—	—	*Ers. Frithjof*
United States:—		
—	*Delaware*	*Florida*
—	*North Dakota*	*Utah*

Lord Nelsons of the Principal Powers.

("Mixed Calibre Dreadnoughts.")

(Qualifications:—Minimum displacement, 16,000 tons; minimum armament, sixteen guns over 9 in. calibre.)

Completed by end of:—

1909.	1910.	1911.
Great Britain:—		
Lord Nelson	—	—
Agamemnon	—	—
France:—		
—	*Danton*	*Voltaire*
—	*Mirabeau*	*Vergniaud*
Japan:—		
Aki	—	—
Satsuma	—	—

Dreadnought Cruisers.

(Minimum displacement, 16,000 tons; minimum speed, 23 knots.)

Completed by end of:—

1909.	1910.	1911.
Great Britain:—		
Invincible	—	New Ship
Indomitable	—	—
Inflexible	—	—
Germany:—		
"F"	"G"	New Ship
Japan:—

PERCIVAL A. HISLAM.

Aerial Navigation and its Future.

WITH A RETROSPECT OF PRINCIPAL EVENTS IN 1907-8.

THE year 1908 will, doubtless, always be memorable in the world's history as having seen the dawn of a new and revolutionising era in aerial navigation. It has been established beyond all doubt that man is capable of propelling himself through the air without the aid of gas-filled envelopes. More than one aviator rivals the *chauffeur* in the facility with which he handles his machine. Finally, among many other remarkable achievements, an airship under complete control has accomplished not only a longer non-stop journey than is performed by any train in the United Kingdom, but it sometimes attained a pace which compares favourably with that of our fastest cruiser. Such momentous experiments, opening up so broad a vista of almost unimaginable possibilities, have created a demand for information in a compact form that cannot readily be gained from easily accessible sources. Cyclopædiæ, and many other works referring to aerial navigation, are out-of-date in view of recent progress; proceedings of scientific societies do not appeal to the lay mind, and the effusions of irresponsible visionaries, possessing no practical experience, are unreliable. In these circumstances it is hoped that the following sketches will be found to comprise the most up-to-date epitome hitherto published within so small a compass. The terminology varies according to the nationality of writers, but as regards this, and the spelling, I have adopted forms that are most likely to be met with in the Press. Abstruse scientific terms are avoided, for I agree with the late Professor Langley's conviction—that aeronautical facts can be made clear to the public if the author takes sufficient pains. It will facilitate reference if the various methods by which the atmosphere is being exploited are treated under separate headings as follows:—

HEAVIER THAN AIR—*Aeroplanes.*—These consist of one or more planes, slightly concave underneath, which rise and are sustained owing to the accumulated pressure of air on the nether surfaces when propelled at a rapid rate. The most successful type is the Wright machine, which embodies the principle first advocated in 1866 by an Englishman, Mr. F. H. Wenham. The latter saw that the supporting power of a large single surface could be obtained in a less unwieldy form by placing smaller planes above one another, or "superposing" them. It was not, however, till the advent of the light motor in recent years that his theory could be put into successful practice. In this class may also be included the Blériot and Gastembide-Mengin *monoplanes* (single surface), the last-named being very bird-like in appearance. The principal drawbacks to all the machines with "planes," hitherto invented, are (1) the necessity for a raised catapult or large open space to effect a start; (2) the limited weight-carrying capacity without involving unwieldiness; (3) lack of stability in strong winds or transverse currents of air; and (4) the aeroplane falls to the ground if the motor stops. These serious defects have caused some eminent scientists to seek a more practical solution in other types of aerial craft, among which are:—

Hélicoptères.—These have no fixed planes, but are sustained in and driven through the air by propellers alone. They are more stable than aeroplanes and, being independent of the necessity always to force an advance, can hover over one spot. M. P. Cornu has succeeded in making his hélicoptère rise, though it failed to progress horizontally; and it is said that Mr. Edison favours this method of navigating the air.

Ornithoptères.—Closely resemble the action of birds. They are usually provided with mechanically-beaten wings, and possess the advantage not yet attained in hélicoptères—that if the motor stops the wings act like a parachute and graduate the fall. Several ingenious models have been constructed, but the system is not regarded favourably by many scientists.

Gyroptères.—The principle governing these is that the flapping of a bird's wings must, for man-flight, be superseded by a rotary motion. With this idea Mr. G. L. O. Davidson has built in Colorado a machine of which little is yet known in England. It consists of two huge umbrella-like wings side by side, which, when revolving rapidly, draw themselves up into the air. By slightly inclining their surfaces forward movement can be obtained. The wings, or gyroptères, are 27 feet in diameter, and one of them, acting alone, has raised a ton and a half. The surfaces of the wings are like feathers laid at an angle.

Gliders, as the name implies, are used like parachutes, but with a view to progressing *forward*. They are very useful as models in acquiring a knowledge of the difficulties likely to be encountered by aeroplanes; and Mr. José Weiss, whose name is prominently associated with these craft, has presented the aeronautical world with some valuable results of his studies.

Kites hardly come under the heading of aerial navigation, but they are useful for carrying up scouts in military operations, while valuable photographic and meteorological results have been obtained with their aid. The "box" form is the most effective.

LIGHTER THAN AIR—*Balloons.*—The old-fashioned balloon, which must go where the wind takes it, is not likely to become less popular for recreative purposes. Its comparative safety, and the absence of a throbbing motor, with its attendant odours, appeal to many devotees. The pear-shape has given place to a perfect sphere, which is now constructed of better materials than have hitherto been used. Safety has been enhanced by means of the "ripping-cord," causing instantaneous deflation on landing, and the "statoscope," which registers minute changes in altitude. Some large models of the "piriform" or pear-shape, apex uppermost, have been made, for which it is claimed that rain or snow are less liable to accumulate and weigh down the aerostat.

Airships, Dirigibles, or *Navigable Balloons.*—These consist of torpedo-shaped, gas-filled vessels propelled by one or more screws. They are provided with minor planes, resembling the fins of a fish, by whose deflection the aerostat can be guided upwards or downwards at the will of the navigator, and without loss of gas. Count Zeppelin advocates a rigid hull and employs an alloy of aluminium for the frameworks of his famous vessels. Further reference to this type will be found in the Forecast.

Balloons-sondes.—Employed either free or captive for automatic meteorological registration of the upper atmosphere. Valuable *data* regarding upper currents have been obtained, and heights up to 16 miles recorded.

PRINCIPAL EVENTS.

(1907) *Nov.* 9. Mr. Henry Farman, after practising curves and turns with his aeroplane, made a circular flight of one kilomètre near Paris. 10. It was announced that the Siemens Electric Works in Berlin had decided to build aerial vessels. 18. Count de la Vaulx, while travelling at thirty miles an hour, was wrecked and pinned beneath his aeroplane, which then caught fire. The Count's life was saved. 21. M. Santos Dumont competed for the Deutsch-Archdeacon prize, but a blade of his propeller snapped and was hurled 125 yards. These accidents to propellers had become quite frequent. 22. The French military airship Patrie sailed from Chalais-Meudon to Verdun, having covered 150 miles, almost in a bee-line, in seven hours. A strong wind blew across its course, and 3,000 ft. was the average height maintained. Blériot monoplane wrecked in a strong wind near Paris. 27. The *Daily Mail* offered another prize—for a half-mile to-and-fro aeroplane flight. 30. The Patrie broke away and was lost. *Dec.* 2. Mr. A. V. Roe tested his aeroplane at Brooklands. 30. Mr. Farman flew a circular kilomètre. (1908) *Jan.* 13. Mr. Farman won Deutsch-Archdeacon prize of £2,000. 15. The Ville de Paris sailed from Paris to Verdun to replace the lost Patrie. *Feb.* 17. Hamburg Airship Club founded. *Mar.* 3. Germany decided to establish a military airship station near French frontier. 20. Mr. Farman flew 2,734 yds. *May* 6. *Daily Mail* special correspondent witnessed the Wrights' flights in N. Carolina. 14. W. Wright flew six miles. 27. M. Delagrange flew six miles. 30. International Balloon Race from Hurlingham; 30 balloons; winner, G. Brewer. *June* 1. First time a woman travelled in an aeroplane. 20. Zeppelin No. 4 made its maiden voyage with 15 passengers. 22. M. Delagrange flew 10 miles. 24. New French airship République made its maiden ascent. 28. M. Delagrange's aeroplane struck a tree and fell into a river. *July.* 1. Zeppelin No. 4 made 12 hours' voyage. 4. *Daily Mail* advocated official aeronautical experiments in England on a large scale. M. Blériot's record monoplane flight 3¼ miles. 6. Farman flew for 20 minutes and won Armengaud prize. 11. *Daily Mail* advocated England keeping abreast with Continental enterprise in aeronautics. 15. Accident to Zeppelin No. 4. 24. British Army Dirigible No. II. made maiden ascent. *Aug.* 4. Zeppelin No. 4 began official 24-hour test. 5. Disaster to Zeppelin No. 4 after having sailed over 400 miles. 8. W. Wright flew at Le Mans. 20. Gross and Parseval airships manœuvre over Berlin. *Sept.* 3. Mishap to O. Wright's aeroplane at Fort Meyer. 6. W. Wright flew 16¼ miles and Delagrange 15½ miles in France. 11. O. Wright's aeroplane remained 70 minutes in the air. 12. M. Blériot's monoplane fell and was completely destroyed. 16. W. Wright flew 30 miles in 40 minutes. 17. Aeroplane containing O. Wright and Lieut. T. E. Selfridge collapsed and latter died shortly afterwards. 19. Ferber aeroplane wrecked near Paris. 21. W. Wright flew 56 miles in 91 minutes. 29. Army aeroplane tested at Farnborough. M. Veiller ordered 50 aeroplanes on Wright principle. During the month the German Gross and Parseval airships made several successful voyages, and it was announced that airship-stations would be erected at Strassburg, Cologne, Mainz and Friedrichshafen. *Oct.* 5. The *Daily Mail* offered another prize—£500 for first cross-Channel flight. 10. W. Wright completed all the tests required by the Lazare-Weiller Syndicate. 11. Gordon-Bennett Balloon Race from Berlin. 16. Army aeroplane fell and broke right wing at Farnborough. 23. The reconstructed Zeppelin No. 1 manœuvred with great success. 29. H. Farman flew from Châlons to Reims (17 miles) in 20 minutes. During the month it was announced that the Russian War Office would immediately put aside £1,200,000 for the construction of airships and aeroplanes.

FORECAST.

Speculations on the future of aerial navigation at this early stage in its new development must be undertaken with considerable reserve. It is the fashion at present to condemn the gas-filled vessel; but fashions are apt to change. Personally, I do not identify myself with the tendency to regard the "dirigible" as having come to the end of its resources, nor am I of opinion that the advantages of existing aeroplanes are proved to be infinitely superior, for all purposes, to those of its rival. But it is in war that the gas-supported airship is most likely to justify itself, on account of its weight-carrying capacities. There can be no question of the ability to deal destruction between an airship that can carry three tons of explosives and an aeroplane which only lifts two or three men. The airship is condemned because it is liable to be destroyed in a gale when at anchor, but it could perform its deadly work before anchorage became necessary. At present, it is true, it offers a large surface to a cross wind when at anchor, but it is surely not beyond human ingenuity to invent a revolving base, by which the "nose" is pointed to the wind like a weathercock, thus offering the minimum of resistance. It is also possible that inventors will one day recognise the advisability of treating the wind as a friend instead of as an enemy. Then we may see airships gliding at an angle *against* the wind, like a sailing-ship, the side of the hull offering resistance with the aid of screws. At present the airship has the advantage over the aeroplane in that it can remain in a much stronger wind than the latter. Its carrying capacity can also be increased more easily than in the case of its rival. The principal improvements that are destined to take place in aeroplanes will take the form of diminishing their weight and causing them to offer less resistance. As regards military operations, it has been argued that aerial craft can be rendered ineffective by artillery; but it is not likely that an enemy would select a cloudless day, or even daylight, as the best time for bombarding dockyards, etc. The aerial navigator can locate his position above the clouds by means of the sextant and sun or stars. When we consider the devastating effect of small quantities of modern high explosives, the power of airships over defenceless arsenals becomes apparent; and the only method of dealing effectively with this new danger consists in meeting an enemy with his own weapons. The future will probably see airships playing the *rôle* of aerial "Dreadnoughts," while aeroplanes act as advanced scouts until they have improved sufficiently to replace the former. From an invasion point of view, however, there is not the remotest possibility of aerial craft ever being employed to transport large bodies of troops, for reasons that are obvious to the aeronautical military student.

H. J. CONINGHAM, CAPT.

ON July 1 of last year there took effect an International Convention for the administration of Radio (Wireless) Telegraphy between ship and shore. The following countries are parties to this Convention:—The Argentine Republic, Austria, Belgium, Brazil, Bulgaria, Chili, Denmark, Germany, Great Britain, Greece, Hungary, Japan, Mexico, Monaco, The Netherlands, Norway, Persia, Portugal, Roumania, Russia, Spain, Sweden, Turkey, and Uruguay; the important exceptions being France, Italy, and the United States, who are, at present, reserving action in the matter.

Though its adaptation to the Navy and Field Services has naturally always been officially paramount, it was soon recognised that radio-telegraphy had a still wider and more general use awaiting it, *i.e.*, effecting satisfactory communication between lightships and lighthouses with the mainland—submarine cables being unsuited for the task—as well as for signalling between moving ships and the shore, or between ships.

After but a brief period of operation, the system of radio-telegraphy that had been first in the field refused to communicate with other ship and shore stations fitted with rival apparatus—apparently hoping to retain the service exclusively for themselves. It was to meet this state of things that the Convention was in the first instance directed; and to render inter-communication feasible on a universal basis it became necessary to formulate a number of regulations of a technical order. Similarly, provision had to be made for exempting certain naval, military, and experimental stations from general inter-communication.

The requirements here set forth were first suggested by the German Emperor, who brought about an International Conference on the subject. This Conference commenced its deliberations in 1903; but Great Britain, like Italy, was not then in a position to take any active part in the proposals adopted. A second Berlin Conference was, however, called in 1906, and this was attended by Great Britain as well as Italy. Deliberations were commenced on October 22 of that year, and after five sittings the Convention was provisionally signed by all the countries which have since formally ratified it. As delegates, this country was represented by four officials of the Post Office, four of the Admiralty, and two of the War Office. The whole subject was fully discussed during the Conference, and without going into the details of the Convention and Service Regulations ultimately formulated, it may be stated that the main features of the former were:—

(1) Obligatory inter-communication between different systems; and

(2) Agreement on a certain pre-arranged wave-length being used with that end in view. The object of the latter is clear when it is remembered that if two musical instruments are placed near enough to one another, the "playing" of one instrument is sufficient to set the chords of the other into a corresponding state of vibration, *provided* that the latter is "tuned" to the same note, key, or pitch—corresponding to frequency and wave-length in radio, etheric, or "wireless" telegraphy. This, however, as already indicated, only applies to particular stations registered for universal use, whilst others remain free for naval purposes, where a different wave-length would be used. As regards the Service regulations, it suffices to say that they are ordinary common-sense rules for the proper administration of radio-telegraphy on a universal basis, founded on the international regulations already in force for the requirements of universal telegraphic communication by metallic conductors.

This Convention became the subject of discussion in the House of Commons on December 17, 1906, when it was suggested by certain private members that our country should refrain from being party to it. The Government thereupon agreed to the appointment of a Select Committee of the House of Commons to make an exhaustive inquiry into the matter, with a view to deciding whether Great Britain should or should not finally agree to ratification. Sir John Dickson-Poynder became chairman, the Post Office and Admiralty being represented by the Right Hon. Sydney Buxton and the Right Hon. George Lambert respectively. Thirteen meetings were held and eighteen witnesses examined during this inquiry, which was commenced on March 13, 1907, and completed on June 18 of that year. The witnesses were composed of officials representing the Government Departments and rival British wireless companies concerned, together with Sir W. H. Preece, F.R.S., and Mr. Charles Bright, F.R.S.E., as independent experts. The whole subject was very fully considered, and further discussed in the *Edinburgh Review* for April, 1908, in the course of an article on the "Politics of Radio-Telegraphy."

It should be noted, in the first place, that the question was not a party one, a similar policy (of friendly consideration) towards the Convention having been adopted by the late (Unionist) Government. It has also to be remembered that by the Convention the universal radio-telegraph service only forms a companion to the previously existing international telegraph service for the proper administration of international telegraphy by wires, on the same principle that the Postal Union provides for the transmission of letters between countries. It was ultimately recognised, indeed, that accepting the principle of international communication by the mail or by wire carries with it, *a fortiori*, acceptance of the principle of universal communication by radio (or wireless) telegraphy.

Turning to the main features of this large and important subject, first and foremost there is the strategic aspect. It is now many years ago since Mr. Charles Bright pointed out the utility of wireless telegraphy for placing our entire coasts into rapid communication with various inland centres and military stations,* and this standpoint has since been kept to the forefront by the authorities of this country. Under the Convention, the Government can exempt any radio-telegraph station from inter-communication, provided that enough stations are made available for universal ship and shore requirements. In time of war, stations on British territory—*i.e.*, within the three-mile limit—pass entirely under our control; thus, by the Convention, more stations would be available at any moment for strategic purposes. Besides being in a position to lay hold of all general inter-communicating stations within our domain in case of emergency, our Navy can (under the Convention) actually work them at short notice themselves. It will be seen, therefore, that the more wireless stations we have on British terri-

* *Royal United Service Institution Journal*, vol. XLIV.

tory the better; for in their absence our foreign rivals would be likely to erect stations in close proximity to our waters, such as might obviously be to our disadvantage in a strategic as well as in a commercial sense. It should be added that the Convention reserves to this country the same rights of censorship, &c., as she enjoys under Articles 7 and 8 of the 1875 International Telegraph Convention of St. Petersburg, which have in the past proved fully adequate for the purpose. Moreover, any country is open to withdraw from the Convention at a year's notice. Further, seeing that this International Convention was about to be adhered to by practically all the other Powers, it is obvious that we could not in any case have rendered it ineffective. By standing out we should have lost certain benefits, with the prospect of conditions being introduced that would be contrary to our interests; on the other hand, by joining the Convention more or less at the start, we have secured our own terms, besides influencing the trend of events. It was afterwards seen that for this, the largest maritime, country the main object should be to turn radio-telegraphy to account for general maritime purposes throughout the world; and humane considerations alone are sufficient to favour universal wireless intercommunication between ship and shore, and also between ship and ship, if only owing to its obvious superiority over the old system of flag-signalling.

It was thought by some of those who were unfavourable to the Convention that we should retain radio-telegraphy for our own exclusive purposes. The evidence adduced at the inquiry showed clearly that this would, in any case, have been impossible, there being other systems in foreign countries of quite equal merit with those in use here. It is true that Mr. Marconi and his company were first to attempt the spanning of great distances without the aid of intervening wires, and that they have established a considerable organisation for that purpose; but various foreign electricians have achieved quite equal success as regards apparatus, and the principal German wireless telegraphy company has for some time had more stations than the Marconi Company. At one time something like exclusive privileges were accorded to the system that was first in the field in England; but wiser counsels prevailed when it was recognised that to tie ourselves down to one particular radio-telegraphic system and company throughout all ages—or even for a long period—would be foolish. In view of the constant march of invention—especially in electrical science—it is, perhaps, surprising that this conclusion was not reached sooner; and for the purposes of navigation and public safety—let alone commerce—such a Convention on an international basis would certainly have been found desirable sooner or later. Apart from the question of an International Convention for universal radio-telegraphy between different systems, there are other reasons why it would have been unsuitable to adopt any particular system of radio-telegraphy to the exclusion of others; and it was eventually conceded to be altogether contrary to public interests to allow a new business to be the subject of exclusive privileges; and that, on the contrary, we should do nothing which might tend to stifle invention outside any particular sphere in view of the question of cost and efficiency. It was further felt that, whilst a preference to British wares was but a natural and patriotic policy, positive isolation in regard to foreigners was a course which would scarcely meet with favour. In any case it would have been scarcely feasible for us to enforce any one particular system on the ships or shores of foreign Powers; and this would, moreover, be immaterial from the naval, strategic standpoint.

A very general impression prevailed at one time that the Marconi system was the only system—or the only British system—of wireless telegraphy in existence. Both these views are now, however, known to be incorrect; and if the exhaustive inquiry lately concluded served no other practical purpose, it undoubtedly brought to light the fact that Mr. Marconi is not by any means the sole radio-telegraphic inventor in this country, and that there are at least two other British companies actively concerned in the development of the art. An examination of the list of British patents relating to wireless telegraphy reveals, indeed, that close on five hundred have been taken out up to the present time. Many of these claim to be complete systems; and the policy of equality of opportunity will afford the largest field to choose from both now and in years to come. In fact, one of the effects of the Convention will be, undoubtedly, that of providing a wide experience with different systems, enabling us to test the value of claims made by inventors under given conditions, besides stimulating further discovery and invention. Every inventor naturally considers his system the best; and it is, perhaps, needless to say that if any one method of radio-telegraphy proves itself to be vastly superior to any other under most conditions, such a method would probably come into universal use. In this connection allusion should be made, in closing, to the view prevailing with some that a monopoly was due to Mr. Marconi on the grounds that he was the pioneer of wireless telegraphy. Apart from other objections already set forth, these premises were shown during the inquiry—independently by Sir William Preece, Sir John Gavey, and Mr. Charles Bright—to be incorrect. That Mr. Marconi's company led the way as regards commercial development may be at once conceded; but the invention and gradual evolution of the art was the work of many hands, and was due to that distinguished German physicist the late Heinrich Hertz in the first place, and Dr. (now Sir Oliver) Lodge in the second. Thus the claim made on behalf of Mr. Marconi, and on behalf of this country generally, that we were morally entitled to keep radio-telegraphy to ourself—if we were able to—was in itself seen to be without suitable foundation.

Eventually the Select Committee issued a majority report* in favour of the Convention being ratified by this country on the general grounds here set forth. The said ratification was effected in due course, and the Convention is now in active operation.
